Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am respectfully asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreparable harm to the bald eagles that nest nearby and forage on the site.

As you may know, American Bald Eagles still remain protected under the Bald and Golden Eagle Protection Act and the Migratory Bird Treaty Act, as well as their being our National bird/symbol/emblem.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would escalate the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors.

Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

  
Melissa A. Freeman

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. CLERK OF THE  
BOARD OF SUPERVISORS  
COUNTY OF SAN BERNARDINO  
CALIFORNIA  
2015 OCT -2 PM 1:00

Sept. 29, 2019

Dear Supervisors,

My name is Charlene Hudson. I live in Livermore, Ca. 94550.

Since March of this year, I have been watching the Big Bear Valley Bald Eagle Cam. Shadow and Jackie (Bald Eagles) had two eaglets. I watched them grow. One however died from a snow storm. This was the most educational live stream of nature. The view is so serene and majestic. (No houses, No noise, or pollution) Both parents work so hard for their eaglets. THIS IS THEIR HOME.

Just today Jackie and Shadow are rebuilding their nest for the next season.

You say housing is more important than protecting Bald Eagles.

Please deny the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most Sincerely,

P.S. Save the Eagle home.

Charlene Hudson

I'm concerned about:

I'm a long-term resident of Big Bear. I go thru Fawnskin often. Please come up here, drive thru that tiny town, and imagine the impact of many more homes with the Moon Camp project. It's a terrible idea.

Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

PLEASE NOTE: We've already lost one eagle sanctuary to "LUXURY" DEVELOPMENT (MOST ARE UNOCCUPIED most of the year) - property 100 and around

Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

---

I am attaching a letter opposing the above development since I believe it would have an adverse impact on the bald eagle breeding area at Big Bear Lake. I truly believe it would be a tragedy to lose this area since more bald eagles seem to be making their home in the area.

Thank you for taking this into consideration.

Honorable Board of Supervisors,

I am in FAVOR of your APPROVAL of the Moon Camp Subdivision.

Community Benefits include:

- The entire lakefront, 2,588 l.f. will be a PERMANENT EAGLE FORAGING AREA.
- 15% of the Subdivision, 9.6 acres, will be set aside as PERMANENT OPEN SPACE.
- 891 l.f. of lakefront, 0.82 acres, will be COMMUNITY LAKE ACCESS for the Fawnskin Community.
- \$3 million of Community Improvements - Water System, Fire Flow, Traffic, and Bike Lane.
- 15 acres of land PERMANENTLY PROTECTED in order to preserve Endangered and Sensitive Plants.

The Moon Camp Subdivision will be an incredible asset to our Eagles, our Endangered and Sensitive Plants, the Fawnskin Community and the entire Big Bear Valley.

Please APPROVE the Moon Camp Subdivision.

Clerk of the Board, [COB@sbcounty.gov](mailto:COB@sbcounty.gov)  
Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

I am attaching a letter opposing the above development since I believe it would have an adverse impact on the bald eagle breeding area at Big Bear Lake. I truly believe it would be a tragedy to lose this area since more bald eagles seem to be making their home in the area.

Thank you for taking this into consideration.

Attn: Clerk of the Board  
Re: Proposed Moon Camp Development, October 8<sup>th</sup> Supervisors' hearing

Dear Supervisors:

I am asking that you deny the zone change and proposed Moon Camp development in Fawnskin. I believe that allowing housing in this area would cause irreversible harm to the bald eagles that nest nearby and forage on the proposed site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within 1/2 mile of the project site. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would escalate the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to the National Forest, to the residents and to visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp

development in Fawnskin. Increasing housing density in this area would cause major irreversible

harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant

adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley

for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the

project site. The much more significant impacts this project would cause based on this key change

has never been evaluated. Project proponents have attempted to conceal the true impacts to bald

eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any

management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles.

This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake.

