- I. County has the discretion to revoke full or partial provisions of the Contract, delegated activities or obligations, or application of other remedies permitted by State or Federal law when the County or DHCS determines Contractor has not performed satisfactorily.
- J. Cultural Competency

The State mandates counties to develop and implement a Cultural Competency Plan (CCP). This Plan applies to all DBH services. Policies and procedures and all services must be culturally and linguistically appropriate. Contract agencies are included in the implementation process of the most recent State approved CCP for San Bernardino County and shall adhere to all cultural competency standards and requirements. Contractor shall participate in the County's efforts to promote the delivery of services in a culturally competent and equitable manner to all enrollees, including those with limited English proficiency and diverse cultural and ethnic backgrounds, disabilities, and regardless of gender, sexual orientation or gender identity. In addition, contract agencies will maintain a copy of the current DBH CCP.

1. Cultural and Linguistic Competency

Cultural competence is defined as a set of congruent practice skills, knowledge, behaviors, attitudes, and policies that come together in a system, agency, or among consumer providers and professionals that enables that system, agency, or those professionals and consumer providers to work effectively in cross cultural situations.

- a. To ensure equal access to quality care for diverse populations, Contractor shall adopt the Federal Office of Minority Health Culturally and Linguistically Appropriate Services (CLAS) national standards.
- b. Contractor shall be required to assess the demographic make-up and population trends of its service area to identify the cultural and linguistic needs of the eligible beneficiary population. Such studies are critical to designing and planning for providing appropriate and effective mental health and substance use disorder treatment services.
- c. Upon request, Contractor shall provide DBH with culture-specific service options available to be provided by Contractor.
- d. Contractor shall have the capacity or ability to provide interpretation and translation services in threshold and prevalent non-English languages, free of charge to beneficiaries. - f. DBH recognizes that cultural competence is a goal toward which professionals, agencies, and systems should strive. Becoming culturally competent is a developmental process and incorporates at all levels the importance of culture, the assessment of cross-cultural relations, vigilance towards the dynamics that result from cultural differences, the expansion of cultural knowledge, and the adaptation of services to meet culturally unique needs. Providing mental health and substance use disorder treatment services in a culturally appropriate and responsive manner is fundamental in any effort to ensure success of high quality and cost-effective behavioral health services. Offering those services in a manner that fails to achieve its intended result due to cultural and linguistic barriers does not reflect high quality of care and is not cost effective.
- g. To assist Contractor's efforts towards cultural and linguistic competency, DBH shall provide the following:
 - i. Technical assistance to Contractor regarding cultural competency implementation.
 - a) Monitoring activities administered by DBH may require Contractor to demonstrate documented capacity to offer services in threshold languages or contracted interpretation and translation services.

I. DEFINITION OF RECOVERY, WELLNESS, AND RESILIENCE

- A. Mental Health Recovery, Wellness, and Resilience (RWR) is an approach to helping the individual to live a healthy, satisfying, and hopeful life despite limitations and/or continuing effects caused by his or her mental illness according to his or her own values and cultural framework. RWR focuses on client strengths, skills and possibilities, rather than on illness, deficits, and limitations, in order to encourage hope (in staff and clients) and progress toward the life the client desires. RWR involves collaboration with and encouragement of clients and their families, support systems and involved others to take control of major life decisions and client care; it encourages involvement or re-involvement of clients in family, social, and community roles that are consistent with their values, culture, and predominate language; it facilitates hope and empowerment with the goal of counteracting internal and external "stigma"; it improves self-esteem; it encourages client self-management of his/her life and the making of his/her own choices and decisions, it re-integrates the client back into his/her community as a contributing member; and it achieves a satisfying and fulfilling life for the individual. It is believed that all clients can recover, even if that recovery is not complete. This may at times involve risks as clients move to new levels of functioning. The individual is ultimately responsible for his or her own recovery choices.

For children, the goal of the RWR philosophy of care is to help children (hereinafter used to refer to both children and adolescents) to recover from mistreatment and trauma, to learn more adaptive methods of coping with environmental demands and with their own emotions, and to joyfully discover their potential and their place in the world. RWR focuses on a child's strengths, skills, and possibilities rather than on illness, deficits and limitations. RWR encourages children to take increasing responsibility for their choices and their behavior, since these choices can lead either in the direction of recovery and growth or in the direction of stagnation and unhappiness. RWR encourages children to assume and to regain family, social, and community roles in which they can learn and grow toward maturity and that are consistent with their values and culture. RWR promotes acceptance by parents and other caregivers and by the community of all children, regardless of developmental level, illness, or handicap, and it addresses issues of stigma and prejudice that are related to this. This may involve interacting with the community groups or cultural group's way of viewing mental and emotional problems and differences.

