This Section 20 shall survive termination of this Contract.

23. CONFIDENTIALITY

CONTRACTOR shall maintain the confidentiality of all its records in accordance with all applicable federal, state and COUNTY laws, regulations, ordinances and directives relating to confidentiality. CONTRACTOR shall inform all of its officers, employees, and agents providing services hereunder of the confidentiality provisions of this Contract. In addition, CONTRACTOR must develop written procedures to ensure that all records containing personally identifying information shall remain confidential and kept secure and confidential; the address or location of any domestic violence or related shelter project assisted under ESG will not be made public; and, the address or location of any housing of a program participant will not be made public, except as provided under a preexisting privacy policy of the COUNTY or CONTRACTOR and consistent with state and local laws regarding privacy and obligations of confidentiality.

24. INDEMNIFICATION

CONTRACTOR agrees to indemnify, defend (with counsel reasonably approved by County) and hold harmless the County and its authorized officers, employees, agents and volunteers ("Indemnitees") from any and all claims, actions, losses, damages, and/or liability arising out of this Contract from any cause whatsoever, including the acts, errors or omissions of any person and for any costs or expenses incurred by the County on account of any claim except where such indemnification is prohibited by law. This indemnification provision shall apply regardless of the existence or degree of fault of Indemnitees. CONTRACTOR's indemnification obligation applies to the County's "active" as well as "passive" negligence but does not apply to the County's "sole negligence" or "willful misconduct" within the meaning of Civil Code Section 2782. This indemnification includes, but is not limited to, any determination by HUD or its successors that activities undertaken by CONTRACTOR under this Contract fail to comply with any laws, regulations or policies applicable thereto or that any funds billed by and disbursed to CONTRACTOR under this Contract were improperly expended. This Section 22 shall survive the termination of this Contract.

25. INSURANCE REQUIREMENTS

Additional Insured: All policies, except for the Workers' Compensation, Errors and Omissions and Professional Liability policies, shall contain endorsements naming the County and its officers, employees, agents and volunteers as additional insureds with respect to liabilities arising out of the performance of services hereunder. The additional insured endorsements shall not limit the scope of coverage for the County to vicarious liability but shall allow coverage for the County to the full extent provided by the policy.

Such additional insured coverage shall be at least as broad as Additional Insured (Form B) endorsement form ISO, CG 2010.11 85.

Waiver of Subrogation Rights: CONTRACTOR shall require the carriers of required coverages to waive all rights of subrogation against the County, its officers, employees, agents, volunteers, Contractors and subcontractors. All general or auto liability insurance coverage provided shall not prohibit CONTRACTOR and CONTRACTOR's employees or agents from waiving the right of subrogation prior to a loss or claim. CONTRACTOR hereby waives all rights of subrogation against the County.

Policies Primary and Non-Contributory: All policies required herein are to be primary and non-contributory with any insurance or self-insurance programs carried or administered by the County.

Severability of Interests: CONTRACTOR agrees to ensure that coverage provided to meet these requirements is applicable separately to each insured and there will be no cross liability exclusions that preclude coverage for suits between CONTRACTOR and the County or between the County and any other insured or additional insured under the policy.

Proof of Coverage: CONTRACTOR shall furnish Certificates of Insurance to the County Department administering the contract evidencing the insurance coverage, including endorsements, as required, prior to the commencement of performance of services hereunder, which certificates shall provide that such insurance shall not be terminated or expire without thirty (30) days written notice to the Department, and CONTRACTOR shall maintain such insurance from the time CONTRACTOR commences performance of services hereunder until the completion of such services. Within fifteen (15) days of the commencement of this Contract, CONTRACTOR shall furnish a copy of the Declaration page for all applicable policies and will provide complete certified copies of the policies and endorsements immediately upon request.

Acceptability of Insurance Carrier: Unless otherwise approved by Risk Management, insurance shall be written by insurers authorized to do business in the State of California and with a minimum "Best" Insurance Guide rating of "A- VII".

Deductibles and Self-Insured Retention: Any and all deductibles or self-insured retentions in excess of \$10,000 shall be declared to and approved by Risk Management.

Failure to Procure Coverage: In the event that any policy of insurance required under this Contract does not comply with the requirements, is not procured, or is canceled and not replaced, the County has the right but not the obligation or duty to cancel the contract or obtain insurance if it deems necessary and any premiums paid by the County will be promptly reimbursed by the CONTRACTOR or County payments to CONTRACTOR will be reduced to pay for County purchased insurance.

