Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 02/12/2020. OBSERVATION: Observed (1) 200-gallon tank of used oil labeled with an incomplete hazardous waste label. Also observed (1) 55-gallon drum of waste non-metal filters incorrectly labeled as drained used oil filters. Also observed (1) 55-gallon drum of waste absorbent missing an accumulation start date. CORRECTED ON SITE: Mr. Joaquin Conchas placed complete hazardous waste labels on the (1) 200-gallon tank of used oil and the (1) 55-gallon drum of waste non-metal filters at the time of inspection. Mr. Joaquin Conchas also filled in an accumulation start date for the (1) 55-gallon drum of waste absorbent at the time of inspection.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-29-2016
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: I asked to review their SWPPP and then to be given a tour of the facility which will consist of photographs. Bernardino had no objections and presented their SWPPP. Entire facility is paved or concrete and fairly swept. Debris on ground was a result of daily activities. Few containers were covered but, there was no rain expected soon. We spoke of the value of sampling and its insight to facility management by revealing areas of necessary change such as additional tarps or moving types of scrap metal to other areas of facility or the need to build additional covered areas. We spoke of possible advanced media socks to address any parameters that might exceed the Numeric Action Levels. We also spoke of developing a spill kit despite them never having a spill. I did note that the facility is equipped with absorbent material and keep their metal bins above a secondary containment. Secondary containment was empty and contained no liquids (see figures 3 and 4 in report). Corrective Actions requested; Submit via email or uploads onto SMARTs: a) Monthly visual inspection reports b) Employee training sheet c) Daily sweeping Log d) Proof of sampling field equipment (if sampling your self) e) Proof of sample Bottles kept onsite f) Proof of spill kit and include in SWPPP
Eval Division: Water Boards
Eval Program: INDSTW
Eval Source: SMARTS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-04-2015
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: During inspection I noted, the facility has one discharge point with no run on. The entire facility appeared to be paved. We spoke of Phases of the permit under Option 1 and of Best Management Practices (BMPs) to prevent contamination of stormwater or treat metal contaminated runoff. BMPs such as the use of container covers prior

and through a storm event and metal adsorbing media socks to help adsorb metals within the storm water runoff. We also spoke of Phase III for Option 1 under the Scrap Metal Permit. I stated that Phase III would require an advanced treatment system to treat storm water. In regards to sampling, I pointed out that no samples were taken to date and the requirement of sampling at least four storm events, the requirement of having a lab certified sampling person on site, and the requirement of having a sampling kit on site to measure the field parameters such as pH, turbidity, and specific conductance. I mentioned the field sampling kit since there was no sampling kit present. In regards to their SWPPP, Sweeping Log and Visual Inspection reports/checklist were missing, and their SWPPP did contain a Rain Event Action Plan (REAP).

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