- B. "Rehabilitation" is a strength-based approach to skills development that focuses on maximizing an individual's functioning. Services will support the individual, family,

ADDENDUM I

support system, and/or involved others in accomplishing the desired results. Families, caregivers, human service agency personnel and other significant support persons should be encouraged to participate in the planning and implementation process in responding to the individual's needs and desires, and in facilitating the individual's choices and responsibilities.

- C. Accordingly, program staffing should be multi-disciplinary and reflect the cultural, linguistic, ethnic, age, gender, sexual orientation and other social characteristics of the community in which the program serves. Families, caregivers, human service agency personnel and other significant support persons should be encouraged to participate in the planning and implementation process in responding to the individual's needs and desires, and in facilitating the individual's choices and responsibilities. Programs may be designed to use both licensed and non-licensed personnel who are experienced in providing behavioral health services.
- D. Accordingly, the Contractor shall develop admission policies and procedures regarding those persons who are eligible for EPSDT Medi-Cal services. Non-EPSDT eligible children and youth in need of treatment should be screened and referred to an appropriate behavioral health service provider or be treated under separate funding streams. DBH cannot reimburse Contractor for services provided to out-of-county Medi-Cal beneficiaries with Medi-Cal funds; however, it is the responsibility of the Contractor to monitor the availability of these funds
- E. All outpatient contract agencies are required to provide services under Title 9, Chapter 11, Section 1810.249, which superseded the rehabilitation option and targeted case management guidelines of July 1, 1993, and more recent guidelines as may be incorporated or referenced herein by attachment. 4) The child has been assessed pursuant to Article 2 (commencing with Section 56320) of Chapter 4 of Part 30 of Division 4 of Title 2 of the Education Code and determined to have an emotional disturbance, as defined in paragraph (4) of subdivision (c) of Section 300.8 of Title 34 of the Code of Federal Regulations.

69. Specialty Mental Health Services – Individual or group therapies and interventions that are designed to provide reduction of mental disability and restoration, improvement or maintenance of functioning consistent with the goals of learning, development, independent living and enhanced self-sufficiency and that are not provided as a component of residential services, crisis residential treatment services, crisis intervention, crisis stabilization, day rehabilitation, or day treatment intensive. Service activities may include but are not limited to assessment, collateral, medication support, therapy, rehabilitation, and plan development. [Note: Please note which of the following services are required for each program. SATS will only provide these services if a participant is an EPSDT Medi-Cal beneficiary eligible for Medi-Cal funded services (meets medical necessity criteria and is under the age of twenty-one (21)).]
 - a. Assessment – A service activity designed to evaluate the current status of a child's mental, emotional, or behavioral health. Assessment includes, but is not limited to, one or more of the following: mental status determination, analysis of the child's clinical history; analysis of relevant cultural issues and history; diagnosis; and the use of testing procedures.
 - b. Collateral – A service activity to a Significant Support Person in a child's life for the purpose of meeting the needs of the child in terms of achieving the goals of the child's/youth's client plan. Collateral may include, but is not limited to, consultation and training of the significant support person(s) to assist in better utilization of mental health services by the child, consultation and training of the significant support person(s) to assist in better understanding of the child's/youth's serious emotional disturbance; and family counseling with significant support person(s) in achieving the goals of the child's/youth's client plan. The child/youth may or may not be present for this service activity. NOTE: Per CalAIM payment reform there is no longer a specific code to capture collateral activities, but this activity is included within other billable service codes. For example, activities historically billed under collateral may be billable under Intensive Case Coordination for youth twenty-one (21) and younger.
 - c. Crisis Intervention – A quick emergency response service enabling the individual and/or family, support system and/or involved others to cope with a crisis, while maintaining his/her status as a functioning community member to the greatest extent possible, and in the least restrictive care as applicable. A crisis is an unplanned event that results in the individual's need for immediate service intervention. Crisis intervention services are limited to stabilization of the presenting emergency. This service does not include Crisis Stabilization, which is provided in a twenty-four (24) hour health care facility or hospital outpatient program. Service activities include but are not limited to assessment, evaluation, collateral and therapy (all billed as crisis intervention).
 - d. Intensive Case Coordination (ICC) – Targeted case management services designed to capture the time spent working with children being served by multiple agencies. This includes assessment of strengths and needs, care planning, and coordination of services, including urgent services for children and youth who meet the Katie A. Subclass criteria. Refer to the DHCS manual, Medi-Cal Manual for Intensive Case

ADDENDUM I

Coordination (ICC), Intensive Home Based Services (IHBS) & Therapeutic Foster Care (TFC) for Katie A. Subclass Members ([Medi-Cal Manual Third Edition ADA](#)) for additional information.

