In the event of a conflict between documents, the order of precedence shall be as follows: Approved cost proposal, this Contract and the RFP.
- B.2** Environmental, Mining and permitting services may include, but are not limited to, all items listed in the tasks below. Documents that require submittal to a subsequent reviewing agency (such as LUSD, USFWS or SHPO) will not be deemed complete until such an agency accepts the document as satisfactory. All documents prepared under this Scope of Work shall assume at minimum, delivery of one draft submittal to the Department of Public Works Environmental Management Division (EMD) for review and comment. Upon review and comment the document shall be revised to EMD's satisfaction before acceptance as final or as required above. In addition, Consultant shall assume up to two rounds of comments and revisions from any subsequent reviewing agencies before the document is accepted as final. **As applicable, two hard copies (if needed) and one electronic PDF of all final reports shall be submitted as a final report deliverable.**

Task 1. Land Use Entitlements (Mine and Reclamation Plan)

Preparation of a Mine Plan: In order to prepare a complete and thorough approach to mining and reclamation, detailed mine operation plans will be designed. With input from the County on the typical material volumes needed over time, the excavation plan, cross-sections, and text will be developed. The design will be utilized to determine the most environmentally-sound and permissible mine plan. County application forms will be utilized and requirements will comply with the San Bernardino County Development Code on mining (County Code Chapter 88.03 Surface Mining and Land Reclamation) and Surface Mining and Reclamation Act (SMARA) regulations. All maps, diagrams, or calculations that require preparation must be in accordance with the Professional Engineers Act, the Geologist and Geophysicist Act and the Professional Land Surveyors' Act. Some of the major issues to be addressed include the general site and area characteristics, mining operations, on-site processing of materials, typical utilization of the site, and limiting potential environmental impacts related to aesthetics, biological resources, erosion control and drainage, water supply, and dust. In the preparation of the Mine Plan, measures will be recommended for mine design and phasing that may be initiated to avoid drainages, sensitive plants and/or wildlife species, minimize air quality impacts, and to eliminate/minimize other potential environmental issues. It is important to consider early on, all of the production options and assess their impacts so operation modifications can be incorporated early to limit environmental impacts.

Preparation of an Intermittent Management Plan: Based on the potential intermittent use of the quarry site for repair and maintenance of the NTH, an Interim Management Plan (IMP) shall also be prepared

as an integral part of the planning process and review. Measures to occasionally “mothball” an inactive site in order to provide public safety (i.e. safe slopes, removal of equipment, and fencing) and to limit any environmental impacts (i.e. water and wind erosion and illegal dumping) will be incorporated into the IMP. Per SMARA, whenever a site is inactive for a period of one year, an IMP must be approved by the lead agency (San Bernardino County Land Use Services Department, Planning Division).

Preparation of a Reclamation Plan: The Reclamation Plan will be incorporated into the Mine Plan document with additional plot plan sheets depicting the final reclaimed condition. The quarry will require a site-specific Reclamation Plan; the Reclamation Plan will discuss and outline the procedures for concurrent reclamation and final closure of the site. This will include a detailed Reclamation Plot Plan based on the Mine Plan showing the general mining configuration (depths and slopes) and reclaimed use of the site. The long-term end use for the site will likely be open space desert habitat and a designated NTH operations management area. Reclamation phasing, public safety, post-mining drainage, waste material, and equipment removal will be addressed per SMARA requirements. A detailed Revegetation Plan will be included in the Reclamation Plan to meet the requirements of SMARA. The Financial Assurance Cost Estimates (FACE) calculations will be prepared as required for the first year to comply with SMARA and County requirements to provide adequate funding for reclamation. The County will determine how subsequent reporting years will be handled at a later date outside of this contract.

Task 2. Focused Technical Reports

Cultural Resources: This study will be provided separately by the County. An independent review of this survey shall be performed by the Consultant and information/results/recommendations included in the environmental, mining and permitting documents.

