Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

Why do humans feel they are more important than the nature we encroach upon??
Why is it that money is the end all be all??
The proposed houses are not for the homeless. They are to make people rich period.
Big bear is serene and desirable just because of its flora and fauna.
I am so upset by this proposal I can hardly communicate.
Shame on all of you and your greediness and corruption!!

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon

Camp development in Fawnskin.

Most sincerely,

Deb Thurston-Philips

Honorable Board of Supervisors,

I am in FAVOR of your APPROVAL of the Moon Camp Subdivision.

Community Benefits include:

- The entire lakefront, 2,588 l.f. will be a PERMANENT EAGLE FORAGING AREA.
- 15% of the Subdivision, 9.6 acres, will be set aside as PERMANENT OPEN SPACE.
- 891 l.f. of lakefront, 0.82 acres, will be COMMUNITY LAKE ACCESS for the Fawnskin Community.
- \$3 million of Community Improvements - Water System, Fire Flow, Traffic, and Bike Lane.
- 15 acres of land PERMANENTLY PROTECTED in order to preserve Endangered and Sensitive Plants.

The Moon Camp Subdivision will be an incredible asset to our Eagles, our Endangered and Sensitive Plants, the Fawnskin Community and the entire Big Bear Valley.

Please APPROVE the Moon Camp Subdivision.

Dear Supervisors,

PLEASE do not allow this new subdivision on Big Bear Lake. This is a summer visit area and home of two bald eagles. It would chase the eagles away because this proposal is on their fishing area. It would create a terrible fire danger which the area is not equipped to handle. There are a ton of homes up for sale already at this time so 600 homes would only create more of a problem. PLEASE listen to the people that care about this area.

Sincerely,
Tammy Elwood

The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

There are already many home for sale in this area why build more this is destroying the little wild life that has risen up from other hazards. Especially the bald eagle. Please reconsider, there is hope for wildlife. Fix the current properties revive the area that has homes already and keep wild life safe and pure.

Proposed Moon Camp Development Threatens Bald Eagles, Increases Fire Risk...

Send letters to San Bernardino County Supervisors supporting bald eagle's to COB@sbcounty.gov
[View the Letter](#) [Download Letter](#)
before the October 8, 2019 Board of Supervisor's Meeting

Background:

An undeveloped parcel of land located on the north shore of Big Bear Lake and partially bordered by the San Bernardino National Forest is a critical habitat area for Big Bear's Resident Bald Eagles. The site has large perch trees overlooking, wind-protected forage coves where fish and mud hens (aka: coots) congregate in the quiet shallow waters. Here's what it looks like now:

Current view of the proposed Moon Camp site.

Current view of the proposed Moon Camp site.

A proposal to build 50 luxury house sites with new roads, a huge private marina, and parking area on this parcel that is only ½ mile from the bald eagle nest. That development could destroy the future possibility of the eagles continuing to nest in this area. The site of this proposed development can be seen from the nest camera -- the yellow circle on the webcam photo (below) designates the proposed building site location.

View proposed development site from the eagle's nest

View proposed development site from the eagle's nest

- This forested lakefront site is used by eagles to feed themselves and their chicks--the marina, parking, roads and houses would destroy this key north shore foraging ground.
- The monumental increase in disturbance in this quiet area would likely cause the eagles to abandon the nest and area.
- Even the County's official environmental documents state that there would be significant detrimental impacts to the bald eagles.
- Perch trees, by definition, have dead tops without foliage to block the eagle's view of the forage area. These large trees are considered hazards on a developed site and require removal; but would be allowed to remain without causing any hazard should the site remain undeveloped. (Below: eagles on perch trees at Moon Camp—5/23/19)

Eagles perched in a Moon Camp tree overlooking Big Bear Lake

Eagles perched in a Moon Camp tree overlooking Big Bear Lake

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

For the past two nesting seasons, viewers from around the country have been educated about bald eagles, nature, the San Bernardino Mountains and the Big Bear Valley through watching the nesting pair raising their chicks in real time via the nest camera. The unprecedented popularity of this eagle family has brought it to classrooms, workplaces, thousands of homes and news media across the country.

County planning is recommending approval of the zoning change and of this proposed project, in spite of the impact to bald eagles, saying that housing is more important. But we currently have over 600 houses for sale in our small valley! There is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

When this parcel was acquired by RCK Properties, Inc. it was zoned for Rural Living with a minimum lot size of 40 acres. RCK now wants that changed to accommodate 50 house sites, 3 new side roads and a 55-slip boat dock with a parking lot, dead center on the some of the best north shore bald eagle foraging area. RCK is requesting the County to change zoning for this land to accommodate their proposed Moon Camp project.

