Terracon Project No. LA237111

Dear Mr. Rios:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced subject property (hereinafter known as the 'site'). This assessment was performed in accordance with Purchase Order No. 4100287189 associated with the Terracon Proposal No. PLA237111 dated February 14, 2023.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide other environmental, geotechnical, construction materials, and facilities services on a wide variety of projects locally, regionally, and nationally. For more detailed information on all of Terracon's services please visit our website at [www.terracon.com](http://www.terracon.com). If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,

**Terracon Consultants, Inc.**

## EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Purchase Order No. 4100287189 associated with the Terracon Proposal No. PLA237111 dated February 14, 2023 and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. The ESA was conducted under the supervision or responsible charge of Jennifer S. Van, Environmental Professional. Sabrina Chantler performed the site reconnaissance on March 8, 2023.

### Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

### Site Description and Use

The site is located at 2626 East Pacific Street in San Bernardino, San Bernardino County, California 92346, and consist of approximately 6.6 acres of land on five parcels (San Bernardino County Assessor Parcel Numbers (APNs) 1191-141-36, -37, -38, -40, and -42). The site is developed with a church and associated community or outbuildings (to include a kitchen and pavilion), multiple RV-campers, a single-family residential house (identified at 2634 East Pacific Street), multi-tenant residential duplexes, asphalt paved parking areas and driveways, and landscaped areas on the western portion. The eastern portion of the site consists of a vacant lot. The site is currently occupied by The Salvation Army.

### Historical Information

Based on a review of historical information, the site consisted of undeveloped land from at least 1899 to 1901. From at least 1930 through 1953, the site was utilized for agriculture, including a small portion of an apparent east-adjointing orchard from approximately 1938 to 1949. Multiple apparent single-family residences were present on the site from approximately 1959 through 1980s and Banner Elementary School was present on the western portion of the site from at least 1992 through 2010. Classrooms were depicted on the western portion of the site in 2002 and were removed by 2023. A residence remained on the eastern portion of the site and was removed by 2016. The eastern portion of the site remains vacant to present. The western portion of the site consists of multiple buildings operating as The Salvation Army, which has been present since at least 2017.

The areas to the north, east, and south of the site consisted of agricultural land and residences from the early to mid-1900s and have been fully residential from the 1950s to present. The area to the west of the site consisted of undeveloped or agricultural land through 1989 and was developed with the existing athletic fields by at least 2002. Recognized Environmental Conditions (RECs) were not identified during a review of historical information.

### Prior Report Review

Terracon completed a Phase I ESA report in October 2020 and the property assessed to consist of 6.6-acres, including the current site. At the time of the site reconnaissance, Terracon observed the western portion of the site to consist of a church and associated community or outbuildings (to include a kitchen with two walk-in cooler & freezers, oven with ventilation, interior floor drains, and associated grease trap), a single-family residential house, multi-tenant residential duplexes, HVAC units, storm water drainage system, asphalt paved parking areas and driveways, and landscaped areas on the western portion. Additionally, Terracon observed the eastern portion of the site to consist of a vacant grassy lot. Terracon reported the site to be occupied by The Salvation Army. Terracon concluded that no RECs were identified for the site, but recommended a Soil Management Plan to be implemented during grading activities due to historical agricultural use from at least 1930 to 1953.

### Records Review

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed. The site was identified in the regulatory databases.

Salvation Army Center for Worship & Service (2626 Pacific Street), the site, is listed in the California Integrated Water Quality System (CIWQS) regulatory database. Based on review of the CIWQS regulatory database, Salvation Army Center for Worship & Service the listing is related to management of stormwater during a commercial construction project from 2013 to 2016. The permit status for the listing is "terminated." Based on the status and nature of the listing, RECs were not identified.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time, based upon regulatory status, apparent topographic gradient, and/or distance from the site.

### Site Reconnaissance

During the site reconnaissance, heated and cooled by Heating, Ventilation, and Air Conditioning (HVAC) units, several storm water drains, one grease trap/intercept, a solid waste disposal area, and wood debris were observed. Additionally, Terracon observed the western portion of the site to consist of a church, associated outbuildings (to include

a kitchen and pavilion), multiple RV-campers, a single-family residential house, multi-tenant residential duplexes, asphalt-paved parking areas, and landscaped areas. The eastern portion of the site consisted of a vacant grassy lot. The above-mentioned features do not represent a REC to the site.

### Adjoining Properties

The northern adjoining properties consist of East 17<sup>th</sup> Street followed by single-family residences (6785-6786 Valeria Drive 6788-6789 Lynwood Way) and single-family residences (6788-6789 Lynwood Way). The eastern adjoining properties consist of Highland Creek followed by single-family residences (6813-6833 Rockford Avenue; 26403 Western Avenue; and 26408 Pacific Street). The southern adjoining properties consist of single-family residences (2644 & 2654 Pacific Street) and Pacific Street followed by single-family residences (2657 & 2667 Pacific Street) and multi-family residential buildings (2635 Pacific Street & 1595 Valeria Drive). The western adjoining property consists of Valeria Drive followed by the San Bernardino Soccer Complex (2500 Pacific Street). RECs were not identified observed with the adjoining properties. RECs were not observed in connection with the adjoining properties.

### Significant Data Gaps

No significant data gaps were identified.

### Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 1527-21 for the Salvation Army Center for Worship and Service located at 2626 and 2634 Pacific Street, San Bernardino, San Bernardino County, California (the site). RECs or Controlled RECs (CRECs) were not identified in connection with the site.

### Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon did not identify RECs, CRECs, or SDGs in connection with the site. While not identified as a REC, the site was historically used for agricultural purposes which may have included the application of pesticides and/or herbicides. Based on the historical agricultural use of the site (at least 1930 to 1953), if soils located on the site are to be disturbed during future excavation or construction activities, proper procedures should be followed with respect to worker health and safety (Soil Management Plan to be implemented during grading activities), and if soils are to be disposed off-site, additional investigation may be warranted.

