It uses High Efficiency Video Coding (HEVC) to compress and store images across your devices with higher quality and less space than JPEG23. However, HEIC files are not widely supported by other platforms or applications, so you may need to install special software or convert them to other formats such as JPG.

B.15.2.2 Common Digital Video Formats:

B.15.2.2.1 MP4 (MPEG-4 Part 14): This is a universal and high-quality format that can play on most devices and platforms. It uses the MPEG-4 codec to compress video and audio data.

B.15.2.2.2 MOV (Apple QuickTime Movie): This is a popular format for Apple devices and applications. It stores high-quality video, audio, and effects, but it has large file sizes.

B.15.2.2.3 WMV (Windows Media Video): This is a common format for Windows devices and applications. It offers good video quality and large file sizes, but it has limited compatibility with other platforms.

- B.15.2.2.4** AVI (Audio Video Interleave): This is one of the oldest video formats that can play on almost any web browser. It offers high-quality video and audio, but it also has very large file sizes.

- B.15.2.3** Common Digital Photo Formats:
 - B.15.2.3.1** JPEG (Joint Photographic Experts Group): This is a widely used format that compresses image data to reduce file size and storage space. It is suitable for web images, non-professional printing, email, and PowerPoint. However, it is a lossy format, which means some image quality is lost during compression.
 - B.15.2.3.2** PNG (Portable Network Graphics): This is a newer format that supports transparency and lossless compression. It is ideal for web graphics, logos, and icons that need to have a transparent background. It also preserves more colors and details than JPEG.
 - B.15.2.3.3** TIFF (Tagged Image File Format): This is a high-quality format that retains all the original image data without any compression or loss. It is popular for professional printing, publishing, and graphic design. However, it has very large file sizes and limited compatibility with some platforms.
 - B.15.2.3.4** GIF (Graphics Interchange Format): This is an older format that supports animation and transparency. It can create simple animations by combining multiple images into one file. It also uses lossless compression, but it can only display up to 256 colors.
 - B.15.2.3.5** RAW (Raw Image Data): This is not a single format, but a category of formats that store the raw data captured by digital cameras without any processing or compression. It allows more control over editing parameters such as exposure, white balance, and color correction. However, it requires special software to view and edit, and it has very large file sizes.
- B.15.2.4** Common Digital Document Formats:
 - B.15.2.4.1** PDF (Portable Document Format): This is a widely used format that can present documents independent of the software, hardware, or operating systems used. It preserves the layout, fonts, images, and graphics of the original document. It is suitable for sharing, printing, and archiving documents.
 - B.15.2.4.2** DOC/DOCX (Microsoft Word Document): This is a popular format for creating and editing text-based documents with Microsoft Word. It supports various features such as formatting, tables, charts, images, and hyperlinks. It is compatible with most platforms and applications. However, it may lose some formatting or layout when opened with different software.
 - B.15.2.4.3** XLS/XLSX (Microsoft Excel Spreadsheet): This is a common format for creating and editing spreadsheet-based documents with Microsoft Excel. It supports various features such as formulas, functions, charts, graphs, and pivot tables. It is compatible with most platforms and applications. However, it may lose some functionality or accuracy when opened with different software.
 - B.15.2.4.4** PPT/PPTX (Microsoft PowerPoint Presentation): This is a widely used format for creating and editing presentation-based documents with Microsoft PowerPoint. It supports various features such as animations, transitions, audio, and video clips. It is compatible with most platforms and applications. However, it may lose some quality or effects when opened with different software.

B.15.2.4.5 ODT/ODS/ODP (OpenDocument Format): This is an open-source format for creating and editing text-based (ODT), spreadsheet-based (ODS) and presentation-based (ODP) documents with LibreOffice or other compatible software. FEDERAL BUREAU OF INVESTIGATION CRIMINAL JUSTICE INFORMATION SERVICES SECURITY ADDENDUM

Legal Authority for and Purpose and Genesis of the Security Addendum

Traditionally, law enforcement and other criminal justice agencies have been responsible for the confidentiality of their information. Accordingly, until mid-1999, the Code of Federal Regulations Title 28, Part 20, subpart C, and the National Crime Information Center (NCIC) policy paper approved December 6, 1982, required that the management and exchange of criminal justice information be performed by a criminal justice agency or, in certain circumstances, by a noncriminal justice agency under the management control of a criminal justice agency.

