**BJA FY25 DNA Capacity Enhancement for Backlog Reduction (CEBR) Program
San Bernardino Sheriff's Department – Scientific Investigations Division (SBSD-SID)**

The San Bernardino County Sheriff's Department - Scientific Investigations Division (Crime Laboratory) is responsible for analyzing evidential material associated with criminal investigations for local law enforcement agencies within the counties of San Bernardino and Riverside. The San Bernardino County Sheriff's Department - Scientific Investigations Division (Crime Laboratory) proposes to implement funding from the BJA FY25 DNA Capacity Enhancement for Backlog Reduction (CEBR) Program with goals to increase the throughput of the DNA laboratory, reduce DNA casework backlog and decrease DNA case turnaround time. The proposed objectives include funding a DNA Criminalist position (originally created and funded utilizing the FY2019 DNA CEBR Program and sustained with FY2021 and FY2023 DNA CEBR Program funding) to assist with the analysis of sexual assault evidence. Additionally, the laboratory seeks funding for Criminalist overtime to complete backlogged DNA cases, DNA analysis supplies to complete backlogged DNA cases, necessary training of DNA Criminalists, equipment to be utilized in DNA analysis, and replacement of aging laptops used by DNA Criminalists. The laboratory also proposes Lean Six Sigma training for DNA staff and to conduct an efficiency study in the Forensic Biology (DNA) unit. The projected plans will incorporate the most prudent and efficient use of overtime, supplies, training and other funded categories which will allow us to reach our goals. The Federal funding from this award will assist in giving analysts more time and supplies to work backlogged forensic casework. SBCSD-SID will analyze at least 373 forensic biology backlogged DNA cases with the assistance of these funds. Expected outcomes include a decreased turnaround time for DNA casework and a reduced overall backlog at the end of the grant period.

Program Narrative

The San Bernardino County Sheriff's Department - Scientific Investigations Division (SBCSD-SID) is a Division within the Sheriff's Department which is overseen by the San Bernardino County Board of Supervisors. SBCSD-SID is accredited as a testing laboratory to ISO/IEC 17025:2017 by ANSI National Accreditation Board (see attached certificate and scope). The Forensic Biology Unit of the SBCSD-SID undergoes external quality assurance audits in accordance with the FBI's Quality Assurance Standards (QAS) at least once every two years. The Forensic Biology Unit of the SBCSD-SID conducts internal audits utilizing the QAS in the intervening years.

The Forensic Biology unit is responsible for examining evidential material associated with criminal investigations and provides forensic DNA casework analysis for local law enforcement agencies within the counties of San Bernardino and Riverside. The SBCSD-SID does not charge a fee to provide DNA casework services for any agency. All DNA analysis performed under this program will be maintained in accordance with Federal privacy requirements and applicable state laws. The Forensic Biology Unit will enter all eligible DNA profiles obtained with funding from this program into the Combined DNA Index System (CODIS) and will upload to the National DNA Index System (NDIS) when applicable. The SBCSD-SID Forensic Biology Unit is a CODIS participant in good standing.

SBCSD-SID has experienced budget issues for over a decade. Funding for addition of DNA Criminalist positions to address the influx of sex kits due to change in legislation is not available

currently. Laboratory approved overtime is rare and usually only available to assist with rush DNA casework that is necessary to meet court dates or involves public safety concerns.

Laboratory funding for continuing education for DNA Criminalists is difficult to obtain. The purchase of equipment is challenging under current internal laboratory funding constraints. This grant funding will aid with all these challenges – a Criminalist position for DNA analysis of sexual assault evidence, overtime and supplies for the analysis of backlogged DNA cases, laboratory equipment, and training for DNA Criminalists.

New DNA case requests have increased by 12% from 2023 to 2024, demonstrating the growing demand for forensic biology services. While overall case requests have seen a modest increase, the laboratory has experienced a more significant 22% rise in sexual assault DNA case requests and submissions during the same period. This increase may be attributed to the submission of sexual assault case evidence by law enforcement agencies in compliance with state law mandating DNA analysis for all sexual assault cases.

The average turnaround time for all DNA cases completed in 2024 was 359 days, compared to 487 days in 2023, a 30% reduction. This improvement in turnaround time is likely due to a lower number of older, backlogged sexual assault cases being included in current casework. In 2024, the laboratory completed DNA testing of all previously untested backlogged sexual assault kits dating back to 2016, as required by state law. The laboratory continues to incorporate additional older backlogged sexual assault kits dating back to 2015, as well as property crimes cases, into current DNA casework. The SBCSD Forensic Biology unit has a case acceptance policy which

states that homicides, sexual assault and other violent crimes or crimes against people will take priority over the analysis of property crimes. It is anticipated that the average turnaround time per backlogged case will be decreased by 15-20% (or 54-72 days) and throughput will be increased by at least 10% by the end of the grant period. The laboratory expects to be able to complete recently submitted casework more rapidly and complete numerous backlog cases with this funding.