## 1.0 INTRODUCTION

### 1.1 Site Description

Site Name	Salvation Army Center for Worship and Service
Site Location/Address	2626 and 2634 East Pacific Street, San Bernardino, San Bernardino County, California (San Bernardino County Assessor Parcel Numbers (APNs) 1191-141-36, -37, -38, -40, and -41).
Land Area	Approximately 6.6 acres
Site Improvements	Developed with a church and associated outbuildings (to include a kitchen and pavilion), RV-campers, a single-family residential house, multi-tenant residential duplexes, asphalt parking lots and driveways, and landscaped areas on the western portion. The eastern portion consists of a vacant lot.
Anticipated Future Site Use	Facility for at-risk homeless
Reason for the ESA	Acquiring the site

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the USGS 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

### 1.2 Scope of Services

This Phase I ESA was performed in accordance with Purchase Order No. 4100287189 associated with the Terracon Proposal No. PLA237111 dated February 14, 2023, and was conducted consistent with the procedures included in ASTM E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*.

The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. Recognized environmental conditions are defined by ASTM E1527-21 as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future

release to the environment.” A de minimis condition is not a recognized environmental condition.

This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews (including local government inquiries, as applicable), and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

### 1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

### 1.4 Additional Scope Limitations, ASTM Deviations, and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e., evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are

referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- At the issuance of this report, the client did not provide the requested User's information as of the issuance date of the report, Terracon assumes the client is evaluating the questionnaire information outside the context of the Terracon's Phase I ESA scope of work and report.
- At the issuance of this report, a response from the owner representative for a historical interview has not been received. Based on a review of the historical information and the regulatory database, the absence of an historical interview does not represent a significant data gap to the site.
- At the time of the site reconnaissance, Terracon was not granted access to the kitchen building. Based on a review of the historical information and the Phase I ESA in October 2020, the limited site access does not represent a significant data gap to the site.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances, petroleum products or PFAS compounds may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

## 1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of County of San Bernardino CA. Use or reliance by any other party is prohibited without the written authorization of County of San Bernardino CA and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon’s Agreement. The limitation of liability defined in the Agreement is the aggregate limit of Terracon’s liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-21 Section 4.6. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user’s responsibilities in Section 6 of ASTM E1527-21.

## 1.6 Client Provided Information

Prior to the site visit, Mr. Gil Rios, client’s representative, was asked to provide the following user questionnaire information as described in ASTM E1527-21 Section 6.

### Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client’s Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.	X		
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.	X		
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.	X		
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.	X		
Obvious Indicators of Releases at the site.	X		

The client did not provide the requested User’s information as of the issuance date of the report, Terracon assumes the client is evaluating the questionnaire information outside the context of the Terracon’s Phase I ESA scope of work and report.

## 2.0 PHYSICAL SETTING

Physical Setting Information		Source
<b>Topography</b>		
Site Elevation	Approximately 1,190 to 1,200 feet above sea level	USGS Topographic Map, Harrison Mountain, California Quadrangle, dated 2012 (Appendix A)
Topographic Gradient	Gently sloping towards the southwest	
Closest Surface Water	Highland Creek (unlined storm channel) adjoins the site to the east.	
<b>Soil Characteristics</b>		
Soil Type	Tujunga gravelly loamy sand; Hanford coarse sandy loam; Psamments, Fluvents, and Frequently flooded soils	San Bernardino County CA USDA-NRCS Web Soil Survey issued September 13, 2021 Survey
Description	Tujunga gravelly loamy sand is made from alluvium derived from granite with a typical profile of gravelly loamy sand over gravelly sand. This soil series is somewhat excessively drained with a high to very high capacity to transmit water and low available water storage.	
	Hanford coarse sandy loam is also made from alluvium derived from granite with a typical profile of sandy loam over fine sandy loam. This soil series is well drained with a high capacity to transmit water and moderate available water storage.	
	The psamments, fluvents, and frequently flooded soils series is made from alluvium with a	

Physical Setting Information		Source
	typical profile of gravelly sand over stratified gravelly sand to gravelly loam. This soil series is somewhat excessively drained with a high to very high capacity to transmit water and low available water storage.	
Geology/Hydrogeology		
Formation	Quaternary alluvium and marine deposits	
Description	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly non-marine, but includes marine near the coast.	California Department of Conservation, Geologic Map of California, dated 2015
Estimated Depth to First Occurrence of Groundwater	Approximately 190 feet below ground surface (bgs) based on water well data from approximately 1,100 feet northwest of the site.	California Department of Water Resources, Water Data Library, State Well ID. 01N03W31B001S
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (primarily to the southwest).	

\* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

### 3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

### 3.1 Historical Topographic Maps, Aerial Photographs, and Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10-to-15-year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps and aerial photographs maps are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from EDR to evaluate past uses and relevant characteristics of the site and surrounding properties. EDR provided Sanborn maps were not provided.

- Topographic maps:
  - Redlands, California, published in **1899, 1901**, and 1954 from **1952** aerial photographs (1:62,500)
  - Harrison Mountain, California, published in 1953 from **1952** aerial photographs; published in 1967 from **1966** aerial photographs; published in 1973 from **1973** aerial photographs; published in 1980 from **1978** aerial photographs; published in 1988 from **1985** aerial photographs; published in 1996 from **1994** aerial photographs; published in **2012** (1:24,000)
- Aerial photographs:
  - USDA, **1938, 1949, 1953, 1959, 1968**, and **1989**, 1" =500'
  - USDA/NAIP, **2006, 2009, 2012**, and **2016**, 1" =500'
  - USGS, **1966** and **1975**, 1" =500'
  - FAIR, **1930**, 1" =500'
  - USGS/DOQQ, **2002**, 1" =500'
  - BING, **2023**, 1" =500'