In light of the increasing desire of governmental agencies to contract with private entities to perform administration of criminal justice functions, the FBI sought and obtained approval from the United States Department of Justice (DOJ) to permit such privatization of traditional law enforcement functions under certain controlled circumstances. In the Federal Register of May 10, 1999, the FBI published a Notice of Proposed Rulemaking, announcing as follows:

1. Access to CHRI [Criminal History Record Information] and Related Information, Subject to Appropriate Controls, by a Private Contractor Pursuant to a Specific Agreement with an Authorized Governmental Agency To Perform an Administration of Criminal Justice Function (Privatization). Section 534 of title 28 of the United States Code authorizes the Attorney General to exchange identification, criminal identification, crime, and other records for the official use of authorized officials of the federal government, the states, cities, and penal and other institutions. This statute also provides, however, that such exchanges are subject to cancellation if dissemination is made outside the receiving departments or related agencies. Agencies authorized access to CHRI traditionally have been hesitant to disclose that information, even in furtherance of authorized criminal justice functions, to anyone other than actual agency employees lest such disclosure be viewed as unauthorized. In recent years, however, governmental agencies seeking greater efficiency and economy have become increasingly interested in obtaining support services for the administration of criminal justice from the private sector. With the concurrence of the FBI's Criminal Justice Information Services (CJIS) Advisory Policy Board, the DOJ has concluded that disclosures to private persons and entities providing support services for criminal justice agencies may, when subject to appropriate controls, properly be viewed as permissible disclosures for purposes of compliance with 28 U.S.C. 534.

We are therefore proposing to revise 28 CFR 20.33(a)(7) to provide express authority for such arrangements. The proposed authority is similar to the authority that already exists in 28 CFR 20.21(b)(3) for state and local CHRI systems. Provision of CHRI under this authority would only be permitted pursuant to a specific agreement with an authorized governmental agency for the purpose of providing services for the administration of criminal justice. The agreement would be required to incorporate a security addendum approved by the Director of the FBI (acting for the Attorney General). The security

addendum would specifically authorize access to CHRI, limit the use of the information to the specific purposes for which it is being provided, ensure the security and confidentiality of the information consistent with applicable laws and regulations, provide for sanctions, and contain such other provisions as the Director of the FBI (acting for the Attorney General) may require. The security addendum, buttressed by ongoing audit programs of both the FBI and the sponsoring governmental agency, will provide an appropriate balance between the benefits of privatization, protection of individual privacy interests, and preservation of the security of the FBI's CHRI systems.

The FBI will develop a security addendum to be made available to interested governmental agencies. We anticipate that the security addendum will include physical and personnel security constraints historically required by NCIC security practices and other programmatic requirements, together with personal integrity and electronic security provisions comparable to those in NCIC User Agreements between the FBI and criminal justice agencies, and in existing Management Control Agreements between criminal justice agencies and noncriminal justice governmental entities. The security addendum will make clear that access to CHRI will be limited to those officers and employees of the private contractor or its subcontractor who require the information to properly perform services for the sponsoring governmental agency, and that the service provider may not access, modify, use, or disseminate such information for inconsistent or unauthorized purposes.

Consistent with such intent, Title 28 of the Code of Federal Regulations (C.F.R.) was amended to read:

§ 20.33 Dissemination of criminal history record information.

- a) Criminal history record information contained in the Interstate Identification Index (III) System and the Fingerprint Identification Records System (FIRS) may be made available:
 - 1) To criminal justice agencies for criminal justice purposes, which purposes include the screening of employees or applicants for employment hired by criminal justice agencies.
 - 2) To noncriminal justice governmental agencies performing criminal justice dispatching functions or data processing/information services for criminal justice agencies; and
 - 3) To private contractors pursuant to a specific agreement with an agency identified in paragraphs (a)(1) or (a)(6) of this section and for the purpose of providing services for the administration of criminal justice pursuant to that agreement. The agreement must incorporate a security addendum approved by the Attorney General of the United States, which shall specifically authorize access to criminal history record information, limit the use of the information to the purposes for which it is provided, ensure the security and confidentiality of the information consistent with these regulations, provide for sanctions, and contain such other provisions as the Attorney General may require. The power

and authority of the Attorney General hereunder shall be exercised by the FBI Director (or the Director's designee).

