Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 08/25/2009
Comments: Not reported

Completed Area Name: OU-3
Completed Sub Area Name: West Slag Pile Area
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 09/16/2009
Comments: Not reported

Completed Area Name: OU-1
Completed Sub Area Name: Tar Pits Area
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/24/2002
Comments: Approved the design for cap for Tar Pits parcel.

Completed Area Name: OU-1
Completed Sub Area Name: West End Property Area
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 09/13/2001
Comments: Completion and approval of supplemental PEA for West End Property requiring Deed Restriction. No Further Action and required Land Use Restrictions.

Completed Area Name: OU-1
Completed Sub Area Name: Napa Lots Area
Completed Document Type: Removal Action Completion Report
Completed Date: 04/19/1999
Comments: Removal of soil contaminated from Napa Lot Parcel with polycyclic aromatic hydrocarbons (PAHs). Removed soils were placed in the Corrective Action Management Unit (CAMU) (ChemWest Upper Facility - Consolidated Waste Cell).

KAISER STEEL - TAR PITS AREA (Continued)

S101272834

Completed Area Name: OU-1
Completed Sub Area Name: Materials Recovery Facility (MRF) Area
Completed Document Type: Remedial Action Completion Report
Completed Date: 12/08/1997
Comments: Remediated a 22 acre parcel of the Kaiser Steel site by treating metal and PAH contaminated soils, and capping. The site has been developed into the West Valley Materials Recovery Facility (MRF).

Completed Area Name: OU-1
Completed Sub Area Name: Napa Lots Area
Completed Document Type: Removal Action Workplan
Completed Date: 06/30/1998
Comments: Approval of Removal Action Workplan for NAPA Lots involving the removal of approximately 10,000 yds of PAH and metal impacted soil.

Completed Area Name: OU-1
Completed Sub Area Name: Tar Pits Area
Completed Document Type: Remedial Action Plan Amendment
Completed Date: 12/20/2001
Comments: The Second Amendment to the Remedial Action Plan for Kaiser Steel, Operable Unit Number 1, Tar Pits Area was approved.

Completed Area Name: OU-1
Completed Sub Area Name: Tar Pits Area
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/07/1999
Comments: RI/FS for the Tar Pits Parcel completed.

Completed Area Name: OU-1
Completed Sub Area Name: Materials Recovery Facility (MRF) Area
Completed Document Type: Remedial Action Plan
Completed Date: 05/14/1997
Comments: Completed Remedial Action Plan (RAP) amendment for Materials Recovery Facility (MRF) parcel of the Kaiser Steel site.

Completed Area Name: OU-1
Completed Sub Area Name: Tar Pits Area
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/05/2003
Comments: Remediation of the tar pits was determined to be complete.

Completed Area Name: OU-1
Completed Sub Area Name: Materials Recovery Facility (MRF) Area
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/12/1997
Comments: Remedial Design Report for two caps at the materials recovery facility (MRF) was approved.

Completed Area Name: OU-1
Completed Sub Area Name: West End Property Area
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/28/1996
Comments: Preliminary Endangerment Assessment Report approved with further action required.

KAISER STEEL - TAR PITS AREA (Continued)

S101272834

Completed Document Type: 5 Year Review Reports
Completed Date: 07/29/2002
Comments: Completion of 5-Year Review report on California Speedway (OU2) cap.

Completed Area Name: OU-2
Completed Sub Area Name: A&C Recycling
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 12/02/1996
Comments: A & C Recycling - Preliminary Endangerment Assessment Report. Excavated, sampled, and removed metals and PAH affected soil from a former scrap metal recycling facility located on the Kaiser Steel Site. The Site was closed when background levels for soils were achieved in accordance with PEA Guidance.

Completed Area Name: OU-2
Completed Sub Area Name: Not reported
Completed Document Type: Remedial Action Completion Report
Completed Date: 09/26/1995
Comments: The Final Remedial Action consisted of the design and construction of a 12.84 acre cap over contaminated By- Products Plant soils. The cap is possibly the largest engineered remedial cap ever constructed in California. Excavation, treatment and removal of hazardous substances in the cooling tower sludge bed and the blast furnace gas washer water sludge beds was also performed. Approximately 9,212 tons of hazardous metals sludge waste was treated by chemical fixation; 21,200 tons of waste was removed and disposed of off-site primarily at East Carbon Development Corporation landfill in Utah; and 370 tons of coal tar was shipped off-site for recycling. Vapor extraction of volatile organic contaminants is continuing within the capped area at the former By-Products Plant. A system of extraction wells, including a thermal oxidation unit for destruction of extracted vapors is in place and operating. DTSC also entered into an O&M Agreement for the "capped property", the "restricted property", and limited areas in the remaining operable unit #2 property. Deed restrictions were also recorded for the "capped property" and "restricted property".