Paleontological and Biological Resources: These studies shall be performed as necessary to support analysis and conclusions in the CEQA document.

Jurisdictional Delineation: A jurisdictional delineation of any impacted on-site streambeds (as applicable) shall be performed by Consultant as deemed necessary.

Air Quality and Greenhouse Gases (GHG) Emissions Inventory and Assessment: An inventory and assessment of air emissions of criteria pollutants and GHGs shall be prepared for all proposed mining activities, processing, transportation, and reclamation. A comparison of potential emission reduction with using more distant alternative resource sites shall be included. The potential project and cumulative emissions will also be analyzed for consistency with the current Air Quality Management Plan and the County's General Plan. Measures to reduce construction-related impacts will include compliance with Mojave Desert Air Quality Management County (MDAQMD) Rules and Regulations to control construction dust and reduce exhaust emissions. The County's Greenhouse Reduction Plan will be used to compare the projected operational emissions of greenhouse gases for determining levels of significance.

Hydrology/Drainage/Water Quality Study: A review would be required of the sites' drainage area and quantity and quality of surface water flow that may be expected. A technical study would be prepared by a licensed consulting civil engineer to include both 20 year/1 hour and 100 year/24 hour intensity storm events. Storm Water Pollution Prevention Plans (SWPPP) will be required as part of the condition compliance to be prepared by the Department. Typical Best Management Practices (BMPs) shall be incorporated into the mine operations plans.

Aesthetic/Visual Resources: The site is within the Desert Renewable Energy Conservation Plan's (DRECP's) National Trails Viewshed Special Recreational Management Area (SRMA) designated to manage outstanding scenic and historic recreational opportunities found along the NTH. Motorists along the NTH may be able to view the quarry site. A viewshed analysis shall be performed to determine locations from which the site could be visible and quantify significance of visual impact (if any).

Vehicle Miles Traveled Analysis: In accordance with SB 743 and updated CEQA Guidelines 15064.3, a Vehicle Miles Traveled (VMT) analysis shall be developed that meets the requirements of CEQA and the needs of the County Department of Public Works' Traffic Division.

OPTIONAL: Protocol Desert Tortoise Survey: Consultant shall include an optional task and budget for a protocol Desert Tortoise survey of the quarry area and required buffer and will meet the requirements for determining presence/absence.

OPTIONAL: Water Supply Assessment: Pursuant to CEQA (Water Code Section 10910 et seq.), a Water Supply Assessment (WSA) may be required. Consultant shall include an optional task and budget to prepare plans or at least viable options for water supply which must be formalized prior to completion of the plan submittals.

OPTIONAL: Slope Stability Report: It is assumed that there would be no slope stability issues due to the sites' shallow slopes. If slopes are maintained at 3:1(H:V) or flatter, a formal technical report would not be required. **Consultant shall include an optional task and budget to prepare a slope stability analysis should slopes steeper than 3:1 be determined to be cost effective.**

Task 3. Preparation of CEQA Environmental Documents

Upon adequate completion of the Mine and Reclamation Plans (enough detail to serve as project description for CEQA purposes), work shall commence on an appropriate CEQA compliance document. Consultant will prepare an Initial Study for the Project, using the County's standard environmental checklist, with mitigation and supporting documentation as required. The conclusion of the Initial Study will allow the Department's Environmental Management Division staff to determine if an Environmental Impact Report (EIR) should be required for approval of the Mine/Reclamation Plans.

Assuming a Negative Declaration is determined to be the appropriate CEQA approval, Department staff will review and comment on the preliminary Initial Study and comments will be incorporated into a second version of the draft. A second version of the Draft Initial Study will be submitted for review and then the document will be finalized for public review.

Scope of work and cost should include distribution of the document to the public based on a mailing list compiled by both the Consultant and County staff, and preparation of all required notices and filings. The County will be responsible for placing legal notices in a local newspaper of general circulation.

