Supplemental Terms and Conditions

This Supplement is part of an Agreement between SAP and Customer and applies solely to the SAP Archiving and Document Access Core by OpenText Cloud Service.

1. FEES

- 1.1. The Usage Metric for the Cloud Service is Gigabyte ("**GB**"). "**GB**" is the amount of capacity in the Cloud Service. For this Cloud Service, bandwidth capacity and storage capacity are counted. GB of bandwidth capacity is counted in blocks of 1 GB, and GB of storage capacity is counted in blocks of 500 GB.
- 1.2. One block of GB of storage capacity is included with the Cloud Service in the Initial Subscription.
- 1.3. The Cloud Service includes two production tenants and one pre-production tenant. The production tenants may be used as production and/or non-production tenants. Customer must install a separate instance of Integration Application (defined below) for use on any non-production tenants.
- 1.4. Customer may only use the pre-production tenant for general tests of the archiving services (excluding load tests). The pre-production tenant must not be used for load testing. Storage capacity of the pre-production tenant is limited to 50 GB.

2. ADDITIONAL TERMS

- 2.1. SAP makes available for download the ABAP-on, client components and the proxy in one integration application (the "**Integration Application**"), which is part of the Cloud Service and may only be used by Authorized Users to integrate the Cloud Service with the on-premise Customer environment. Integration Application may not be modified or altered in any way except by SAP. Customer is responsible for the installation, operation, and physical security of Integration Application. In addition to the support policy reference in the Order Form, specific SAP support and maintenance policies apply to Integration Application and can be found at <https://launchpad.support.sap.com/#/notes/2658835>.