Completed Area Name: OU-2
Completed Sub Area Name: Not reported
Completed Document Type: Design/Implementation Workplan
Completed Date: 08/09/1995
Comments: The Design was completed in phases in order to expedite remediation. Areas in need of remediation were segregated and a design document was completed and approved for each segregated remedial unit. The final design document which included a compilation of all approved remedial unit design documents was submitted and approved shortly before site certification, although the majority of remedial work had already been completed.

Background Info: commended for minor material removal. The two RI reports concluded that approximately five percent of the site needed remediation. The site has since been split into four separate sites: the Tarpits area, the Byproducts area the Chemwest area, and the landfill area.

Not reported

The Tarpits area is consists of approximately 250 acres in the middle third of the northern part of Kaiser Steel Resources. This area includes three pits containing approximately 31,000 cubic yards of the heavier fractions of coal tar from a coking operation and associated contaminated soil. This decanter tank tar sludge is an EPA listed hazardous waste K087. Laboratory analyses indicated high concentrations of polynuclear aromatic hydrocarbons (PAHs), phenols, benzene, toluene, xylenes, and styrene.

Not reported

Routes of exposure are through dermal contact an inhalation of volatiles.

Not reported

A field test study was completed in June 2000 to determine the feasibility of solidification of the tar. A Remedial Action Plan was submitted in June 2001 and public participation activities were conducted in July 2001.

The Kaiser Steel Resources facility is located on approximately 880 acres in Fontana. The facility was a former integrated steel production plant that the Kaiser Steel Corporation owned and operated from 1942 to 1983. Following shutdown, portions of the original Kaiser property were sold or otherwise transferred. During this time, the Kaiser Steel Corporation entered bankruptcy proceedings. When the Corporation emerged from bankruptcy, their name changed to Kaiser Steel Resources.

Not reported

The Department became aware of the potential presence of hazard waste in 1985, when asbestos and liquids from a benzol production area were released during demolition of onsite structures.

The asbestos was removed and is no longer of concern.

Also in 1985, an environmental assessment was conducted by J.M. Montgomery at the Kaiser Steel Corporation's request. As a result of these actions, both the Department and U.S. EPA became involved with the site.

Not reported

In 1988, U.S. EPA proposed listing the Kaiser Steel facility on the NPL. In October, U.S. EPA decided not to list the site.

Not reported

During the bankruptcy proceedings, the Department and Kaiser Steel submitted a Consent Order for the investigation and mitiga-

tion of the site to the court for review and approval. Subsequent to the court's approval, the Department entered into a consent order in August 1988, with Kaiser Steel Resources. The Lusk Company, a land development company, has negotiated an agreement with Kaiser Steel Resources to fund the initial cleanup. Future work will be funded through the sale of the remediated portions of the site.

Not reported

In August 1988, and January 1989, Preliminary Assessment/Site Inspection Reports (PA/SI) were completed in an effort to identify areas of contamination. Of the 32 areas investigated, 12 were identified as requiring no further action and 20 were recommended for remedial investigation.

Not reported

The remedial investigation at the site was conducted in two phases, phase I and Phase II. Phase I, completed in April 1990, evaluated the 20 potential sites and concluded that three required further investigation and/or remediation. Of these three, two areas, the by-products plant and the east slag pile landfill, were recommended for further remedial investigation, and the third area, the tar pits, was recommended for remediation. Phase II, completed in October 1990, further sampled and analyzed the by-products plant and east slag pile landfill. Results concluded that these areas required remediation. Two smaller areas, the cooling tower sludge pit and the furnace dust and mills scale piles, were also investigated in Phase II. These areas were re-

