- J. Cultural Competency

The State mandates counties to develop and implement a Cultural Competency Plan (CCP). This Plan applies to all DBH services. Policies and procedures and all services must be culturally and linguistically appropriate. Contract agencies are included in the implementation process of the most recent State approved CCP for San Bernardino County and shall adhere to all cultural competency standards and requirements. In addition, contract agencies will maintain a copy of the current DBH CCP.

1. Cultural and Linguistic Competency

Cultural competence is defined as a set of congruent practice skills, knowledge, behaviors, attitudes, and policies that come together in a system, agency, or among consumer providers and professionals that enables that system, agency, or those professionals and consumer providers to work effectively in cross-cultural situations.

- a. To ensure equal access to quality care for diverse populations, Contractor shall adopt the Federal Office of Minority Health Culturally and Linguistically Appropriate Services (CLAS) national standards.
- b. Contractor shall be required to assess the demographic make-up and population trends of its service area to identify the cultural and linguistic needs of the eligible beneficiary population. Such studies are critical to designing and planning for providing appropriate and effective mental health and substance use disorder treatment services.
- c. Upon request, Contractor shall provide DBH with culture-specific service options available to be provided by Contractor.
- d. Contractor shall have the capacity or ability to provide interpretation and translation services in threshold and prevalent non-English languages, free of charge to beneficiaries. Upon request, Contractor will provide DBH

Contractor shall upon request from the County, provide information and/or reports as to whether its provider staff completed cultural competency training.

- f. DBH recognizes that cultural competence is a goal toward which professionals, agencies, and systems should strive. Becoming culturally competent is a developmental process and incorporates at all levels the importance of culture, the assessment of cross-cultural relations, vigilance towards the dynamics that result from cultural differences, the expansion of cultural knowledge, and the adaptation of services to meet culturally-unique needs. Providing mental health and substance use disorder treatment services in a culturally appropriate and responsive manner is fundamental in any effort to ensure success of high quality and cost-effective behavioral health services. Offering those services in a manner that fails to achieve its intended result due to cultural and linguistic barriers does not reflect high quality of care and is not cost-effective.

- g. To assist Contractor's efforts towards cultural and linguistic competency, DBH shall provide the following:

- i. Technical assistance to Contractor regarding cultural competency implementation.

- a) Monitoring activities administered by DBH may require Contractor to demonstrate documented capacity to offer services in threshold languages or contracted interpretation and translation services.

T. Telehealth

Contractor shall utilize telehealth, when deemed appropriate, as a mode of delivering behavioral health services in accordance with all applicable state and federal requirements, DBH's Telehealth Policy (MDS2027) and Procedure (MDS2027-1), as well as DHCS Telehealth Policy, CMS Telehealth/Telemedicine Standards, and those related to privacy/security, efficiency, and standards of care.

I. DEFINITION OF RECOVERY, WELLNESS, AND RESILIENCE AND REHABILITATIVE MENTAL HEALTH SERVICES

- A. Mental Health Recovery, Wellness, and Resilience (RWR) is an approach to helping the individual to live a healthy, satisfying, and hopeful life despite limitations and/or continuing effects caused by his or her mental illness according to his or her own values and cultural framework. RWR focuses on client strengths, skills and possibilities, rather than on illness, deficits, and limitations, in order to encourage hope (in staff and clients) and progress toward the life the client desires. RWR involves collaboration with and encouragement of clients and their families, support systems and involved others to take control of major life decisions and client care; it encourages involvement or re-involvement of clients in family, social, and community roles that are consistent with their values, culture, and preferred language; it facilitates hope and empowerment with the goal of counteracting internal and external "stigma"; it improves self-esteem; it encourages client self-management of his/her life and the making of his/her own choices and decisions, it re-integrates the client back into his/her community as a contributing member; and it achieves a satisfying and fulfilling life for the individual. It is believed that all clients can recover, even if that recovery is not complete. This may at times involve risks as clients move to new levels of functioning. The individual is ultimately responsible for his or her own recovery choices.

