1. Cultural and Linguistic Competency

Cultural competence is defined as a set of congruent practice skills, knowledge, behaviors, attitudes, and policies that come together in a system, agency, or among consumer providers and professionals that enables that system, agency, or those professionals and consumer providers to work effectively in cross-cultural situations.

Providing mental health and substance use disorder treatment services in a culturally appropriate and responsive manner is fundamental in any effort to ensure success of high quality and cost-effective behavioral health services. Offering those services in a manner that fails to achieve its intended result due to cultural and linguistic barriers does not reflect high quality of care and is not cost-effective.
- g. To assist Contractor's efforts towards cultural and linguistic competency, DBH shall provide the following:

TRANSITIONAL AGE YOUTH CRISIS RESIDENTIAL TREATMENT SERVICES IN THE EAST VALLEY

PROGRAM AND SERVICE DESCRIPTION

The STAY
780 E. Gilbert St. Bldg. H
San Bernardino, CA 92415

Note: All of the requirements noted in **RFP-DBH 21-111 Request for Proposals for Crisis Residential Treatment Services** are incorporated into this Addendum by reference.

I. BACKGROUND

- A. Historically, DBH, which is the County's MHP, and their behavioral health services contractors have provided mental health treatment services throughout San Bernardino County. This has been a seamless system of care enabling County residents to access mental health services in all regions of the County. DBH works to maintain this coordinated system of care by continuing to provide Crisis Residential Treatment (CRT) services in the form of a 14-bed, voluntary CRT program for transitional aged youth (TAY), aged 18 through the individual's 26th birthday, located in the East Valley region of San Bernardino County. The program is funded by the Mental Health Services Act (MHSA), Community Services and Supports component and was previously funded by the Innovation component as a project. Initially titled the Transitional Age Youth Behavioral Health Hostel (TAY BHH), upon the project's completion under the Innovation component, this program transitioned to a DBH program under the Community Services and Supports (CSS) component and is now known as the TAY CRT. The TAY CRT will continue to provide TAY, who generally require a stay of 14 to 30 days for crisis resolution or stabilization, with an alternative to unnecessary hospitalization or incarceration. The program will also continue to assist clients in transitioning to lower levels of care or community reintegration.

II. OBJECTIVE

- A. The Crisis Residential Treatment (CRT) program is voluntary and will operate on the principal of choice and with the Recovery, Wellness, and Resilience (RWR) approach as defined by the participant. CRTs will incorporate the tenants of recovery, resilience, peer support, and cultural linguistic competence early in the crisis stabilization process. The program will embrace the recovery philosophy as a guiding framework, which will provide various options and opportunities for the individuals to succeed in the community. The recovery model will promote consumer centered treatment, personal responsibility and independence. The program will be strength-based and will instill hope while engaging individuals and their families as they pursue their path to recovery. TAY CRT will serve individuals who are aged 18 through the individual's 26th birthday and will provide culturally and linguistically competent services.

III. LICENSING AND CERTIFICATION REQUIREMENTS

- A. CRT contractors must be licensed as a Social Rehabilitation Facility by the California Department of Social Services (CDSS), as set forth in California Code of Regulations (CCR) Title 22, Division 6, and Chapter 2.
- B. The mental health program component of the CRTs must be certified by the California Department of Health Care Services (DHCS) as a Short-Term Crisis Residential Treatment Program, as set forth in the California Welfare and Institutions Code (WIC), Sections 5670, 5670.5 and 5671 and CCR Title 9, Division 1, Chapter 3, Article 3.5.
- C. The mental health program component must also be Medi-Cal certified by DHCS. CRTs must provide services 24 hours per day, 7 days per week (24/7) with a maximum capacity of 16 beds per CRT, provided by the Contractor under Title 9, Chapter 11, Section 1810.249, which superseded the rehabilitation option and targeted case management guidelines of July 1, 1993, and more recent guidelines as may be incorporated or referenced herein by attachment. DATA SECURITY REQUIREMENTS

Pursuant to its contract with the State Department of Health Care Services, the Department of Behavioral Health (DBH) requires Contractor adhere to the following data security requirements:

A. Personnel Controls

1. Employee Training. All workforce members who assist in the performance of functions or activities on behalf of DBH, or access or disclose DBH Protected Health Information (PHI) or Personal Information (PI) must complete information privacy and security training, at least annually, at Contractor's expense. Each workforce member who receives information privacy and security training must sign a certification, indicating the member's name and the date on which the training was completed. These certifications must be retained for a period of ten (10) years from the final date of the contract period or from the date of completion of any audit, whichever is later.
2. Employee Discipline. Appropriate sanctions must be applied against workforce members who fail to comply with privacy policies and procedures or any provisions of these requirements, including termination of employment where appropriate.
3. Confidentiality Statement. All persons that will be working with DBH PHI or PI must sign a confidentiality statement that includes, at a minimum, General Use, Security and Privacy Safeguards, Unacceptable Use, and Enforcement Policies. The Statement must be signed by the workforce member prior to accessing DBH PHI or PI. The statement must be renewed annually. The Contractor shall retain each person's written confidentiality statement for DBH inspection for a period of ten (10) years from the final date of the contract period or from the date of completion of any audit, whichever is later.
4. Background Check. Before a member of the workforce may access DBH PHI or PI, a background screening of that worker must be conducted. The screening should be commensurate with the risk and magnitude of harm the employee could cause, with more thorough screening being done for those employees who are authorized to bypass significant technical and operational security controls. The Contractor shall retain each workforce member's background check documentation for a period of ten (10) years from the final date of the contract period or from the date of completion of any audit, whichever is later.

B. Technical Security Controls

1. Workstation/Laptop Encryption. All workstations and laptops that store DBH PHI or PI either directly or temporarily must be encrypted using a FIPS 140-2 certified algorithm which is 128bit or higher, such as Advanced Encryption Standard (AES). The encryption solution must be full disk unless approved in writing by DBH's Office of Information Technology.
2. Server Security. Servers containing unencrypted DBH PHI or PI must have sufficient administrative, physical, and technical controls in place to protect that data, based upon a risk assessment/system security review.
3. Minimum Necessary. Only the minimum necessary amount of DBH PHI or PI required to perform necessary business functions may be copied, downloaded, or exported.
4. Removable Media Devices. All electronic files that contain DBH PHI or PI data must be encrypted when stored on any removable media or portable device (i.e. USB thumb drives, floppies, CD/DVD, Blackberry, backup tapes, etc.). Encryption must be a FIPS 140-2 certified algorithm which is 128bit or higher, such as AES.
5. Antivirus / Malware Software. All workstations, laptops and other systems that process and/or store DBH PHI or PI must install and actively use comprehensive anti-virus software / Antimalware software solution with automatic updates scheduled at least daily.

6. Patch Management. All workstations, laptops and other systems that process and/or store DBH PHI or PI must have all critical security patches applied with system reboot if necessary. There must be a documented patch management process which determines installation timeframe based on risk assessment and vendor recommendations. At a maximum, all applicable patches must be installed within thirty (30) days of vendor release. Applications and systems that cannot be patched within this time frame due to significant operational reasons must have compensatory controls implemented to minimize risk until the patches can be installed. Application and systems that cannot be patched must have compensatory controls implemented to minimize risk, where possible.
7. User IDs and Password Controls. All users must be issued a unique user name for accessing DBH PHI or PI. Username must be promptly disabled, deleted, or the password changed upon the transfer or termination of an employee with knowledge of the password. Passwords are not to be shared. Passwords must be at least eight characters and must be a non-dictionary word. Passwords must not be stored in readable format on the computer. Passwords must be changed at least every ninety (90) days, preferably every sixty (60) days. Passwords must be changed if revealed or compromised. Passwords must be composed of characters from at least three of the following four groups from the standard keyboard:
 - a. Upper case letters (A-Z)
 - b. Lower case letters (a-z)
 - c. Arabic numerals (0-9)
 - d. Non-alphanumeric characters (special characters)
8. Data Destruction. When no longer needed, all DBH PHI or PI must be wiped using the Gutmann or U.S. Department of Defense (DoD) 5220.22-M (7 Pass) standard, or by degaussing. Media may also be physically destroyed in accordance with NIST Special Publication 800-88. Other methods require prior written permission of DBH's Office of Information Technology.
9. System Timeout. The system providing access to DBH PHI or PI must provide an automatic timeout, requiring re-authentication of the user session after no more than twenty (20) minutes of inactivity.
10. Warning Banners. All systems providing access to DBH PHI or PI must display a warning banner stating that data is confidential, systems are logged, and system use is for business purposes only by authorized users. User must be directed to log off the system if they do not agree with these requirements.
11. System Logging. The system must maintain an automated audit trail which can identify the user or system process which initiates a request for DBH PHI or PI, or which alters DBH PHI or PI. The audit trail must be date and time stamped, must log both successful and failed accesses, must be read only, and must be restricted to authorized users. If DBH PHI or PI is stored in a database, database logging functionality must be enabled. Audit trail data must be archived for at least ten (10) years from the final date of the contract period or from the date of completion of any audit, whichever is later.
12. Access Controls. The system providing access to DBH PHI or PI must use role based access controls for all user authentications, enforcing the principle of least privilege.
13. Transmission Encryption. All data transmissions of DBH PHI or PI outside the secure internal network must be encrypted using a FIPS 140-2 certified algorithm which is 128bit or higher, such as AES. Encryption can be end to end at the network level, or the data files containing DBH PHI can be encrypted. This requirement pertains to any type of DBH PHI or PI in motion such as website access, file transfer, and E-Mail.
14. Intrusion Detection. All systems involved in accessing, holding, transporting, and protecting DBH PHI or PI that are accessible via the Internet must be protected by a comprehensive intrusion detection and prevention solution.

