1. Cultural and Linguistic Competency

Cultural competence is defined as a set of congruent practice skills, knowledge, behaviors, attitudes, and policies that come together in a system, agency, or among consumer providers and professionals that enables that system, agency, or those professionals and consumer providers to work effectively in cross-cultural situations.

Providing mental health and substance use disorder treatment services in a culturally appropriate and responsive manner is fundamental in any effort to ensure success of high quality and cost-effective behavioral health services. Offering those services in a manner that fails to achieve its intended result due to cultural and linguistic barriers does not reflect high quality of care and is not cost-effective.
- g. To assist Contractor's efforts towards cultural and linguistic competency, DBH shall provide the following:
 - i. Technical assistance to Contractor regarding cultural competency implementation.

- a) Monitoring activities administered by DBH may require Contractor to demonstrate documented capacity to offer services in threshold languages or contracted interpretation and translation services.

DESCRIPTION OF PROGRAM SERVICES
MILITARY SERVICES AND FAMILY SUPPORT PROGRAM

I. BACKGROUND

The intent of the Mental Health Services Act (MHSA) (effective January 1, 2005) funding is “to reduce the long-term adverse impact on individuals, families, and state and local budgets resulting from untreated serious mental illness.” In addition, local mental health delivery systems have been charged to “create a state-of-the-art, culturally competent system that promotes recovery/wellness for adults and older adults with serious mental illness and resilience for children and youth with serious emotional disorders and their families.” The MHSA identified five (5) primary program components for funding that work to transform the mental health services system. The components include:

1. Community Services and Supports
2. Capital (buildings and housing) and Information Technology
3. Workforce Education and Training
4. Prevention and Early Intervention
5. Innovation

The Department of Behavioral Health (DBH) has embraced the transformational concepts inherent to the MHSA to develop a community-driven, culturally competent wellness focused Prevention and Early Intervention (PEI) Plan that targets individuals and families, with special attention to underserved communities. While prevention and early intervention can occur across the entire mental health intervention spectrum, the purpose of the PEI component of MHSA is to design programs at the early end of the spectrum.

PEI, as a whole, works to include program participants and their families in the planning, implementing, and evaluating of PEI programs. These programs are implemented in collaboration with other systems or organizations and delivered in natural community settings. All programs link individuals in need of additional services to appropriate mental health agencies, primary care providers, grassroots organizations, or local agencies for additional services as necessary.

The Military Services and Family Support (MSFS) Program is a program within the MHSA's PEI component. MSFS is categorized as both a Prevention and Early Intervention Program. MSFS provides mental health services to military service members and their families throughout San Bernardino County. The program has provided in-home screenings and assessments, case management and linkage, peer support groups, psychoeducation, and therapeutic mental health services using evidence-based practices since 2009.

II. PERSONS TO BE SERVED (TARGET POPULATION)

Contractor is expected to provide prevention and early intervention services to a minimum of 497 unduplicated participants per fiscal year. Contractor shall screen clients referred to

ADDENDUM I

them from various sources. Client referrals can come from military volunteer organizations, schools, juvenile justice system, primary healthcare clinics, and various San Bernardino County departments such as the Department of Children and Family Services (CFS) and DBH. In conjunction with DBH and the Department of Veterans Affairs, Proposer(s) shall develop admission policies and procedures regarding those persons who are eligible for services and shall provide a discharge plan for all cases that aids in the maintenance of a stable level of functioning. Cases will be discharged following completion of services, an acceptable level of stability, and linkage with support resources.

Target Population

Services through the Military Services and Family Support Program will be provided to the following population who are at risk of or are experiencing the early onset of a serious mental illness:

1. Active military members,
2. Veterans of military service,
3. Service members of the Reserves and National Guard,
4. Military family members including children, transitional age youth, and adults.

The population served will be reflective of the social, economic, and ethnic characteristics of the communities served by Contractor.