### Historical Maps and Aerial Photographs

Direction	Description
Site	Undeveloped land (1899-1901); <u>agricultural land</u> with an apparent residence or barn along the eastern site boundary (1930); <u>agricultural land</u> with an apparent <u>orchard</u> on the eastern portion of the site (1938-1949); site consists of agricultural land on the western portion and multiple apparent farming-related structures on the eastern portion (1953); undeveloped land on the western and northern portions with apparent residences on the southwestern and eastern portions of the site (1959-1975); additional structures are present on the southwestern portion of the site (1985-1989); buildings present on the western portion resembling the existing site buildings and a residence remains on the eastern portion (2002); classrooms developed on the western portion of the site (2006); the residence on the eastern portion of the site has been removed (2016); the classrooms appear removed, followed by vacant land (2023).
North	Undeveloped land (1899-1901); apparent orchard (1930-1938); orchard appears to have lain fallow (1949); undeveloped land (1953); residences (1959-2023)
East	Structure depicted (1899-1901); agricultural land and residences (1930-1949); stream/drainage ditch followed by residences (1953-2023)
South	Undeveloped land (1899-1901); a road followed by undeveloped or agricultural land (1930); small apparent residential structure followed by a road and agricultural land (1938-1953); residences followed by Pacific Street and additional residential structures (1966-2023)
West	Undeveloped land (1899-1901); agricultural land (1930); unimproved road followed by undeveloped or agricultural land (1938-1989); Valaria Drive followed by athletic fields (2002-2023)

The site has been utilized historically as agricultural land, including portions of an orchard. The agricultural practice of crop production often includes the use of pesticides and/or herbicides. Information that would indicate the extensive use of pesticides or herbicides on the site or the storage or mixing of pesticides or herbicides on the site was not identified. Indications of pesticides and/or herbicide misuse or vegetative stress on the site or surrounding property were not observed during the site reconnaissance. Therefore, the historical agricultural use of the site does not appear to represent a recognized environmental condition (REC) to the site.

### 3.2 Historical City Directories

The Haines Criss-Cross Directory and EDR Digital Archive city directories used in this study were made available through EDR (selected years reviewed: 1971-2017) and were reviewed at approximate five-year intervals, if readily available. Street listings were not available prior to 1971. The current street address for the site was identified as 2626 and 2634 East Pacific Street. Based on a review of the historical city directories, previous site address was identified as 2626 East Pacific Street.

#### Historical City Directories

Direction	Description
Site	<b>2626 Pacific Street:</b> Not listed (1971-1980); Magic Years (1985); Banner Elementary School (1992-2010); not listed (2014); <i>The Salvation Army</i> (2017).
	<b>2634 Pacific Street:</b> Not listed (1971-2000); Villa, Cecilia A (2005-2010); Delatorre, Tony D (2014); no listings (2017).
	<b>2670 Pacific Street:</b> Not listed (1971); Smith Columbus (1976-1985); Jesse Rivas (1995); Parra, Alberto (2005); occupant unknown (2010-2014); no listings (2017).
North	<b>6785 Valaria Drive:</b> Not listed (1971-1992); private individual (1995-2017).
	<b>6786 Valaria Drive:</b> Not listed (1971-1992); private individual (1995-2017).
	<b>6788 Lynwood Way:</b> Private individual (1971-1992); occupant unknown (1995-2014); no listings (2017).
	<b>6789 Lynwood Way:</b> Not listed (1971); private individual (1976-1995); occupant unknown (2000); private individual (2005-2017).
East	Highland Creek

Direction	Description
South	<b>1595 Valaria Drive:</b> Not listed (1971-1980); private individuals (1985-2017).
	<b>2635 Pacific Street:</b> Not listed (1971-1980); private individuals (1985; 2000-2017).
	<b>2644 Pacific Street:</b> Not listed (1971-1995); Willams, George E (2000); occupant unknown (2005-2010); Valdez, Candelario M (2014); no listings (2017).
	<b>2654 Pacific Street:</b> Not listed (1971-2017).
	<b>2655 Pacific Street:</b> Not listed (1971-1980); private individual (1985-1995); occupant unknown (2000-2014); no listings (2017)..
	<b>2657 Pacific Street:</b> Not listed (1971); Mar Ric Equipment (1976-1980); private individual (1976-1985; 1995-2017).
	<b>2665 Pacific Street:</b> Not listed (1971-1976); private individual (1980); occupant unknown (2000); private individual (2005-2017).
West	<b>2500 Pacific Street:</b> Not listed (1971-1995); CYSA South San Bernardino Soccer Foundation (2000); not listed (2005-2017).

The above underlined and italicized addresses and facilities were listed in the regulatory database and is further discussed in Section 4.1.

### 3.3 Site Ownership

Based on a review of information obtained from the San Bernardino County assessor’s records, the current site owner is Salvation Army. In addition, previous owners identified included Banner Elementary and various private individuals.

### 3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

### 3.5 Environmental Liens and Activity and Use Limitations

The EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

### 3.6 Interviews Regarding Current and Historical Site Uses

At the issuance of this report, a response from the owner representative for a historical interview has not been received. Based on a review of the historical information and the regulatory database, the absence of an historical interview does not represent a significant data gap to the site.

### 3.7 Prior Report Review

Terracon requested the client provide any previous environmental reports selection they are aware of for the site. A previous report was provided by the client to Terracon for review.

- Phase I Environmental Site Assessment  
2626 East Pacific Street, San Bernardino County, California  
Dated: October 14, 2020  
Prepared by: Terracon Consultants, Inc.  
For: County of San Bernardino

Terracon completed a Phase I ESA report in October 2020 and the property assessed to consist of 6.6-acres, including the current site and previous classrooms located on the western portion of the site. At the time of the site reconnaissance, Terracon observed the western portion of the site to consist of a church and associated community or outbuildings (to include a kitchen with two walk-in cooler & freezers, oven with ventilation, interior floor drains, and associated grease trap), a single-family residential house, multi-tenant residential duplexes, HVAC units, storm water drainage system, asphalt paved parking areas and driveways, and landscaped areas on the western portion. Additionally, Terracon observed the eastern portion of the site to consist of a vacant grassy lot. Terracon reported the site to be occupied by The Salvation Army. Terracon concluded that no RECs were identified for the site but recommended a Soil Management Plan to be implemented during grading activities due to historical agricultural use from at least 1930 to 1953.