This Security Addendum, appended to and incorporated by reference in a government-private sector contract entered into for such purpose, is intended to insure that the benefits of privatization are not attained with any accompanying degradation in the security of the national system of criminal records accessed by the contracting private party. This Security Addendum addresses both concerns for personal integrity and electronic security which have been addressed in previously executed user agreements and management control agreements.

A government agency may privatize functions traditionally performed by criminal justice agencies (or noncriminal justice agencies acting under a management control agreement), subject to the terms of this Security Addendum. If privatized, access by a private contractor's personnel to NCIC data and other CJIS information is restricted to only that necessary to perform the privatized tasks consistent with the government agency's function and the focus of the contract. If privatized the contractor may not access, modify, use or disseminate such data in any manner not expressly authorized by the government agency in consultation with the FBI.

**FEDERAL BUREAU OF INVESTIGATION
CRIMINAL JUSTICE INFORMATION SERVICES
SECURITY ADDENDUM**

The goal of this document is to augment the CJIS Security Policy to ensure adequate security is provided for criminal justice systems while (1) under the control or management of a private entity or (2) connectivity to FBI CJIS Systems has been provided to a private entity (contractor). Adequate security is defined in Office of Management and Budget Circular A-130 as “security commensurate with the risk and magnitude of harm resulting from the loss, misuse, or unauthorized access to or modification of information.”

The intent of this Security Addendum is to require that the Contractor maintain a security program consistent with federal and state laws, regulations, and standards (including the CJIS Security Policy in effect when the contract is executed), as well as with policies and standards established by the Criminal Justice Information Services (CJIS) Advisory Policy Board (APB).

This Security Addendum identifies the duties and responsibilities with respect to the installation and maintenance of adequate internal controls within the contractual relationship so that the security and integrity of the FBI's information resources are not compromised. The security program shall include consideration of personnel security, site security, system security, and data security, and technical security.

The provisions of this Security Addendum apply to all personnel, systems, networks and support facilities supporting and/or acting on behalf of the government agency.

1.00 Definitions

1.01 Contracting Government Agency (CGA) - the government agency, whether a Criminal Justice Agency or a Noncriminal Justice Agency, which enters into an agreement with a private contractor subject to this Security Addendum.

1.02 Contractor - a private business, organization or individual which has entered into an agreement for the administration of criminal justice with a Criminal Justice Agency or a Noncriminal Justice Agency.

2.00 Responsibilities of the Contracting Government Agency.

2.01 The CGA will ensure that each Contractor employee receives a copy of the Security Addendum and the CJIS Security Policy and executes an acknowledgment of such receipt and the contents of the Security Addendum. The signed acknowledgments shall remain in the possession of the CGA and available for audit purposes. The acknowledgement may be signed by hand or via digital signature (see glossary for definition of digital signature).

3.00 Responsibilities of the Contractor.

3.01 The Contractor will maintain a security program consistent with federal and state laws, regulations, and standards (including the CJIS Security Policy in effect when the contract is executed and all subsequent versions), as well as with policies and standards established by the Criminal Justice Information Services (CJIS) Advisory Policy Board (APB).

4.00 Security Violations.

4.01 The CGA must report security violations to the CJIS Systems Officer (CSO) and the Director, FBI, along with indications of actions taken by the CGA and Contractor.

4.02 Security violations can justify termination of the appended agreement.

4.03 Upon notification, the FBI reserves the right to:

- a. Investigate or decline to investigate any report of unauthorized use;
- b. Suspend or terminate access and services, including telecommunications links. The FBI will provide the CSO with timely written notice of the suspension. Access and services will be reinstated only after satisfactory assurances have been provided to the FBI by the CGA and Contractor. Upon termination, the Contractor's records containing CHRI must be deleted or returned to the CGA.

