8. **CONFIDENTIAL INFORMATION.**

- 8.1. Treatment and Protection. Each Party agrees to (a) use the Confidential Information solely to perform or to exercise its rights under this Agreement, and (b) not to purposely transfer, display, convey or otherwise disclose or make available all or any part of such Confidential Information to any third party (other than the receiving Party's directors, officers, employees or agents to the extent such persons are bound by equivalent confidentiality commitments and have a legitimate need to know the Confidential Information in order for the receiving Party to perform its obligations or exercise its rights under this Agreement), except as required by applicable law. Each Party shall take the same measures to protect against the disclosure or use of the Confidential Information as it takes to protect its own proprietary or confidential information, but in any case, no less than reasonable measures.
- 8.2. Exclusions. The term "Confidential Information" shall not include information that is: (a) in the public domain through no fault of the receiving Party or of any other person or entity that is similarly contractually or otherwise; (b) obtained independently from a third party without an obligation of confidentiality to the disclosing Party and without breach of this Agreement; or (c) independently developed by the receiving Party without reference to the Confidential Information of the disclosing Party.
- 8.3. Disclosures Required by Law. The receiving Party may disclose the Confidential Information of the other in response to a valid court order, law, rule, regulation (including any securities exchange regulation), or other governmental action provided that to the extent legally permissible, (a) the disclosing Party is promptly notified in writing prior to disclosure of the information, and (b) the receiving Party assists the disclosing Party, at the disclosing Party's expense, in any attempt by the other to limit or prevent the disclosure of the Confidential Information. Unless the subpoena or process is timely limited, quashed or extended, the receiving Party will then be entitled to comply with the request to the extent permitted by law.
- 8.4. Remedies Upon Breach. Except as otherwise provided hereunder, the remedies provided under this Agreement are not exclusive of the remedies available to the Parties at law or in equity. Without limiting the foregoing, each Party agrees that the other Party shall have no adequate remedy at law if there is a breach or threatened breach of this Section 8 and that breach of the obligations imposed by this Agreement under this Section 8 may cause

irreparable harm or injury to the other Party and, accordingly, that either Party shall be entitled (in addition to any legal or equitable remedies available to such Party) without the requirement of posting bond or other security, to seek and obtain injunctive or other equitable relief to prevent or remedy such breach or threatened breach.

- 8.5. Return or Destruction. Upon the termination or expiration of this Agreement or upon the earlier request of the disclosing Party, the receiving Party shall (a) at its own expense, (i) promptly return to the disclosing Party all tangible Confidential Information (and all copies thereof) of the disclosing Party, or (ii) upon written request from the disclosing Party or if return is not practical given the circumstances, destroy such Confidential Information and provide the disclosing Party with written certification of such destruction, and (b) cease all further use of the other Party's Confidential Information, whether in tangible or intangible form.

9. DISCLAIMER OF WARRANTIES. EXCEPT AS EXPRESSLY SET FORTH IN SECTIONS 5.2, 5.3, AND 5.4, NEITHER PARTY MAKES ANY EXPRESS OR IMPLIED WARRANTIES, CONDITIONS OR REPRESENTATIONS TO THE OTHER PARTY WITH RESPECT TO THE APPLICATION PROVIDED HEREUNDER OR OTHERWISE REGARDING THIS AGREEMENT, WHETHER ORAL OR WRITTEN, EXPRESS, IMPLIED OR STATUTORY. WITHOUT LIMITING THE FOREGOING, ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, AND THE IMPLIED WARRANTY OR CONDITION OF FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY EXCLUDED AND DISCLAIMED.

10. **INDEMNIFICATION.** Dovetail will defend Customer against any claim, demand, suit or proceeding ("**Claim**") made or brought against Customer by a third party alleging that the use of the Application as permitted under this Agreement infringes or misappropriates the IP Rights of a third party, and shall indemnify Customer for any damages finally awarded against Customer, and for reasonable attorney fees incurred by Customer. These obligations apply only if Customer immediately notifies Dovetail in writing of the Claim and cooperates with Dovetail in defending or settling the Claim. Dovetail can control the defense and settlement and may procure the right for Customer to use or modify the Application so it is non-infringing. If in Dovetail's judgment, these options are unreasonable, Dovetail may terminate this Agreement. If the Claim results from modifications made by Customer or from Customer's breach of this Agreement, Dovetail has no obligation to defend or indemnify and Customer will defend and indemnify Dovetail against the Claim for Dovetail's costs, attorney's fees, and damages. Customer shall defend Dovetail against any Claim made or brought against Dovetail by a third party alleging that Customer Data or Customer's use of the Application in violation of this Agreement infringes or misappropriates the IP Rights of a third party, or violates applicable law, and shall indemnify Dovetail for any damages finally awarded against Dovetail, and for reasonable attorney fees incurred by Dovetail in connection with any such Claim, provided that Dovetail immediately gives Customer written notice of the Claim and gives Customer sole control of the defense and settlement of the Claim provided that Customer cannot settle any Claim unless the settlement unconditionally releases Dovetail of all liability.