## 4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company in a report dated February 28, 2023. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient, and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

### 4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

#### Federal Databases

Database	Description	Distance (miles)	Listings
CERCLIS	Comprehensive Environmental Response, Compensation, & Liability Information System	0.5	0
CERCLIS / NFRAP	Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	0
ERNS	Emergency Response Notification System	Site	0
IC / EC	Institutional Control/Engineering Control	Site	0
NPL	National Priorities List	1	0
NPL (Delisted)	National Priorities Delisted List	0.5	0
RCRA CORRACTS/ TSD	RCRA Corrective Action Activity	1	0

Database	Description	Distance (miles)	Listings
RCRA Generators	Resource Conservation and Recovery Act	Site and adjoining properties	0
RCRA Non-CORRACTS/TSD	RCRA Non-Corrective Action Activity	0.5	0

### State/Tribal Databases

Database	Description	Distance (miles)	Listings
CALSITES	CalSites Database	1	0
CALSITES (AWP)	Active Annual Workplan Sites	1	0
LUST	Leaking Underground Storage Tanks	0.5	7
SWF/LF	Solid Waste Facilities/Landfills	0.5	0
UST	Underground Storage Tank Facilities	Site and adjoining properties	1
VCP	Voluntary Cleanup Program	0.5	0
ENVIROSTOR	Envirostor Database	1.0	3
SWRCY	Recycling Center Listing	0.5	1
CERS HAZ WASTE	California Environmental Reporting System (CERS) HAZ WASTE	0.25	1
SWEEPS UST	SWEEPS UST Listing	0.25	1
HIST UST	Hazardous Substance Storage Container Database	0.25	0
CA FID UST	California Facility Inventory Database	0.25	0
CERS TANKS	CERS Tanks	0.25	1
RCRA NonGen / NLR	RCRA- Non-Generator / No Longer Regulated	0.25	4
FINDS	Facility Index System	Site	0

Database	Description	Distance (miles)	Listings
ECHO	Enforcement and Compliance History Information	Site	0
Cortese	Hazardous Waste & Substances Site List	0.5	4
HIST CORTESE	Hazardous Waste & Substances Site List	0.5	3
NPDES	National Pollutant Discharge Elimination System	Site	1
San Bern. Co. Permit	Hazardous Materials Permits	0.25	1
CIWQS	California Integrated Water Quality System	Site	1
EDR Hist Auto	EDR Exclusive Historical Auto Stations	0.125	1

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report in Appendix D.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

#### Listed Facilities

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Findings Summary
Salvation Army Center For Worship & Serv 2626 Pacific Street	Site	CIWQS	No, discussed below.

#### Salvation Army Center for Worship & Service (2626 Pacific Street)

Salvation Army Center for Worship & Service, the site, is listed in the CIWQS regulatory database. Based on review of the CIWQS regulatory database, Salvation Army Center For Worship & Serv the listing is related to management of stormwater during a commercial construction project from 2013 to 2016. The permit status for the listing is "terminated." Based on the status and nature of the listing, RECs were not identified.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed three facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, none of these facilities were identified as the site or adjacent properties. These facilities are listed in the database report in Appendix D.

## 4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
San Bernardino County Health Services / by online <a href="https://sanbernardinocounty.nextrequest.com/requests/new">https://sanbernardinocounty.nextrequest.com/requests/new</a>	According to the San Bernardino County Health Services on March 15, 2023, records were not identified for the site address.
Department of Toxic Substances (DTSC) / by e-mail <a href="mailto:PubReqAct@dtsc.ca.gov">PubReqAct@dtsc.ca.gov</a>	According to Gao Moua at the Department of Toxic Substances on March 2, 2023, records were not identified for the site address. According to the Phase I ESA report in October 2020, an asbestos waste listing that was taken from the site in 2013 was identified for 2670 East Pacific Street.
Santa Ana Regional Water Quality Control Board (SARWQCB) / by e-mail <a href="mailto:FileReview8@waterboards.ca.gov">FileReview8@waterboards.ca.gov</a>	According to File Desk Review at the Santa Ana Regional Water Quality Control Board on March 14, 2023 records were not identified for the site address.

Agency Contacted/ Contact Method	Response
South Coast Air Quality Management District (SCAQMD) / by online <a href="https://www.aqmd.gov/nav/online-services/public-records">https://www.aqmd.gov/nav/online-services/public-records</a>	According to Michelle Card at the South Coast Air Quality Management District on March 2, 2023, records were not identified for the site address.
San Bernardino County Fire Department / by online form	According to the Christina Rivera at the San Bernardino County Fire Department on March 6, 2023, records were not identified for the site address.
City of San Bernardino City Clerk / by online form <a href="https://sanbernardinocity.nextrequest.com/requests/new">https://sanbernardinocity.nextrequest.com/requests/new</a>	According to Sylvia Bautista at the City of San Bernardino City Clerk on March 8, 2023, records were not identified for the site address.  According to the Phase I ESA report in October 2020, building permits and certificates of occupancy were identified for 2626 East Pacific Street and a demolition permit for a single-family residence was identified for 2670 East Pacific Street.

### 4.3 Local Area Knowledge

Based on a review of the California Department of Conservation, Geologic Energy Management Division well finder website ([CalGEM GIS](#)), the site is not identified within an oil field and there are no active or plugged oil production wells located at the site or adjoining properties.

Terracon researched on-line at the State Resources Water Control Board (SRWCB) GeoTracker database – Land Disposal Sites and landfills were not identified on-site or in the site vicinity.