Insurance Review: Insurance requirements are subject to periodic review by the County. The Director of Risk Management or designee is authorized, but not required, to reduce, waive or suspend any insurance requirements whenever Risk Management determines that any of the required insurance is not available, is unreasonably priced, or is not needed to protect the interests of the County. In addition, if the Department of Risk Management determines that heretofore unreasonably priced or unavailable types of insurance coverage or coverage limits become reasonably priced or available, the Director of Risk Management or designee is authorized, but not required, to change the above insurance requirements to require additional types of insurance coverage or higher coverage limits, provided that any such change is reasonable in light of past claims against the County, inflation, or any other item reasonably related to the County's risk.

Any change requiring additional types of insurance coverage or higher coverage limits must be made by amendment to this Contract. CONTRACTOR agrees to execute any such amendment within thirty (30) days of receipt.

Any failure, actual or alleged, on the part of the County to monitor or enforce compliance with any of the insurance and indemnification requirements will not be deemed as a waiver of any rights on the part of the County.

CONTRACTOR agrees to provide insurance set forth in accordance with the requirements herein. If CONTRACTOR uses existing coverage to comply with these requirements and that coverage does not meet the specified requirements, CONTRACTOR agrees to amend, supplement or endorse the existing coverage to do so. The type(s) of insurance required is determined by the scope of the contract services.

Without in anyway affecting the indemnity herein provided and in addition thereto, CONTRACTOR shall secure and maintain throughout the contract term the following types of insurance with limits as shown:

Workers' Compensation/Employers Liability: A program of Workers' Compensation insurance or a state-approved, self-insurance program in an amount and form to meet all applicable requirements of the Labor Code of the State of California, including Employer's Liability with \$250,000 limits covering all persons including volunteers providing services on behalf of CONTRACTOR and all risks to such persons under this Contract.

If CONTRACTOR has no employees, it may certify or warrant to the County that it does not currently have any employees or individuals who are defined as "employees" under the Labor Code and the requirement for Workers' Compensation coverage will be waived by the County's Director of Risk Management.

With respect to CONTRACTOR that are non-profit corporations organized under California or Federal law, volunteers for such entities are required to be covered by Workers' Compensation insurance.

Commercial/General Liability Insurance: CONTRACTOR shall carry General Liability Insurance covering all operations performed by or on behalf of CONTRACTOR providing coverage for bodily injury and property damage with a combined single limit of not less than one million dollars (\$1,000,000), per occurrence. The policy coverage shall include:

- A. Premises operations and mobile equipment.
- B. Products and completed operations.
- C. Broad form property damage (including completed operations).
- D. Personal injury
- E. Contractual liability.
- F. \$2,000,000 general aggregate limit.

Automobile Liability Insurance: Primary insurance coverage shall be written on ISO Business Auto coverage form for all owned, hired and non-owned automobiles or symbol 1 (any auto). The policy shall have a combined single limit of not less than one million dollars (\$1,000,000) for bodily injury and property damage, per occurrence.

If the CONTRACTOR is transporting one or more non-employee passengers in performance of contract services, the automobile liability policy shall have a combined single limit of two million dollars (\$2,000,000) for bodily injury and property damage per occurrence.

If the CONTRACTOR owns no autos, a non-owned auto endorsement to the General Liability policy described above is acceptable.

Umbrella Liability Insurance: An umbrella (over primary) or excess policy may be used to comply with limits or other primary coverage requirements. When used, the umbrella policy shall apply to bodily injury/property damage, personal injury/advertising injury and shall include a "dropdown" provision providing primary coverage for any liability not covered by the primary policy. The coverage shall also apply to automobile liability.

26. AMENDMENTS AND VARIATIONS

This writing with attachments embodies the whole of this Contract of the parties hereto. There are no oral agreements not contained herein. Except as herein provided, addition or variation of the terms of this Contract shall not be valid unless made in the form of a written amendment to this Contract formally approved and executed by both parties.

The provision below does not apply to this Agreement

27. USE OF ARRA FUNDS AND REQUIREMENTS

This Contract may be funded in whole or in part with funds provided by the American Recovery and Reinvestment Act of 2009 ("ARRA"), signed into law on February 17, 2009. Section 1605 of ARRA prohibits the use of recovery funds for a project for the construction, alteration, maintenance or repair of a public building or public work (both as defined in 2 CFR 176.140) unless all of the iron, steel and manufactured goods (as defined in 2 CFR 176.140) used in the project are produced in the United States. A waiver is available under three limited circumstances: (i) Iron, steel or relevant manufactured goods are not produced in the United States in sufficient and reasonable quantities and of a satisfactory quality; (ii) Inclusion of iron, steel or manufactured goods produced in the United States will increase the cost of the overall project by more than 25 percent; or (iii) Applying the domestic preference would be inconsistent with the public interest. This is referred to as the "Buy American" requirement. Request for a waiver must be made to the County for an appropriate determination. Section 1606 of ARRA requires that laborers and mechanics employed by CONTRACTORS and subcontractors on projects funded directly by or assisted in whole or in part by and through the Federal Government pursuant to ARRA shall be paid wages at rates not less than those prevailing on projects of a character similar in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act (40 U.S.C. 31). This is referred to as the "wage rate" requirement. The above described provisions constitute notice under ARRA of the Buy American and wage rate requirements. CONTRACTOR must contact the County contact if it has any questions regarding the applicability or implementation of the ARRA Buy American and wage rate requirements. CONTRACTOR will also be required to provide detailed information regarding compliance with the Buy American requirements, expenditure of funds and wages paid to employees so that the County may fulfill any reporting requirements it has under ARRA. The information may be required as frequently as monthly or quarterly. CONTRACTOR agrees to fully cooperate in providing information or documents as requested by the County pursuant to this provision. Failure to do so will be deemed a default and may result in the withholding of payments and termination of this Contract. CONTRACTOR may also be required to register in the Central Contractor Registration (CCR) database at <http://www.ccr.gov> and may be required to have its subcontractors also register in the same database. CONTRACTOR must contact the County with any questions regarding registration requirements.