III. DESCRIPTION OF SPECIFIC SERVICES TO BE PROVIDED

A. Program Definitions

1. Access and Linkage to Treatment Program or Strategy – A set of related activities to connect children and youth with severe mental health concerns, as early in the onset of these conditions as practicable, to medically necessary care and treatment including, but not limited to, care provided by county mental health programs.
2. Community and/or Practice-Based Evidence – A set of practices that communities have used and determined to yield positive results by community consensus over time, which may or may not have been measured empirically.
3. Early Intervention Program – Treatment and other services and intervention, including relapse prevention, to address and promote recovery and related functional outcomes for a mental illness early in its emergence.
4. Evidence-Based Practices – Activities for which there is scientific evidence consistently showing improved mental health outcomes for the intended population including, but not limited to, scientific peer-reviewed research using randomized clinical trials.
5. Improve Timely Access to Mental Health Services for Individuals and/or Families from Underserved Populations Strategy – To increase the extent

ADDENDUM I

to which an individual or family from an underserved population, who needs mental health services because of risk or presence of a mental health concern, receives appropriate services as early in the onset as practicable, through program features such as accessibility, cultural and language appropriateness, transportation family focus, available hours, and cost of services.

6. Mental Health Services – The individual or group therapies and interventions that are designed to provide reduction of mental disability and restoration, improvement or maintenance of functioning consistent with the goals of learning, development, independent living and enhanced self-sufficiency and that are not provided as a component of adult residential services, crisis residential treatment services, crisis intervention, crisis stabilization, day rehabilitation, or day treatment intensive. Service activities may include but are not limited to assessment, collateral services, therapy, rehabilitation, and plan development.
7. Mental Health Services Act (MHSA) – MHSA, also known as Proposition 63, passed in November 2004. The Act provides funding to expand and support county mental health programs and addresses a broad continuum of prevention, early intervention, and service needs along with the necessary infrastructure, technology, and training elements that will effectively support this system.
8. Mental Illness/Mental Disorder – Syndrome characterized by clinically significant disturbance in the psychological or biological processes underlying mental functioning. Mental health concern is usually associated with significant distress or disability in social and other important activities. This is applicable to serious emotional disturbance for individuals under the age of 18, other than a primary substance use disorder or developmental disorder, which is inappropriate to the individual's age according to expected developmental norms.
9. Non-Stigmatizing and Non-Discriminatory Strategy – Promoting, designing, and implementing Programs in ways that reduce and circumvent stigma, including self-stigma, and discrimination related to being diagnosed with a mental health concern, having a mental health concern, or seeking mental health services, and making services accessible, welcoming, and positive.
10. Outreach for Increasing Recognition of Early Signs of Mental Illness – The process of engaging, encouraging, educating, and/or training, and learning from, potential responders about ways to recognize and respond effectively to early signs of potentially severe and disabling mental illness.
11. Post-Traumatic Stress Disorder (PTSD) – A debilitating condition that often follows a terrifying physical or emotional event causing the person

ADDENDUM I

who survived the event to have persistent, frightening thoughts and memories, or flashbacks, of the ordeal. Persons with PTSD often feel chronically, emotionally numb. Once referred to as "shell shock" or "battle fatigue."

12. Prevention and Early Intervention (PEI) Component – PEI is one of the five components under the Mental Health Services Act (MHSA). The purpose of the PEI component is to design programs intended to prevent mental health conditions for those at risk of developing a severe mental illness and/or improving individuals' mental health concerns in the early stages of development before they become severe.
13. Prevention Program – Program offering a set of related activities to reduce risk factors for developing a potentially serious mental health concern and to build protective factors.
14. Program – A stand-alone organized and planned work, action, or approach that evidence indicates is likely to bring about positive mental health outcomes for individuals and families with or at risk of serious mental illness or for the mental health system.
15. Promising Practices – Activities for which there is research demonstrating effectiveness, including strong quantitative and qualitative data showing positive outcomes, but the research does not meet standards used to establish evidence-based practices and does not have enough research or replication to support generalizable positive public health outcomes.
16. Risk Factors – Conditions or experiences that are associated with a greater than average risk of developing a potentially serious mental health concern. Risk factors include, but are not limited to, biological including family history and neurological, behavioral, social/economic, and environmental.
17. B. Program Objective

Data analysis has shown that military personnel returning from active duty have a higher risk of suicide than that of the general population. Diverse children in these families also face adjustment difficulties and vulnerabilities as they live with challenges that include frequent moves and the process of reintegration. In addition, the men and women who have returned from active duty carry the emotional scars of prolonged battle fatigue and possibly Post-Traumatic Stress Disorder (PTSD).

