

- Performed numerous market study/appraisals assignments for USDA RD properties in several states in conjunction with acquisition rehabilitation redevelopments. Documents are used by states, FannieMae, USDA, and the developer in the underwriting process. Market studies are compliant to State, FannieMae, and USDA requirements. Appraisals are compliant to FannieMae and USDA HB-1-3560 Chapter 7 and Attachments.
- Completed numerous FannieMae and FreddieMac appraisals of affordable and market rate multi-family properties for DUS Lenders.
- Managed and completed numerous Section 8 Rent Comparability Studies in accordance with HUD's Section 8 Renewal Policy and Chapter 9 for various property owners and local housing authorities.
- Managed and conducted various City and County-wide Housing Needs Assessments in order to determine the characteristics of existing housing, as well as determine the need for additional housing within designated areas.
- Performed numerous valuations of the General and/or Limited Partnership Interest in a real estate transaction, as well as LIHTC Year 15 valuation analysis.

## **VI. Speaking Engagements**

A representative sample of industry speaking engagements follows:

- Novogradac & Company LLP: RAD Conferences, LIHTC, Developer and Bond Conferences
- Institute for Professional Education and Development (IPED): LIHTC and Year 15 Seminars
- Institute for Responsible Housing Preservation (IRHP): Annual Meetings
- Western FHA Mortgage Lenders Conference: Annual Meetings
- Midwest FHA Mortgage Lenders Conference: Annual Meetings
- Southwest FHA Mortgage Association Lenders Conference: Annual Meetings
- National Council of Housing Market Analysts (NCHMA): Seminars and Workshops
- National Council of State Housing Agencies: Housing Credit Connect Conferences
- National Leased Housing Association: Annual Meeting
- Nebraska's County Assessors: Annual Meeting
- AHF Live! Affordable Housing Finance Magazine Annual Conference
- Missouri Workforce Housing (MOWHA) Annual Conference
- Ohio Housing Council Symposium
- Kansas Housing Conference
- California Council for Affordable Housing (CCAH) Meetings

## **VII. Industry Engagements**

- Novogradac & Company LLP – Chairperson of Annual RAD Conference
- Novogradac & Company LLP – Chairperson of Annual Affordable Housing Developer and Investor Conference

### IV. Real Estate Assignments

A summary of assignments relating to market feasibility studies and appraisals includes:

- Managed and completed the production of over 2,500 rental housing market studies for projects located throughout 50 states as well as Puerto Rico and US Virgin Islands. The preponderance of experience is with affordable housing developments, particularly those that operate with Section 42 Low-income Housing Tax Credit, HUD Section 8/202, and/or USDA Rural Development financing. Scope of analysis typically has included physical inspection of the property and market (have conducted over 500 property inspections throughout the United States, Puerto Rico, and US Virgin Islands), concept analysis, demographic and economic analysis, demand and absorption projections, comparable surveying, supply analysis and rent determination. The Subjects include both new construction and rehabilitation properties in both rural and metro regions throughout the United States and its territories
- Managed and completed over 500 appraisals of multifamily rental housing, commercial office, and commercial retail properties. Scope of analyses has included rent determination,

operating expense analysis, capitalization rate determination, valuation utilizing the three approaches to value, insurable value estimation, and LIHTC equity valuation. Appraisal assignments typically involved determining the as is, as if complete and the as if complete and stabilized values. Additionally, encumbered LIHTC and unencumbered values were typically derived. The three traditional approaches to value are developed with special methodologies included to value tax credit equity, below market financing, and PILOT agreements.

- Managed and completed numerous Section 8 Rent Comparability Studies in accordance with HUD's Section 8 Renewal Policy and Chapter 9 for various property owners and local housing authorities.
- Managed and conducted various City and County-wide Housing Needs Assessments in order to determine the characteristics of existing housing, as well as determine the need for additional housing within designated areas.
- Additional experience authoring market feasibility analyses for condominium housing, single-family housing, senior-oriented housing, seasonal housing, retail, office, golf course/marina resorts, and mixed-use developments.
- Conducted special research for highest and best use evaluations, the impact of "green" development principals on marketability, and seasonal housing dynamics.
- Reviewed third-party market studies, Rent Comparability Studies, and appraisals for various market participants.