- e. Intensive Home Based Services (IHBS) (optional) – Services that includes intensive, individualized, strength-based, and needs-driven intervention activities that support the engagement and participation of the child/youth and significant others and help the child/youth develop skills and achieve the goals and objectives of the plan. IHBS (EPSDT Medi-Cal) may only be provided to children and youth who meet the Katie A. Subclass criteria. IHBS (EPSDT Medi-Cal) must be authorized within a CFTM. Refer to the DHCS manual, Medi-Cal Manual for Intensive Care Coordination (ICC), Intensive Home Based Services (IHBS) & Therapeutic Foster Care (TFC) ([Medi-Cal Manual Third Edition ADA](#)) for additional information.
- f. Medication Support Services – Services that include staff persons practicing within the scope of their professions by prescribing, administering, dispensing and/or monitoring of psychiatric medications or biologicals necessary to alleviate the symptoms of mental illness. This service includes:
 - 1) Evaluation of the need for medication.
 - 2) Evaluation of clinical effectiveness and side effects of medication.
 - 3) Obtaining informed consent.
 - 4) Medication education (including discussing risks, benefits and alternatives with the individual, family or significant support persons).
 - 5) Plan development related to the delivery of this service.
- g. Plan Development – A service activity that consists of development of client plans, approval of client plans, and/or monitoring and recording of a child's/youth's progress.
- h. Rehabilitation – A service activity that includes, but is not limited to, assistance in improving, maintaining, or restoring a child's/youth's or group of children's/youth's functional skills, daily living skills, social and leisure skills, and grooming and personal hygiene skills; obtaining support resources; and/or obtaining medication education.
 - 1) Assistance in restoring or maintaining an individual's functional skills, social skills, medication compliance, and support resources.
 - 2) Age-appropriate counseling of the individual and/or family, support systems and involved others.
 - 3) Training in leisure activities needed to achieve the individual's goals/desired results/personal milestones.
 - 4) Medication education for family, support systems and involved others.
- i. Targeted Case Management (TCM) – Services that assist a beneficiary to access needed medical, educational, social, prevocational, vocational, rehabilitative, or other community services. The service activities may include, but are not limited to, communication, coordination, and referral; monitoring service delivery to ensure beneficiary access to service and the service delivery system; monitoring of the beneficiary's progress; placement services; and plan development. TCM may be either face-to-face or by telephone with the child/youth or significant support persons and may be provided anywhere in the community.
- j. Therapeutic Behavioral Services (TBS) – One-to-one behavioral mental health services available to children/youth with serious emotional challenges who are under age 21 and who are eligible for a full array of Medi-Cal benefits without restrictions or limitations (full scope Medi-Cal). ADDENDUM I

required. For SAP and SATS these services will be accessed, if needed, by working with another DBH vendor who holds a TBS Program contract.

- k. Therapy – A service activity that may be delivered to an individual or group of individuals and may include family therapy (when the individual is present). Therapeutic interventions are consistent with the individual's goals, desired results, and personal milestones and focus primarily on symptom reduction as the means to improve functional impairments.
70. State Bill (SB) 785 – Legislation intended to facilitate the receipt of medically necessary specialty mental health services by a Dependent who is placed outside of their county of jurisdiction. The bill clarifies responsibility for treatment authorizations and transfers the responsibility for the provision of services to the host county while keeping the financial responsibility to authorize and pay for services with the county of jurisdiction.
71. Strategy – A planned and specified method within a Program intended to achieve a defined goal.
72. Strength-based – The process of developing an Individualized Service Plan beginning with an assessment of the strengths of all the family members and other individuals involved with the family team. The Plan emphasizes the strengths of the family rather than their problems and deficits. It evaluates and utilizes family strengths in the individualized planning process. This is a departure from the professional-driven service delivery system that traditionally focuses on family deficits and generally fails to identify strengths.
73. Subject Matter Experts (SMEs) – The technical experts in Objective Arts program for their agency or program. Only users designated as agency SMEs can access the Objective Arts program.
74. Transformational Collaborative Outcomes Management (TCOM) - A framework into the daily care of mental health consumers within San Bernardino County. The TCOM system was developed by the Praed Foundation in 1998 and specific tools have been modified by DBH and Praed in an effort to ensure that the needs of the County's specific population are addressed. These tools are the Adult Needs and Strengths – San Bernardino and the Child and Adolescent Needs and Strengths – San Bernardino. TCOM:
 - a. Focuses on change and impact to all levels of activities
 - b. Information is integrated into all activities with the consumer, family, and staff as full partner
 - c. Measures are relevant to decisions about and evaluation of interventions
 - d. Information is used to manage services, from an individual consumer level to supervision to individual programs to the entire system of care
75. Transitional Age Youth (TAY) – A term used to describe consumers who are sixteen (16) to twenty-five (25) years old.
76. Trauma Exposed – Those who are exposed to traumatic events or prolonged traumatic conditions including grief, loss and isolation.
77. Trauma-Informed Care (TIC) - Understands and considers the pervasive nature of trauma and promotes healing and recovery environments rather than practices and services that may inadvertently re-traumatize.
78. Treatment Progress Report – A structured report indicating current status, progress in treatment, and expectation of future services.