Upon completion of the public review period, Consultant will prepare response to comment letters (assumes no more than 10 comment letters) and a Mitigation Monitoring and Reporting Program. These documents will be prepared for approval along with the Mitigated Negative Declaration if appropriate. Consultant will prepare a Notice of Determination (NOD) to be filed with the County Clerk of the Board.

Task 4. Regulatory Permitting

- Preparation of mining and reclamation plan conditional use permit applications to be processed through County Land Use Services Department.
- During preparation of technical reports and the CEQA compliance document, Consultant shall determine the need for additional regulatory permitting (such as US Army Corps of Engineers, 404 permit with Regional Water Quality Control Board 401 certification (under the Clean Water Act and Porter Cologne Water Quality Act) and Streambed Alteration Agreement (Section 1602 of the Fish and Game Code) with California Department of Fish and Wildlife. If required, Consultant shall prepare all permitting applications and materials for review and submission to appropriate regulatory agencies.

Task 5. Meetings, SMARA Conditions Training and Project Management

Regular meetings will be held to discuss the project with the Department and the County's Land Use Services Department Planning Division (Planning) to prepare the plans leading up to a public hearing with the County Planning Commission and/or Board of Supervisors. The project team needs to be available for all meetings as required. Additional meetings with wildlife agencies may also be required.

Project management includes coordination with the Department and their staff and other Consultants, County Planning staff, and responsible agencies as needed for project processing review. This task includes preparation of updated schedules, month project accounting, and preparation of meeting notes, summaries and minutes.

At the conclusion of the permitting and approval process, the County's Mine and Reclamation Plan approval will include numerous conditions of approval requiring verification of compliance from the Department. In addition, SMARA requires annual reporting to the Division of Mine Reclamation and County Planning as required by all mine operators. These requirements include Annual Operation Reports, Annual Mine Inspections by County Planning, and annual updated Financial Assurance Cost Estimates. Consultant will assist in guiding Department staff regarding condition compliance to meet the requirements of all agencies for the first year following approval of the quarry operation.

Note: All Deliverables should assume a minimum of one (1) draft and one (1) final deliverable to the County before submittal to regulatory agencies.

Consultant shall not claim reimbursement or payment from County for, or apply sums received from County with respect to that portion of its obligations that have been paid by another source of revenue. Consultant agrees that it will not use funds received pursuant to this Contract, either directly or indirectly, as a contribution or compensation for purposes of obtaining funds from another revenue source without prior written approval of the County.

In addition, Consultant is encouraged to utilize local transportation services, including but not limited to, the Ontario International Airport.

G. INDEMNIFICATION AND INSURANCE REQUIREMENTS

G.1 Indemnification

The Consultant agrees to indemnify, defend (with counsel reasonably approved by County) and hold harmless the County and its authorized officers, employees, agents and volunteers from any and all claims, actions, losses, damages and/or liability arising out of this Contract from any cause whatsoever, including the acts, errors or omissions of any person and for any costs or expenses incurred by the County on account of any claim except where such indemnification is prohibited by law. This indemnification provision shall apply regardless of the existence or degree of fault of indemnities. The Consultant indemnification obligation applies to the County's "active" as well as "passive" negligence but does not apply to the County's "sole negligence" or "willful misconduct" within the meaning of Civil Code section 2782.

G.2 Additional Insured

All policies, except for Worker's Compensation, Errors and Omissions and Professional Liability policies shall contain additional endorsements naming the County and its officers, employees, agents and volunteers as additional named insured with respect to liabilities arising out of the performance of services hereunder. The additional insured endorsements shall not limit the scope of coverage for the County to vicarious liability but shall allow coverage for the County to the full extent provided by the policy. Such additional insured coverage shall be at least as broad as Additional Insured (Form B) endorsement form ISO, CG 2010.11 85.