### **III. Real Estate Assignments**

A representative sample of Due Diligence, Consulting, or Valuation Engagements includes:

- Assisted with market and feasibility studies for family and senior affordable housing. Local housing authorities, developers, and lenders have used these studies to assist in the financial underwriting and design of market-rate and Low-Income Housing Tax Credit (LIHTC) properties. Analysis typically includes: unit mix determination, rental rate analysis, competitive property surveying, and overall market analysis.
- Assisted with appraisals of new construction and existing LIHTC and market-rate properties, as well as solar farm developments.

#### NCHMA MEMBER CERTIFICATION

This market study has been prepared by **Novogradac**, a member in good standing of the National Council of Housing Market Analysts (NCHMA). This study has been prepared in conformance with the standards adopted by NCHMA for the market analysts' industry. These standards include the *Standard Definitions of Key Terms Used in Market Studies*, and *Model Content Standards for the Content of Market Studies*. These Standards are designed to enhance the quality of market studies and to make them easier to prepare, understand, and use by market analysts and by the end users. These Standards are voluntary only, and no legal responsibility regarding their use is assumed by the National Council of Housing Market Analysts.

**Novogradac** is duly qualified and experienced in providing market analysis for Affordable Housing. The company's principals participate in the National Council of Housing Market Analysts (NCHMA) educational and information sharing programs to maintain the highest professional standards and state-of-the-art knowledge. **Novogradac** is an independent market analyst. No principal or employee of **Novogradac** has any financial interest whatsoever in the development for which this analysis has been undertaken.

## EXECUTIVE SUMMARY

EFI Global, Inc. (EFI) has performed a Phase I Environmental Site Assessment (Phase I ESA) for U.S. VETS - National Office (Client or User) of a vacant property located at 1351 North E Street, in the City of San Bernardino, San Bernardino County, California (the "Subject Property"). The Subject Property's Assessor's Parcel Number (APN) is 0145-211-55-0000.

The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (US EPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) International E1527-21 scope of work.

According to the User, the User is the owner of the Subject Property performing due diligence on the Subject Property in contemplation of a future sale or refinance.

PROPERTY INFORMATION	
Property Name:	1351 North East Street
Street Address:	1351 North E Street, San Bernardino, California <a href="#">Figures 1 through 4</a>
APN(s):	0145-211-55-0000
Reported Site Acreage:	0.80-acre (34,848-square feet)
Historically and Additionally Associated Addresses:	1353, 1355, and 1357 North E Street,
Current Use/Occupant:	Vacant
Groundwater Depth:	In excess of 150 feet below ground surface (bgs)
Groundwater Flow Direction:	South

STRUCTURE INFORMATION	
Number of Structures and Approx. Square Footage:	None
Year Constructed:	Not applicable
Number of Floors/Stories:	None
Number of Residential Units:	None
Number of Commercial/Industrial Units:	None

POTENTIAL CONCERNS	
Site Reconnaissance/Interviews ( <a href="#">Section 3.0</a> ):	None identified
Historical ( <a href="#">Section 4.0</a> ):	None identified
Regulatory Database ( <a href="#">Section 5.0</a> ):	None identified
Agency Record ( <a href="#">Section 6.0</a> ):	None identified
Considerations Beyond Scope ( <a href="#">Section 7.0</a> ):	None identified

## **FINDINGS AND CONCLUSIONS**

EFI has performed a Phase I ESA in conformance with the scope and limitations of ASTM International E1527-21, at 1351 North E Street, San Bernardino, California, the Subject Property. It is EFI's opinion that no exceptions to or deletions from this practice that would alter the findings of this assessment were identified.

This assessment has revealed no evidence of significant data gaps, recognized environmental conditions (RECs), controlled RECs (CRECs), or historical RECs (HRECs) in connection with the Subject Property.

## **RECOMMENDATIONS**

Based on the foregoing, no additional investigation is recommended at this time.

## 1.0 INTRODUCTION

EFI Global, Inc. (EFI) has performed a Phase I Environmental Site Assessment (Phase I ESA) for a vacant property located at 1351 North E Street, in the City of San Bernardino, San Bernardino County, California (the "Subject Property"; [Figures 1 through 4](#)).

This report has been prepared for the sole use of U.S. VETS - National Office (Client or User).

According to the User, the User is the owner of the Subject Property performing due diligence on the Subject Property in contemplation of a future sale or refinance.