C. Audit Controls

1. System Security Review. Contractor must ensure audit control mechanisms that record and examine system activity are in place. All systems processing and/or storing DBH PHI or PI must have at least an annual system risk assessment/security review which provides assurance that administrative, physical, and technical controls are functioning effectively and providing adequate levels of protection. Reviews should include vulnerability scanning tools.
2. Log Review. All systems processing and/or storing DBH PHI or PI must have a routine procedure in place to review system logs for unauthorized access.
3. Change Control. All systems processing and/or storing DBH PHI or PI must have a documented change control procedure that ensures separation of duties and protects the confidentiality, integrity and availability of data.

D. Business Continuity/Disaster Recovery Controls

1. Emergency Mode Operation Plan. Contractor must establish a documented plan to enable continuation of critical business processes and protection of the security of DBH PHI or PI held in an electronic format in the event of an emergency. Emergency means any circumstance or situation that causes normal computer operations to become unavailable for use in performing the work required under this Agreement for more than 24 hours.
2. Data Backup Plan. Contractor must have established documented procedures to backup DBH PHI to maintain retrievable exact copies of DBH PHI or PI. The plan must include a regular schedule for making backups, storing backups offsite, an inventory of backup media, and an estimate of the amount of time needed to restore DBH PHI or PI should it be lost. At a minimum, the schedule must be a weekly full backup and monthly offsite storage of DBH data.

E. Paper Document Controls

1. Supervision of Data. DBH PHI or PI in paper form shall not be left unattended at any time, unless it is locked in a file cabinet, file room, desk or office. Unattended means that information is not being observed by an employee authorized to access the information. DBH PHI or PI in paper form shall not be left unattended at any time in vehicles or planes and shall not be checked in baggage on commercial airplanes.
2. Escorting Visitors. Visitors to areas where DBH PHI or PI is contained shall be escorted and DBH PHI or PI shall be kept out of sight while visitors are in the area.
3. Confidential Destruction. DBH PHI or PI must be disposed of through confidential means, such as cross cut shredding and pulverizing.
4. Removal of Data. Only the minimum necessary DBH PHI or PI may be removed from the premises of Contractor except with express written permission of DBH. DBH PHI or PI shall not be considered "removed from the premises" if it is only being transported from one of Contractor's locations to another of Contractor's locations.
5. Faxing. Faxes containing DBH PHI or PI shall not be left unattended and fax machines shall be in secure areas. Faxes shall contain a confidentiality statement notifying persons receiving faxes in error to destroy them. Fax numbers shall be verified with the intended recipient before sending the fax.
6. Mailing. Mailings containing DBH PHI or PI shall be sealed and secured from damage or inappropriate viewing of such PHI or PI to the extent possible.

Mailings which include 500 or more individually identifiable records of DBH PHI or PI in a single package shall be sent using a tracked mailing method which includes verification of delivery and receipt, unless the prior written permission of DBH to use another method is obtained.