For children, the goal of the RWR philosophy of care is to help children (hereinafter used to refer to both children and adolescents) to recover from mistreatment and trauma, to learn more adaptive methods of coping with environmental demands and with their own emotions, and to joyfully discover their potential and their place in the world. RWR focuses on a child's strengths, skills, and possibilities rather than on illness, deficits and limitations. RWR encourages children to take increasing responsibility for their choices and their behavior, since these choices can lead either in the direction of recovery and growth or in the direction of stagnation and unhappiness. RWR encourages children to assume and to regain family, social, and community roles in which they can learn and grow toward maturity and that are consistent with their values and culture. RWR promotes acceptance by parents and other caregivers and by the community of all children, regardless of developmental level, illness, or handicap, and it addresses issues of stigma and prejudice that are related to this. This may involve interacting with the community group's or cultural group's way of viewing mental and emotional problems and differences.

- B. “Rehabilitation” is a strength-based approach to skills development that focuses on maximizing an individual’s functioning. Services will support the individual, family, support system, and/or involved others in accomplishing the desired results. Families, caregivers, human service agency personnel and other significant support persons should be encouraged to participate in the planning and implementation process in responding to the individual’s needs and desires, and in facilitating the individual’s choices and responsibilities.
- C. Accordingly, program staffing should be multi-disciplinary and reflect the cultural, linguistic, ethnic, age, gender, sexual orientation and other social characteristics of the community in which the program serves. Families, caregivers, human service agency personnel and other significant support persons should be encouraged to participate in the planning and implementation process in responding to the individual’s needs and desires, and in facilitating the individual’s choices and responsibilities. Programs may be designed to use both licensed and non-licensed personnel who are experienced in providing behavioral health services.
- D. Additionally, the Contractor shall develop admission policies and procedures that incorporate the multi-agency collaboration inherent in ChRIS regarding those persons who are eligible for ChRIS and for EPSDT Medi-Cal services. Non-EPSDT eligible children and youth in need of treatment should be screened and referred to an appropriate behavioral health service provider or be treated under separate funding streams. **DBH will not reimburse Contractor for services provided to Non-Medi-Cal beneficiaries.**

II. ChRIS MISSION AND GOALS:

A. Overview:

The Department of Behavioral Health (DBH) and Children and Family Services (CFS) are respectively responsible for meeting the mental health and residential treatment needs of minors in their care. In order to provide children the intensity of services they require, minors are sometimes placed in out-of-county long-term residential care settings due to the lack of appropriate level placements in the local community. Through a variety of programs (e.g., SB163 Wraparound) DBH and CFS have collaborated to provide an appropriate alternative to residential placement and keep children and youth with their family. For some children the level of need is high enough that only residential placement in a Short-Term Residential Therapeutic Program (STRTP) is an appropriate placement option. This program is intended to provide a means for such youth to be placed close to their community and develop healthy connections that will facilitate their return to home or to another home like setting.

The Children’s Residential Intensive Services (ChRIS) program is a structured residential program that utilizes STRTP’s which are also Full Service Partnerships (FSP) as well as the values and principles of the Integrated Core Practice Model (ICPM) in providing necessary services during the period of

placement and up to 2 months after the child has left the STRTP in order to facilitate a successful transition to a lower level of care. ChRIS will allow for the provision of a Full Service Partnership program, including Specialty Mental Health Outpatient Services, to children/youth in residential settings.

The goal of the ChRIS program is to maximize the benefits for the CCR changes. This includes, but is not limited to the STRTP to providing high levels of therapeutic services to children/youth that suffer from severe emotional and behavioral disorders to help them recover and achieve a socially acceptable functioning level while simultaneously building permanency options. The expectation is that these specialty mental health services will be complimentary to, and integrated with, the residential services offered within an STRTP. Specifically, the specialty mental health services are intended to complement the “Core Services” required with STRTPs. Core services provided to children and their families, should encompass community services and supports, physical, behavioral, and mental health support and access to services, including educational support, life and social support, transitional support services for children, youth, and families who assume permanency, services for transition-aged youth, services for non-minor dependents, and trauma-informed practices and supports for children and youth, including treatment services.