Background Info: The Kaiser Steel Resources facility is located on approximately 880 acres in Fontana. The facility was a former integrated steel production plant that the Kaiser Steel Corporation owned and operated from 1942 to 1983. Following shutdown, portions of the original Kaiser property were sold or otherwise transferred. During this time, the Kaiser Steel Corporation entered bankruptcy proceedings. When the Corporation emerged from bankruptcy, their name changed to Kaiser Steel Resources.
Not reported
The Department became aware of the potential presence of hazardous waste in 1985, when asbestos and liquids from a benzol production area were released during demolition of onsite structures. The asbestos was removed and is no longer of concern. Also in 1985, an environmental assessment was conducted by J. M. Montgomery at the Kaiser Steel Corporation's request. As a result of these actions, both the Department and EPA became involved with the site.
Not reported
In 1988, EPA proposed listing the Kaiser Steel facility on the NPL. In October 1989, EPA decided not to list the site.
Not reported
During bankruptcy proceedings, the Department and Kaiser Steel submitted a Consent Order for the investigation and mitigation of the site to the court for review and approval. Subsequent to the court's approval, the Department entered into a consent order in August 1988, with Kaiser Steel Resources. The Lusk Company, a land development company, has negotiated an agreement with Kaiser Steel Resources to fund the initial cleanup. Future work will be funded through the sale of the remediated portions of the site.

KAISER STEEL - CHEMWEST AREA (Continued)

S101272832

In August 1988, and January 1989, Preliminary Assessment/ Site Inspection Reports (PA/SI) were completed in an effort to identify areas of contamination. Of the 32 areas investigated, 12 were identified as requiring no further action and 20 were recommended for remedial investigation.

Not reported

The remedial investigation at the site was conducted in two phases. Phase I, completed in April 1990, evaluated the 20 potential sites and concluded that three required further investigation and/or remediation. Of these three, two areas, the by-products plant and the east slag pile landfill, were recommended for further remedial investigation, and the third area, the tar pits, was recommended for remediation. Phase II, completed in October 1990, further sampled and analyzed the by-products plant and east slag pile landfill. Results concluded that these areas required remediation. Two smaller areas, the cooling tower sludge pit and the furnace dust and mills scale piles, were also investigated in Phase II. These areas were recommended for minor material removal. The two RI reports concluded that approximately five percent of the site needed remediation. The site has since been split into four separate sites: the Tar Pits area, the Byproducts area, the Chemwest area, and the Landfill area.

Not reported

Chemwest Area- This is approximately 50 acres located west and northwest of the east slag pile landfill. This area includes the five ferrous chloride ponds (Chemwest Upper Facility), two of which have had a history of releases of the ferrous chloride solutions, and the Chemwest lower facility. Past operations in this area involved the processing of the waste pickle liquor from the neighboring steel manufacturing facility to produce concentrated and marketable solutions of ferrous chloride. Later, when the steel manufacturing facility started recycling its waste pickle liquor, Chemwest was reported to resort to importing raw materials to manufacture ferrous chloride. This area is characterized by significant concentrations of metals in an acidic environment. Waste pickle liquor is an EPA listed hazardous waste K062.

Not reported

On two occasions, the pond linings failed. The first reported loss of liquid occurred from the southernmost pond in June 1978 and consisted of 1.3 million gallons. The second loss occurred from the northeasterly pond in May 1983 and consisted of 300,000 gallons.

Not reported

Between the period of April 1995 and February 1996, iron hydroxide sludge affected by the leakage of waste ferrous chloride solution/hydrochloric acid was removed from the CWUP under the direction of the Department of Toxic Substances Control (DTSC). A total of 7,000 tons of affected sludge was removed until the remaining sludge was at a pH of 7.0 (neutral) or higher, and metals were below concentrations typical of iron hydroxide sludge. The affected iron hydroxide sludge was transported to a permitted offsite disposal facility (East Carbon

Development Corporation environmental landfill in Utah). At that time the in-place pond liners were also removed, and affected soils from the berms separating the ponds were screened and sampled. A description of the removal activities and confirmation sampling is provided in "Report of Removal Action, Chemwest Upper Ponds Area, Kaiser Ventures Site, Fontana, CA" (SCS Engineers, June, 1996).

Not reported

In March 2001, a field sampling plan was submitted for the Chemwest Lower Facility. The Department has responded with comments.

of concern. Also in 1985, an environmental assessment was conducted by J.M. Montgomery at the Kaiser Steel Corporation's request. As a result of these actions, both the Department and U.S. EPA became involved with the site.