This Program will be delivered in the clients' homes when desired or within the community, increasing the likelihood that military personnel will use the services, while reducing the stigma of seeking mental health services.

1. The MSFS Program includes two main components for military families:
 - a. Prevention – These services and activities will be aimed at reducing risk factors for developing a potentially serious mental illness while building protective factors. Prevention services include:
 - i. Screenings and assessments for possible mental health needs.
 - ii. Linkage and case management services. Referrals will be made to other program services and/or higher levels of care.

ADDENDUM I

- iii. Education services in which Contractor will provide group sessions utilizing DBH approved curriculum that focuses on increasing and improving mental health awareness, self-awareness, resiliency, adjustment awareness, coping skills, problem solving, anger management, and deployment issues.
 - iv. Supportive group sessions, including peer to peer support groups, in which Contractor will provide formal and informal sessions to address the needs of military service members and their families, including suicide prevention education.
 - v. Individual and family peer mentoring and education in which Contractor will provide education to individual participants or as a family unit to address the needs of the individual or the family.
 - vi. Relapse prevention for individuals in recovery from a serious mental illness.
- b. Early Intervention – These services, treatments, and interventions will be aimed at addressing and promoting recovery and related functional outcomes for a mental illness early in its emergence. Services will also be provided to individuals identified as experiencing the first onset of a serious mental illness or emotional disturbance with psychotic features. Early intervention services will be offered for up to eighteen months unless the individual receiving the service is identified as experiencing the first onset of a serious mental illness or emotional disturbance with psychotic features, in which case early interventions services shall not exceed four years. Early Intervention services include:
- i. Clinical assessments in which Contractor will provide bio-psychosocial assessments for individuals presenting signs of early onset of a mental illness. Clinical assessments will be completed during the initial intake period and updated at any point if additional significant information becomes available. Contractor will utilize an appropriate client assessment form approved by DBH.
 - ii. Mental health outpatient behavioral health treatment services to individuals, couples, and families.
 - iii. Contractor will utilize Child and Adolescent Needs and Strengths (CANS) which is used for children ages 0-17 receiving behavioral health treatment, and Adults Needs and Strengths Assessment (ANSA) which is used for individuals aged 18 and over, to provide useful information on clinical outcomes that inform the broader Program outcomes.

ADDENDUM I

- Initial CANS and ANSA will be completed within the first thirty (30) days of intake.
 - Updated assessments will be completed every three or six months, depending on the intensity of the Program.
 - CANS and ANSA data will be entered into Objective Arts, or any other secured data collection and reporting system designated by DBH, within five (5) days after the CANS and ANSA are administered.
- iv. Contractor will utilize the Post-Traumatic Stress Disorder (PTSD) Checklist for DSM-5 (PCL-5) to measure symptom improvement over course of treatment.
 - v. Plan development using measurable goals that are meaningful to the individual consumer. Plans will be completed within the first two months and post evaluations will be conducted at the end of activities. Within 30 days before the end of every service period, a new, rewritten plan will be required for any continuing services.
 - vi. Relapse prevention for individuals in recovery from a serious mental illness.
 - vii. Linkage and case management services. Referrals will be made to other program services and/or higher levels of care.
 - viii. Crisis intervention services.
2. The Military Services and Family Support Program also includes the following three strategies:
- a. Access and Linkage to Treatment Strategy – Contractor will connect children, adults, and seniors with severe mental illness, as early in the onset of these conditions as practical, to medically necessary care and treatment, including but not limited to care provided by County mental health programs.
 - b. Improve Timely Access to Services for Underserved Populations Strategy – Contractor will implement strategies to increase the extent to which an individual or family from an underserved population, who needs mental health services because of risk or presence of a mental illness, receives appropriate services, as early in the onset as practical, through Program features such as:
 - i. Accessibility.
 - ii. Cultural and/or language appropriateness.
 - iii. Family focus.
 - iv. Available hours.