Schedule of Expenditure of Federal Awards

In addition to the requirements described in "Use of ARRA Funds and Requirements," proper accounting and reporting of ARRA expenditures in single audits is required. CONTRACTOR agrees to separately identify the expenditures for each grant award funded under ARRA on the Schedule of Expenditures of Federal Awards (SEFA) and the Data Collection Form (SF-SAC) required by the Office of Management and Budget Circular A-133, "Audits of States, Local Governments, and Nonprofit Organizations." This identification on the SEFA and SF-SAC shall include the Federal award number, the Catalog of Federal Domestic Assistance (CFDA) number, and amount such that separate accountability and disclosure is provided for ARRA funds by Federal award number consistent with the recipient reports required by ARRA Section 1512 (c). In addition, CONTRACTOR agrees to separately identify to each sub-contractor and document at the time of sub-contract and at the time of disbursement of funds, the Federal award number, any special CFDA number assigned for ARRA purposes, and amount of ARRA funds. CONTRACTOR may be required to provide detailed information regarding expenditures so that the County may fulfill any reporting requirements under ARRA described in this section. The information

may be required as frequently as monthly or quarterly. CONTRACTOR agrees to fully cooperate in providing information or documents as requested by the County pursuant to this provision. Failure to do so will be deemed a default and may result in the withholding of payments and termination of this Contract.

Whistleblower Protection

CONTRACTOR agrees that both it and its subcontractors shall comply with Section 1553 of the ARRA, which prohibits all non-Federal subcontractors, including the State, and all subcontractors of the State, from discharging, demoting or otherwise discriminating against an employee for disclosures by the employee that the employee reasonably believes are evidence of: (1) gross mismanagement of a contract relating to ARRA funds; (2) a gross waste of ARRA funds; (3) a substantial and specific danger to public health or safety related to the implementation or use of ARRA funds; (4) an abuse of authority related to the implementation or use of recovery funds; or (5) a violation of law, rule, or regulation related to an agency contract (including the competition for or negotiation of a contract) awarded or issued relating to ARRA funds.

CONTRACTOR agrees that it and its subcontractors shall post notice of the rights and remedies available to employees under Section 1553 of Division A, Title XV of the ARRA.

28. ANTI-DISCRIMINATION

No person shall, on the basis of race, color, ancestry, national origin, sex, gender, gender identity, gender expression, sexual orientation, familial status, marital status, physical disability, mental disability, medical condition, genetic information, age, religious creed, military or veteran status, be excluded from participating in, be refused the benefits of, or otherwise be subjected to discrimination in any activities, programs, or employment supported by this Contract.

29. CONTRACT COMPLIANCE

CONTRACTOR shall make every effort to ensure that all projects funded wholly or in part by ESG funds shall provide equal employment and career advancement opportunities for minorities and women. In addition, CONTRACTOR shall make every effort to employ residents of the area and shall keep a record of the positions that have been created directly or as a result of this program.

30. COMPLIANCE WITH FEDERAL, STATE, AND LOCAL LAWS AND REGULATIONS

All parties agree to be bound by all applicable federal, state, and local laws, ordinances, regulations, directives, and all applicable cross-cutting requirements as they pertain to the performance of this Contract. This Contract is subject to and incorporates the following, including, but not limited to:

(1) Economic Opportunities for Low- and Very Low-income Persons. The CONTRACTOR shall ensure that employment and other economic opportunities generated by the Program shall, to the greatest extent feasible, be directed to low- and very low-income persons, particularly those who are recipients of government assistance for housing. Section 3 of the Housing and Urban Development Act of 1968, 12 U.S.C. 1701u, and regulations at 24 CFR Part 135 apply, except that homeless individuals have priority over other Section 3 residents in accordance with § 576.405(c).