There are legal requirements for changing a Development Code zone including that the "amendment would not be detrimental to the public interest, health, safety, convenience, or welfare of the County."

- As a noted high fire risk area, homeowners are already having [homeowners insurance](#) cancelled
- Studies show increasing housing density on National Forest boundaries—known as the Urban-Wildland intermix—greatly increases fire risk of the whole area (this property borders National Forest)
- This area is ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency with more houses/airbnb's, residents, visitors and exit roads to the narrow curvy highway.
- Infrastructure, especially water is limited on the north shore, with a stand-alone water system and nearby wells that already run dry seasonally. To get an agreement for water service, this project spent over 10 years of questionable, back-room dealings with agencies.

View of Big Bear Lake from proposed Moon Camp site

View of Big Bear Lake from proposed Moon Camp site

WHAT YOU CAN DO...

Please share this [information](#) with everyone.

Please ask the County Supervisors to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and a rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved.

With all of the associated impacts, this zone change clearly does not fit the County's own requirements. To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors.

Endangered Ashy Gray Paintbrush on the Moon Camp site

Endangered Ashy Gray Paintbrush on the Moon Camp site

You can [download](#), [sign](#) and [email](#) or mail the letter posted here, with whatever additional comments you'd like to make...and please CC each official listed on the letter.

Ask your friends and family to send emails or letters, also.

If you are anywhere nearby, please attend the hearing before the Supervisors on October 8 in San Bernardino (385 N. Arrowhead Ave.) at 10 a.m.

(If you need a ride from Big Bear, email Sandy at fobbvinfo@gmail.com)

If you are willing to be more involved to help with anything, or if you have additional questions, please email Sandy at fobbvinfo@gmail.com.

Thank you for your assistance!

Subject: Proposed Moon Camp Development, October 8th Supervisors meeting.
Date: Sunday, September 29, 2019 4:46:37 AM

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would escalate the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Sincerely,

Kerry Konefal

Dear Supervisors:

I am asking you to **DENY** the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. **Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.**

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. **The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved.** With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would escalate the fire risk. **The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state.** This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. **Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.**

I urge you to deny this request in the interest of preserving the eagle habitat. I like many others have derived much joy from watching nature take place, seeing the lives of bald eagles on the Friends of Big Bear Valley webcam. It has led me to further educate myself on eagles and have found greater admiration and love for these birds. The fledglings already have a reduced life expectancy of nearly 50% within the first year of leaving the nest. Please don't contribute to the further decline of this species and deny the Moon Camp development in Fawnskin

Most sincerely,

Felicia Markham-Dickson

Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors,

Please pass this on to all voting members of your council.

There are so many homes available, why destroy this precious area? I have been watching the eagle cam for a few years now and have friends from all over the country and the WORLD watching your Big Bear. I will be talking even this evening with my step daughter in Australia, who has many of HER friends watching. Korea, Italy...all say "oh I would like to go to Big Bear to maybe spot the eagles".

This is a really foolish proposal. I don't know about all of the impacts this would have on on Big Bear and fire and environmental problems but I am sure there will be many. One fire could do you in!!!

I live in Redlands. We just had our homeowners insurance cancelled due to possible fire risk... if your foolish proposal goes through, what will it do to all of those who live in Big Bear currently? Will more of them have their insurance cancelled? will it drive them OUT of Big Bear?

Figure another way to get money for your city. Don't destroy what you have. IF this project goes through and ESPECIALLY if this endangers or pushes out your very precious residents, the eagles, you can be sure I and any of my friends will not be driving to Big Bear any more. I would think that many other followers of the Eagle Cam (which gain numbers every year) would do the same...so revenue from visitors, gone. There are certainly other mountain communities to visit.

Please don't let this pass.

Sent with much concern,
Lorrie D.

The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,
Michelle Norris

San Bernardino, CA 92415

ATTENTION: Clerk of the Board

SUBJECT: Proposed Moon Camp development, October 8 Supervisors' hearing -
Please DENY the detrimental zone change and project proposal for the Moon Camp
development in Fawnskin.

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site. I'm very distressed about this plan which would be so detrimental to what California is about. Everywhere you look California is ahead of everyone on emissions, and chemicals used in everything from makeup to household and they have held these high standards to protect the environment. These bald eagles are disappearing and why would you disturb them when the impact would mean a future with so few eagles. The eagles won't stand a chance since most nests have mishaps and not all the eagles survive. I thank you for your consideration to this matter.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary

would escalate the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

If I have forgotten to copy anyone that will be on the board please feel free to include them. Thanks.