11. LIMITATION OF LIABILITY.

- 11.1. **LIMITATION OF LIABILITY. NOTWITHSTANDING ANYTHING TO THE CONTRARY SET FORTH ELSEWHERE IN THIS AGREEMENT, EXCEPT FOR: 1) THE INDEMNIFICATION OBLIGATIONS CONTAINED IN SECTION 10; 2) CLAIMS FOR BODILY INJURY, DEATH OR DAMAGE TO TANGIBLE PERSONAL PROPERTY TO THE EXTENT RESULTING FROM THE OTHER PARTY'S ACTIONS, OR 3) CUSTOMER'S PAYMENT OBLIGATIONS PURSUANT TO SECTION 6.2, IN NO**

EVENT SHALL EITHER PARTY'S AGGREGATE LIABILITY ARISING OUT OF THIS AGREEMENT, WHETHER IN CONTRACT, TORT OR OTHERWISE, EXCEED THREE HUNDRED THOUSAND DOLLARS (US\$300,000).

- 11.2. **EXCLUSION OF DAMAGE.** IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER PARTY (OR THE INDEMNIFIED PARTIES OF SUCH PARTY) FOR ANY INDIRECT, CONSEQUENTIAL, INCIDENTAL, SPECIAL OR PUNITIVE DAMAGES, INCLUDING (WITHOUT LIMITATION) LOSS OF PROFIT, INCOME OR SAVINGS, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

12. **TERMINATION.**

- 12.1. **Termination.** Either Party may terminate this Agreement for cause in the event that the other Party fails to cure a material breach of this Agreement within thirty (30) days after receiving written notice thereof.
- 12.2. **Effect of Termination.** In the event this Agreement is terminated pursuant to this Section 12, (a) the terminating Party may pursue any and all remedies available to it under this Agreement, at law or in equity, as the remedies stated herein are cumulative and in addition to any remedies available at law or equity; (b) Dovetail shall immediately stop the affected work hereunder and cause any of its suppliers or subcontractors to cease such work; (c) Customer's liability shall be limited to the price for all products and Services delivered to and, if applicable, accepted by Customer prior to the effective date of termination; and (d) upon Customer's written request and subject to Dovetail's agreement and the hourly rates agreed to in Exhibit B, Dovetail will reasonably cooperate with Customer to provide the Termination Assistance Services as described herein.
- 12.3. **Survival.** The following Sections shall survive the expiration or termination of this Agreement: Section 8 (Confidential Information), Section 9 (Disclaimer of Warranties), Section 10 (Indemnification), Section 11 (Limitation of Liability), Section 13 (Miscellaneous) and this Section 12.3 (Survival).
- 12.4. **Termination Assistance.** In the event of the expiration or any whole or partial termination of this Agreement or a Statement of Work, upon Customer's written request and Dovetail's agreement, such agreement not to be withheld unreasonably, Dovetail will provide during the Termination Assistance Period the Termination Assistance Services. Customer will pay for the Termination Assistance Services on a time and materials basis, at the hourly rates agreed to in Exhibit B.

13. **MISCELLANEOUS.**

- 13.1. **Export Compliance.** Each Party shall comply with the export laws and regulations of the United States and other applicable jurisdictions in providing and using the Application.
- 13.2. **Successors and Assigns.** This Agreement shall be binding upon and shall inure to the benefit of the permitted successors and assigns of each Party hereto. Dovetail may not assign, subcontract, delegate or otherwise convey this Agreement, or any of its rights and obligations hereunder, to any entity without the prior written consent of Customer, which consent shall

not be unreasonably withheld or delayed, and any such attempted assignment, subcontracting, delegation or conveyance without consent shall be void.