(3) Civil Rights. (4) Nondiscrimination and Equal Employment Opportunity. During the performance under this AGREEMENT, the CONTRACTOR shall not discriminate against any employee or applicant for employment based on race, color, creed, religion, sex, age, handicap, disability, ancestry, national origin, marital status, familial status, sexual orientation, or any other basis prohibited by applicable law. The CONTRACTOR shall take affirmative action to ensure that all applicants and employees are treated without regard to race, color, creed, religion, sex, age, handicap, disability, ancestry, national 13 origin, marital status, familial status, and sexual orientation. (9) Affirmative Outreach. The COUNTY and CONTRACTOR must make known that use of the facilities, assistance, and services are available to all on a nondiscriminatory basis. If it is unlikely that the procedures that the recipient or subrecipient intends to use to make known the availability of the facilities, assistance, and services will reach persons of any particular race, color, religion, sex, age, national origin, familial status, or disability who may qualify for those facilities and services, the recipient or subrecipient must establish additional procedures that ensure that those persons are made aware of the facilities, assistance, and services. The recipient and its subrecipients must take appropriate steps to ensure effective communication with persons with disabilities including, but not limited to, adopting procedures that will make available to interested persons information concerning the location of assistance, services, and facilities that are accessible to persons with disabilities. 31. PARTICIPATION OF HOMELESS PERSONS

In compliance with the federal regulations governing the ESG Program, and specifically 24 CFR 576.405 governing homeless assistance and participation, CONTRACTOR must provide for the participation of not less than one homeless or formerly homeless individual on its *board of directors or other equivalent policymaking entity*. To the extent feasible, CONTRACTOR must involve homeless individuals and families in providing work or services pertaining to operating facilities, providing services assisted under ESG, and providing services for occupants of facilities assisted under ESG. CONTRACTOR must provide a certification (Exhibit 14 – Homeless Participation Certification) documenting compliance with, or efforts to comply with, this requirement.

32. SUSPENSION AND DEBARMENT

By entering this Contract, CONTRACTOR certifies that CONTRACTOR, including its principals, is not suspended or debarred from participating in federally funded contracts and sub-awards.

33. GOOD STANDING OF NON-PROFIT STATUS

CONTRACTOR certifies:

(1) CONTRACTOR is a duly organized and existing non-profit corporation in good standing and authorized to do business under the laws of the State of California and in possession of required non-profit status under the United States Internal Revenue Code [for example, 26 USC § 501(c)(3)]. The CONTRACTOR has full right, power, and lawful authority to accept the funding hereunder and to undertake all obligations as provided herein and the execution, performance, and delivery of this Contract by the CONTRACTOR has been fully authorized by all requisite actions on the part of the CONTRACTOR.

(2) If CONTRACTOR's non-profit status changes at anytime during this Contract, it will advise the COUNTY within 15 days.

(3) If the CONTRACTOR is a private non-profit, it hereby agrees that the members of its Board of Directors will receive no compensation, directly or indirectly, other than reimbursement for expenses, from any funds generated from or because of the ESG program, for their services.

MOVING FORWARD PROJECT SCOPE OF WORK

I. Purpose and Goals

Moving Forward consists of engaging County homeless residents in outreach services, housing access and navigation services, and comprehensive case management.

The goal of the program is to create a sustainable, streamlined, expanded, and integrated/aligned homeless response system that will rapidly connect individuals and families to housing and services. Moving Forward will assist individuals and families move from short-term to long-term housing.

The County housed individuals and families in short-term housing, such as motels, in response to the COVID-19 pandemic. The purpose of the response was to house people who met the high-risk COVID-19 category to help them self-quarantine and protect them from contracting the virus. Moving Forward will transition these individuals and families into long-term housing as soon as possible, because this is an emergency situation that will help protect the public's health and safety.

Eligibility for Moving Forward services will be verified by Contractor staff. Prioritized individuals may be either Medi-Cal and non-Medi-Cal beneficiaries. Documentation requirements will be part of agreed policies and procedures.

B. Project Roomkey population

Unsheltered persons who are non-symptomatic and present healthy that meet the following high-risk criteria:

IV. SERVICES PROVIDED - The Contractor will:

- A. Directly transition 50 Project Roomkey program participants to permanent housing.

The San Bernardino County Office of Homeless Services maintains a listing of agencies actively participating as part of the Continuum of Care (CoC) for Contractor review and engagement.