5.00 Audit

5.01 The FBI is authorized to perform a final audit of the Contractor's systems after termination of the Security Addendum.

6.00 Scope and Authority

6.01 This Security Addendum does not confer, grant, or authorize any rights, privileges, or obligations on any persons other than the Contractor, CGA, CJA (where applicable), CSA, and FBI.

The parties are also subject to applicable federal and state laws and regulations.

6.03 The terms set forth in this document do not constitute the sole understanding by and between the parties hereto; rather they augment the provisions of the CJIS Security Policy to provide a minimum basis for the security of the system and contained information and it is understood that there may be terms and conditions of the appended Agreement which impose more stringent requirements upon the Contractor.

6.04 This Security Addendum may only be modified by the FBI, and may not be modified by the parties to the appended Agreement without the consent of the FBI.

CERTIFICATION

I hereby certify that I am familiar with the contents of (1) the Security Addendum, including its legal authority and purpose; (2) the NCIC Operating Manual; (3) the CJIS Security Policy; and (4) Title 28, Code of Federal Regulations, Part 20, and agree to be bound by their provisions.

I recognize that criminal history record information and related data, by its very nature, is sensitive and has potential for great harm if misused. I acknowledge that access to criminal history record information and related data is therefore limited to the purpose(s) for which a government agency has entered into the contract incorporating this Security Addendum. I understand that misuse of the system by, among other things: accessing it without authorization; accessing it by exceeding authorization; accessing it for an improper purpose; using, disseminating or re-disseminating information received as a result of this contract for a purpose other than that envisioned by the contract, may subject me to administrative and criminal penalties. I understand that accessing the system for an appropriate purpose and then using, disseminating or re-disseminating the information received for another purpose other than execution of the contract also constitutes misuse. I further understand that the occurrence of misuse does not depend upon whether or not I receive additional compensation for such authorized activity. Such exposure for misuse includes, but is not limited to, suspension or loss of employment and prosecution for state and federal crimes.

Exhibit A – Chain of Custody

ID will continue to follow the agreed upon process for receiving encrypted hard drives from the County, ID will provide a chain of custody document for shipping and receiving these encrypted drives to/from the Sheriff's office. Expanding on ID's chain of custody and defensibility, ID's data receiving, processing, and generation of deliverables are governed by ISO 9001 policies and quality objectives: Data Attributes, Client Request, Execution Accuracy, Execution of Resolution, as well as ID's Standard Operating Procedures (SOPs) for original client data storage, data staging/delivery, deliverable encryption, and data processing.

ID maintains a formal Information Transfer Policy that governs the secure transfer of information within or external to the organization. The ID Network Security Policy outlines the technical controls that are in place to protect data in transit. ID-managed file transfer system (MFT) only allows secure data transfer via authenticated HTTPS/SFTP connections. The system is configured with SSL/TLS 1.2 or greater with 2048 encryption standards.

Received data is verified to match expected volumes. After the secure receipt of data on physical media or via encrypted channels, data are logged at each stage and handled in a way to preserve original data attributes.

ID maintains best practices for defensible evidence handling and offers both physical and electronic data transfer methods. For data shipped to ID via a parcel service (e.g., FedEx, UPS, etc.), ID ensures tracking information is provided and chain of custody is maintained throughout. ID utilizes both electronic and hard copy methods for tracking original materials. Chain of Custody and tracking logs live with the evidence media, and electronic logging of all evidence tracks the evidence media by location and disposition in multiple locations. All tracking logs and Chain of Custody are available for the County in either hard copy or electronic format.

Each volume of information--whether a set of digital files delivered via secure FTP or physical--is considered a piece of media. Each piece is uniquely labeled and logged in our tracking system upon receipt. Each time a piece of media changes hands, the system is updated with the current responsible employee/department and the date/time of the event. A chain of custody can be generated using this system. Time constraints are used to keep the media in secure storage when it is not actively being used. Data validation is in place to ensure accuracy and prevent unnecessary storage. Within 30 days (or client-specific SLA), clients are contacted with options for return, storage, or destruction. Return shipping information is provided with all returns, and certificates of destruction are generated by default.