Note: All of the requirements noted **RFQ DBH 20-98 Request for Qualification Applications for Children’s Residential Intensive Services (ChRIS) as well as the services noted in the agency proposal**, are incorporated into this Addendum by reference.

B. Program Objective:

1. The overall objective of ChRIS is to maximize the benefits for the CCR changes. This includes, but is not limited to, the STRTP incorporating trauma informed care principles and providing high levels of therapeutic services to children/youth to help them recover and achieve a socially acceptable functioning level while simultaneously building permanency options.
2. It is expected that these specialty mental health services will be complementary to, and integrated with, the residential services offered within an STRTP. Specifically, the specialty mental health services are intended to compliment the “Core Services” required with STRTPs. Core services provided to children and their families, should encompass community services and supports, individualized enrichment activities, physical, behavioral, and mental health support and access to services, including educational support, life and social support, transitional support services for children, youth, and families who assume permanency, services for transition-aged youth, services for non-minor dependents, and trauma-informed practices and supports for children and youth,

including treatment services.

3. ChRIS will enhance residential care by providing specialty mental health services within the context of an Integrated Core Practice Model (ICPM) Full-Service Partnership (FSP) while the child is residing within the STRTP and during a transition period after the child leaves the STRTP. These services and program will be implemented with oversight and interdepartmental management, integration of core service elements as appropriate (e.g., Parent-Family Advocacy), and flexibility to ensure as smooth of an implementation of CCR as possible to improve transition outcomes and reduce the length of stay. This model is referred to throughout the contract as an Integrated Core Practice Model Full Service Partnership (ICPM FSP) or a Wrap-informed FSP.
4. Additionally, all services shall be provided within the context of a Full Service Partnership (FSP), which is operationalized in accordance to the values, principles, basic tenets, and philosophies of the Integrated Core Practice Model and Wraparound.

C. Values, Principles, Basic Tenets, and Philosophies of the Integrated Core Practice Model and Wraparound:

1. Children are first and foremost protected from abuse and neglect, and maintained safely in their own homes.
2. Services are needs driven, strength-based, and family focused from the first conversation with or about the family.
3. Services are individualized and tailored to the strengths and needs of each child and family.
4. Wraparound is a community-based effort.
5. Services are delivered through a multi-agency collaborative approach that is grounded in a strong community base.
6. Parent/Family voice, choice, and preference are assured throughout the process.
7. Services incorporate a blend of formal and informal resources designed to assist families with successful transition that ensure long-term success.
8. Services are culturally competent and respectful of the culture of children and their families.
9. Services and supports are provided in the child and family's community.
10. Children have permanency and stability in their living situation.

However, it is understood that the Contractor must adhere to the admission criteria established with Community Care & Licensing (CCL), which may include exclusionary criteria based on licensing.
 - 3. If there is a disagreement between ChRIS partners, including the Contractor, regarding the appropriateness of a referred youth the Contractor shall discuss concerns with the placing agency staff. If, after

this discussion, there is still disagreement on the appropriateness of the placement then a brief letter detailing the reasons for refusal shall be submitted to both the placing agency and DBH.