### 1.1 PHASE I ESA PURPOSE AND OBJECTIVES

The research conducted for this study and the report prepared are in general conformance with the United States Environmental Protection Agency (US EPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) International E1527-21 "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The primary purpose for performing a Phase I ESA is to "...permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability" (ASTM, 2021). An environmental site assessment meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition is presumed to be valid under this standard.

In order to maintain landowner liability protections, the User also has the following continuing obligations: "(1) No disposal of hazardous substances can occur after the person acquires the property; (2) Provide all legally required notices with respect to the discovery or release of any hazardous substances at the facility; (3) Exercise appropriate care with respect to hazardous substances by taking reasonable steps to stop any continuing release; prevent any threatened future releases; and prevent or limit human, environmental, or natural resource exposure to any previously released hazardous substance; (4) Provide full cooperation, assistance, and access to persons who are authorized to conduct response actions or natural resource restoration (including the cooperation and access necessary for the installation, integrity, and maintenance of any complete or partial response actions or natural resource restoration); (5) Comply with any land use restrictions established or relied on in connection with the response action, and not impede the effectiveness or integrity of any institutional control employed at the vessel or facility in connection with a response action; and (6) Comply with any request for information or administrative subpoena issued under CERCLA" (ASTM, 2021).

The goal of this process is to identify any (1) significant data gaps, (2) recognized environmental conditions (RECs), (3) controlled recognized environmental conditions (CRECs), and/or (4) historical recognized environmental conditions (HRECs) associated with the Subject Property. These terms as defined by ASTM are discussed below.

This investigation is not an environmental compliance audit and is not designed to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations.

- A **significant data gap** is defined as "a data gap that affects the ability of the environmental professional to identify a recognized environmental condition" (ASTM, 2021).
- A **recognized environmental condition (REC)** is defined as "...(1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of

hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment" (ASTM, 2021).

- A **controlled recognized environmental condition (CREC)** is defined as a "recognized environmental condition affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)" (ASTM, 2021).
- A **historical recognized environmental condition (HREC)** is defined as "a previous release of hazardous substances or petroleum products affecting the Subject Property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the Subject Property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition" (ASTM, 2021). The HREC designation requires the comparison of residual contamination concentrations, if any, to current regulatory standards.
- A **de minimis condition** is defined as "a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition" (ASTM, 2021).
- A **business environmental risk (BER)** is defined as "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice" (ASTM, 2021).

In order to identify environmental conditions at the Subject Property, the Phase I ESA includes a site inspection, interviews with parties familiar with the Subject Property, historical research into the past uses of the Subject Property, and an environmental records search with regard to the Subject Property, adjoining and immediately surrounding properties, and the surrounding area. In addition, EFI provides an opinion regarding the potential for non-scope considerations including but not limited to asbestos containing materials, lead-based paints, mold, radon, methane, and wetlands as they relate to the Subject Property.

## 1.2 SIGNIFICANT ASSUMPTIONS

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. Conducting interviews with knowledgeable parties and reviewing those documents that are publicly available, reasonably ascertainable, and practically reviewable controls the completeness of this assessment. The inability to review documents which do not exist or are not publicly available, reasonably ascertainable, or practically reviewable may result in a data gap. Further, it is assumed the records provided by various data sources inquired with during the preparation of this report, including but not limited to public agencies, constitute all responsive records for the Subject Property within the respective data sources' repositories.

This assessment has been conducted, in part, based on information, data or reports provided or prepared by others. EFI reviews and interprets these documents in good faith and relies that the provided data and documents are true, accurate, and complete.

### 1.3 LIMITATIONS AND EXCEPTIONS

This report has been prepared in accordance with generally accepted environmental methodologies and practices referred to in ASTM E1527-21 and contains all of the limitations inherent in these methodologies. No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost. The possibility remains that unreported disposal of waste, chemicals, or other materials, or other activities impairing the environmental condition of the Subject Property may have occurred which could not be identified.

Certain environmental conditions are impossible to visually identify; their presence can be verified only by testing and analysis. EFI can make no direct inferences as to the subsurface conditions at the Subject Property based on the Phase I scope of work, which does not include a physical investigation of the subsurface. Conditions other than those observed may exist in inaccessible or unobserved areas of the Subject Property. During site reconnaissance, materials identified on the Subject Property were not disturbed and underlying conditions were not observed. The findings of this report cannot be extended to portions of the Subject Property that were not directly observed.