- 13.3. Force Majeure. Unless otherwise specified in this Agreement, and except for Customer's payment obligations for undisputed charges as stated in Section 6.3 hereunder, neither Party will be liable for delays or failure in its performance hereunder to the extent that such delay or failure is caused by an event beyond the reasonable control of that Party, including but not limited to acts of God, war, natural disaster, strike, lockout, labor dispute, work stoppage, fire, third-party criminal act, quarantine restriction or act of government (a "**Force Majeure Event**"). In the event a Force Majeure Event continues for more than thirty (30) days within any six (6) month period, the other Party shall have the right, at its option, to immediately terminate this Agreement by giving the Party whose performance is so delayed or fails written notice of such election to terminate. In addition, Customer's payment obligations hereunder shall be suspended for any period that Dovetail's performance hereunder is delayed or fails due to a Force Majeure Event.
- 13.4. Entire Agreement; Amendment. This Agreement and all Exhibits hereto constitute the entire agreement between the Parties with respect to the subject matter and supersede any prior or contemporaneous agreement or understanding, whether written or oral, if any, between the Parties with respect to such subject matter. - 13.5. Notices. All notices, reports, invoices and other communications required or permitted hereunder to be given to or made upon any Party hereto in writing, shall be addressed as provided below and shall be considered as properly given if (a) sent by an express courier delivery service which provides signed acknowledgments of receipt; or (b) deposited in the U.S. certified or registered first class mail, postage prepaid, return receipt requested. All notices shall be effective upon receipt. For the purposes of notice, the addresses of the Parties shall be as set forth below; provided, however, that either Party shall have the right to change its address for notice hereunder to any other location by giving not less than five (5) days' prior written notice to the other Party in the manner set forth above.

The parties agree that the venue of any action or claim brought by any party to this Agreement will be the Superior Court of California, San Bernardino County, San Bernardino District. - 13.9. Waiver. The failure of either Party to insist upon strict performance or to seek remedy for breach of any term or condition of this Agreement, or to exercise any right, remedy or election set forth herein or permitted by law or equity, shall not constitute nor be construed as a waiver or relinquishment in the future of such term, condition, right, remedy or election. Any consent, waiver or approval by either Party of any act or matter shall not be effective unless made in writing and signed by an officer of the consenting, waiving or approving Party.
- 13.10. Counterparts; Execution. DOVETAIL SOFTWARE INFORMATION SECURITY PROGRAM

Overview

The purpose of this Information Security Program is to provide an overview of the policies, standards and procedures that protect Dovetail Software's customer information as part of their Employee Engagement Suite SaaS application. The intent of the Program is to provide effective security balanced with the need to remain a competitive SaaS product, and a successful company. Dovetail Software exercises independent authority for establishing and executing its information security program.

It is the collective responsibility of all users to ensure:

- Confidentiality of information which Dovetail Software must protect from unauthorized access
- Integrity and availability of information stored on or processed by Dovetail Software information systems
- Compliance with applicable laws, regulations, and Dovetail Software policies governing information security and customer data privacy protection

The organization's policies and activities that make up a security program are the responsibility of senior management, not the sole responsibility of one individual. The Chief Security Officer has overall responsibility of the organization's Information Security Program, yet other policies and programs developed by other individuals within the organization also support the Information Security Program.

Scope

The program applies to all users, all information assets, facilities, applications, systems and network resources used by Dovetail Software to provide support and services to customers of the Dovetail Employee Engagement Suite SaaS application.

Management Commitment

Dovetail Software Executives oversee the risks we take as a company. The Chief Security Officer oversees, among other things, our enterprise-wide Information Security Program, which outlines the policies, processes and governance structures used to execute the Dovetail Software's approach to information security and data privacy. As part of this oversight, executives within Dovetail Software are committed to information security and data privacy of our clients' data. Working closely with the Chief Security Officer, they provide the ability to implement, manage and create the effective security controls - both technical and operational - to ensure we exceed our client's expectations with regards to data security and privacy.

Senior Management Roles and Responsibilities

Chief Security Officer

Overall, responsible for the security of all Dovetail operations. Directs all security aspects of Dovetail Software, maintaining ownership and approval of all security programs and policies within the organization. Maintains final approval for any and all access to customer data.

VP of Engineering

Responsible for leading, planning, and implementing all development and engineering activities for Dovetail Software, which includes design, development, operations, testing and production implementations of our technology offerings. Responsible for ensuring all security program and policies are followed by the team, such as secure development and testing practices, security configuration and hardening of the infrastructure, along with oversight of access permissions within the development and operations teams.