4. The San Bernardino County Interagency Placement Committee (IPC) considers the foregoing application for CHRIS services and approves the child's/youth's selection after considering other treatment options.
- B. Integrated Core Practice Model Components: Services are provided within the context of an Integrated Core Practice Model Full Service Partnership (ICPM-FSP). These services are intended to complement the phases of Wraparound and the components of the Integrated Core Practice Model, which include:
1. Engagement: The engagement phase is the initial stage of services and is the foundation of building a trusting and mutually beneficial relationship. This phase begins prior to the child coming to the STRTP.
 2. Screening and Assessment: Assessment is a continuous process. The initial assessment should include screening for unique concerns (e.g., medical or educational) as well as thorough assessment of needs and strengths to ensure an accurate understanding of the child and family.
 3. Service Planning and Implementation

Child and Family Team Meetings shall be held every 90 days at a minimum. They should be held more frequently, even weekly or more often, if the child's situation warrants.

Planning for this will occur throughout the treatment process within the context of the Child and Family Team (CFT). The Contractor shall continue to provide EPSDT Specialty Mental Health Services after the child has left the STRTP with these services coordinated through the CFT.

"Discharge" refers to the child being exited from ChRIS for all potential services. Discharge planning will occur throughout the treatment process within the context of the CFT.

There are multiple reasons why children are transitioned out of the STRTP and/or discharged from ChRIS. Potential reasons for either transitioning or discharging to occur circumstances include the following:

1. Upon mutual agreement of the family and Contractor that the goals of treatment have been met;
2. Upon parent or guardian refusal of services, or refusal to comply with objectives outlined in the Mental Health Services Plan;
3. Upon parent or guardian's unilateral decision to terminate treatment;
4. Upon a good faith determination by Contractor that the individual youth cannot be effectively served by the program;
5. Upon a determination that the individual is a danger to other youth, staff or self;
6. Upon transfer out of the County or to another region;
7. By agreement of the Child and Family Team that appropriate follow-up or other service linkage will be made.
8. Children will not be automatically terminated from services if involved in the juvenile justice system and should be assessed for further services upon discharge.

NOTE: Children who continue to meet Katie A. Subclass criteria will not be discharged from ChRIS unless a successful transition to another ICPM program has been accomplished.

8. Crisis Intervention is a quick emergency response service enabling the individual, his or her family, support system and/or involved others to cope with a crisis, while maintaining the child's status as a functioning family and/or "immediate community" member to the greatest extent possible, and in the least restrictive care as applicable. A crisis is an unplanned event that results in the individual's need for immediate service intervention. Crisis intervention services are limited to stabilization of the presenting emergency. This service does not include Crisis Stabilization, which is provided in a 24-hour health care facility or hospital outpatient program. Service activities include but are not limited to assessment, evaluation, collateral and therapy (all billed as crisis intervention).
9. Targeted Case Management means services that assist a beneficiary to access needed medical, educational, social, prevocational, rehabilitative, or other needed community services. The service activities may include, but are not limited to, communication, coordination, and referral; monitoring service delivery to ensure beneficiary access to service and the service delivery system; monitoring of the beneficiary's progress; placement services; and plan development. Targeted Case Management may be either face-to-face or by telephone with the child/youth or significant support systems and may be provided anywhere in the community.
10. Linkage and Consultation - The identification and pursuit of resources necessary and appropriate to implement the service plan, treatment plan or coordination plan, which include, but are not limited to the following:
- a. Interagency and intra-agency consultation, communication, coordination and referral.
 - b. Monitoring service delivery and service plan, treatment plan or coordination plan implementation to ensure an individual's access to service and the service delivery system.
11. Placement Services - Supportive assistance to the client in the assessment, determination of need and securing of adequate and appropriate living arrangements, including, but not limited to the following:

- a. Locating and securing an appropriate living environment.
- b. Locating and securing funding.
- c. Pre-placement visit(s).
- d. Negotiation of housing or placement contracts.
- e. Placement and placement follow-up.

12. Intensive Care Coordination (ICC) - Within the Integrated Core Practices Model (ICPM) there is a need for thorough collaboration between all CFT members. Planning within the ICPM is a dynamic and interactive process that addresses the goals and objective necessary to accomplish goals. The ICC coordinator is responsible for working within the CFT to ensure that plans from any of the system partners are integrated to comprehensively address the identified goals and objectives and that the activities of all parties involved with the service to the child/youth and/or family, are coordinated to support an ensure successful and enduring change.