This assessment is limited by the availability of information at the time of the assessment. The conclusions and recommendations presented in this report are based on EFI's professional judgement. Nothing in this report, including but not limited to EFI's conclusions and recommendations, should be considered or construed as legal advice. Unless otherwise stated in the report, third-party liabilities have not been assessed within the scope of work.

Unless otherwise stated in the report, environmental conditions at the Subject Property were assessed assuming the Subject Property use remains the same, and no redevelopment or new construction occurs at the Subject Property. Should there be a substantial change in the functional utilization of the Subject Property, or if additional improvements are planned, the conclusions presented herein may not be valid.

No warranties, expressed or implied, are made as to the professional services provided under the terms of EFI's contract(s) or specified in this report. Further, EFI cannot warrant against undiscovered environmental liabilities. Environmental conditions at the Subject Property were assessed within the context of EFI's contract(s), the scope of work authorized by the Client, and existing environmental regulations of applicable jurisdiction(s) as of the date of the report.

Regulatory requirements, regulations and guidance are subject to change subsequent to the date of the report. Unless otherwise stated in the report, evaluating compliance of past, present or future owners or operators with applicable local, provincial and federal government laws and regulations was not included within the scope of the assessment. Unless otherwise stated in the report, this assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems (EMS) that may or should exist on the Subject Property.

All components of this report, including but not limited to text, signatures, certifications, figures, tables, attachments, appendices, supporting documents and addenda, are integral to the reporting of the assessment. Certain portions of this report, particularly tables and figures, may utilize color to fully convey technical information. This report may not be reproduced, except in full, without written approval of EFI.

## 1.4 RELIANCE

All reports, both verbal and written, are for the sole benefit of U.S. VETS - National Office. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of EFI. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with EFI granting reliance rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against EFI, its officers, employees, vendors, successors or assigns.

Reliance is provided in accordance with EFI's Contract and Terms and Conditions executed February 11th, 2025 which authorized this assessment.

## 1.5 USER'S RESPONSIBILITIES

The US EPA AAI and ASTM International E1527-21 Standards describe tasks to be performed by the User or on behalf of the User seeking to qualify for CERCLA liability. A User may include, without limitation, a potential purchaser of Subject Property, a potential tenant of Subject Property, an owner of the Subject Property, a lender, or a property manager. These tasks include the following:

- The User should obtain and review Land Title Records and Judicial Records for Environmental Liens and Activity and Use Limitations (AULs) by relying on Transaction-Related Title Insurance Documentation Such as Preliminary Title Reports and Title Commitments or Title Search Information Reports Such as Condition of Title, Title Abstracts, and AUL/Environmental Lien Reports. If environmental liens or AULs encumbering the Subject Property or in connection with the Subject Property are identified, the User should provide that information to the Environmental Professional (EFI).
- The User should provide the Environmental Professional (EFI) with any specialized or actual knowledge the User has with regard to RECs, environmental liens, or AULs in connection with the Subject Property.
- If the User is aware of any commonly known information in the community about the Subject Property with respect to RECs, the User should provide the information to the Environmental Professional (EFI).
- If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the Subject Property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the Subject Property being affected by hazardous substances or petroleum products.

Discussion of items provided by the User during this assessment, if any, are included in Section 3.5.

## 2.0 SUBJECT PROPERTY DESCRIPTION

The site and legal descriptions are described below to define Subject Property location and boundaries. Using these boundaries, current and historically associated addresses identified in the research from this assessment are listed. Lastly, the physical settings and hydrology information for the Subject Property are detailed below.

### 2.1 SUBJECT PROPERTY DESCRIPTION

The Subject Property is located on the east side of North E Street, approximately 400 feet north of West 13th Street in the City of San Bernardino ([Figures 1 and 2](#)).

The Subject Property is approximately 0.80-acre (34,848-square feet) in size and is comprised of vacant land. The Subject Property is vacant land that consists of an unpaved lot with broken aged asphalt on the east portion surrounded by a chain link fence.

The surrounding area is developed with a mix of commercial and residential properties ([Figures 3 and 4](#)).

### 2.2 LEGAL DESCRIPTION

According to the San Bernardino County Assessor's Office, the Subject Property is located in the City of San Bernardino, and is identified by Assessor's Parcel Number (APN): 0145-211-55-0000.