The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else

in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes

currently for sale in this small valley (150 more than a year ago), there is no justification to declare

that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated

such a high fire risk that many local homeowners have had their insurance cancelled. A housing

density increase along the National Forest boundary would increase the fire risk. The area is already

ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation

routes in the state. This zoning change would further aggravate that potentially dire evacuation

deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.  
Most sincerely,

This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,  
Bill E Adams

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would escalate the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

Derek R. Hayes

Please preserve the Moon Camp “development.” This is a precious, natural, free-land preserve which my family has enjoyed for years. Adding 50 odd “luxury” houses is a greedy grab of land, closing this natural habitat to all but the elite. Considering that there are hundreds of available houses for sale already, this is a greedy, benefit-the-wealthy-only scheme.

Please consider the damage to natural fauna. It is known as a precious breeding ground for the rare and threatened American Bald Eagle, our national bird.

Also, our state is increasing prone to drought and wildfire. Perhaps this development is a quick cash gain, but what would it cost the county in future additional fire fighting costs and litigation? Will the developers pay for those fees?

If nothing else, please, pause and think of future generations.

Thank you.

Patricia Finnerty

Supervisors:

We are APPALLED that the San Bernardino County Board would want to approve, even build, a large housing development in the Big Bear area which would adversely affect all the wildlife in the area, including the nesting BALD EAGLES (our National Bird) who use the surrounding area for breeding, food and habitation year round. After watching the development of the Eagle Family in their nest for most of the year, it would be CRIMINAL to force this family and many other species to find other places to live, or stress them to death with the deforestation, lack of food, building of houses and human traffic. This area is already under duress and in order to preserve it, there must be NO DEVELOPMENT in the area where the ecosystem will be impacted in a devastatingly adverse way. RECONSIDER THIS PLAN. Big Bear does not need to become a mall, but must remain a forested area where the natural world and its inhabitants (who truly own it) can continue to thrive. Sincerely, G Hagopian

Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

Alison Karen Avery

-----  
Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would escalate the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

949-616-0194

Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am respectfully asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would escalate the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors.

Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

Melissa A. Freeman

Why do humans feel they are more important than the nature we encroach upon??  
Why is it that money is the end all be all??  
The proposed houses are not for the homeless. They are to make people rich period.  
Big bear is serene and desirable just because of its flora and fauna.  
I am so upset by this proposal I can hardly communicate.  
Shame on all of you and your greediness and corruption!!

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Our national treasured Bald Eagles, your treasured Bald Eagles deserve to stay in their existing home

Sincerely,

Carol Wehling

Re: Proposed Moon Camp development, October 8 Supervisors' hearing

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that does not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zone change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance cancelled. A housing density increase along the National Forest boundary would increase the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

---

Dear Supervisors:

I am asking you to DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin. Increasing housing density in this area would cause major irreversible harm to the bald eagles that nest nearby and forage on the site.

The most recent Draft Environmental Impact Report (2011) concluded there would be significant adverse impacts to bald eagles. That analysis was based on bald eagles only wintering in the valley for a few months a year. Beginning in 2012, a pair of bald eagles began nesting within ½ mile of the project site. The much more significant impacts this project would cause based on this key change has never been evaluated. Project proponents have attempted to conceal the true impacts to bald eagles by creating what they call a 'Long Term Management Plan.' Without proper analysis, any management plan is invalid.

Planning staff cites the need for housing as more important than any harm caused to bald eagles. This area is in the heart of a National Forest, in a unique, rural area on the north side of the lake. The project site itself contains 3 species of plants and rare habitat that do not exist anywhere else in the world! Less than 1/3 of this special habitat is planned to be conserved. With over 600 homes currently for sale in this small valley (150 more than a year ago), there is no justification to declare that a need for housing overrides significant harmful impacts to bald eagles.

Any zoning change, as this project requires, must be in the public interest. This area is already rated such a high fire risk that many local homeowners have had their insurance canceled. A housing density increase along the National Forest boundary would escalate the fire risk. The area is already ranked in the top 1% as having the most hazardous, least adequate fire and emergency evacuation routes in the state. This zoning change would further aggravate that potentially dire evacuation deficiency.

To approve this project, County decision-makers would be saying they care more about adding luxury houses and a private marina than they care about preventing harmful impacts to the bald eagles, to our National Forest, to our residents and to our visitors. Please DENY the detrimental zone change and project proposal for the Moon Camp development in Fawnskin.

Most sincerely,

Tina Jones