The laboratory will continue to streamline the DNA analysis process to increase case output.

Grant funding will assist these efforts, limiting the negative impact on case turnaround time and case output.

Goals:

Goal 1: To meet the state mandated 120-day turnaround time for newly submitted sexual assault evidence, decrease the overall case turnaround time, and increase case output in the Forensic Biology Unit.

An estimated 84% of requested funds will be used for the analysis of backlogged cases with the funding of a Criminalist position, overtime, and supplies.

Goal 2: To increase and maintain capacity to process crime scene samples for possible CODIS entry.

An estimated 11% of requested funds will be used for equipment, training supplies and an efficiency study of current DNA laboratory processes.

Goal 3: To maintain a high-quality and efficient Forensic Biology Unit.

An estimated 5% of the requested funds will be used for travel and registration costs.

Objectives:

Objective 1A: Fund a DNA Criminalist position to assist with the analysis of backlogged sexual assault kits. This DNA Criminalist position was originally created and funded utilizing the FY2019 DNA CEBR Program and sustained with FY2021 and FY2023 DNA CEBR Program funding, to assist with the analysis of sexual assault evidence. The DNA Criminalist will undergo training in DNA analysis of sexual assault evidence and once trained, will perform DNA analysis on these types of cases. The involvement of this Criminalist in the analysis process is expected to streamline the DNA analysis workflow and further reduce the turnaround time for sample

analysis by an additional 10%. In 2023, the average turnaround time for analysis of sexual assault evidence was 651 days, which improved to 401 days in 2024, a 47% reduction. This improvement is likely attributed to enhanced workflow efficiencies and additional personnel completing DNA analysis training. With the requested funding, continued progress in reducing turnaround times for sexual assault evidence analysis is anticipated, with the goal of meeting state-mandated requirements for sample processing.

Timeline: The grant funded Criminalist is currently in training with expected completion in Fall 2026. Once trained in DNA analysis, they will analyze backlogged sexual assault evidence through the end of the grant program of September 2027.

Objective 1B: Fund overtime for DNA Criminalists to work backlogged cases.

With the combination of grant funded supplies and overtime, the laboratory anticipates processing at least 373 backlogged cases in-house, above and beyond the number of cases worked using laboratory funding. Through careful tracking of grant funded resources, including supplies and overtime, the laboratory expects to exceed the projected goal of 373 cases.

Internally, the laboratory has set a target of completing at least 410 cases using these grant funds.

Timeline: Overtime funding for the analysis of backlogged DNA cases will be utilized throughout the grant period with the goal of completing at least 200 grant funded backlogged DNA cases in calendar year 2026 and an additional 210 grant funded backlogged DNA cases in the first three quarters of 2027.

Objective 1C: Work general backlogged DNA cases using grant funded supplies.

Timeline: Grant funded supplies will be purchased on a quarterly basis beginning in 2026 and continuing through the third quarter of 2027. These grant funded supplies will be utilized for the analysis of backlogged DNA cases throughout the grant period with the goal of completing at least 200 grant funded backlogged DNA cases in calendar year 2026 and an additional 210 grant funded backlogged DNA cases in the first three quarters of 2027.

Objective 2A: With the purchase of requested equipment, the laboratory expects to continue its objective to streamline the DNA analysis process and increase sample throughput. With the requested funds, the laboratory expects to be able to replace aging equipment, such as mini vortexers and centrifuges. This equipment is used in the laboratory throughout the DNA analysis process.

Timeline: This equipment will be purchased in the third and fourth quarter of 2026 and during the first and second quarters of 2027.

Objective 3A: Fund Lean Six Sigma (LSS) training for current DNA unit staff and conduct an efficiency study of laboratory processes. The requested funds will be utilized to hire external consultants for a Lean Six Sigma project, training current staff in LSS and conduct an efficiency study of current DNA analysis processes at the laboratory. The purpose of the efficiency study is to identify bottlenecks and improve DNA analysis capacity and productivity. The training of staff in LSS processes will allow the continued evaluation of the DNA analysis workflow and

continued improvement. Process improvements, once implemented, are expected to decrease turnaround time and increase case output by 10%.

Timeline: This goal and objective will commence when the DNA laboratory remodel project is completed (expected completion May 2026) and is expected to conclude by September 2027.