The legal description of the Subject Property parcel is listed as: "R S B PTN LOT 11 BLK 34 DESC AS BEG 236.66 FT S OF NW COR LOT 11 BLK 34 TH E 300 FT TO PT M1DWAY BETWEEN E BNDRY LI E ST AND W LI D ST TH S 115 FT 4 INCHES TH W 300 FT TH N 115 FT 4 INCHES TO POB"

The Subject Property information is provided in [Appendix A](#).

### 2.3 CURRENT AND HISTORICAL ADDRESSES

According to EFI's research and information provided by the Client, the following addresses have been found to be associated with the Subject Property: 1351, 1353, 1355, and 1357 North E Street, San Bernardino, California.

### 2.4 PHYSICAL SETTING

The elevation of the Subject Property is approximately 1,120 feet above mean sea level (United States Geological Survey [USGS] San Bernardino South, California 7.5-minute topographic quadrangle). Based on review of the GeoCheck Section of the Environmental Data Resources, Inc. (EDR) Radius Map report, the Subject Property is not situated within a 100 or 500-year Federal Emergency Management Agency (FEMA) Flood Zone.

No surface water is located on the Subject Property. The nearest surface water in the vicinity of the Subject Property is Santa Ana River is located approximately 3.8-miles to the south of the Subject Property.

According to USGS National Water Information System (NWIS), the depth to groundwater is anticipated to be approximately 169 feet bgs.

### 3.0 SITE RECONNAISSANCE AND INTERVIEWS

The purpose and objective of the site reconnaissance is to collect information from visual and/or physical observations. The site inspection attempts to identify current Subject Property use(s), current hazardous materials storage, evidence of past Subject Property uses, past hazardous material storage, and evidence of other RECs.

#### 3.1 SITE RECONNAISSANCE

On February 28th, 2025, Kevin Ballesteros with EFI conducted a site reconnaissance of the Subject Property, unaccompanied.

The visual reconnaissance consisted of observing the boundaries of the Subject Property and systematically traversing the Subject Property to provide an overlapping field of view, wherever possible.

The Subject Property is located within the jurisdiction of Southern California Gas Company and Southern California Edison for natural gas and electrical services, respectively, and the City of San Bernardino for potable water and sewer services. However, as of the date of completion of this report, no utility connections have been provided to the Subject Property.

The following table summarize EFI's site reconnaissance observations. Notable Subject Property features observed from the site inspection are depicted on [Figure 4](#). The photograph log of the site reconnaissance is provided in [Appendix B](#).

Yes	No	Observed Feature(s)
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Hazardous Substances and Petroleum Products
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Drums, Totes, and Intermediate Bulk Containers
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Unidentified Substance Containers
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Underground Storage Tanks
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Aboveground Storage Tanks
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Strong, Pungent, or Noxious Odors
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Standing Surface Water/Pits/Ponds/Lagoons and Pools
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Drains/Sumps/Clarifiers/Interceptors
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Septic Systems/Cesspools
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Stained or Corroded Surfaces/Stained Soil or Pavement/Stressed Vegetation
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Electrical or Hydraulic Equipment with the Potential to Contain Fluids
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Wells (Dry, Irrigation, Injection, Monitoring, Soil Vapor, Abandoned, etc.)
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Evidence of Borings
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Evidence of Improper Solid Waste Disposal/Dumping/Fill Areas

#### 3.1.1 INTERIOR OBSERVATIONS

As the Subject Property is a vacant lot, there were no building interior areas for inspection at the time of this assessment.

#### 3.1.2 EXTERIOR OBSERVATIONS

The exterior portions of the Subject Property consist of an unpaved lot enclosed by a partial chain link fence along the northern and eastern boundaries. The remaining boundaries are unfenced and the Subject Property is currently accessible to the public. At the time of the site reconnaissance, EFI

observed multiple homeless encampment along the eastern and southern portions of the Subject Property. Thus, portions of the Subject Property were not accessible due to this site condition. Therefore, portions of our site reconnaissance were limited to only vantage point views.

The eastern portion of the lot was observed to be broken-up asphalt that is indicative of a past parking lot area. However, the asphalt is severely degraded and overgrown. No evidence of illegal dumping or hazardous materials were observed onsite. No evidence of on-site burial of previous building materials was noted during the visit.

No RECs were observed in the exterior portions of the Subject Property.

