

**COUNTY OF SAN BERNARDINO
SOLID WASTE MANAGEMENT DIVISION**
222 West Hospitality Lane, 2nd Floor
San Bernardino, CA 92415-0017
Fax: 909-386-8900

ADDENDUM NO. 2

**GCCS IMPROVEMENTS AND GAC TREATMENT FACILITY
AT THE LANDERS SANITARY LANDFILL**

MARCH 10, 2021

I. The following question (s) have been received by bidders:

Q1. The Bid Schedule, BI #90 lists PLC Programing. Will the programming be provided by your design consultant, Frank's Industrial Services? The Bid Schedule should be modified to include a value for BI#90 that represents what you want bidders to include for Frank's Industrial Service.

A1. Contractor is responsible for providing and properly installing and wiring the PLC. Contractor shall trouble shoot any problem the system may have at their cost if the fault should lie within the installation of the system. Contractor is not responsible for the programming. The County will perform subsequent programming.

Q2. The well located on existing slopes will require access roads to reach the wells for construction and maintenance. No such access roads are indicated on the civil drawings. Please provide design for installation and restoration of access roads.

A2. SubSection C02500 of the Specifications sets forth the Contractor's responsibilities for creating access and perform necessary grading to complete the well drilling and installation. The Plans do not include any extraction wells located mid slope, between bench roads. All wells are located at the toe or hinge of slopes (on bench roads and the top deck).

Q3. We understand that there is no construction water available onsite. Does the County have a pre-negotiated contract to have water delivered to the site for landfill operations. If so, can we use the existing contract?

A3. The Contractor is solely responsible for obtaining their own source for water.

The addition of these requirements shall be considered in concert with existing documents in preparation of bids. If you have any questions, please Johnny Gayman at (909) 386-8688.
