

**REPORT/RECOMMENDATION TO THE BOARD OF SUPERVISORS
OF SAN BERNARDINO COUNTY
AND RECORD OF ACTION**

May 5, 2026

FROM

NOEL CASTILLO, Director, Department of Public Works – Solid Waste Management

SUBJECT

Application to Amend Irrevocable Standby Letter of Credit with Wells Fargo Bank for the San Gabriel Valley Water Company

RECOMMENDATION(S)

Approve Application to Amend Irrevocable Standby Letter of Credit between San Bernardino County and Wells Fargo Bank, in favor of the San Gabriel Valley Water Company, in the amount of \$1,215,750 at a cost of approximately \$40,000, effective July 1, 2026 through June 30, 2027.

(Presenter: Noel Castillo, Director, 387-7906)

COUNTY AND CHIEF EXECUTIVE OFFICER GOALS & OBJECTIVES

Operate in a Fiscally Responsible and Business-Like Manner.

Provide for the Safety, Health and Social Service Needs of County Residents.

FINANCIAL IMPACT

Approval of this item will not result in the use of Discretionary General Funding (Net County Cost) as the Department of Public Works (Department) – Solid Waste Management Division (SWMD) is funded by fee revenue. SWMD establishes fees that are charged to the public and other agencies for utilization of the County's Waste Disposal System. The Irrevocable Standby Letter of Credit, issued by Wells Fargo Bank, will be in the amount of \$1,215,750, which is an increase of \$145,950 from last year. The increased amount is due to an increase in the estimated budget submitted by San Gabriel Valley Water Company (SGVWC) for 2026-27. The estimated cost for the Irrevocable Standby Letter of Credit is \$40,000. Sufficient appropriation will be included in the SWMD 2026-27 Recommended Budget.

BACKGROUND INFORMATION

In accordance with Agreement No. 98-947 (Agreement) between San Bernardino County (County) and SGVWC, which was approved by the Board of Supervisors (Board) on November 10, 1998 (Item No. 33), the County is required to post, annually, an Irrevocable Standby Letter of Credit for 125% of that year's operation cost estimate to ensure payment for the operation and maintenance of SGVWC's F-10 water supply Plant. An Irrevocable Standby Letter of Credit guarantees payment from the bank to SGVWC should the County default on the payment for the operation and maintenance costs. This item will approve the Application to Amend the Irrevocable Standby Letter of Credit for 2026-27.

The Agreement settled claims that a groundwater plume emanating from the Mid-Valley Sanitary Landfill (MVSL) contained volatile organic compounds, which had impacted two

production wells at SGVWC's F-10 Plant. The Agreement required the County to fund construction and annual operation and maintenance of a granular activated carbon water treatment facility at the F-10 Plant and the installation of a third production well in the heart of the plume to contain it.

On May 6, 2025 (Item No. 27), the Board approved the Application to amend the Irrevocable Standby Letter of Credit between the County and Wells Fargo Bank in favor of SGVWC in the amount of \$1,069,800 for 2025-26, based on SGVWC's annual budget for its estimated annual operations cost for the period of July 1, 2025 to June 30, 2026.

SGVWC submitted a proposed annual operations cost estimate of \$972,600 for 2026-27, which resulted in the Irrevocable Standby Letter of Credit being calculated to be \$1,215,750, an increase of \$145,950 from the prior year's Letter of Credit. SGVWC issues monthly invoices that are paid based on actual costs, and for any costs that are overpaid, the County is issued a credit. SWMD staff reviewed the proposed annual operations cost estimate and, subject to a reservation of rights to dispute certain costs, if necessary, determined the estimate to be fair and reasonable.

The recommended action supports the County and the Chief Executive Officer's goals and objectives of operating in a fiscally responsible and business-like manner and provides for the safety and health of County residents by continuing the Irrevocable Standby Letter of Credit, allowing continuing operations of the groundwater treatment system to protect the groundwater near the MVSL from volatile organic compound impacts.