Objective 3B: Provide required continuing education for Criminalists in the DNA unit by funding DNA Criminalists' travel and registration costs to conferences and workshop opportunities that will include the 2026 International Symposium on Human Identification, the 2027 American Academy of Forensic Science meeting, the 2027 California Association of Criminalists Seminar, the 2027 Green Mountain DNA conference, and the mandatory grant forensics workshop, all occurring during the grant period of 10/01/2025 through 9/30/2027. This training supports continuing education as required by the laboratory's accredited status and the FBI Quality Assurance Guidelines. The laboratory is requesting funding for travel and registration to in-person meetings which ensures that DNA Criminalists stay abreast of new developments and have opportunities for interactions with other members of the forensic DNA community and discussion of new techniques and methods. An in-person meeting also allows interactions with various vendors and the ability to view new technology and products which is invaluable to the laboratory and its efforts to streamline the DNA analysis process.

Timeline: The requested training opportunities will occur in the fourth quarter of 2026, and the first, second and third quarters of 2027.

Data Collection

All data used for performance measure reporting is collected using an in-house SBCSD-SID Forensic Biology grant statistics database, SBCSD-SID Forensic Biology DNA case request database and information from the CODIS terminal. The SBCSD Forensic Biology grant statistics database is used for measures 4,7,8,9 and 11. The SBCSD Forensic Biology DNA case request database is used for measures 5 and 6 while the CODIS terminal is used for measures 10 and 12. DNA Criminalists performing the DNA analysis or review process track and document DNA case information for each case in the SBCSD-SID Forensic Biology grant statistics database. The laboratory has a DNA case management team that reviews and approves, or denies, DNA requests and is responsible for entry of these DNA requests into the SBCSD-SID Forensic Biology DNA case request database. The SBCSD Forensic Biology DNA case request database also contains the backlog case worksheets (separated by type of crime). A summary Excel spreadsheet will be created for easy reviewing of all casework grant parameters for the reporting period. All cases or tasks associated with casework completed on overtime will be tracked for grant reporting purposes and incorporated into the grant statistics Excel spreadsheet as well.

Deliverables:

Objective 1A: Completion of training and any casework will be tracked and reported in the progress reports.

Objective 1B: Grant funded overtime cases will be tracked and reported in the progress reports.

Objective 1C: Casework completed with grand funded supplies will be tracked and reported in the progress reports.

Objective 2A: As equipment and laptops are purchased, updates will be made to the subsequent progress report.

Objective 3A: The Lean Six Sigma training and efficiency study of the laboratory is expected to begin mid-2026, with completion expected in the second or third quarter of 2027. Updates to this objective will be made to the subsequent progress report.

Objective 3B: As registration and travel to the requested training opportunities occurs, updates to this objective will be made to the subsequent progress report.

5. LAW ENFORCEMENT AGENCY CERTIFICATION REQUIRED UNDER DEPARTMENT OF JUSTICE DISCRETIONARY GRANT PROGRAMS ("SAFE POLICING CERTIFICATION")

If this application is for a discretionary award pursuant to which award funds may be made available (whether by the award directly or by any subaward at any tier) to a State, local, college, or university law enforcement agency, the Applicant certifies that any such law enforcement agency to which funds will be made available has been certified by an approved independent credentialing body or has started the certification process. To become certified, a law enforcement agency must meet two mandatory conditions:

(a) the agency's use of force policies adhere to all applicable federal, State, and local laws; and

(b) the agency's use of force policies prohibit chokeholds except in situations where use of deadly force is allowed by law.

For detailed information on this certification requirement, see <https://cops.usdoj.gov/SafePolicingEO>.

The Applicant acknowledges that compliance with this safe policing certification requirement does not ensure compliance with federal, state, or local law, and that such certification shall not constitute a defense in any federal lawsuit. Nothing in the safe policing certification process or safe policing requirement is intended to be (or may be) used by third parties to create liability by or against the United States or any of its officials, officers, agents or employees under any federal law. Neither the safe policing certification process nor the safe policing certification requirement is intended to (or does) confer any right on any third-person or entity seeking relief against the United States or any officer or employee thereof. No person or entity is intended to be (or is) a third-party beneficiary of the safe policing certification process, or, with respect to the safe policing certification requirement, such a beneficiary for purposes of any civil, criminal, or administrative action.

6. COORDINATION REQUIRED UNDER PUBLIC SAFETY AND COMMUNITY POLICING PROGRAMS

Affected agencies may include, among others, Offices of the United States Attorneys; State, local, or tribal prosecutors; or correctional agencies.

I acknowledge that a materially false, fictitious, or fraudulent statement (or concealment or omission of a material fact) in this certification, or in

the application that it supports, may be the subject of criminal prosecution (including under 18 U.S.C. §§ 1001 and/or 1621, and/or 34 U.S.C. §§ 10271-10273), and also may subject me and the Applicant to civil penalties and administrative remedies for false claims or otherwise (including under 31 U.S.C. §§ 3729-3730 and 3801-3812). I also acknowledge that the Department's awards, including certifications provided in connection with such awards, are subject to review by the Department, including by its Office of the Inspector General.