Sincerely,

Mary Ann Rich

Dear Supervisors:

I am asking you to please deny the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would escalate the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

Charlotte Siboldi

Subject: Moon Camp Development
Date: Tuesday, October 01, 2019 7:35:11 PM

Dear Supervisors:

Like many, I watched the Eagle Cam religiously from the first hatch to Simba's first flight and the weeks prior to independence. I continue to check in for the occasional activity and look forward to nest building.

My knowledge of San Bernadino County is limited to travel on the Interstates so I was pleasantly surprised to learn of Big Bear Valley—a wonderful refuge for desert dwellers and those fleeing LA-Riverside-San Bernadino congestion. It is a good complement to Joshua Tree and Mojave Dessert. From what I can tell, this section of the lake gets moderate use on weekends while still retaining its natural beauty. The proposed development permanently changes that. The development will be exclusive, exclusionary and an intrusion on the environment.

I have family who lost everything in the Paradise Fire and live in an area susceptible to fire. Increase development in this environment is not smart.

I live in Central Oregon therefore am powerless to reflect my opinions at the ballot box. However, I send you this photo of a lake 25 minutes from my home to remind you of the beauty and importance of experiences in natural environments. Wouldn't it be wonderful to have a house here? Can you imagine a cluster of "high-end" condos and roads lacing through the bog and circumnavigating the shore? Not so nice. Most likely I couldn't afford it, wouldn't be able to enjoy the view anymore, and that person with money who could afford it would alter the ecology. Oregon legislators and citizens work hard to preserve the beauty of the state and usually get it right. Will you?

Sincerely,

Adrienne Phillips

Dear Supervisors -

I am a frequent vacationer and visitor to your beautiful neck of the woods from LA, and one of my favorite things to do there is hike in your glorious mountains...especially when I am able to sight one of your majestic bald eagles. I was absolutely shocked to hear about the Moon Camp development in Fawnskin.

It is my understanding the Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. It doesn't take a great deal of common sense to understand why! I would hate to think you'd sacrifice so much - including tourism dollars - simply to build more unnecessary homes in that location, when there are *plenty* of homes at various price points available now in the area.

I beg you to reconsider!

Most sincerely,

Lisa Jenkins

Date: Tuesday, October 01, 2019 2:44:23 PM

TO ALL CONCERNED:

I concur with the statement below from “Maureen” regarding further development on Big Bear Lake.

Is nothing sacred anymore? Many historical sites, whether restaurants and other prominent businesses, hillsides that have been habitats for various animals, etc., are being indiscriminately replaced or filled with condos, apartment buildings, mini-malls, or tightly packed residential structures, causing not only animals to be dislocated, but Californians who are fed up, and leave the state.

Politicians see fit to allow people to pour over the borders, promising “free everything.” But many of these people cannot find jobs when they arrive and are left homeless, some standing around businesses waiting for someone to come along and offer them a day of work for a pittance. As a result, the homeless create infested areas and health problems, though unintentionally. How is this helping them?

What ever happened to respect, order, dignity, striving for excellence, rather than the mishmash that Los Angeles has become? In fact, much of California! As an 83-year old fourth generation Californian, whose ancestry combines Spanish, French, English, Scottish, Irish, and bits of other ethnicities, it turns my stomach to see what has happened to this once beautiful state. Ancestors such as mine must be proverbially “restless in their graves” at what they once took great pride.

For the sake of leaving some preservation in these areas, leave Big Bear alone!

With unabashed sincerity,

Barbara L. Celello

[COB@sbcountry.gov](mailto:COB@sbcountry.gov). (San Bernadino County Board of Supervisors) to oppose an unnecessary housing development on Big Bear Lake which would impact and destroy trees and habitat for many species, including the *Bald Eagles (Jackie, Shadow, baby Simba)* we have been watching all year as they made their nest and raised a family. This would be destroyed by development and also housing is not needed there in this high fire risk area. The area would be irreparably changed and wildlife there will be uprooted. If you have a moment you can copy this letter, adding your name or write a brief comment to their main email or to their personnel. Thank you. Maureen

Subject: NO development in BIG BEAR

Supervisors:

We are APPALLED that the San Bernardino County Board would want to approve, even build, a large housing development in the Big Bear area which would adversely affect all the wildlife in the area, including the nesting BALD EAGLES (our National Bird) who use the surrounding area for breeding, food and habitation year round.