## 5.0 SITE RECONNAISSANCE

### 5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

#### General Site Information

Site Reconnaissance				
Field Personnel	Sabrina Chantler			
Reconnaissance Date	March 8, 2023			
Weather Conditions	Sunny / 75°F			
Site Contact/Title	Unaccompanied			
Building Description				
Building Identification	Building Use	Approx. Construction Date	Number of Stories	Approx. Size (ft <sup>2</sup> )
2626 East Pacific Street	Chapel for Worship	1959	1	6,800
	Kitchen Facility			4,000
	"L" Duplex- Residential Dwelling			4,300
	Duplex- Residential Dwelling			3,800
2634 East Pacific Street	Single-family Residence	1959	1	2,500
Site Utilities				
Drinking Water	East Valley Water District			
Wastewater	East Valley Water District			
Electric	Southern California Edison (SCE)			
Natural Gas	Southern California Gas Company (SoCalGas)			

## 5.2 Overview of Current Site Occupants and Operations

During the site reconnaissance, the site was currently occupied The Salvation Army.

## 5.3 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an "X") are discussed in more detail following the table.

<b>Site Characteristics</b>		
<b>Category</b>	<b>Item or Feature</b>	<b>Observed or Identified</b>
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	
	Air compressors	
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	X
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	
	Drums, barrels, and/or containers ≥ 5 gallons	
	MSDS or SDS	

Category	Item or Feature	Observed or Identified
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins, and/or dry wells	X
	Grease traps	X
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	
	Interior floor drains	
Electrical Transformers/PCBs	Transformers and/or capacitors	
	Other equipment	
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	
	Leachate and/or waste seeps	
	Trash, debris, and/or other waste materials	
	Dumping or disposal areas	X
	Construction/demolition debris and/or dumped fill dirt	X
	Surface water discoloration, odor, sheen, and/or free-floating product	
	Strong, pungent, or noxious odors	
Other Notable Site Features	Exterior pipe discharges and/or other effluent discharges	
	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	

### Site Operations, Processes, and Equipment

Heating and/or cooling systems

During the site reconnaissance, Terracon observed on-site buildings are heated and cooled by HVAC units, situated on concrete-pads, throughout the site, associated with the church chapel, kitchen, and residential dwellings. Staining and/or releases were not observed during the site reconnaissance. Based on the visual observations, indications of RECs were not observed, in connection with the HVAC units.

## **Underground Chemical or Waste Storage, Drainage or Collection Systems**

### Sumps, cisterns, catch basins and/or dry wells

Terracon observed a trench drain (on the eastern portion of the pavilion), and several storm water drains throughout the western portion of the site, during the visual reconnaissance. According to the Phase I ESA report in October 2020, the western portion of the site had the drains installed to alleviate stormwater flooding. No evidence of chemical waste disposal, noxious odors, or other indications of releases were observed near the vicinity of the drains. Based on visual observations, the drains do not constitute a REC to the site.

### Grease traps

One apparent grease trap/intercept or associated with the existing on-site kitchen was observed along the eastern exterior of the kitchen facility, during the site reconnaissance. The maintenance record of the grease trap was unavailable. No evidence of chemical waste disposal, noxious odors, or other indications of releases were observed near the vicinity of the grease trap. Based on visual observations, the grease trap does not constitute a REC to the site.

### Dumping or disposal areas

At the time of the site reconnaissance, a solid waste disposal area was observed, located on the central portion of the site. Chemical/hazardous materials, noxious odors, staining or indications of releases were not observed in or around the disposal area at the time of the reconnaissance. Based on visual site observations the disposal area / waste bin does not represent a REC to the site.

### Construction/demolition debris and/or dumped fill dirt

At the time of the site reconnaissance, wood debris was observed, scattered on the eastern portion of the site. The wood debris is presumed to be associated with the former on-site dwelling, that was subsequently removed from the site.

Chemical/hazardous materials, noxious odors, staining or indications of releases were not observed in or around the concrete, at the time of the reconnaissance. Based on visual site observations the scattered, wood debris does not represent a REC to the site.

## 6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

### Adjoining Properties

Direction	Description
North	The northern adjoining properties consist of East 17 <sup>th</sup> Street followed by single-family residences (6785-6786 Valeria Drive 6788-6789 Lynwood Way) and single-family residences (6788-6789 Lynwood Way).
East	The eastern adjoining properties consist of Highland Creek followed by single-family residences (6813-6833 Rockford Avenue; 26403 Western Avenue; and 26408 Pacific Street).
South	The southern adjoining properties consist of single-family residences (2644 & 2654 Pacific Street) and Pacific Street followed by single-family residences (2657 & 2667 Pacific Street) and multi-family residential buildings (2635 Pacific Street & 1595 Valaria Drive).
West	The western adjoining property consists of Valaria Drive followed by the San Bernardino Soccer Complex (2500 Pacific Street).

RECs were not identified with the adjoining properties.

## 7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, the following additional services (e.g., asbestos sampling, lead-based paint sampling, wetlands evaluation, lead in drinking water testing, radon testing, vapor encroachment screening, etc.) were not conducted.

## 8.0 DECLARATION

I, Jennifer S. Van declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Terracon (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

<u>Year</u>	<u>Target Street</u>	<u>Cross Street</u>	<u>Source</u>

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 11/29/2018. OBSERVATION: (5) 55-GALLON DRUMS OF HAZARDOUS WASTE CONTAINERS WERE NOT COMPLETELY LABELED. HAZARDOUS WASTE LABELS WERE MISSING REQUIRED ELEMENTS INCLUDING ACCUMULATION START DATE, CONTENTS, AND PHYSICAL AND CHEMICAL CHARACTERISTICS. ACCUMULATION STORAGE TIME OF HAZARDOUS WASTE HAS BEEN EXCEEDED BASED ON THE LAST HAZARDOUS WASTE DISPOSAL RECEIPT AVAILABLE DATED 3/25/2011. COMPLIANCE REQUIREMENT: PROPERLY LABEL ALL HAZARDOUS WASTE CONTAINERS. PROPERLY REMOVE AND DISPOSE ALL HAZARDOUS WASTE. SUBMIT COPIES OF DISPOSAL RECEIPTS TO THIS DIVISION

Violation Date: 04-05-2016  
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)