 - Improve how Moving Forward connected individuals connect to services to resolve their homelessness;
 - Ensure compliance with local, State and Federal standards, if applicable;

- Improve transparency regarding access to and availability of resources;
 - Improve functionality for providers; and

Additional redesign priorities include:
- Integrating diverse entry systems including those for the general population, veterans, transition-aged youth, families, and human services clients; and,
 - Identify opportunities for technology to support system operations.
- H. Be “on-call” 24/7 to the County Program Manager and related staff for emergencies. EXHIBIT 3 – ESG PROGRAM REQUIREMENTS

The new Emergency Solutions Grant (ESG) signifies a shift in federal funding from traditional emergency shelter and outreach activities to homeless prevention and re-housing efforts. Effective rapid re-housing programs help people transition out of the homeless assistance system as quickly as possible, thus reducing the number of persons who are homeless within the community. Rapid re-housing also ensures that emergency shelter resources are used to serve individuals and families with the most urgent housing crises.

Providing rental assistance through the Emergency Solutions Grant (ESG) program, which includes ESG-CV1 and ESG-CV2 funding, requires adherence to both Fair Market Rents (FMRs) and Rent Reasonableness standards to determine whether a specific unit can be assisted with short-or medium-term rental assistance. The ESG program allows short-and medium-term rental assistance to be provided to eligible program participants only when the rent, including utilities (gross rent), for the housing unit:

- Does not exceed the annual Fair Market Rent (FMR) established by HUD for each geographic area, as provided under 24 CFR 888 and 24 CFR 982.503. **PLEASE NOTE: AS AN EXCEPTION MADE AS A RESULT OF THE COVID-19 PANDEMIC, IF THE FMR TEST IS NOT MET, A WAIVER MAY BE PLACED TO FILE. THE WAIVER IS CURRENTLY AVAILABLE UNTIL SEPTEMBER 30, 2020 OR UNTIL EXTENDED BY HUD;** and
- Complies with HUD’s standard of Rent Reasonableness, as established under 24 CFR 982.507.2

Please use this form to ensure the subject unit meets the Fair Market Rent **AND** Rent Reasonable Tests. If a unit does not meet both tests, it is not deemed eligible and ESG funds, in whole or part, may not be used to assist the client for the ineligible unit.

A. Fair Market Rent: Please complete the table below to determine if the Proposed Unit is in compliance with the FMR’s¹ set forward by the Department of Housing and Urban Development (HUD).

Habitability Standards Checklist for Permanent Housing

(Checklist must be completed for Rapid Re-Housing and Homelessness Prevention activities)

The standards for housing unit inspections under are the limited HQS standards described in 24 CFR 576.403. Inspections must be conducted on units used for Rapid Re-Housing and Homeless Prevention even if only a minimal amount of assistance is provided for rental assistance. The Habitability Standards are different from Housing Quality Standards (HQS) used for other HUD programs. If ESG funds are used for a program participant to remain in or move into a unit, a habitability inspection must be conducted. **PLEASE NOTE: DURING THE COVID-19 PANDEMIC, HABITABILITY INSPECTIONS MAY BE CONDUCTED REMOTELY USING TECHNOLOGICAL MEANS SUCH AS WITH DATE-STAMPED PHOTOGRAPHS AND VIDEOS.**

* ESG does not use the ELJ measure to establish income limits but instead uses the 30% of Area Median Income (AMI) income limits. Please use the 50 percent AMI tables. If ESG recipients/subrecipients were to use the ELJ standard, some applicants for ESG assistance might be falsely determined to be eligible for homelessness prevention assistance, when actually their incomes were over 30 percent AMI. Under the ESG program, income eligibility is based on the HUD income limits in effect at the time of income verification. Are You Planning to Buy or Rent a Home Built Before 1978?

Did you know that many homes built before 1978 have **lead-based paint**? Lead from paint, chips, and dust can pose serious health hazards.

Read this entire brochure to learn:

- How lead gets into the body
- About health effects of lead
- What you can do to protect your family
- Where to go for more information

Before renting or buying a pre-1978 home or apartment, federal law requires:

- Sellers must disclose known information on lead-based paint or lead-based paint hazards before selling a house.
- Real estate sales contracts must include a specific warning statement about lead-based paint. Buyers have up to 10 days to check for lead.
- Landlords must disclose known information on lead-based paint and lead-based paint hazards before leases take effect. Leases must include a specific warning statement about lead-based paint.

If undertaking renovations, repairs, or painting (RRP) projects in your pre-1978 home or apartment:

- Read EPA's pamphlet, *The Lead-Safe Certified Guide to Renovate Right*, to learn about the lead-safe work practices that contractors are required to follow when working in your home (see page 12).

Simple Steps to Protect Your Family from Lead Hazards

If you think your home has lead-based paint:

- Don't try to remove lead-based paint yourself.
- Always keep painted surfaces in good condition to minimize deterioration.
- Get your home checked for lead hazards. Find a certified inspector or risk assessor at epa.gov/lead.
- Talk to your landlord about fixing surfaces with peeling or chipping paint.
- Regularly clean floors, window sills, and other surfaces.
- Take precautions to avoid exposure to lead dust when remodeling.
- When renovating, repairing, or painting, hire only EPA- or state-approved Lead-Safe certified renovation firms.
- Before buying, renting, or renovating your home, have it checked for lead-based paint.
- Consult your health care provider about testing your children for lead. Your pediatrician can check for lead with a simple blood test.
- Wash children's hands, bottles, pacifiers, and toys often.
- Make sure children avoid fatty (or high fat) foods and eat nutritious meals high in iron and calcium.
- Remove shoes or wipe soil off shoes before entering your house.