Director of Customer Operations

Responsible for all customer facing activities from engagement through support, including customer onboarding, customer configuration, training, customer implementation and go-live transition activities. Responsible for ensuring all security program and policies are followed by the team, such as safe handling of customer data, customer training regarding support engagement to ensure the security of customer data, and oversight of access permissions within the implementation and support teams.

Security Organization and Governance

Information security cannot be treated solely as a technology issue. Based on the company's dependence on information technology and information technology-based controls, information and information technology security risks increasingly contribute to operational and reputational risk. Information security is an intrinsic part of governance and consists of the leadership, organizational structures and processes that safeguard Dovetail Software's information, its operations, its market position, and its reputation.

Security Standards and Best Practices

There are a wide variety of federal government laws, regulations, and guidance along with industry best practices that define the essential elements of an effective security program. An effective program includes many elements found in security documentation published by the National Institute of Standards and Technology (NIST), the Office of Management and Budget (OMB), the National Security Agency (NSA), and the General Accounting Office (GAO), and Cloud Security Alliance (CSA), just to name a few. We will use these frameworks as best practice guides as part of our security policies and overall security program.

National Institute of Standards and Technology (NIST)

The National Institute of Standards and Technology (NIST) has developed a library of guidance and standards (<http://csrc.nist.gov/publications/>) which can be used to help organize an information security program to protect an organization's information technology assets. The NIST Special Publications (SP), 800 series, established in 1990, provides research and guidance in computer security working with industry, government, and academic organizations. These documents provide approved guidance that the organizations within the federal government are now required to follow.

International Organization for Standardization

The ISO 17799 standard is a detailed security standard that lists ISO identified best practices of the information security arena. The international standard is composed of two parts, ISO 17799 - a method of practice and BS-7799-2 - specifications for an information management system. The standard is organized into ten major sections covering different aspects of information security.

- Business Continuity Planning
- System Access Control
- System Development and Maintenance
- Physical and Environmental Security
- Compliance
- Personnel Security
- Security Organization
- Computer & Network Management
- Asset Classification and Control
- Security Policy

Many organizations accept the ISO 17799 as reputable standards to use for constructing an information security program.

SANS (SysAdmin, Audit, Network, Security)

SANS is an established institute recognized for its research, education, and certification of individuals in the information security profession. SANS also provides a medium for these professionals to share their lessons learned. This community is made of individuals working in government, educational and civil organizations from around the world. SANS supports many ongoing programs to promote secure computing environments using best practices that have been identified, discussed, and validated by the information security professionals. Security Consensus Operational Readiness Evaluation (SCORE) is an effort between SANS and the Center for Internet Security (CIS) to promote these best practices (<http://www.sans.org/score/>) and make them available to the security community at large.

Cloud Security Alliance

The Cloud Security Alliance (CSA) is the world's leading organization dedicated to defining and raising awareness of best practices to help ensure a secure cloud computing environment. CSA harnesses the subject matter expertise of industry practitioners, associations, governments, and its corporate and individual members to offer cloud security-specific research, education, certification, events and products. CSA's activities, knowledge and extensive network benefit the entire community impacted by cloud — from providers and customers, to governments, entrepreneurs and the assurance industry — and provide a forum through which diverse parties can work together to create and maintain a trusted cloud ecosystem.

Center for Internet Security

The Center for Internet Security (CIS) is a non-profit organization that provides other organizations methods and tools to improve, measure, monitor, and compare the security status of an organization's Internet-connected systems and appliances. The CIS works with a large member group consisting of vendors and individual users that identify security threats that are of concern to the members in the group. Working with the member community, and as stated by the CIS web page, the CIS makes available Internet security benchmarks that are "based on recognized best practices for deployment, configuration, and operation of network systems." The CIS' benchmarks are developed in an attempt to cover three factors in Internet-based attacks: technology, processes, and human behavior. All benchmarks are made available to the public and be found at <http://www.cisecurity.org/benchmarks.html>.

Information Security Policies

Policies are developed and executed, and expectations are set for protecting Dovetail Software information assets. These policies are high-level statements of principle that provide technology direction to Dovetail Software. In collaboration with the Dovetail management team, the Chief Security Officer (CSO) leads efforts to develop, approve, and launch a suite of information security policies based upon the industry's best practices in information security. These policies, standards and guidelines formally establish the Dovetail's Information Technology Security Program and set forth employee responsibility for information protection. Ongoing policy development is driven by Dovetail Software directives, new legislation and regulations, audit findings, risk assessment and corporate strategic planning and initiatives. A complete list of Dovetail Software Information Security Policies is provided to all Dovetail Software employees.