ADDENDUM I

79. Unduplicated – When reporting the number of unduplicated clients, an individual client is to be included in the number reported; that individual client shall only be included once for the year, no matter how many times the individual client returns for assistance during the year.
80. Underserved or inappropriately served – Those individuals who may be receiving some services, but whose services do not provide the necessary opportunities to participate and move forward and pursue their wellness/recovery goals.
81. Unserved – Those individuals who are not receiving mental health services, particularly those who are a part of racial ethnic populations that have not had access to mental health services.
82. Ward – A child or youth who is under the jurisdiction of the San Bernardino County Juvenile Court pursuant to WIC Section 602 and is under the supervision of Probation.
83. Welfare and Institutions Code (W&I Code) – A series of statutes in California that includes programs and services designed to provide protection, support, or care of individuals. The purpose of these statutes is to provide protective services to the fullest extent deemed necessary by the juvenile court, probation department, or other public agencies designated by the Board of Supervisors to perform the duties prescribed to ensure that the rights or physical, mental, or moral welfare of children are not violated or threatened by their present circumstances or environment.

III. **SATS MISSION AND GOALS**

A. Overview

SATS is intended to provide access to mental health care for school-age children, making it extremely important for providers to cultivate strong working relationships with Local Education Areas (LEAs). Cooperation and collaboration with schools in respective service region(s) is crucial in order to provide services on local campuses (as permitted by LEAs) and for identifying additional school-based services for linkages within San Bernardino County. The target population for SATS is children and youth initially dealing with mental health issues (i.e., mild to moderate within spectrum of medical necessity) and those with established long-term difficulties (i.e., severely emotionally disturbed). Target population is limited to full scope Medi-Cal Beneficiaries who are enrolled, or recently were enrolled, in the school district.

Additionally, it is expected that in the provision of services to Dependents (aka, Foster Children) providers will adhere to the Core Practice Model; working in a highly collaborative manner and providing Intensive Care Coordination (ICC) as needed.

SATS is to provide EPSDT Medi-Cal Specialty Mental Health services for school-age children and youth (i.e., up to twenty-one (21) years of age) who are experiencing significant distress due to a mental health condition and who meet medical necessity criteria. The target population for SATS is children and youth initially dealing with mental health issues (i.e., mild to moderate within spectrum of medical necessity) and those with established long-term difficulties (i.e., severely emotionally disturbed). Services will minimally include the following: Assessment, Plan Development, Targeted Case Management, Intensive Care Coordination, Rehabilitation, and Therapy. Provision of these services should be carried out within an easily accessible location for school aged clients and must be available for all twelve months of the fiscal year.

The Contractor will serve children, youth and their families during the term of the Contract with a primary focus in the areas and regions of San Bernardino County more commonly

ADDENDUM I

known as East Valley, West Valley, High Desert, Mountain, and Eastern Desert. The Contractor shall screen clients generated and referred by DBH outpatient contract agencies, acute inpatient psychiatric hospitals, agencies and local schools; in conjunction with the DBH, shall develop admission policies and procedures regarding those persons who are eligible for services; and shall provide a discharge plan for all cases that aids in the maintenance of a stable level of functioning. (Cases will be discharged following completion of services, an acceptable level of stability and linkage with supportive resources.)