ICC is similar to the activities provided through Targeted Case Management. ICC must be delivered using a Child and Family Team to develop and guide the planning and services delivery process. ICC may be utilized by more than one mental health provider; however, there must be an identified mental health ICC coordinator that ensure participation by the child or youth, family or caregiver and significant others so that the child/youth's assessment and plan addresses the child/youth's needs and strengths in the context of the values and philosophy of the ICPM.

Activities coded as ICC may include interventions such as:

- a. Facilitation of the development and maintenance of a constructive and collaborative relationship among child/youth, his/her family or caregiver(s), other providers, and other involved child-serving systems to create a Child and Family Team (CFT);
- b. Facilitation of a care planning and monitoring process which ensures that the plan is aligned and coordinated across the mental health and child serving systems to allow the child/youth to be served in his/her community in the least restrictive setting possible;
- c. Ensure services are provided that equip the parent/caregiver(s) to meet the child/youth's mental health treatment and care coordination needs, described in the child/youth's plan;
- d. Ensure that medically necessary mental health services included in the child/youth's plan are effectively and comprehensively assessed, coordinated, delivered, transitioned and/or reassessed as necessary in a way that is consistent with the full intent of the

Integrated Core Practice Model (ICPM);

- e. Provide active participation in the CFT planning and monitoring process to assure that the plan addresses or is refined to meet the mental health needs of the child/youth.

NOTE: ICC was initially developed solely for use with children with an open child welfare case who meet the ‘Subclass’ Criteria of a class action lawsuit; however, ICC is a service available to all EPSDT Medi-Cal beneficiaries in need of this service.

Contractor must provide ICC for all children with an open child welfare case who meet the criteria for the ‘Subclass’ at least once every thirty (30) days, as this is the least frequent level of coordination needed for this population.

ICC may be provided in any non-juvenile hall setting; however, when provided in a hospital, psychiatric health facility, community treatment facility, STRTP or psychiatric nursing facility, it may be used solely for the purpose of coordinating placement of the child/youth on discharge from those facilities and may be provided during the 30 calendar days immediately prior to the day of discharge, for a maximum of three nonconsecutive periods of 30 calendar days or less per continuous stay in the facility as part of discharge planning.

Additional information on ICC may be obtained from the DHCS publication “Medical Manual for Intensive Care Coordination (ICC), Intensive Home Based Services (IHBS) & Therapeutic Foster Care (TFC) for Katie A. Subclass Members.

- 13. Intensive Home Based Services (IHBS) are intensive, individualized and strength-based, needs-driven intervention activities that support the engagement and participation of the child/youth and his/her significant support persons and to help the child/youth develop skills and achieve the goals and objectives of the plan. IHBS are not traditional therapeutic services. IHBS must be approved before it can be provided to CHRIS youth.

Activities coded as IHBS may include interventions such as:

- a. Medically necessary skill-based interventions for remediation of behaviors or improvement of symptoms, including but not limited to the implementation of a positive behavioral plan and/or modeling interventions for the child/youth’s family and/or significant other to assist them in implementing the strategies;
- b. Development of functional skills to improve self-care, self-regulation, or other functional impairments by intervening to decrease or replace non-functional behavior that interferes with daily living tasks or the avoidance of exploitation by others;

- c. Development of skills or replacement behaviors that allow the child/youth to fully participate in the CFT and service plans including but not limited to the plan and/or child welfare services plan;
- d. Improvement of self-management of symptoms, including self-administration of medications as appropriate;
- e. Education of the child/youth and/or their family or caregiver(s) about, and about to manage the child/youth's mental health disorder or symptoms:
- f. Support of the development, maintenance and use of social networks including the use of natural and community resources;
- g. Support to address behaviors that interfere with the achievement of a stable and permanent family life;
- h. Support to address behaviors that interfere with a child/youth's success in achieving educational objectives in an academic program in the community; and
- i. Support to address behaviors that interfere with transitional independent living objectives such as seeking and maintain housing and living independently.