Risk Management

Dovetail continually assesses risk as part of its ongoing commitment to security. Regular evaluation and audit of existing and proposed security processes are fundamental to a quality information security program. As new risks are identified, proper planning, development and implementation of more effective security controls - both procedural and technical - greatly enhance Dovetail's ability to stay on top of security related issues.

Personnel Security

In addition to defining security roles and responsibilities, personnel security is addressed through pre-employment screenings, clear position descriptions, terms of employment, and security awareness training. Additionally, personnel with access to customer data are senior, very experienced and security-minded individuals.

Security Awareness Training

The focus of security awareness at Dovetail Software is aimed at creating an attitude towards a commitment to good security practices and facilitating a climate that sees security rules as beneficial to the protection of Dovetail and more importantly, it's customers. Users must formally acknowledge their responsibilities through the acceptance of a statement on the terms of use of information technology resources. Training is required on an annual basis. Security awareness information is provided to all employees with access to the Dovetail hosted environment. Communication regarding email scams, phishing attempts and other malicious actions are made available to inform users of possible threats.

Physical Security

Dovetail Software utilizes its cloud provider, Amazon Web Services (AWS), to process and store its customer's data. AWS maintains all physical security controls for their data centers and Dovetail is never permitted onsite at an AWS facility. At no time and under no circumstances is Dovetail customer

data removed from Dovetail's AWS facilities. Keeping this data within the physical boundaries of AWS allows Dovetail to leverage the physical security capabilities of AWS to keep customer data safe.

Identity Management

Dovetail Software maintains a secure technical environment which require unique identifying credentials in order to gain access and authorization. These credentials are managed through a central identity and password management system which employs multi-factor authentication. All identifying credentials provided must be authorized by the Chief Security Officer.

Access Control

Access to information technology resources is controlled on the basis of business need and security requirements, following the principle of least privilege. Passwords are managed through a formal process, a centralized password management system and secure log-on procedures. Duties are separated to protect systems and data. Access rights are audited at regular intervals.

Incident Management

The process for responding to security incidents is identified in the *Security Incident Handling Policy*. Security incidents are managed by the Information Security Team who ensures that security incidents are promptly reported, investigated, documented and resolved in a manner that restores operation quickly and, if required, maintains evidence for further disciplinary, legal, or law enforcement actions. Specific roles and responsibilities have been identified for the Information Security Team, including those for communication with law enforcement or outside agencies (if necessary) and our customers. It is every employee's responsibility to maintain acute security incident awareness and support the needs of the Information Security Team in their efforts of prevention, management and resolution.

Contingency Planning

Contingency planning is conducted to minimize the impact and loss of information assets in the event of a disaster. Business continuity plans are developed to understand risks and to identify and prioritize critical business processes. An overall strategy is developed for crisis management, recovery and restoration. Plans are formalized with agreements as to the required service level commitments, or RTO/RPO metrics. Continuity plans are tested regularly to ensure that they are up to date and effective.

Policy Enforcement

The Chief Security Officer will ensure that suspected violations and resultant actions receive the proper and immediate attention of the appropriate law enforcement, outside agencies, and/or disciplinary processes. Allegations against employees that are sustained may result in disciplinary action. Such actions will be handled as noted in each specific information security policy. Non-compliance may result in personal, criminal, civil, or other administrative liability.

Program Management

The Information Security Program for Dovetail Software conducts itself using the following principles to remain an effective program:

Collaboration: We seek input, advice, thoughts, ideas from all Dovetail employees regarding security by whatever means possible. This type of proactive, inclusive environment supports the high level of commitment we have to information security.

Planning: We identify and prioritize security requirements, based on business objectives, the threat and risk environment, and compliance requirements. We develop a security program aligned with our business needs.

Governance: We have established an effective governance process for making decisions and assigning decision rights. Management commitment to this process is evident.

Execution: We execute our security program, policies and the controls within, in response to changing business requirements, risk, and threat scenarios.

Continuous Improvement: We drive effective changes to this program with a mindset of continuous improvement. Policies, upgrades, technical controls and other initiatives have a common goal of supporting and maintaining an effective security program on behalf of our customers.

10. **Insurance Review.** Insurance requirements are subject to periodic review by the Customer. The Director of Risk Management or designee is authorized, but not required, to reduce, waive or suspend any insurance requirements whenever Risk Management determines that any of the required insurance is not available, is unreasonably priced, or is not needed to protect the interests of the Customer.