B. Program Objective

1. The overall objective of School-Aged Treatment Services (SATS) is to restore or maintain functioning consistent with the requirements for learning, development, independent living and enhanced self-sufficiency in school-age children who are Medi-Cal beneficiaries and have experienced significant impairment from mental health difficulties. Service priority should be given to unserved/underserved populations and children/youth that are dually diagnosed with co-occurring disorders. Additional service priorities are as follows:
 - a. Children who are emotionally disturbed in the target populations.
 - b. Children in foster homes referred for assessments by the regional DBH liaison to the Department of Children's Services.
 - c. Children referred from DBH
2. The intent of this program is to provide access to mental health care to school-age children, making it extremely important for providers to cultivate strong working relationships with Local Education Areas (LEAs). Cooperation and collaboration with schools in respective service region(s) is crucial in order to provide services on local campuses (as permitted by LEAs) and for identifying additional school-based services for linkages within San Bernardino County.
3. The program objective is to:
 - a. Provide services appropriate to needs based on functioning and cultural background.
 - b. Provide effective services that are continually reviewed and revised as needed.

C. Values, Principles, Basic Tenets, and Philosophies of the Core Practice Model:

1. Children are first and foremost protected from abuse and neglect and maintained safely in their own homes.
2. Services are needs driven, strength-based, and family focused from the first conversation with or about the family.
3. Services are individualized and tailored to the strengths and needs of each child and family.
4. SATS is a community-based effort.
5. Services are delivered through a multi-agency collaborative approach that is grounded in a strong community base.
6. Parent/Family voice, choice, and preference are assured throughout the process.
7. Services incorporate a blend of formal and informal resources designed to assist families with successful transitions that ensure long-term success.

ADDENDUM I

8. Services are culturally competent and respectful of the culture of children and their families.
9. Services and support are provided in the child and family's community.
10. Children have permanence and stability in their living situation.
11. It is further expected that the client population will be reflective of the social, economic and ethnic characteristics of the communities served by the Contractor.

IV. PERSONS TO BE SERVED (TARGET POPULATION)

- A. School-age children and youth (i.e., up to twenty-one (21) years of age) who are experiencing significant distress due to a mental health condition and who meet medical necessity criteria. This includes children and youth who, while receiving mental health services, move outside the local area. Services should be continued as appropriate. The target population for SATS is children and youth initially dealing with mental health issues (i.e., mild to moderate within spectrum of medical necessity) and those with established long-term difficulties (i.e., severely emotionally disturbed). Target population is limited to full scope Medi-Cal Beneficiaries who are enrolled, or recently were enrolled, in the school district, but are not limited to children and youth enrolled in public schools.
- B. Service priority should be given to unserved/underserved populations and children/youth that are dually diagnosed with co-occurring disorders.
- C. Additionally, it is expected that in the provision of services to Dependents (aka, Foster Children) providers will adhere to the Integrated Core Practice Model (ICPM); working in a highly collaborative manner and providing Intensive Care Coordination (ICC) as needed.

V. PROGRAM DESCRIPTION

SATS programs are an essential part of the continuum of care, as they provide a link between school-age children/youth and appropriate mental health services. An essential aspect of SATS is close collaboration with other programs for provision of appropriate services.

EPSDT is a federally mandated Medi-Cal plan requiring states to provide screening, diagnostic and treatment services to eligible Medi-Cal recipients under the age of twenty-one (21). The intent of the program is to extend Medi-Cal coverage to children and youth to "ascertain physical and mental defects" and "to provide treatment to correct or ameliorate defects and chronic conditions found." Thus, the Contractor will be expected to provide a full range of services that are tailored to meet the respective target population in each geographic area to be served by the Contractor.

- A. Mental Health Services
 1. Assessment
 2. Case Management
 3. Crisis Intervention
 4. Medication Support Services (Optional)
 5. Plan Development
 6. Rehabilitation
 7. Therapy
- B. Overall Service Requirements