In 1988, U.S. EPA proposed listing the Kaiser Steel facility on the NPL. In October 1989, U.S. EPA decided not to list the site.

During the bankruptcy proceedings, the Department and Kaiser Steel submitted a Consent Order for the investigation and mitigation of the site to the court for review and approval. Subsequent to the court's approval, the Department entered into a consent order in August 1988, with Kaiser Steel Resources. The Lusk Company, a land development company, has negotiated an agreement with Kaiser Steel Resources to fund the initial cleanup. Future work will be funded through the sale of the remediated portions of the site.

In August 1988, and January 1989, Preliminary Assessment/Site Inspection Reports (PA/SI) were completed in an effort to identify areas of contamination. Of the 32 areas investigated, 12 were identified as requiring no further action and 20 were recommended for remedial investigation.

The remedial investigation at the site was conducted in two phases. Phase I, completed in April 1990, evaluated the 20 potential sites and concluded that three required further investigation and/or remediation. Of these three, two areas, the by-products plant and the east slag pile landfill, were recommended for further remedial investigation, and the third area, the tar pits, was recommended for remediation. Phase II, completed in October 1990, further sampled and analyzed the by-products plant and east slag pile landfill. Results concluded that these areas required remediation. Two smaller areas, the cooling tower sludge pit and the furnace dust and mills scale piles, were also investigated in Phase II. These areas were recommended for minor material removal. The two RI reports concluded that approximately five percent of the site needed remediation.

The site has since been split into four separate sites: the Tar Pits area, the By-products area, the Chemwest area, and the Landfill area.

East Slag Pile Landfill Area- Approximately 50 acres in the eastern half of the southern part of Kaiser Steel Resources. This area consists of a mound of slag and solid wastes which received inert material, oily mill scale, and sludges, including those derived from the cooling tower, neutralized waste pickle liquor, and blast furnace gas washer water. North of the east slag pile landfill are five ferrous chloride ponds (part of the Chemwest area) and two chrome ponds (part of this area). Some of the sludges disposed in the landfill contain significant levels of heavy metals (lead and zinc).

Not reported

In March 2001, an RI was submitted for the East Slag Pile Landfill. This included a border determination of the extent of the landfill. Currently, slag mining operations are being conducted east of the landfill on the slag pile

CA BOND EXP. PLAN:

Responsible Party: NPL SITE CLEANUP WORKPLAN
Project Revenue Source Company: Not reported
Project Revenue Source Addr: Not reported
Project Revenue Source City,St,Zip: Not reported
Project Revenue Source Desc: DHS and Kaiser Steel have submitted a consent order to the bankruptcy court for approval. Upon authorization by the court, Kaiser Steel will initiate remedial activities. Under this order, Kaiser Steel will pay for all remediation costs. The Company will also advance \$70,000 to DHS to pay for its direct costs, staff costs and overhead related to the Department's oversight activities. EPA has proposed this site for listing on the NPL.
Site Description: The Kaiser Steel facility is located on approximately four square miles in Fontana. The facility was a former integrated steel production plant that operated from 1942 to 1983. Parcels of the property have subsequently been leased to other private parties. Much of the site remains unoccupied and has areas which may contain hazardous wastes. These areas include unlined tar pits,

Hazardous Waste Desc:	chromium reduction ponds and slag piles. The following hazardous substances were, among others, handled on the site during its years of operation: chromic acid, calcium carbide, polychlorinated biphenyls (PCBs), chromic hydroxide, asbestos, hydrochloric acid, ferric chloride and oily wastes. The following hazardous wastes, among others, were released on the site after the facility was closed: asbestos, acenaphthylene, anthracene, benzo(a)anthracene, benzo(a)pyrene, chrysene, fluorene, fluoroanthene, phenanthrene, pyrene, biphenyl, dibenzofuran, indene and methyl naphthalene.
Threat To Public Health & Env:	The site overlies the Chino Water Basin, Which is a source of drinking water for approximately 500,000 people. An intermittent flow storm channel traverses the property and may receive contaminated runoff from the site. The channel ultimately flows into the Santa Ana River which recharges drinking water aquifers downgradient. Disturbance of contaminated soils may result in a release of adverse air emissions that could expose workers and the public. The demolition of structures insulated by asbestos has exposed workers to the hazardous substance.
Site Activity Status:	Regulatory and enforcement efforts are being undertaken by DHS, the RWQCB, EPA and the San Bernardino County Environmental Health Department. The Department became aware of the presence of potential hazardous wastes in 1985 when asbestos and liquids from a benzol production area were released during demolition. Kaiser Steel will conduct a site investigation to identify all contaminated areas on the site. The company has filed for bankruptcy and may identify additional financing of remedial activities through partnerships with land developers.