ADDENDUM I

- c. Non-Stigmatizing and Non-Discriminatory Strategies – Contractor will ensure that services are provided and promoted in ways that reduce and circumvent stigma, including self-stigma, and discrimination related to being diagnosed with a mental illness, having a mental illness, or seeking mental health services, and making services accessible, welcoming, and positive through approaches that include:
- i. Using factual messages and approaches with a focus on recovery, wellness, and resilience.

 - iv. Co-locating mental health services with other life resources.
 - v. Promoting positive attitudes and understanding of recovery among mental health providers.
 - vi. Inclusion and welcoming attitudes of family members.
 - vii. Employment of peers in a range of roles.

All services, treatments, and interventions will be provided using evidence-based practices, promising practices, and/or community/practice-based activities approved by DBH.

Collaboration will include participation in and support of regional community outreach events planned by the Department of Veterans Affairs. This may include, but is not limited to: assistance in planning, facilitating and presenting at various events.

Referrals and/or services to resources may be provided, depending on need, including addressing financial needs, referrals to food banks, and job coaching, etc.

2. Server Security. Servers containing unencrypted DBH PHI or PI must have sufficient administrative, physical, and technical controls in place to protect that data, based upon a risk assessment/system security review.
3. Minimum Necessary. Only the minimum necessary amount of DBH PHI or PI required to perform necessary business functions may be copied, downloaded, or exported.
4. Removable Media Devices. All electronic files that contain DBH PHI or PI data must be encrypted when stored on any removable media or portable device (i.e. USB thumb drives, floppies, CD/DVD, Blackberry, backup tapes, etc.). Encryption must be a FIPS 140-2 certified algorithm which is 128bit or higher, such as AES.
5. Antivirus / Malware Software. All workstations, laptops and other systems that process and/or store DBH PHI or PI must install and actively use comprehensive anti-virus software / Antimalware software solution with automatic updates scheduled at least daily.

ATTACHMENT II

6. Patch Management. All workstations, laptops and other systems that process and/or store DBH PHI or PI must have all critical security patches applied with system reboot if necessary. There must be a documented patch management process which determines installation timeframe based on risk assessment and vendor recommendations. At a maximum, all applicable patches must be installed within thirty (30) days of vendor release. Applications and systems that cannot be patched within this time frame due to significant operational reasons must have compensatory controls implemented to minimize risk until the patches can be installed. Application and systems that cannot be patched must have compensatory controls implemented to minimize risk, where possible.
7. User IDs and Password Controls. All users must be issued a unique user name for accessing DBH PHI or PI. Username must be promptly disabled, deleted, or the password changed upon the transfer or termination of an employee with knowledge of the password. Passwords are not to be shared. Passwords must be at least eight characters and must be a non-dictionary word. Passwords must not be stored in readable format on the computer. Passwords must be changed at least every ninety (90) days, preferably every sixty (60) days. Passwords must be changed if revealed or compromised. Passwords must be composed of characters from at least three of the following four groups from the standard keyboard:
 - a. Upper case letters (A-Z)
 - b. Lower case letters (a-z)
 - c. Arabic numerals (0-9)
 - d. Non-alphanumeric characters (special characters)
8. Data Destruction. When no longer needed, all DBH PHI or PI must be wiped using the Gutmann or U.S. Department of Defense (DoD) 5220.22-M (7 Pass) standard, or by degaussing. Media may also be physically destroyed in accordance with NIST Special Publication 800-88. Other methods require prior written permission of DBH's Office of Information Technology.
9. System Timeout. The system providing access to DBH PHI or PI must provide an automatic timeout, requiring re-authentication of the user session after no more than twenty (20) minutes of inactivity.
10. Warning Banners. All systems providing access to DBH PHI or PI must display a warning banner stating that data is confidential, systems are logged, and system use is for business purposes only by authorized users. User must be directed to log off the system if they do not agree with these requirements.
11. System Logging. The system must maintain an automated audit trail which can identify the user or system process which initiates a request for DBH PHI or PI, or which alters DBH PHI or PI. The audit trail must be date and time stamped, must log both successful and failed accesses, must be read only, and must be restricted to authorized users. If DBH PHI or PI is stored in a database, database logging functionality must be enabled. Audit trail data must be archived for at least ten (10) years from the final date of the contract period or from the date of completion of any audit, whichever is later.
12. Access Controls. The system providing access to DBH PHI or PI must use role based access controls for all user authentications, enforcing the principle of least privilege.
13. Transmission Encryption. All data transmissions of DBH PHI or PI outside the secure internal network must be encrypted using a FIPS 140-2 certified algorithm which is 128bit or higher, such as AES. Encryption can be end to end at the network level, or the data files containing DBH PHI can be encrypted. This requirement pertains to any type of DBH PHI or PI in motion such as website access, file transfer, and E-Mail.
14. Intrusion Detection. All systems involved in accessing, holding, transporting, and protecting DBH PHI or PI that are accessible via the Internet must be protected by a comprehensive intrusion detection and prevention solution.