NOTE: IHBS was initially developed solely for use with children with an open child welfare case who meet the 'Subclass' Criteria of a class action lawsuit; however, IHBS is a service available to all EPSDT Medi-Cal beneficiaries in need of this service.

IHBS was developed to be provided within the context of the Integrated Core Practice Model and requires the provision of ICC to ensure a participatory CFT. IHBS may be provided to all EPSDT Medi-Cal Beneficiaries in need of this service; however, IHBS still requires the provision of ICC to ensure a participatory coordination of services.

IHBS must be approved by the youth's CFT. In addition, the provision of IHBS must receive prior authorization by the DBH ACCESS unit in compliance with their established policy and procedures.

IHBS are typically, but not only, provided by paraprofessionals under clinical supervision. IHBS is well-suited to be provided outside the STRTP setting to children/youth that are transitioning to a permanent home environment to facilitate the transition during single day and multiple day visits. IHBS may be provided within the residential placement setting.

Additional information on IHBS may be obtained from the DHCS publication "Medical Manual for Intensive Care Coordination (ICC), Intensive Home Based Services (IHBS) & Therapeutic Foster Care (TFC)

for Katie A. Subclass Members.”

14. Therapeutic Behavioral Service (TBS) is a one-to-one behavioral mental health service available to children/youth with serious emotional challenges who are under age 21, and who are eligible for a full array of Medi-Cal benefits without restrictions or limitations. TBS helps children/youth/TAY (Transitional Age Youth), and their parents/caregivers, foster parents, STRTP staff and school staff learn new ways of reducing and managing challenging/ problematic behaviors, as well as strategies and skills to increase the kinds of behavior that will allow children/youth/TAY to be successful in their current environment and avoid more restrictive placements. Accordingly, TBS never exist alone, but are an adjunct, specialized service to an existing mental health service as above. **Contractor shall only provide TBS to EPSDT Medi-Cal beneficiaries enrolled in the agency’s ChRIS Program. Contractor shall NOT function as a TBS Program, but rather will be a program that includes TBS.**
- a. TBS Class Criteria: Emily Q Class members are defined as “all current and future beneficiaries of the Medicaid program under the age of 21 in California who:
- (1) are placed in an STRTP and/or a locked treatment facility for the treatment of mental health needs, but not presently detained at Juvenile Detention Centers, Institutions for Mental Diseases (IMD)’s or psychiatric hospitals (excluding Psychiatric Health Facility or where the child/youth/TAY is “at risk” only of being detained at Juvenile Detention Centers, IMD’s or In-Patient Psychiatric Hospitals)
 - (2) are being considered for placement in these facilities as an option to meet the child’s/youth’s/TAY’s needs (not necessarily the only option and whether or not a facility is actually available); or have at least one emergency psychiatric hospitalization related to their current presenting disability within the preceding 24 months (not necessarily the only option and whether or not a facility is actually available) or is at risk of hospitalization.
- b. TBS “Needs” Eligibility: Once the child/youth is identified as a TBS Class member, then the County as the Mental Health Provider must determine that the child/youth/TAY meets the “needs” criteria below:
- (1) child/youth/TAY is receiving other specialty mental health services; and
 - (2) in the clinical opinion of the mental health provider, it is highly unlikely that without the additional short-term support of TBS, the child/youth/TAY:

- i. will need to be placed out-of-home, or into a higher level of residential care, including acute care (e.g., acute psychiatric hospital inpatient services, psychiatric health facility services, and crisis residential treatment services), as a result of the child's/youth's/TAY's behaviors or symptoms which jeopardize continued placement, or
 - ii. needs this additional support to transition to a home or foster home or lower level of residential placement, or to stabilize the child's/ youth's behavior or symptoms in a new environment/placement.
- c. Therefore, Medi-Cal Reimbursement TBS criteria are:
 - (1) be a full-scope Medi-Cal beneficiary under the age of 21,
 - (2) meet MHP "medical necessity" criteria,
 - (3) be receiving a Medi-Cal mental health service to be supported by TBS short-term interventions, and;
 - (4) be a member of the TBS certified class (above) or must have previously received TBS while a member of the certified class.
 - (5) Services must be authorized by DBH Access Unit or designee prior to start of services.
- d. TBS is **NOT** reimbursable as or when:
 - (1) services rendered for the convenience of the family or other caregivers, physician or teacher;
 - (2) supervision or services provided to assure compliance with Probationary terms;
 - (3) supervision to ensure the child's/youth's/TAY's safety or safety of others;
 - (4) services rendered to address conditions that are not part of the child's/youth's/TAY's mental health condition;
 - (5) services to children/youth/TAY who can sustain non-impulsive, self-directed behavior, handle themselves appropriately in social situations with peers, and who are able to appropriately handle transitions during the day; and
 - (6) services to children/youth/TAY who will never be able to sustain non-impulsive, self-directed behavior and engage in appropriate community activities without full-time supervision; or when the beneficiary is an inpatient of a hospital, psychiatric health facility, nursing facility, IMD, or crisis residential program.

- (7) If services are provided for any of the above, or if services were not authorized by the DBH Access Unit or designee prior to start of services, TBS services will not be reimbursable.

e. TBS Services

- (1) TBS Assessment is a clinical analysis of the history and current status of the individual's mental, emotional, or behavioral disorder. Relevant cultural issues and history should be included where appropriate. Assessment may include diagnosis. A TBS assessment also includes identifying the child/youth's target behaviors and/or symptoms that jeopardize continuation of the current residential placement or may interfere in transition to a lower level of care. The assessment must be comprehensive enough to identify that the minor meets medical necessity, is a full-scope Medi-Cal beneficiary under 21 years of age and is a member of the "certified class", and that there is a need for specialty mental health services in addition to TBS. This service is not always a direct face-to-face service.
- (2) TBS Collateral is contact with one or more significant support person in the life of the beneficiary, which may include consultation and training to assist in better utilization of TBS services and understanding of mental illness, the behaviors and symptoms being targeted. TBS collateral services can be used in such cases when a TBS Coach or TBS Clinician contacts the therapist providing the mental health services, or beneficiaries caregivers (parent, teacher, STRTP staff, neighbor, siblings, etc.), as long as it directly relates to the TBS treatment plan. As a general rule, if the Contractor is providing services that are linked to target behaviors or TBS treatment plan and the beneficiary is not present, then the Contractor would be delivering "Collateral TBS". An example of "Collateral TBS" would be when the Contractor is working with the parent/caregiver towards the goals of the minor's TBS treatment plan, or while conducting a TBS Treatment Team meeting. TBS collateral contacts must be with individuals identified as significant in the child/youth's life and be directly related to the needs, goals and interventions for the child/youth identified on the TBS Treatment Plan. This service can be delivered either face-to-face or by phone.

- (3) TBS Plan Development may include any or all of the following:
 - i. Development and approval of treatment or service plans.
 - ii. Verification of service necessity.
 - iii. Monitoring of the individual's progress.
- (4) TBS Coach Time - is a service that includes one-to-one (face-to-face) therapeutic contact between a mental health provider (TBS Coach) and a beneficiary for a specified short-term period of time, which is designed to maintain the child/youth's placement at the lowest appropriate level by resolving target behaviors and achieving short-term goals.
 - i. TBS Coach Time may not begin until the initial assessment is completed.
 - ii. The majority of TBS billing should fall under this category.