### 3.1.3 SUBJECT PROPERTY AND IMMEDIATELY SURROUNDING GEOGRAPHY

The surrounding area is relatively flat with a slight topographic slope to the south. No nearby hills or bedrock outcroppings were observed in the area of the Subject Property. No lakes, ponds, rivers, or streams were observed in the surrounding area.

### 3.1.4 RECONNAISSANCE LIMITATIONS

Portions of the Subject Property were not accessible due to the homeless encampment located on the site. Therefore, portions of our site reconnaissance were limited to only vantage point views. Based on the foregoing and vacant nature of the entire subject property, the lack of full access is not expected to represent a REC for this assessment.

## 3.2 ADJOINING AND IMMEDIATELY SURROUNDING PROPERTIES

The adjoining and immediately surrounding properties (within 100 feet of the Subject Property boundary) were visually and physically observed from public right-of-ways and the Subject Property in an attempt to identify RECs. EFI's observations are summarized in the following table:

Direction	Adjoining/ Immediately Surrounding	Historical and Current Address(es)	Current Uses and Historical Uses of Concern
North	Adjoining	1361 North E Street	Commercial building / store front (A&H IT Renew, Inc.)
East	Adjoining	1351 North Stoddard Avenue 1349 North Stoddard Avenue 1339 North Stoddard Avenue	Residence Vacant land Residence
South	Adjoining	1347-1349 North E Street 1342 North Stoddard Avenue	Vacant land Residence
West	Adjoining	1340-1370 North E Street 1334 North E Street	Vacant land Multi-tenant residences

No recognized environmental conditions were readily observable at the adjoining/immediately surrounding properties.

## 3.3 SURROUNDING PROPERTY USES (BEYOND 100 FEET)

The surrounding area is developed with commercial and residential structures.

### 3.4 INTERVIEWS

The purpose of interviews is to obtain information from those associated with the Subject Property to identify RECs in connection with the Subject Property.

Documentation associated with the following interviews, if any, is provided in [Appendix C](#).

#### 3.4.1 SUBJECT PROPERTY OWNER

EFI provided an environmental property questionnaire to property ownership requesting information about the Subject Property, past and current operations, historical uses and any known environmental concerns including asbestos-containing material, lead-based paint, underground storage tanks, aboveground storage tanks, polychlorinated biphenyls, and spills or releases of hazardous materials. The questionnaire was completed by Mr. Kent Trimble.

Mr. Trimble informed EFI that no environmental violations or liens were associated with the site.

#### 3.4.2 KEY SITE MANAGER/SUBJECT PROPERTY OCCUPANT(S)

A representative from Subject Property management was not available for interview for this assessment.

#### 3.4.3 NEIGHBORING PROPERTY OWNERS/TENANTS

Per ASTM, an attempt to interview neighboring property owners/tenants should be conducted when the Subject Property is abandoned and/or unsecured land, with evidence of uncontrolled access.

No owners/tenants of adjoining properties were available for interview during the site reconnaissance as no one was available.

### 3.5 USER INTERVIEW, INFORMATION, AND PROVIDED DOCUMENTS

EFI provided the User Questionnaire to Mr. Trimble who is the representative of the owner of the Subject Property. According to a review of the questionnaire dated February 27, 2025, the following was determined.

AAI Standard Questions	Yes/No
Did a search of land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Subject Property under federal, tribal, state, or local law?	No
Did a search of land title records (or judicial records where appropriate, see Note 1 below) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded against the Subject Property under federal, tribal, state or local law?	No
Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	No

AAI Standard Questions	Yes/No
Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property?	Unknown
Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases?	No
Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?	No
*Note 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records shall be searched for environmental liens and AULs.	

### 3.5.1 ENVIRONMENTAL LIEN AND AUL SEARCH

Per the ASTM International E1527 standard, the User is responsible for obtaining judicial records for environmental liens or Activity and Use Limitations (AULs) recorded against the Subject Property.

EFI notes that the User did not engage EFI in obtaining judicial records for environmental liens or AULs that may be associated with the Subject Property. Additionally, these documents were not provided to EFI by the User for review and incorporation into this assessment. The lack thereof or inability to obtain this information represents a data gap. However, based on the quality of historical and regulatory information researched and reviewed as part of this assessment, this data gap is not considered to be significant.

Documentation, if any, is included in [Appendix D](#).