G.3 Waiver of Subrogation Rights

Consultant shall require the carriers of required coverages to waive all rights of subrogation against the County, its officers, employees, agents, volunteers, contractors and subcontractors. All general or auto liability insurance coverage provided shall not prohibit Consultant and Consultant's employees or agents from waiving the right of subrogation prior to a loss or claim. Consultant hereby waives all rights of subrogation against the County.

G.4 Policies Primary and Non-Contributory

All policies required herein are to be primary and non-contributory with any insurance or self-insurance programs carried or administered by the County.

G.5 Severability of Interests

Consultant agrees to ensure that coverage provided to meet these requirements is applicable separately to each insured and there will be no cross liability exclusions that preclude coverage for suits between Consultant and County or between County and any other insured or additional insured under the policy.

G.6 Proof of Coverage

Consultant shall furnish Certificates of Insurance to the County Department administering the Contract evidencing the insurance coverage at the time the Contract is executed, additional endorsements, as required shall be provided prior to the commencement of performance of services hereunder, which certificates shall provide that such insurance shall not be terminated or expire without thirty (30) days written notice to the Department, and Consultant shall maintain such insurance from the time Consultant commences performance of services hereunder until the completion of such services. Within fifteen (15) days of the commencement of this contract, Consultant shall furnish a copy of the Declaration page for all applicable policies and will provide complete certified copies of the policies and endorsements immediately upon request.

G.7 Acceptability of Insurance Carrier

Unless otherwise approved by Risk Management, insurance shall be written by insurers authorized to do business in the State of California and with a minimum "Best" Insurance Guide rating of "A- VII".

G.8 Deductibles and Self-Insured Retention

Any and all deductibles or self-insured retentions in excess of \$10,000 shall be declared to and approved by Risk Management.

G.9 Failure to Procure Coverage

In the event that any policy of insurance required under this Contract does not comply with the requirements, is not procured, or is canceled and not replaced, County has the right but not the obligation or duty to cancel this Contract or obtain insurance if it deems necessary and any premiums paid by County will be promptly reimbursed by Consultant or County payments to the Consultant will be reduced to pay for County purchased insurance.

G.10 Insurance Review

Insurance requirements are subject to periodic review by County. The Director of Risk Management or designee is authorized, but not required, to reduce, waive or suspend any insurance requirements whenever Risk Management determines that any of the required insurance is not available, is unreasonably priced, or is not needed to protect the interests of County. In addition, if the Department of Risk Management determines that heretofore unreasonably priced or unavailable types of insurance coverage or coverage limits become reasonably priced or available, the Director of Risk Management or designee is authorized, but not required, to change the above insurance requirements to require additional types of insurance coverage or higher coverage limits, provided that any such change is reasonable in light of past claims against County, inflation, or any other item reasonably related to the County's risk.

Any change requiring additional types of insurance coverage or higher coverage limits must be made by amendment to this contract. Consultant agrees to execute any such amendment within thirty (30) days of receipt.

Any failure, actual or alleged, on the part of County to monitor or enforce compliance with any of the insurance and indemnification requirements will not be deemed as a waiver of any rights on the part of County.

- G.11** Consultant agrees to provide insurance set forth in accordance with the requirements herein. If Consultant uses existing coverage to comply with these requirements and that coverage does not meet the specified requirements, Consultant agrees to amend, supplement or endorse the existing coverage to do so.

Without in anyway affecting the indemnity herein provided and in addition thereto, Consultant shall secure and maintain throughout the contract term the following types of insurance with limits as shown:

If Consultant has no employees, it may certify or warrant to the County that it does not currently have any employees or individuals who are defined as "employees" under the Labor Code and the requirement for Workers' Compensation coverage will be waived by the County's Director of Risk Management.

With respect to Consultants that are non-profit corporations organized under California or Federal law, volunteers for such entities are required to be covered by Workers' Compensation insurance.

If Consultant is transporting one or more non-employee passengers in performance of contract services, the automobile liability policy shall have a combined single limit of two million dollars (\$2,000,000) for bodily injury and property damage per occurrence.