ADDENDUM I

1. Contractor will have primary responsibility to provide the full range of mental health services to children/youth that live within the Contractor's service area(s), including crisis and emergency services.
2. Accept referrals directly from DBH and other child serving agencies
3. Maintain a system/protocol to address crisis and emergency situation, twenty-four (24) hours a day – seven (7) days a week, to meet the needs of the child/youth/family.
4. Develop, coordinate and provide formal therapeutic treatment services based on assessments and treatment recommendations.
5. Develop a system to screen and prioritize clients awaiting treatment and those in treatment, to ensure availability of service to the most severely ill.
6. Provide services in a culturally competent manner by recruiting, hiring, training and maintaining staff that provide culturally appropriate services to diverse populations.
7. Ensure clinical staff are trained in identification, treatment, and management of eating disorders.
8. Review and maintain information in Objective Arts on a weekly basis.
9. Median number of business days between a complete referral received and first attempted contact of family is two (2) days or less.
10. Median number of days between first contact and intake meeting is fourteen (14) calendar days or less.
11. Median number of days between first assessment appointment and provision of first treatment plan driven service is thirty (30) calendar days or less.
12. Median number of days between treatment services will be less than twenty-one (21).
13. Services provided will be within a range of intensities (e.g., three (3) times per week to two (2) times per month). Within this range it is expected that at least twenty percent (20%) of the children and youth served receive low-intensity services (i.e., two (2) times per month or less). It is also expected that SATS will provide more intensive services for a short period of time (e.g., two (2) times per week for five (5) weeks) if needed; however, a referral to a more intensive program must be considered if this higher intensity is needed.
14. Median number of EPSDT Specialty Mental Health hours provided to a client who meets Medi-Cal Necessity will be at least one (1) hour per week during the first three (3) months of service.
15. Provide structure and support to children/youth enrolled in the program, including assisting the child/youth in engaging in appropriate activities.
16. Work towards reducing impulsivity in children/youth enrolled in the program.
17. Increase social and community competencies by building or reinstating those daily living skills that will assist the child/youth to live successfully in the community.
18. Maintain a clear audit trail between school-aged treatment services and the provision of other specialty mental health services.

ADDENDUM I

19. Establish a plan to deal with a crisis involving the client, family members and treatment team.
20. Ensure there are adequate budgeted funds to pay for all necessary treatment staff, supplies and tools.
21. Maintain ongoing communication with the DBH Program Manager and make all policies and procedures (administrative and service-related) available to the Program Manager on a regular basis.
22. Contractor's Director or designee must attend regional meetings as scheduled.
23. Contractor must make pamphlets available, identifying the clinic and its services in threshold languages (English and Spanish) for distribution to the community.

VI. DESCRIPTION OF SPECIFIC SERVICES TO BE PROVIDED

The following list of mental health service activities includes both required and optional services to be provided:

- A. **Assessment (required):** A service activity designed to evaluate the current status of a child's/youth's mental, emotional, or behavioral health. Assessment includes, but is not limited to, one or more of the following: mental status determination, analysis of clinical history; analysis of relevant cultural issues and history; diagnosis; and the use of testing procedures.
- B. **Collateral (required):** A service activity to a Significant Support Person in a child's life for the purpose of meeting the needs of the child in terms of achieving the goals of the child's/youth's client plan. Collateral may include, but is not limited to, consultation and training of the significant support person(s) to assist in better utilization of mental health services by the child, consultation and training of the significant support person(s) to assist in better understanding of the child's/youth's serious emotional disturbance; and family counseling with significant support person(s) in achieving the goals of the child's/youth's client plan. The child/youth may or may not be present for this service activity. Note: Per CalAIM payment reform, there is no longer a specific service code to bill for collateral activities. Clinical activities historically billed under collateral may be billable under Intensive Case Coordination for youth twenty-one (21) and younger or other service codes that allow for these activities.
- C. **Crisis Intervention (required):** A quick emergency response service enabling the individual, his or her family, support system, and/or involved others to cope with a crisis, while maintaining the child's status as a functioning family and/or "immediate community" member to the greatest extent possible, and in the least restrictive care as applicable. A crisis is an unplanned event that results in the individual's need for immediate service intervention. Crisis intervention services are limited to stabilization of the presenting emergency. This service does not include Crisis Stabilization, which is provided in a twenty-four (24) hour health care facility or hospital outpatient program. Service activities include but are not limited to assessment, evaluation, collateral, and therapy (all billed as crisis intervention).

ADDENDUM I

D. Intensive Care Coordination (required): Within the Integrated Core Practices Model (ICPM) there is a need for thorough collaboration between all Child and Family Team (CFT) members. Planning within the ICPM is a dynamic and interactive process that addresses the goals and objectives necessary to accomplish goals. The ICC Coordinator is responsible for working within the CFT to ensure that plans from any of the multi system partners are integrated to comprehensively address the identified goals and objectives and that the activities of all parties involved with the service to the child/youth and/or family, are coordinated to support and ensure successful and enduring change. ICC is similar to the activities provided through Targeted Case Management (TCM). ICC must be delivered using a Child and Family Team (CFT) to develop and guide the planning and services delivery process. ICC may be utilized by more than one mental health provider; however, there must be an identified mental health ICC Coordinator that ensures participation by the child or youth, family or caregiver and significant others so that the child/youth's assessment and plan addresses the child/youth's needs and strengths in the context of the values and philosophy of the Integrated Core Practice Model (ICPM).

ICC must be provided at the frequency needed to address the needs effectively. For many children this is monthly, but it should be provided more frequently if the situation warrants.