Violation Description: Failure of sensor to be located in the proper position/location.  
Violation Notes: Returned to compliance on 12/21/2016. THE CURRENT CONFIGURATION OF THE SUMP SENSORS FAILS TO MEET THE REQUIREMENT OF EARLIEST DETECTION. AS NOTED IN VIOLATION# 329, THE SENSORS ARE ATTACHED TO THE SUMP WALLS WITH A SCREW AND BOSTIK-LIKE SUBSTANCE. THIS IS NOT AN APPROVED ACTION, AS IT ALSO REQUIRES THE TECHNICIAN TO ENTER THE SUMP TO EFFECTIVELY TEST THE SENSORS. THE MANNER IN WHICH THE SENSORS WERE AFFIXED TO THE SUMP WALLS PREVENTED THEM FROM REACHING THE LOW POINT OF THE CONTAINMENT. REQUIREMENT: WITHIN 10 DAYS; INSTALL BRACKETS AND SENSOR SLEEVES TO PERMANENTLY SECURE ALL SUMP SENSORS TO THE LOW POINT OF THE SUMP (ON THE PIPING SIDE). PROVIDE A COPY OF THE WORK ORDER DOCUMENTING THE REPAIR TO JKOOYMAN@SBCFIRE.ORG UPON COMPLETION. WORK WILL BE VERIFIED DURING THE RE-INSPECTION OF THE SUMP WALL REPAIRS.

Violation Description: Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).

Violation Notes: Returned to compliance on 06/26/2017. OBSERVATION: Monitoring certifications are due every 365 days. This certification was due 4/22/2016 and the facility failed to conduct certification. Tampering with sensor programming was discovered on 4/2/16 and a monitoring certification after correction was not completed in required time frame. COMPLIANCE: THE NEXT MONITORING CERTIFICATION IS DUE ON OR BEFORE 4/22/2018 Monitoring Certification was conducted today.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: OBSERVATION: Failures were noted during the Overfill Prevention testing conducted on 06/29/2021. No repairs have been made and no construction plans to address these failures have been submitted to this agency. CORRECTIVE ACTION: This violation serves as a 7 day notice to comply. If this violation is not corrected within 7 days this facility will become subject to red tag. Repair/replace all fill tube shut off valves for all tanks to be set at or below 95 percent within 7 days. Construction UST modification plans must be submitted to this agency within 30 days to address these Overfill Prevention repairs. Formal Enforcement May Occur.

LETTER SEVERAL DEFICIENCIES WERE NOTED WITH THE UST TANK INFORMATION SUBMITTED TO CERS (DATED 4/24/15). CORRECT THE FOLLOWING: 1.) THE VAPOR RECOVERY PIPING FOR TANK 1 (87) AND TANK 2 (91) IS DOUBLE-WALLED FIBERGLASS. THE CURRENT INFORMATION STATES "NONE". ADD "FIBERGLASS" TO THE VAPOR RECOVERY PRIMARY AND SECONDARY CONTAINMENT FOR BOTH THE 87 AND 91 TANKS. 2.) THE VENT PIPING TRANSITIONS ABOVEGROUND THROUGH A VENT TRANSITION SUMP. ADD "FIBERGLASS" UNDER VENT TRANSITION SUMP FOR ALL THREE TANK PAGES. 3.) TANKS 2 AND 3 ARE STAND-ALONE TANKS (NOT COMPARTMENTED; EACH TANK HAS IT'S OWN DEDICATED ANNULAR SENSOR). UPDATE BOTH TANK PAGES TO REFLECT A SINGLE COMPARTMENT. REQUIREMENT: WITHIN 30 DAYS; UPDATE THE ABOVE NOTED CORRECTIONS INTO CERS AND SIGN/SUBMIT THE CERTIFICATE OF COMPLIANCE TO JKOOYMAN@SBCFIRE.ORG UPON COMPLETION. 8/9/17 compliance activity: Submittal of 6/26/17 failed to correct inaccuracy. Printed, scanned, and emailed [Truncated]

Violation Date: 06-24-2022  
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)  
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: OBSERVATION: The fill tube shut off valves in all tanks are set above 95 percent, no repairs have been made to have the drop tubes set at or below 95 percent. CORRECTIVE ACTION: Repair/replace the fill tube shut off valves for all tanks within 7 days and submit complete and accurate plans to this agency within 14 days for this UST modification.

