CFI Round 2 Alternative Fuel Corrider - Lenwood Rd - Skychargers LLC - San Bernardino County - MHD EV Hub	

#### **Project Abstract**

San Bernardino County ("SBC") - in partnership with SkyCharger, LLC ("SkyCharger"), Burns & McDonnell, Skyview Ventures, and small/diverse business subcontractors, and small/minority-owned businesses to be selected through a competitive bid process ("Project Team") - seeks funding to construct and operate a medium- and heavy-duty (MDHD) public charging station as part of the Charging Station Project ("Project"). Critically, the Project site will simultaneously serve two local Alternative Fuel Corridors (AFCs), the Barstow railyard (less than 1.5 miles away), and the BNSF rail development known as the Barstow International Gateway ("BIG"). The new BNSF facility represents a \$1.5B investment directly across Lenwood Road, which connects Interstate 15 (I-15) and California State Route 58 (SR 58) from the proposed Project site. Supporting the fleets located at and surrounding BIG with reliable and high-speed charging infrastructure will enable them to accelerate their adoption of MDHD Electric Vehicles (EVs). Additionally, I-15 has been identified as a Proposed Priority Clean Freight Corridor by the California Transportation Commission.

The Project directly supports the CFI program vision to equitably expand the deployment of public EV charging infrastructure in accessible locations for the community and California's ambitious EV adoption goals. The Project, as proposed, will meet the CFI goals by installing 42 DC fast charging ports to accommodate the charging needs of MDHD trucks, including 30 charging ports (E.g., 350 kW) for quick charging and 12 charging ports (E.g., 150 kW) for slower, overnight charging. A solar-powered microgrid will support the site to maximize sustainability and resiliency. In total, 3.09 MW of solar and 1MW/4MWhr of battery energy storage will be installed.

The Project Team is proactively securing necessary permits and has applied for utility power. The site is on track to receive Environmental Impact Report (EIR) certification under CEQA, with preliminary assessments indicating no significant unmitigated impacts. EVC Partners LLC initiated the land use entitlement process in August 2022, and after County reviews, the formal application was deemed complete in October 2023. The Phase 1 environmental assessment revealed no significant environmental concerns.

The Project site on Lenwood Road in Barstow, CA, is strategically located within communities of concern, defined as SB 535 Disadvantaged Communities (DACs) and Low-Income Communities (LICs). These areas face significant challenges, including high levels of pollution, particularly ozone and PM 2.5, and an unemployment rate of 5.7%, above the national average of 4.3%, . Additionally, 43% of residents experience linguistic isolation, leading to a lack of investment and workforce development. The Project will significantly impact emissions by reducing 442,041 metric tons of CO2e over 20 years and eliminating all tailpipe emissions from electrified MDHD vehicles. The Project includes an inclusive community engagement and workforce plan to address economic challenges, involving local stakeholders and providing resources. A community fund, funded by SkyCharger, will provide \$100,000 annually, with a 2.0% escalation, totaling \$520,404 over the 5-year performance period. This fund will be used for local and county education, workforce development, and support other community goals. This initiative aims to improve air quality, reduce emissions, and foster economic and workforce growth in one of California's most disadvantaged regions.

A solar-powered microgrid will support the site to maximize sustainability and resiliency. Additionally, as of 2022, 1,674 trucks per day pass the Lenwood Road ("Lenwood") on I-15; 7,602 trucks travel daily on SR 58 to the west of the SR 58/Lenwood Road interchange; and 6,154 trucks per day travel on SR 58 at its interchange with I-15. With the development of the BIG Project, this number is expected to increase significantly. The high truck traffic, in addition to local fleets, is the basis for charger utilization Projections and supports the long-term market viability of the Project.

The Project Team is proactively securing necessary permits and applied for utility power.