During the processing stage, reports are generated and delivered to account for all received, processed, corrupted, culled, and delivered data. These stages are accompanied by in-line, post-process, and final deliverable quality control steps. Processing personnel actively participate in training programs and ID's Continuous Improvement Process to ensure accuracy.

Business requirements are discussed at the project setup stage, documented, and translated into standard processing steps or well-defined custom procedures, facilitating a repeatable process for creating a deliverable in accordance with business requirements.

At each stage of the data life cycle, ID provides both standard and custom reports as desired by the County.

Redaction Workflow:

The ID team has discussed with the County team on calls the following high level Redaction Workflow:

- ID will first run blackout to redact out/highlight anything automatically.
- Next, ID would have human eyes on the document and will modify/add in redactions where needed.
- ID would also clean up any auto redactions/highlights where necessary.
- After the described review completes, Quality Control checks would take place.
- ID will provide a Relativity search of the redacted documents to the County team, to be 2nd Level Reviewed
- Redacted documents may then be pulled down and loaded to the County website as deemed appropriate.

Manual analysis, review, and redaction of documents are performed within a secure Relativity environment. Relativity logs every user action, including the name of the user who coded/redacted a document, the time that action was taken, and the coordinates of the redaction. This item is available in the user interface. An aggregate of activity can be generated as a report or overlaid into Relativity, upon request.

Auto-redaction tools (such as Blackout and Veritone) generate redaction audit logs, by user, containing every change made to the redacted file since the file was uploaded. Blackout provides detailed information including usage metrics, a markup report showing the type of redaction placed (manual or automated), the markup scope, markup reasons, and information regarding the user who generated the markup or executed the job. For Veritone, a redaction report is also available for each redacted file including specific details of each redaction. This includes start and stop times in milliseconds, type of redaction, the redaction code applied to an individual redaction, label type, and any added notes.

In any event, Recipient will be responsible for any breach of this Agreement by any of its Representatives and Recipient agrees, at its sole expense, to take all reasonable measures to assure that its Representatives do not make any prohibited or unauthorized disclosure or use of the Confidential Material. Except as set forth in Paragraph 3, Recipient further agrees that without the Discloser's prior written consent, neither Recipient nor any of its Representatives will disclose to any other person the fact that the Confidential Material has been made available, the fact that discussions or negotiations between the Parties are or may be taking place, or have taken place, or any of the terms, conditions, or other matters discussed with respect thereto.

3. LEGALLY COMPELLED DISCLOSURE

If Recipient or any of its Representatives is required, in the written opinion of its legal counsel who has been informed of the relevant facts, by law or in any judicial, administrative, or other legal proceeding, or pursuant to subpoena, civil investigative demand, or other compulsory process, to disclose any of the Confidential Material, Recipient and its Representative shall provide the Discloser with prompt written notice of any such requirement, to the extent Recipient and its Representatives may legally do so, so that the Discloser may seek a protective order or other appropriate remedy, and will consult with the Discloser with respect to the Discloser or Recipient (or such Representative) taking steps to resist or narrow the scope of such required disclosure. If, in the absence of a protective order or other remedy or the receipt of a waiver by the Discloser, Recipient or any of its Representatives are nonetheless, in the further written opinion of legal counsel, legally compelled to disclose Confidential Material to any tribunal or other authority or else stand liable for contempt or suffer other censure or penalty, Recipient (or such Representative) may disclose only that portion of the Confidential Material that such counsel advises is legally required to be disclosed, provided that Recipient (or such Representative) exercise best efforts to preserve the confidentiality of the Confidential Material, including, without limitation, by cooperating with the Discloser to obtain an appropriate protective order or other reliable assurance that confidential treatment will be accorded the Confidential Material by such tribunal or other authority.