Version Date: 2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

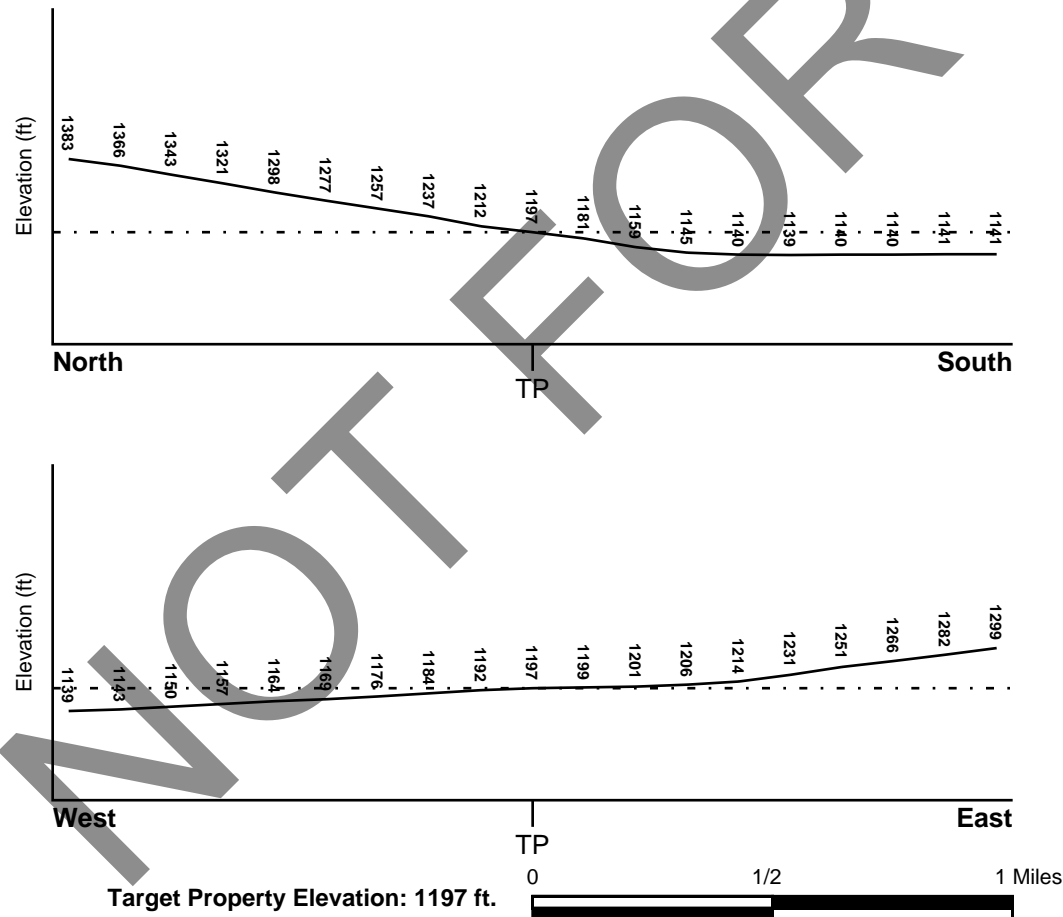

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>  06071C7963H  <u>Additional Panels in search area:</u>  06071C7965H 06071C8701H 06071C8702H	<u>FEMA Source Type</u>  FEMA FIRM Flood data  <u>FEMA Source Type</u>  FEMA FIRM Flood data FEMA FIRM Flood data FEMA FIRM Flood data
---	--

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> NOT AVAILABLE	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

**Site-Specific Hydrogeological Data\*:**  
 Search Radius: 1.25 miles  
 Status: Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
53	1/2 - 1 Mile NNW	SW
1G	1/2 - 1 Mile NNW	SW

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6
2	11 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 2

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	35 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	35 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1

### Soil Map ID: 3

Soil Component Name: FLUVENTS

Soil Surface Texture: gravelly sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
2	9 inches	29 inches	stratified gravelly sand to gravelly loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
3	29 inches	59 inches	stratified gravelly sand to gravelly loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

**Soil Map ID: 4**

Soil Component Name: GREENFIELD

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6
2	16 inches	50 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6
3	50 inches	59 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.6

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

## Sabrina, Chantler

Assistant Geologist

### PROFESSIONAL EXPERIENCE

Ms. Chantler is an assistant geologist in Terracon's Colton, CA office, Environmental Department. Ms. Chantler's professional experience includes assisting Phase I Environmental Site Assessments (ESAs). These efforts involve field surveys, interviews with property owners, Environmental Data Resource reports, and file reviews at local county and city regulatory offices. As required, each ESA is prepared and finalized in accordance with the new ASTM Standards.

### PROJECT EXPERIENCE

#### Undeveloped/Vacant/Agricultural- California

Assisted Phase I Environmental Site Assessment (ESA) report writing on undeveloped, vacant, and agricultural land. Performed site reconnaissance's on projects ranging from 5-acres to 50-acres for clients such as Navistar Inc. and real estate properties.

#### Commercial Properties- California

Performed site reconnaissance's, and assisted Project Managers on Environmental Site Assessments for commercial properties.

#### Industrial Properties- California

Performed site reconnaissance's, and assisted Project Managers on Environmental Site Assessments for industrial properties.

### EDUCATION

Bachelor of Science,  
Environmental Science,  
University of California,  
Riverside, CA, 2021

Associate of Science,  
Natural Science,  
Orange Coast College,  
Costa Mesa, CA, 2019

### WORK HISTORY

Terracon, Colton, California  
Assistant Geologist  
February 2022 to Present

Citrus Research Board/CASSA,  
Riverside, CA,  
Biological Technician  
June 2021 to February 2022

## Jennifer S. Van

**Project Manager / Environmental Group Manager**

### PROFESSIONAL EXPERIENCE

Ms. Van is an Environmental Group Manager in Terracon's Carson, Los Angeles County, California Office. She has over 10 years of experience in of environmental consulting experience including environmental Services; Phase I Environmental Site Assessments (ESAs), Limited Subsurface Investigations (LSIs), Spill Prevention, Control and Countermeasure Plans, regulatory compliance and Radon Measurement Provider. She possesses excellent organization, analytical, advisory and team management skills.

Ms. Van's team managements due diligence services throughout California and has vast experience in renewable energy, healthcare, commercial and residential types of projects.

### PROJECT EXPERIENCE

#### Environmental Site Assessment (ESAs):

Performed and managed over 2,000 ESAs in California and several in Hawaii and Alaska for industrial, commercial, residential, and agricultural properties. Managed long-term national accounts for financial institutions (equity and loan portfolios), real estate investment trusts, developers and other real property owners. Understands facility operating systems; state and federal regulations; and fate and transport of chemicals through air, soil, vapor, surface water and groundwater. Is experienced in the performance of ESAs under the All Appropriate Inquiry rules (ASTM 1527-13), and meets the requirements of an Environmental Professional as defined in Section 312.10 of 40 CFR 312.

#### Radon Assessments

Performed and managed over 10 radon assessments including commercial and residential in California.

#### Limited Subsurface Investigations (LSIs):

Performed and managed over 10 LSI's in California. Investigated environmental conditions in soils and groundwater as a result of releases from a variety of sources, including service stations, dry cleaners, and a wide range of industrial and manufacturing operations. Specialized in collection and interpretation of data.

### EDUCATION

Bachelor of Science,  
Environmental Sciences: Natural  
Sciences.  
Minor: Business Administration  
University of California Riverside,  
California, 2011.

