

Department of Public Works - Special Districts Water and Sanitation

2020 Urban Water Management Plan County Service Area 70J Oak Hills

Brendon Biggs, Director June 22, 2021

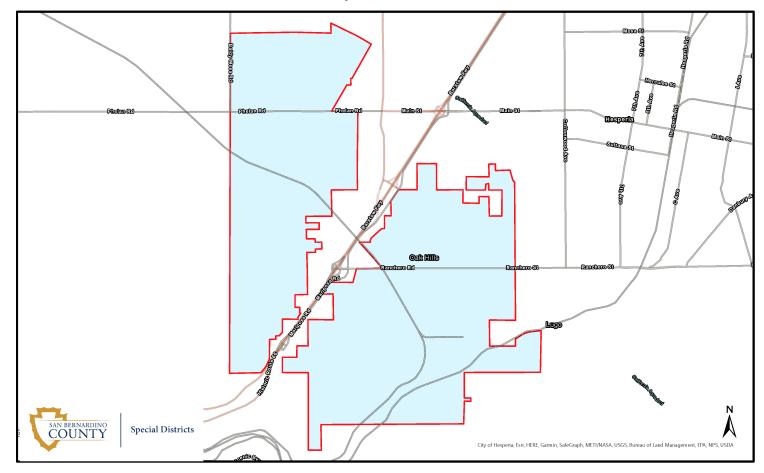

Why complete a 2020 Urban Water Management Plan Update?

- Utilize the UWMP as a planning tool to supply sufficient water to support the community as well as buildout demands in future years.
- UWMP affirms we have efficient water supply plans and policies to ensure long term water conservation.
- UWMP helps us understand that well planned resiliency programs are important to support dry year demands and provide reliability.
- Develops a framework to evaluate and enhance the availability, reliability and quality of water supplies.
- Identifies gaps between supply and demand through time (20-year analysis required)
- Due to State of California by July 1, 2021.

CSA 70J Service Boundary Map

County Service Area 70 J

Water System Demands

Table ES-1. Historical and Current Water Uses by Use Sector (AFY)

| USE TYPE | 2016 | 2017 | 2018 | 2019 | 2020 |
|--------------------------------|-------|-------|-----------------|-------|----------|
| Single Family | 1,142 | 1,236 | 1,327 | 1,202 | 1,300 |
| Multi-Family* | 0 | 0 | 0 | 0 | 0 |
| Commercial | 13 | 14 | 16 | 14 | 15 |
| Institutional/ Governmental | 96 | 104 | 112 | 101 | 109 |
| Losses | 227 | 193 | 251 | 207 | 193 |
| TOTAL: | 1,478 | 1,547 | 1, 7 05* | 1,524 | 1,617*** |

^{*} Note: Due to rounding errors, the summation of the use type demands is slightly off from the total for years 2025 and 2045.

CSA 70J serves potable drinking water to meet all municipal (residential and commercial) and industrial demands.

Including single-family residences, multi-family residences, parks, schools, and churches.

CSA 70J averaged 1,575 Acre-Feet per Year (AFY) of potable water.

Residential demand accounts for about 80% of the total demand.

^{**}The multi-family water use is less than one but due to rounding it shows as zero.

Projected Water System Demands

Table ES-2. Projected Demands for Water (AFY)

DWR Table 4-2R

| | | PROJECTED WATER USE | | | | | |
|----------------------------|------------------------|---------------------|-------|-------|-------|-------|--|
| USE TYPE | ADDITIONAL DESCRIPTION | 2025 | 2030 | 2035 | 2040 | 2045 | |
| Single Family | | 1,285 | 1,293 | 1,301 | 1,301 | 1,324 | |
| Multi-Family* | | 0 | 0 | 0 | 0 | 0 | |
| Commercial | | 15 | 15 | 15 | 15 | 16 | |
| Institutional/Governmental | | 108 | 109 | 109 | 109 | 111 | |
| Losses | | 222 | 223 | 225 | 225 | 229 | |
| - | TOTAL**: | 1,630 | 1,640 | 1,650 | 1,650 | 1,680 | |

^{*}The multi-family water use is less than one but due to rounding it shows as zero.

Demands projected out to 2045.

Based on the expected population forecast. The demands for each water use category are projected to remain steady through 2045.

Total demand is predicted to increase by about 3.9%.

^{**}These numbers are from MWA's UWMP as they performed the water demand projection analysis.