4. RETURN OF CONFIDENTIAL MATERIAL

- (a) At any time upon the request of the Discloser for any reason, Recipient will promptly, and in any event no later than 30 days after the request, deliver to the Discloser or, at the Discloser's option, destroy all Confidential Material furnished by Discloser or its Representatives (and all copies, extracts, or other reproductions thereof), whether in paper, electronic, or other form or media. Notwithstanding the foregoing, Recipient may retain Confidential Material prepared by Recipient or its Representatives, including data or electronic records containing Confidential Material for the purposes of backup, recovery, contingency planning, or business continuity planning, so long as such data or records, to the extent not permanently deleted or overwritten in the ordinary course of business, are not accessible in the ordinary course of business and are not accessed except as required for backup,

recovery, contingency planning, or business continuity purposes. If such data or records are restored or otherwise become accessible, the Recipient agrees to permanently delete them.

- (b) Through an authorized supervising officer, the Recipient shall certify in writing to the Discloser the destruction of the Confidential Material furnished by Discloser or its Representatives promptly after such destruction occurs. Notwithstanding the return or destruction of the Confidential Material furnished by Discloser or its Representatives, Recipient and its Representatives will continue to be bound by obligations of confidentiality and other obligations hereunder for all Confidential Material.

5. REMEDIES

Recipient acknowledges and agrees that monetary damages alone would not be a sufficient remedy for breach of this Agreement by Recipient or any of its Representatives and that the Discloser will also be entitled to equitable relief, including injunctions and specific performance, as a remedy for any such breach without the necessity of posting any bond or other security and without proof of irreparable harm or of any actual damages. Such remedies will nonetheless not be deemed to be the exclusive remedies for a breach of this Agreement and will be in addition to all other remedies available at law or in equity.

6. NOTICES

- (c) **Governing Law.** All matters relating to or arising out of this Agreement and the rights of the Parties (sounding in contract, tort, or otherwise) will be governed by and construed and interpreted under the laws of the State of California, without regard to conflicts of laws principles that would require the application of any other law.
- (d) **Term/Survival.** The Parties agree that unless modified in writing by the Parties in accordance with this Agreement, the term of this Agreement shall commence on the Effective Date and shall remain in effect until terminated by either of the Parties, or until such time as the funding outlined in the Parties' Contract No. _____ dated August 20, 2024, has been exhausted. The provisions shall survive termination of the Agreement and shall remain in effect for a period of two (2) years after termination.
- (e) **Mutual Non-Solicitation.** Both parties acknowledge that information about existing employees is confidential competitive information and constitutes a trade secret. Accordingly, both parties agree

- (f) **Non-Compete.** The Parties agree to a non-compete agreement for opportunities that one Party brings to the attention of the other Party. If a preexisting relationship exists between the introduced Party and the opportunity, that Party will disclose this information immediately to the introducing Party.
- (g) **No Waiver.** Neither any failure nor any delay by any Party in exercising any right, power, or privilege under this Agreement will operate as a waiver of such right, power, or privilege, and no single or partial exercise of any such right, power, or privilege will preclude any other or further exercise of such right, power, or privilege or the exercise of any other right, power, or privilege. To the maximum extent permitted by applicable law, (i) no claim or right arising out of this Agreement can be waived by a Party, in whole or in part, unless made in a writing signed by such Party; (ii) a waiver given by a Party will only be applicable to the specific instance for which it is given; and (iii) no notice to or demand on a Party will (A) waive or otherwise affect any obligation of that Party or (B) affect the right of the Party giving such notice or demand to take further action without notice or demand as provided in this Agreement.
- (h) **Severability.** If any provision of this Agreement is held invalid or unenforceable by any court of competent jurisdiction, the other provisions of this Agreement will remain in full force and effect. Any provision of this Agreement held invalid or unenforceable only in part or degree will remain in full force and effect to the extent not held invalid or unenforceable.
- (i) **Counterparts/Electronic Signatures.** This Agreement, and if applicable, any subsequent amendments, may be executed in any number of counterparts, each of which so executed shall be deemed to be an original, and such counterparts shall together constitute one and the same Agreement. The parties shall be entitled to sign and transmit an electronic signature of this Agreement (whether by facsimile, PDF or other mail transmission), which signature shall be binding on the party whose name is contained therein. Each party providing an electronic signature agrees to promptly execute and deliver to the other party an original signed Agreement upon request.