Masters: Environmental Engineering  
California State University, Fullerton,  
2018

### CERTIFICATIONS

24-Hour AHERA Asbestos  
Abatement Building Inspector  
40-Hour OSHA HAZWOPER  
National Radon Proficiency Program  
Residential Measurement Provider

### WORK HISTORY

Terracon Consultants, Inc. (Tustin,  
CA). Environmental Group Manager  
February 2018 to Present

Terracon Consultants, Inc. (Irvine,  
CA). Senior Staff Scientist  
2014 to February 2018

Terracon Consultants, Inc. (Irvine,  
CA). Staff Scientist  
August 2011 to 2014

# Resumes

---

## **Spill Prevention, Control And Countermeasure Plans (SPCCs)**

Ms. Van has experience with federal and state requirements for Spill Prevention, Control and Countermeasure Plans for Tier I and II qualified facilities.

## **Regulatory Compliance, Buena Park and Tipton, California**

Project Manager for two regulatory compliance projects in Buena Park and Tipton, California, which included refrigeration and multiple dairy facilities.

## **Military Base Phase I ESAs and Soil Management Plans – San Diego County, California**

Project Manager of ESAs and SMPs of over 100 sites for proposed telecommunication small cell locations within naval bases located within the San Diego County. Findings of the ESAs were utilized in creation of the SMPs, which was implemented at the installation of telecommunications utilities on the various bases.

## **Automotive Body Shop Portfolio, California**

Portfolio assistant manager of environmental consulting services including Phase I ESA. The purpose of the services were to assist a client with a large acquisition of properties.

# Clifford Nale, L.G., P.G.

## SENIOR PROJECT MANAGER

### PROFESSIONAL EXPERIENCE

Mr. Nale is a Senior Project Manager with Terracon's Seattle (Mountlake Terrace) office. His duties include the management of all phases of environmental site assessments (ESAs), business environmental risk reviews, site characterizations, and National Environmental Policy Act (NEPA) compliance assessments for wireless telecommunications providers. He also performs technical review of all environmental service projects in the Seattle office.

Over the course of his 28 years of professional environmental experience, Mr. Nale has performed site characterizations of soil and groundwater for regulatory compliance, and for remediation design projects throughout Washington, Oregon, California, Nevada and Arizona.

### PROJECT EXPERIENCE

#### Environmental Site Assessments (ESAs)

Mr. Nale has managed and performed hundreds of ESAs throughout Washington, Oregon, California, Nevada, and Arizona for industrial, commercial, residential, and agricultural properties. He has managed projects for financial institutions, real estate investment trusts, developers, and other real property owners. Mr. Nale fully understands facility operating systems; state and federal regulations; and fate and transport of chemicals through air, soil, vapor, surface water, and groundwater. He has extensive experience and expertise in the performance of ESAs under the All Appropriate Inquiry rules (ASTM 1527-13) and meets the requirements of an Environmental Professional as defined by this rule.

#### Limited Subsurface Investigations (LSIs)

Mr. Nale has managed and performed hundreds of LSIs throughout Washington, Oregon, California, and Nevada. He has investigated environmental conditions in soils, soil vapor, and groundwater due to releases from a variety of sources, including gasoline service stations, dry cleaners, and a wide range of industrial and manufacturing facilities.

#### Remedial Investigation/Remedial Action

Mr. Nale has managed numerous Remedial Investigation (RI) and Remedial Action (RA) projects in Washington State, either through an Independent Remedial Action or in coordination with the Washington State Department of Ecology's Voluntary Cleanup Program (VCP). He has expertise in the collection and interpretation of data to pursue closure through Washington's VCP program. Mr. Nale has provided oversight on RA projects utilizing cleanup remedies, including in-situ chemical oxidation, the installation of granular-activated carbon, and large-scale dig-and-haul methods on a variety of industrial and commercial properties.

### EDUCATION

Bachelor of Science, Engineering Geology, University of California, Los Angeles, CA

2018 – Present

**NOT FOR BID**

**APPENDIX F**  
**DESCRIPTION OF TERMS AND ACRONYMS**

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	<p>Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).</p> <p>Regulatory agencies have generally defined ACM as a material containing greater than one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable.</p> <p>Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.</p>
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally Exempt Small Quantity Generators
CFR	Code of Federal Regulations

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a “solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-13 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program
LQG	Large Quantity Generators
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.
pCi/L	picoCuries per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in picoCuries per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ('cradle to grave'). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/TS Ds	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/TS Ds	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. De minimis conditions are not recognized environmental conditions."
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small Quantity Generator
SWF/LF	State and/or Tribal database of Solid Waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.

## Description of Selected General Terms and Acronyms

Term/Acronym	Description
TSCA	Toxic Substances Control Act. A federal law regulating manufacture, import, processing and distribution of chemical substances not specifically regulated by other federal laws (such as asbestos, PCBs, lead-based paint and radon). 15 U.S.C 2601 et seq.
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-13, define this as any tank, incl., underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VCP	State and/or Tribal facilities included as Voluntary Cleanup Program sites.
VOC	Volatile Organic Compound
Wetlands	<p>Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs). The <u>Corps of Engineers Wetlands Delineation Manual</u> (Technical Report Y-87-1) defines wetlands as areas inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. For an area to be considered a jurisdictional wetland, it must meet the following criteria: more than 50 percent of the dominant plant species must be categorized as Obligate, Facultative Wetland, or Facultative on lists of plant species that occur in wetlands; the soil must be hydric; and, wetland hydrology must be present.</p> <p>The federal Clean Water Act which regulates “waters of the US,” also regulates wetlands, a program jointly administered by the USACE and the EPA. Waters of the U.S. are defined as: (1) waters used in interstate or foreign commerce, including all waters subject to the ebb and flow of tides; (2) all interstate waters including interstate wetlands; (3) all other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, etc., which the use, degradation, or destruction could affect interstate/ foreign commerce; (4) all impoundments of waters otherwise defined as waters of the U. S., (5) tributaries of waters identified in 1 through 4 above; (6) the territorial seas; and (7) wetlands adjacent to waters identified in 1 through 6 above. Only the USACE has the authority to make a final wetlands jurisdictional determination.</p>