Following shutdown, portions of the original Kaiser property were sold or otherwise transferred. During this time, the Kaiser Steel Corporation entered bankruptcy proceedings. When the Corporation emerged from bankruptcy, their name changed to Kaiser Steel Resources.

The Department became aware of the potential presence of hazardous waste in 1985, when asbestos and liquids from a benzol production area were released during demolition of onsite structures. The asbestos was removed and is no longer of concern. Also in 1985, an environmental assessment was conducted by J.M. Montgomery at the Kaiser Steel Corp.'s request. As a result of these actions, both the Department and EPA became involved with the site.

In 1988, EPA proposed listing the Kaiser Steel facility on the NPL. In October 1989, EPA decided not to list the site.

During the bankruptcy proceedings, the Department and Kaiser Steel submitted a Consent Order for the investigation and mitigation of the site to the court for review and approval. Subsequent to the court's approval, the Department entered into a consent order in August 1988, with Kaiser Steel Resources. The Lusk Company, a land development company, has negotiated an agreement with Kaiser Steel Resources to fund the initial cleanup. Future work will be funded through the sale of the remediated portions of the site.

In August 1988, and January 1989, Preliminary Assessment/Site Inspection Reports (PA/SI) were completed in an effort to identify areas of contamination. Of the 32 areas investigated, 12 were identified as requiring no further action and 20 were recommended for remedial investigation. The remedial investigation at the site was conducted in two phases. Phase I, completed in April 1990, evaluated the 20 potential sites and concluded that three required further investigation and/or remediation. Of these three, two areas, the by-products plant and the east slag pile landfill, were recommended for further remedial investigation, and the third area, the tar pits, was recommended for remediation. Phase II, completed in October 1990, further sampled and analyzed the by-products plant and east slag pile landfill. Results concluded that these areas required remediation. Two smaller areas, the cooling tower sludge pit and the furnace dust and mills scale piles, were also investigated in Phase II. These areas were recommended for minor material removal. The two RI reports concluded that approximately five percent of the site needed remediation. The site has since been split into four separate sites: the Tar Pits area, the Byproducts area, the Chemwest area, and the Landfill area.

The Byproducts Area- Approximately 340 acres in the northern part of Kaiser Steel Resources. This area includes an approximated sixteen-acre portion in which volatile portions of the coking operations were processed to produce other materials of potential value. Numerous underground storage tanks which contained light oils, motor fuels, and various volatile aromatic hydrocarbons were also located in this portion. This area was found to contain elevated soil

concentrations of PAHs and volatile aromatic hydrocarbons. Routes of exposure are through dermal contact and inhalation of volatiles. Possible receptors are workers onsite and residents of houses in the vicinity. DTSC applied RAP for the By Products Area and the RAP was implemented. The remedy included a 13 acre CAP, excavation and off-site disposal, and vapor extraction for VOCs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 07/12/2021	Source: Department of the Navy
Date Data Arrived at EDR: 08/06/2021	Telephone: 843-820-7326
Date Made Active in Reports: 10/22/2021	Last EDR Contact: 11/08/2021
Number of Days to Update: 77	Next Scheduled EDR Contact: 02/21/2022
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/17/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/21/2021	Telephone: 703-603-0695
Date Made Active in Reports: 08/11/2021	Last EDR Contact: 08/23/2021
Number of Days to Update: 82	Next Scheduled EDR Contact: 12/06/2021
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/17/2021	Source: Environmental Protection Agency

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/18/2021	Source: Drug Enforcement Administration

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

UTM Y (Meters):	3770010.0
Elevation:	1068 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12015969 FONTANA, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Data Coverage

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile WSW
Site Name:	Western States Refining
Site EPA ID Number:	CAD076080563
Groundwater Flow Direction:	Southwest
Inferred Depth to Water:	approximately 280 feet.
Hydraulic Connection:	Permeable soils are present above the identified ground water.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	35 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	35 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2