After watching the development of the Eagle Family in their nest for most of the year, it would be CRIMINAL to force this family and many other species to find other places to live, or stress them to death with the deforestation, lack of food, building of houses and human traffic. This area is already under duress and in order to preserve it, there must be NO DEVELOPMENT in the area where the ecosystem will be impacted in a devastatingly adverse way. RECONSIDER THIS PLAN. Big Bear does not need to become a mall, but must remain a forested area where the natural world and its inhabitants (who truly own it) can continue to thrive.

Sincerely, M. Solomon

Honorable Board of Supervisors,

I am in **FAVOR** of your **APPROVAL** of the Moon Camp Subdivision.

**Community Benefits include:**

- The **entire lakefront**, 2,588 l.f. will be a **PERMANENT EAGLE FORAGING AREA**.
- **15%** of the Subdivision, **9.6 acres**, will be set aside as **PERMANENT OPEN SPACE**.
- 891 l.f. of lakefront, 0.82 acres, will be **COMMUNITY LAKE ACCESS** for the Fawnskin Community.
- **\$3 million** of **Community Improvements - Water System, Fire Flow, Traffic, and Bike Lane**.
- **15 acres** of land **PERMANENTLY PROTECTED** in order to preserve Endangered and Sensitive Plants.

The Moon Camp Subdivision will be an incredible asset to our Eagles, our Endangered and Sensitive Plants, the Fawnskin Community and the entire Big Bear Valley.

Please **APPROVE** the **Moon Camp Subdivision**.

Please keep Fawnskin the way it is. Ive been coming to Fawnskin since I was 8 years old. I am 54 now and have lived here since 1993. I have raised my boys here as well. There are so many memories I have in Fawnskin, and would like to see Fawnskin preserved and kept in its natural beauty. I was here during the evacuations of two fires and it was absolutely terrifying. Fawnskin does not need the traffic and noise and fire danger that would come along with this project. Not to mention in that very spot where the eagles perch is the exact spot where my husband died and went into the lake. When we pass the spot my son says honk to say hi to dad, please don't take that away from him, it is a special memory that he will always have as the eagles are looking over his dad.

What Fawnskin needs is s few small businesses that will thrive. No bars, or Moose lodge. Definitely not 50 luxury homes.

I hope you all wil take this into considerstion. Thank you for your time.

---

Dear Supervisors,

As a California native who has lived in Seattle for the last 20 years, I have witnessed firsthand the effects of over-development. We've seen record traffic, pollution and the disappearance of wildlife. I'd like to add my voice to those of the people who are concerned about seeing the same thing in their area.

Sincerely,  
Rebecca Wolf-Nail

Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site. The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year.

Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.'

Without proper analysis, any management plan is invalid. Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be

conserved. With over 600 homes currently for sale in this small valley(150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles. Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency. To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Most sincerely,\_\_\_\_\_Rebecca Wolf-Nail\_\_\_\_\_

---

SB County Representatives,

I am sending you this correspondence to let you know how passionate I am about the cause to save the eagles and the pristine North Shore of Big Bear Lake. My grandparents first came to BB in 1925. I have been coming to Big Bear since I was a young girl in the 1950's. I have owned my own home up there and enjoyed the mountains with my parents, children and grandchild. I love the beauty of Big Bear and don't understand the need to build more houses on such a magnificent section of the north shore. There are many reasons I feel so strongly. Fire danger, evacuation problems, water shortage, and the Bald Eagle habitat. Have you ever viewed the eagle cam? Have you ever noticed that people from all over the world view the Big Bear eagles daily? What a wonderful representation of what Big Bear really stands for.

Please don't ruin the magnificent land just to collect more taxes. That is a very cold way to look at Big Bear and what people love about getting away to the beauty of the mountains.

Thank you for considering my passionate plea. Go up to Big Bear, stand on this property and then think, is rezoning really what your heart tells you to do?

Sincerely,

Susie Casey

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. I'm attaching a letter that was put together by people in the community you are elected by/appointed by and responsible for maintaining and protecting the environment. The content speaks for itself and perhaps will force aside the monetary visions you may have and return some compassion for the reason that Big Bear is such a beautiful piece of the world and the reasons you were sworn to protect it. There are fewer and fewer places for wildlife to have what is rightfully theirs; they fight for survival every day and man's continued encroachment is a threat to all lives in the National Forest.

Hopefully, you will regain your equilibrium and understand the greater commission you are charged with and find more appropriate ways to balance the needs of all. At first, they may not be as rewarding financially but they will be in the overall richness of the area; protecting the very things that attract tourism and honest responsible citizens.