Activities coded as ICC may include interventions such as:

- 1) Facilitation of the development and maintenance of a constructive and collaborative relationship among child/youth, his/her family or caregiver(s), other providers, and other involved child-serving systems to create a CFT.
- 2) Facilitation of a care planning and monitoring process which ensures that the plan is aligned and coordinated across the mental health and child serving systems to allow the child/youth to be served in his/her community in the least restrictive setting possible.
- 3) Ensure services are provided that equip the parent/caregiver(s) to meet the child/youth's mental health treatment and care coordination needs, described in the child/youth's plan.
- 4) Ensure that medically necessary mental health services included in the child/youth's plan are effectively and comprehensively assessed, coordinated, delivered, transitioned and/or reassessed as necessary in a way that is consistent with the full intent of the Integrated Core Practice Model (ICPM).
- 5) Provide active participation in the CFT planning and monitoring process to assure that the plan addresses or is refined to meet the mental health needs of the child/youth.

NOTE: ICC was initially developed solely for the use with children with an open child welfare case who meet the 'Subclass' criteria of a class action lawsuit; however, ICC is a service available to all EPSDT Medi-Cal beneficiaries in need of this service.

Contractor must provide ICC for all children with an open child welfare case who meet the criteria for the 'Subclass' as least once every thirty (30) days, as this is the least frequent level of coordination needed for this population.

ICC may be provided in any setting; however, when provided in a hospital, psychiatric health facility, community treatment facility, STRTP or psychiatric nursing facility, it may

ADDENDUM I

be used solely for the purpose of coordinating placement of the child/youth on discharge from those facilities and may be provided during the thirty (30) calendar days immediately prior to the day of discharge, for a maximum of three (3) nonconsecutive periods of thirty (30) calendar days or less per continuous stay in the facility as part of discharge planning.

Additional information on ICC may be obtained from the DHCS publication "Medical Manual for Intensive Care Coordination (ICC), Intensive Home Based Services (IHBS) & Therapeutic Foster Care (TFC) Services for Medi-Cal Beneficiaries".

- E. Intensive Home Based Services (IHBS) (Optional) are intensive, individualized and strength-based, need driven intervention activities that support the engagement and participation of the child/youth and his/her significant support persons and to help the child/youth develop skills and achieve the goals and objectives of the plan. IHBS are not therapeutic services.

Activities coded as IHBS may include interventions such as:

- 1) Medically necessary skill-based interventions for remediation of behaviors or improvement of symptoms, including but not limited to the implementation of positive behavioral plan and/or modeling interventions for the child/youth's family and/or significant other to assist them in implementing the strategies.
- 2) Development of functional skills to improve self-care, self-regulation, or other functional impairments by intervening to decrease or replace non-functional behavior that interferes with daily living tasks or the avoidance of exploitation by others.
- 3) Development of skills or replacement behaviors that allow the child/youth to fully participate in the CFT and service plans including but not limited to the plan and/or child welfare services plan.
- 4) Improvement of self-management of symptoms, including self-administration of medications as appropriate.
- 5) Education of the child/youth and/or their family or caregiver(s) about, and about to manage the child/youth's mental health disorder or symptoms.
- 6) Support of the development, maintenance and use of social networks including the use of natural and community resources.
- 7) Support to address behaviors that interfere with the achievement of a stable and permanent family life.
- 8) Support to address behaviors that interfere with a child/youth's success in achieving educational objectives in an academic program in the community.
- 9) Support to address behaviors that interfere with transitional independent living objectives such as seeking and maintaining housing and living independently.

NOTE: IHBS was initially developed solely for use with children with an open child welfare case who meet the 'Subclass' Criteria of a class action lawsuit. However, IHBS is a service available to all EPSDT Medi-Cal beneficiaries in need of this service.

- IHBS was developed to be provided within the context of the Integrated Core Practice Model and requires the provision of ICC to ensure a participatory CFT. IHBS may be provided to all EPSDT Medi-Cal Beneficiaries in need of this

ADDENDUM I

service; however, IHBS still requires the provision of ICC to ensure a participatory coordination of services.