Lead Gets into the Body in Many Ways

Adults and children can get lead into their bodies if they:

- Breathe in lead dust (especially during activities such as renovations, repairs, or painting that disturb painted surfaces).
- Swallow lead dust that has settled on food, food preparation surfaces, and other places.
- Eat paint chips or soil that contains lead.

Lead is especially dangerous to children under the age of 6.

- At this age, children's brains and nervous systems are more sensitive to the damaging effects of lead.
- Children's growing bodies absorb more lead.
- Babies and young children often put their hands and other objects in their mouths. These objects can have lead dust on them.

Women of childbearing age should know that lead is dangerous to a developing fetus.

- Women with a high lead level in their system before or during pregnancy risk exposing the fetus to lead through the placenta during fetal development.

Health Effects of Lead

Lead affects the body in many ways. It is important to know that even exposure to low levels of lead can severely harm children.

In children, exposure to lead can cause:

- Nervous system and kidney damage
- Learning disabilities, attention deficit disorder, and decreased intelligence
- Speech, language, and behavior problems
- Poor muscle coordination
- Decreased muscle and bone growth
- Hearing damage

While low-lead exposure is most common, exposure to high amounts of lead can have devastating effects on children, including seizures, unconsciousness, and, in some cases, death.

Although children are especially susceptible to lead exposure, lead can be dangerous for adults, too.

In adults, exposure to lead can cause:

- Harm to a developing fetus
- Increased chance of high blood pressure during pregnancy
- Fertility problems (in men and women)
- High blood pressure
- Digestive problems
- Nerve disorders
- Memory and concentration problems
- Muscle and joint pain

Check Your Family for Lead

Get your children and home tested if you think your home has lead.

Children's blood lead levels tend to increase rapidly from 6 to 12 months of age, and tend to peak at 18 to 24 months of age.

Consult your doctor for advice on testing your children. A simple blood test can detect lead. Blood lead tests are usually recommended for:

- Children at ages 1 and 2
- Children or other family members who have been exposed to high levels of lead
- Children who should be tested under your state or local health screening plan

Your doctor can explain what the test results mean and if more testing will be needed.

Where Lead-Based Paint Is Found

In general, the older your home or childcare facility, the more likely it has lead-based paint.¹

Many homes, including private, federally-assisted, federally-owned housing, and childcare facilities built before 1978 have lead-based paint. In 1978, the federal government banned consumer uses of lead-containing paint.²

Learn how to determine if paint is lead-based paint on page 7.

Lead can be found:

- In homes and childcare facilities in the city, country, or suburbs,
- In private and public single-family homes and apartments,
- On surfaces inside and outside of the house, and
- In soil around a home. (Soil can pick up lead from exterior paint or other sources, such as past use of leaded gas in cars.)

Learn more about where lead is found at epa.gov/lead.

¹ "Lead-based paint" is currently defined by the federal government as paint with lead levels greater than or equal to 1.0 milligram per square centimeter (mg/cm), or more than 0.5% by weight.

² "Lead-containing paint" is currently defined by the federal government as lead in new dried paint in excess of 90 parts per million (ppm) by weight.

Identifying Lead-Based Paint and Lead-Based Paint Hazards

Deteriorating lead-based paint (peeling, chipping, chalking, cracking, or damaged paint) is a hazard and needs immediate attention. **Lead-based paint** may also be a hazard when found on surfaces that children can chew or that get a lot of wear and tear, such as:

- On windows and window sills
- Doors and door frames
- Stairs, railings, banisters, and porches

Lead-based paint is usually not a hazard if it is in good condition and if it is not on an impact or friction surface like a window.

Lead dust can form when lead-based paint is scraped, sanded, or heated. Lead dust also forms when painted surfaces containing lead bump or rub together. Lead paint chips and dust can get on surfaces and objects that people touch. Settled lead dust can reenter the air when the home is vacuumed or swept, or when people walk through it. EPA currently defines the following levels of lead in dust as hazardous:

- 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) and higher for floors, including carpeted floors
- 250 $\mu\text{g}/\text{ft}^2$ and higher for interior window sills

Lead in soil can be a hazard when children play in bare soil or when people bring soil into the house on their shoes. EPA currently defines the following levels of lead in soil as hazardous:

- 400 parts per million (ppm) and higher in play areas of bare soil
- 1,200 ppm (average) and higher in bare soil in the remainder of the yard

Remember, lead from paint chips—which you can see—and lead dust—which you may not be able to see—both can be hazards.