B. Parent Partner

A basic tenet of DBH Children's Services is the involvement of parents and families of children and youth with serious emotional disturbances as full partners in every aspect of the system. To support this basic tenet, DBH developed Parent Partner Network Meetings as a venue to ensure that families and youth have an equal voice and that services meet the needs identified by families and are sensitive to the unique cultural context and history of each family.

To support this basic tenet of DBH Children's Services, the Contractor shall hire one, paid Parent Partner who is a parent or family member of a child with serious emotional disturbance to work closely with DBH parent partners. The duties and responsibilities of Parent Partners are either administrative or claimable as an allowable billable service, but not both.

Parent Partners are expected to provide the following services:

- 2. Ensure services meet the needs identified by families.
- 3. Accompany the families to Individualized Education Plan (IEP) meetings.
- 4. Facilitate parent support groups.
- 5. Provide in-home support services.
- 6. Promote collaboration among families, advocates, mental health providers, health care providers and other agency/school personnel.

- 1. Ensure that each beneficiary has an ongoing source of care appropriate to his or her needs and a person or entity formally designated as primarily responsible for coordinating the services accessed by the beneficiary. The beneficiary shall be provided information on how to contact their designated person or entity [42 C.F.R. § 438.208(b)(1)].
- 2. Coordinate the services Contractor furnishes to the beneficiary between settings of care, including appropriate discharge planning for short term and long-term hospital and institutional stays. Coordinate the services Contractor furnishes to the beneficiary with the services the beneficiary receives from any other managed care organization, in FFS Medicaid, from community and social support providers, and other human services agencies used by its beneficiaries [(42 C.F.R. § 438.208(b)(2)(i)-(iv), CCR, title 9 § 1810.415.]

IV. **BILLING UNIT**

- A. The billing unit for mental health services, rehabilitation, medication support services, crisis intervention and case management/brokerage is staff time, based on minutes of time. The exact number of minutes/hours/activities used by staff providing a reimbursable service shall be reported and billed in their respective units. In no case shall more than 60 minutes/24 hours/Duplicative Service Activities in their respective units of time be reported or claimed for any one staff person during a billing period. Also, in no case shall the units of time reported or claimed for any one staff member exceed the minutes/hours/service activities worked.
- B. When a staff member provides service to or on behalf of more than one individual at the same time, the staff member's time must be pro-rated to each individual. When more than one staff person provides a service, the time utilized by all involved staff members shall be added together to yield the total billable time. The total time claimed shall not exceed the actual staff time utilized for billable service. The time required for documentation and travel shall be linked to the delivery of the reimbursable service and shall not be separately billed.

Plan development is reimbursable. Units of time may be billed when there is no unit of service (e.g., time spent in plan development activities may be billed regardless of whether there is a face-to-face or phone contact with the individual or significant other).

- C. San Bernardino County will not reimburse the Contractor for services provided to children/youth placed in San Bernardino County-located home by another county unless the placement falls under the provisions of AB 1299 and Presumptive Transfer. San Bernardino County will reimburse the Contractor for services provided to San Bernardino County children/youth placed in an contracted out-of-county home if the placement again falls under the provisions of AB 1299 and the Waiver of Presumptive Transfer. The Waiver documentation must be located in the youth's medical record. All decisions about Presumptive Transfer and Waivers must be made within the context of the Child and Family Team of the youth. The Senate Bill (SB) 785 Out of County Placements process does not apply to the provision of MHSA programs and is therefore not applicable to ChRIS. If the contractor serves a child/youth from another county outside of the provisions of AB1299, it is understood that no funding of services through ChRIS will be expended and the county of origin will reimburse the agency for any and all related costs. If the ChRIS program includes funded positions that serve the STRTP residents collectively, and non-San Bernardino youth are placed in the

home, it is expected that this will be appropriately reflected in the annual cost report.

- D. Contractor may not exceed the anticipated utilization rate without prior written approval from the Program Manager or designee. The Agreement is contingent upon sufficient funds being made available by Federal, State, and/or County governments for the term of this agreement.