If Consultant owns no autos, a non-owned auto endorsement to the General Liability policy described above is acceptable.

G.11.4 Umbrella Liability Insurance – An umbrella (over primary) or excess policy may be used to comply with limits or other primary coverage requirements. When used, the umbrella policy shall apply to bodily injury/property damage, personal injury/advertising injury and shall include a “dropdown” provision providing primary coverage for any liability not covered by the primary policy. The coverage shall also apply to automobile liability.

H. SUCCESSORS AND ASSIGNS

H.1 This Contract shall be binding upon County and Consultant and their respective successors and assigns.

H.2 Neither the performance of this Contract, nor any part thereof, nor any monies due or to become due thereunder may be assigned by Consultant without the prior written consent and approval of County.

H.3 Death or Incapacity: If the Consultant transacts business as an individual, his/her death or incapacity shall automatically terminate this Contract as of the date of such event, and neither he/she nor his/her estate shall have any further right to perform hereunder, and County shall pay him/her or his/her estate the compensation payable under Article F, Fiscal Provisions, for any services rendered prior to such termination not heretofore paid, reduced by the amount of

additional costs which will be incurred by County by reason of such termination. If there be more than one Consultant and any one of them die or become incapacitated and the others continue to render the services covered herein, County will make payment to those continuing as though there had been no such death or incapacity and County will not be obliged to take any account of the person who died or became incapacitated or to make any payments to such person or his estate. The provision shall apply in the event of progressive or simultaneous occasions of death or incapacity among any group of persons named as Consultant herein, and if death or incapacity befalls the last one of such group before this Contract is fully performed, then the rights shall be as if there had been only one Consultant.

I. RIGHT TO MONITOR AND AUDIT

- I.1** The County, State and Federal government shall have absolute right to review and audit all records, books, papers, documents, corporate minutes, and other pertinent items as requested, and shall have absolute right to monitor the performance of Consultant in the delivery of services provided under this Contract. Consultant shall give full cooperation, in any auditing or monitoring conducted. Consultant shall cooperate with the County in the implementation, monitoring, and evaluation of this Contract and comply with any and all reporting requirements established by the County.
- I.2** All records pertaining to services delivered and all fiscal, statistical and management books and records shall be available for examination and audit by County representatives for a period of three years after final payment under the Contract or until all pending County, State and Federal audits are completed, whichever is later.

J. CORRECTION OF PERFORMANCE DEFICIENCIES

- J.1** Failure by Consultant to comply with any of the provisions, covenants, requirements or conditions of this Contract shall be a material breach of this Contract.
- J.2** In the event of a non-cured breach, County may, at its sole discretion and in addition to any other remedies available at law, in equity, or otherwise specified in this Contract:
 - a. Afford Consultant thereafter a time period within which to cure the breach, which period shall be established at the sole discretion of County; and/or
 - b. Discontinue reimbursement to Consultant for and during the period in which Consultant is in breach, which reimbursement shall not be entitled to later recovery; and/or
 - c. Withhold funds pending duration of the breach; and/or
 - d. Offset against any monies billed by Consultant but yet unpaid by County those monies disallowed pursuant to Item "b" of this paragraph; and/or
 - e. Terminate this Contract immediately and be relieved of the payment of any consideration to Consultant. In the event of such termination, County may proceed with the work in any manner deemed proper by County. The cost to County shall be deducted from any sum due to Consultant under this Contract and the balance, if any, shall be paid by Consultant upon demand.
- J.3** Unless a remedy is specifically designated as exclusive, no remedy conferred by any of the specific provision of the Contract is intended to be exclusive of any other remedy, and each and every remedy shall be cumulative and shall be in addition to every other remedy given hereunder, now or hereafter existing at law or in equity or by statute or otherwise. The election of any one or more remedies by either Party shall not constitute a waiver of the right to pursue other available remedies.