The only way to find out if paint, dust, or soil lead hazards exist is to test for them. The next page describes how to do this.

Checking Your Home for Lead

You can get your home tested for lead in several different ways:

- A lead-based paint **inspection** tells you if your home has lead-based paint and where it is located. It won't tell you whether your home currently has lead hazards. A trained and certified testing professional, called a lead-based paint inspector, will conduct a paint inspection using methods, such as:
 - Portable x-ray fluorescence (XRF) machine
 - Lab tests of paint samples
- A **risk assessment** tells you if your home currently has any lead hazards from lead in paint, dust, or soil. It also tells you what actions to take to address any hazards. A trained and certified testing professional, called a risk assessor, will:
 - Sample paint that is deteriorated on doors, windows, floors, stairs, and walls
 - Sample dust near painted surfaces and sample bare soil in the yard
 - Get lab tests of paint, dust, and soil samples
- A combination inspection and risk assessment tells you if your home has any lead-based paint and if your home has any lead hazards, and where both are located.

Be sure to read the report provided to you after your inspection or risk assessment is completed, and ask questions about anything you do not understand.

Checking Your Home for Lead, continued

In preparing for renovation, repair, or painting work in a pre-1978 home, Lead-Safe Certified renovators (see page 12) may:

- Take paint chip samples to determine if lead-based paint is present in the area planned for renovation and send them to an EPA-recognized lead lab for analysis. In housing receiving federal assistance, the person collecting these samples must be a certified lead-based paint inspector or risk assessor
- Use EPA-recognized tests kits to determine if lead-based paint is absent (but not in housing receiving federal assistance)
- Presume that lead-based paint is present and use lead-safe work practices

There are state and federal programs in place to ensure that testing is done safely, reliably, and effectively. Contact your state or local agency for more information, visit epa.gov/lead, or call **1-800-424-LEAD (5323)** for a list of contacts in your area.³

³ Hearing- or speech-challenged individuals may access this number through TTY by calling the Federal Relay Service at 1-800-877-8399.

What You Can Do Now to Protect Your Family

If you suspect that your house has lead-based paint hazards, you can take some immediate steps to reduce your family's risk:

- If you rent, notify your landlord of peeling or chipping paint.
- Keep painted surfaces clean and free of dust. Clean floors, window frames, window sills, and other surfaces weekly. Use a mop or sponge with warm water and a general all-purpose cleaner. (Remember: never mix ammonia and bleach products together because they can form a dangerous gas.)
- Carefully clean up paint chips immediately without creating dust.
- Thoroughly rinse sponges and mop heads often during cleaning of dirty or dusty areas, and again afterward.
- Wash your hands and your children's hands often, especially before they eat and before nap time and bed time.
- Keep play areas clean. Wash bottles, pacifiers, toys, and stuffed animals regularly.
- Keep children from chewing window sills or other painted surfaces, or eating soil.
- When renovating, repairing, or painting, hire only EPA- or state-approved Lead-Safe Certified renovation firms (see page 12).
- Clean or remove shoes before entering your home to avoid tracking in lead from soil.
- Make sure children avoid fatty (or high fat) foods and eat nutritious meals high in iron and calcium. Children with good diets absorb less lead.

Reducing Lead Hazards

Disturbing lead-based paint or removing lead improperly can increase the hazard to your family by spreading even more lead dust around the house.

- In addition to day-to-day cleaning and good nutrition, you can **temporarily** reduce lead-based paint hazards by taking actions, such as repairing damaged painted surfaces and planting grass to cover lead-contaminated soil. These actions are not permanent solutions and will need ongoing attention.
- You can minimize exposure to lead when renovating, repairing, or painting by hiring an EPA- or state-certified renovator who is trained in the use of lead-safe work practices. If you are a do-it-yourselfer, learn how to use lead-safe work practices in your home.
- To remove lead hazards permanently, you should hire a certified lead abatement contractor. Abatement (or permanent hazard elimination) methods include removing, sealing, or enclosing lead-based paint with special materials. Just painting over the hazard with regular paint is not permanent control.

Always use a certified contractor who is trained to address lead hazards safely.

- Hire a Lead-Safe Certified firm (see page 12) to perform renovation, repair, or painting (RRP) projects that disturb painted surfaces.
- To correct lead hazards permanently, hire a certified lead abatement professional. This will ensure your contractor knows how to work safely and has the proper equipment to clean up thoroughly.

Certified contractors will employ qualified workers and follow strict safety rules as set by their state or by the federal government.