C. Audit Controls

1. System Security Review. Contractor must ensure audit control mechanisms that record and examine system activity are in place. All systems processing and/or storing DBH PHI or PI must have at least an annual system risk assessment/security review which provides assurance that administrative, physical, and technical controls are functioning effectively and providing adequate levels of protection. Reviews should include vulnerability scanning tools.
2. Log Review. All systems processing and/or storing DBH PHI or PI must have a routine procedure in place to review system logs for unauthorized access.
3. Change Control. All systems processing and/or storing DBH PHI or PI must have a documented change control procedure that ensures separation of duties and protects the confidentiality, integrity and availability of data.

D. Business Continuity/Disaster Recovery Controls

1. Emergency Mode Operation Plan. Contractor must establish a documented plan to enable continuation of critical business processes and protection of the security of DBH PHI or PI held in an electronic format in the event of an emergency. Emergency means any circumstance or situation that causes normal computer operations to become unavailable for use in performing the work required under this Agreement for more than 24 hours.
2. Data Backup Plan. Contractor must have established documented procedures to backup DBH PHI to maintain retrievable exact copies of DBH PHI or PI. The plan must include a regular schedule for making backups, storing backups offsite, an inventory of backup media, and an estimate of the amount of time needed to restore DBH PHI or PI should it be lost. At a minimum, the schedule must be a weekly full backup and monthly offsite storage of DBH data.

E. Paper Document Controls

1. Supervision of Data. DBH PHI or PI in paper form shall not be left unattended at any time, unless it is locked in a file cabinet, file room, desk or office. Unattended means that information is not being observed by an employee authorized to access the information. DBH PHI or PI in paper form shall not be left unattended at any time in vehicles or planes and shall not be checked in baggage on commercial airplanes.
2. Escorting Visitors. Visitors to areas where DBH PHI or PI is contained shall be escorted and DBH PHI or PI shall be kept out of sight while visitors are in the area.
3. Confidential Destruction. DBH PHI or PI must be disposed of through confidential means, such as cross cut shredding and pulverizing.
4. Removal of Data. Only the minimum necessary DBH PHI or PI may be removed from the premises of Contractor except with express written permission of DBH. DBH PHI or PI shall not be considered "removed from the premises" if it is only being transported from one of Contractor's locations to another of Contractor's locations.
5. Faxing. Faxes containing DBH PHI or PI shall not be left unattended and fax machines shall be in secure areas. Faxes shall contain a confidentiality statement notifying persons receiving faxes in error to destroy them. Fax numbers shall be verified with the intended recipient before sending the fax.
6. Mailing. Mailings containing DBH PHI or PI shall be sealed and secured from damage or inappropriate viewing of such PHI or PI to the extent possible.

Mailings which include 500 or more individually identifiable records of DBH PHI or PI in a single package shall be sent using a tracked mailing method which includes verification of delivery and receipt, unless the prior written permission of DBH to use another method is obtained.
