BACKGROUND INFORMATION

The approval of this amendment will allow ARMC to protect stored backup data from being altered or destroyed. Rubrik Software is currently ARMC's backup and recovery solution, providing protection for both active systems and archived data. It is designed with built-in cybersecurity safeguards to defend against ransomware and emerging security threats.

With the addition of Rubrik Cloud Vault software, backup data will be stored in a separate, isolated environment, ensuring that backup data remains immutable and cannot be altered or destroyed, even in the event of a cyberattack. This software enhances ARMC's ability to protect critical assets such as patient records, electronic health record data, and operational systems, while also supporting compliance with the Health Insurance Portability and Accountability Act (HIPAA) and other cybersecurity standards.