Reducing Lead Hazards, continued

If your home has had lead abatement work done or if the housing is receiving federal assistance, once the work is completed, dust cleanup activities must be conducted until clearance testing indicates that lead dust levels are below the following levels:

- 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) for floors, including carpeted floors
- 250 $\mu\text{g}/\text{ft}^2$ for interior windows sills
- 400 $\mu\text{g}/\text{ft}^2$ for window troughs

For help in locating certified lead abatement professionals in your area, call your state or local agency (see pages 14 and 15), or visit epa.gov/lead, or call 1-800-424-LEAD.

Renovating, Remodeling, or Repairing (RRP) a Home with Lead-Based Paint

If you hire a contractor to conduct renovation, repair, or painting (RRP) projects in your pre-1978 home or childcare facility (such as pre-school and kindergarten), your contractor must:

- Be a Lead-Safe Certified firm approved by EPA or an EPA-authorized state program
- Use qualified trained individuals (Lead-Safe Certified renovators) who follow specific lead-safe work practices to prevent lead contamination
- Provide a copy of EPA's lead hazard information document, *The Lead-Safe Certified Guide to Renovate Right*

RRP contractors working in pre-1978 homes and childcare facilities must follow lead-safe work practices that:

- **Contain the work area.** The area must be contained so that dust and debris do not escape from the work area. Warning signs must be put up, and plastic or other impermeable material and tape must be used.
- **Avoid renovation methods that generate large amounts of lead-contaminated dust.** Some methods generate so much lead-contaminated dust that their use is prohibited. They are:
 - Open-flame burning or torching
 - Sanding, grinding, planing, needle gunning, or blasting with power tools and equipment not equipped with a shroud and HEPA vacuum attachment and
 - Using a heat gun at temperatures greater than 1100°F
- **Clean up thoroughly.** The work area should be cleaned up daily. When all the work is done, the area must be cleaned up using special cleaning methods.
- **Dispose of waste properly.** Collect and seal waste in a heavy duty bag or sheeting. When transported, ensure that waste is contained to prevent release of dust and debris.

To learn more about EPA's requirements for RRP projects visit epa.gov/getleadsafe, or read *The Lead-Safe Certified Guide to Renovate Right*.

Other Sources of Lead

While paint, dust, and soil are the most common sources of lead, other lead sources also exist:

- **Drinking water.** Your home might have plumbing with lead or lead solder. You cannot see, smell, or taste lead, and boiling your water will not get rid of lead. If you think your plumbing might contain lead:
 - Use only cold water for drinking and cooking.
 - Run water for 15 to 30 seconds before drinking it, especially if you have not used your water for a few hours.

Call your local health department or water supplier to find out about testing your water, or visit epa.gov/lead for EPA's lead in drinking water information.
- **Lead smelters** or other industries that release lead into the air.
- **Your job.** If you work with lead, you could bring it home on your body or clothes. Shower and change clothes before coming home. Launder your work clothes separately from the rest of your family's clothes.
- **Hobbies** that use lead, such as making pottery or stained glass, or refinishing furniture. Call your local health department for information about hobbies that may use lead.
- Old **toys** and **furniture** may have been painted with lead-containing paint. Older toys and other children's products may have parts that contain lead.⁴
- Food and liquids cooked or stored in **lead crystal** or **lead-glazed pottery or porcelain** may contain lead.
- Folk remedies, such as "**greta**" and "**azarcon**," used to treat an upset stomach.

⁴ In 1978, the federal government banned toys, other children's products, and furniture with lead-containing paint (16 CFR 1303). In 2008, the federal government banned lead in most children's products. The federal government currently bans lead in excess of 100 ppm by weight in most children's products (76 FR 44463).

IMPORTANT!

Lead From Paint, Dust, and Soil in and Around Your Home Can Be Dangerous if Not Managed Properly

- Children under 6 years old are most at risk for lead poisoning in your home.
- Lead exposure can harm young children and babies even before they are born.
- Homes, schools, and child care facilities built before 1978 are likely to contain lead-based paint.
- Even children who seem healthy may have dangerous levels of lead in their bodies.
- Disturbing surfaces with lead-based paint or removing lead-based paint improperly can increase the danger to your family.
- People can get lead into their bodies by breathing or swallowing lead dust, or by eating soil or paint chips containing lead.
- People have many options for reducing lead hazards. Generally, lead-based paint that is in good condition is not a hazard (see page 10).

Disclosure of Information on Lead-Based Paint and/or Lead-Based Paint Hazards

Lead Warning Statement

Housing built before 1978 may contain lead-based paint. Lead from paint, paint chips, and dust can pose health hazards if not managed properly. Lead exposure is especially harmful to young children and pregnant women. Before renting pre-1978 housing, lessors must disclose the presence of known lead-based paint and/or lead-based paint hazards in the dwelling. Lessees must also receive a federally approved pamphlet on lead poisoning prevention.