- According to Information Notice No.: 19-026, IHBS may not be provided unless prior authorization from the Mental Health Plan is granted. To request authorization, providers will follow DBH's Prior Authorization for IHBS Procedure.
- DBH will notify the requesting provider in writing within five (5) business days of a decision. DBH will also notify the client in writing of any decision to deny a service authorization or request, or to authorize a service in an amount, duration, or scope that is less than required. IHBS Services will be authorized for up to one hundred twenty-five (125) hours for six (6) months. Requests for more Authorization of services may be submitted according to the DBH Prior Authorization for IHBS Procedure.
- IHBS, as it is currently documented in the DHCS publication, has multiple requirements for authorization [e.g., should be authorized within a CFT Meeting with authorizations no longer than ninety (90) days]. The requirements provided by DHCS shall be followed and if new requirements are published, the new requirements shall be followed.
- IHBS is typically, but not only, provided by paraprofessionals under clinical supervision. IHBS can be provided in any setting and is expected to be provided primarily in the home, school, or other community setting.
- Additional information on IHBS may be obtained from the DHCS publication "Medi-Cal Manual for Intensive Care Coordination (ICC), Intensive Home-Based Services (IHBS) & Therapeutic Foster Care (TFC) Services for Medi-Cal Beneficiaries, Third Edition, January 2018."

F. Medication Support Services (optional): Medication support services include staff persons practicing within the scope of their professions by prescribing, administering, dispensing and/or monitoring of psychiatric medications or biological factors necessary to alleviate the symptoms of mental illness. This service includes:

- 1) Evaluation of the need for medication
- 2) Evaluation of clinical effectiveness and side effects of medication
- 3) Obtaining informed consent
- 4) Medication education (including discussing risks, benefits and alternatives with the individual, family or significant support persons)
- 5) Plan development related to the delivery of this service

Note: It is recognized that many of the children/youth served through SATS will not require medication services, and many of those requiring medication services are best served through collaboration with their pediatrician; however, psychiatric care is a critical element to services and may be included in the SATS program. If medication support services are not included in the SATS proposal, Proposer must explain how medication support will be attained for clients in need of this service.

G. Plan Development (required): A service activity that consists of developing and approving client plans, and monitoring and recording an individual's progress.

ADDENDUM I

- H. Rehabilitation (required): A service activity that includes, but is not limited to, assistance in improving, maintaining, or restoring a child/youth or group of children/youth functional skills, daily living skills, social and leisure skills, and grooming and personal hygiene skills; obtaining support resources; and/or obtaining medication education. This service includes:
- 1) Assistance in restoring or maintaining an individual's functional skills, social skills, medication compliance, and support resources
 - 2) Age-appropriate counseling of the individual and/or family, support systems and involved others
 - 3) Training in leisure activities needed to achieve the individual's goals/desired results/personal milestones
 - 4) Medication education for family and other support systems
- I. Targeted Case Management (required): Services that assist a beneficiary to access needed medical, educational, social, prevocational, vocational, rehabilitative, or other community services. The service activities may include, but are not limited to, communication, coordination, and referral; monitoring service delivery to ensure beneficiary access to service and the service delivery system; monitoring of the beneficiary's progress; placement services; and plan development. Targeted Case Management may be either face-to-face or by telephone with the child/youth or significant support persons and may be provided anywhere in the community.
- J. Therapy (required): A service activity that is a therapeutic intervention, focusing primarily on symptom reduction as a means to improve functional impairments. Therapy may be delivered to a child/youth or a group of children/youth and may include family therapy.

VII. BILLING UNIT

Generally, the Contractor shall collect revenues for the provision of the services described in this agreement. Such revenues may include, but are not limited to, fees for services, private contributions, grants or other funds. All revenues collected shall be used to offset the cost of services and should, therefore, be considered in computing the proposed schedules to this agreement.

a. Billing Unit (EPSDT Medi-Cal)

The billing unit for EPSDT Medi-Cal mental health services, medication support services, rehabilitation support services, crisis intervention and case management/brokerage is staff time, based on minutes of time. The exact number of minutes used by staff providing a reimbursable service shall be reported and billed. In no case shall more than sixty (60) units of time be reported or claimed for any one staff person during a one (1) hour period. Also, in no case shall the units of time reported or claimed for any one staff member exceed the hours worked.

When a staff member provides service to or on behalf of more than one individual at the same time, the staff member's time must be pro-rated to each individual. When more than one staff person provides a service, the time utilized by all involved staff members shall be added together to yield

ADDENDUM I

the total billable time. The total time claimed shall not exceed the actual staff time utilized for billable service. The time required for documentation and travel shall be linked to the delivery of the reimbursable service.

Plan development is reimbursable. Units of time may be billed for time spent on plan development activities, regardless of whether there is a face-to-face or phone contact with the individual or significant other. All treatment plans shall be developed in collaboration with individual and/or significant others.

b. **UMDAP**

The Contractor shall abide by the criteria and procedures set forth in the Uniform Method of Determining Ability to Pay (UMDAP) manual consistent with State regulations for mental health programs.
