Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple
Violation Description: Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 11/30/2014. Failure to obtain a CUPA Hazardous Materials Handler permit (SBCC 23.0602(a)) New facility, invoicing will be mailed out
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 150320
Site Name: San Bernardino Justice Center, Judicial Council of California, 36-R1
Violation Date: 02-23-2018
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 02/28/2018. Hazardous materials were observed on site during the inspection that are not listed in the most current CERS inventory or are listed in lesser quantities. The cooling tower water treatment chemicals and battery electrolyte must be added to the inventory. The freon must be converted from pounds to cubic feet as it is a compressed gas.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Document Type: Site Characterization Workplan
Completed Date: 04/11/2007

Completed Area Name: PROJECT WIDE
Completed Document Type: Other Report
Completed Date: 08/21/2007
Comments: According to Tetra Tech, access was no longer possible to indoor locations where the sub-slab samples were previously collected. The drill rig access immediately outside and adjacent to these locations were also not possible due to the clearance underneath the building overhang. There are data gaps due to the lack of revised soil gas data from the recommended locations and not implementing changed in sampling techniques provided in DTSC's previous comments. However, DTSC does not anticipate any substantial increase in the risk number beyond the threshold value of risk = 1E-05 from vapor intrusion for this site. Therefore, DTSC recommended that Tetra Tech develop the health risk assessment pertaining to indoor-air vapor intrusion based on the data previously provided to DTSC in the RAW of October 2006 for Parcels B, and A and C. DTSC also recommended that the VOC concentrations from the samples collected from the previous and the most recent sampling event should be used to evaluate the indoor-air risk assessment to the current commercial workers. Moreover, the indoor-air risk assessment should be performed using the highest VOC concentrations that provide maximum risk and hazard values from all soil gas data performed so far.