### 3.5.2 USER PROVIDED DOCUMENTS

**EFI, Phase I ESA Report, 1351 North E Street, San Bernardino, California 92405, dated June 29, 2017-** On behalf of U.S. VETS, this Phase I ESA was conducted to ascertain previous land use and to identify any recognized environmental conditions (RECs) for the Subject Property. The report was prepared on the Subject Property in conformance with ASTM Standard Practice E1527-13.

At the time of this report, the Subject Property was unpaved vacant land, used for parking purposes. Historical research, through aerial photographs and topographic maps, revealed no environmental concerns associated with the Subject Property. The findings/conclusions of this Phase I ESA revealed no evidence of RECs in connection with the Subject Property, and recommended no additional assessment.

User provided documentation, if any, is included in [Appendix E](#).

## 4.0 HISTORICAL LAND USE

A review of historical data including, but not limited to, those derived from standard historical resources and other historical sources are provided in this section. The objective of obtaining, reviewing, and analyzing historical resources is to develop a history of the previous uses of the Subject Property, adjoining properties, and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the Subject Property. During EFI's historical review, acute attention is paid to the Subject Property. Data relating to the adjoining and immediately surrounding properties (within 100 feet of the Subject Property boundary) and the surrounding area is reviewed to the extent that it is revealed in the course of researching the Subject Property itself.

### 4.1 HISTORICAL SUMMARY

According to EFI's interpretation of the historical research data, the Subject Property was undeveloped land from at least 1896 through 1901. Sometime prior to 1936, the Subject Property was developed with a residential structure which was demolished by 1938. By 1942, the Subject Property was developed with a two-unit commercial structure (1351-1353 North E Street) on the southwest portion. In 1955, a second two-unit commercial structure (1355-1357 North E Street) was constructed in the northwest portion of the Subject Property. Prior to the construction of the second building, the address "1357 North E Street" was associated with the present-day north adjacent property. In approximately 1965, an addition was made to the east side of the northern building (1355-1357 North E Street). In 1986, both buildings were demolished. The property has been a vacant lot since that time.

Previous tenants for 1351 North E Street included: Lloyd & Sons Insurance (1951 through at least 1977) and other insurance companies intermittently during that time.

Identified previous tenants for 1353 North E Street included: Remington Rand (1948-1953), Magic Carpet (1955-1967), Club Tyre (1967). Based on a review of other historical records, including historical newspapers, this unit operated as a club/bar through at least 1983.

According to a review of other historical records, including historical newspapers, 1355 North E Street was historically occupied by Lloyd Cooper Insurance from at least 1959 through 1977, and by 1980, the address was an office for The March of Dimes, which operated at the site until approximately 1983.

Previous tenants identified for 1357 North E Street included: the California Department of Mental Hygiene Bureau of Social Work (1963), Price Realty (1978-1982), and Casa De San Bernardino (1983-1986).

- According to historical research, Remington Rand Company installed a spray booth in the portion of the property located at 1353 North E Street in 1952. By 1954, Remington Rand was no longer located at the property and the unit was converted into a club/bar. Based on the short period of operation of the spray booth equipment (approximately 1 to 2 years) and the short-term tenancy of Remington Rand (1948-1953), this permit listing is not considered a REC for the Subject Property.

### 4.2 HISTORICAL DATA FAILURE

None of the historical resources utilized as part of this assessment covered the period from 1902 to 1935, 1955 through 1962, or 1964 through 1977 for the portion of the property located at 1357 North E Street, constituting a data gap. However, based on the nature of the Subject Property in 1936 for residential purposes, the nature of the Subject Property in 1963 for office purposes, and in 1979 for office purposes, and a lack of an indication of any manufacturing or industrial work at the Subject Property, this limitation is not expected to significantly alter the findings of this report.

### 4.3 TOPOGRAPHIC MAP REVIEW

Topographic maps of many portions of the United States date back to 1879 and the series of 7.5-minute quadrangles was officially completed in 1992. More than 55,000 7.5-minute maps were made to cover the 48 conterminous States. This is the only uniform map series that covers the entire area of the United States in considerable detail. Traditionally, topographic maps show both natural and man-made features. Items searched for in each topographic map included, but were not limited to: evidence of tanks, landfills, water drainage pathways, or areas which show significant evidence of fill, et cetera.

Available topographic maps dated from 1896 to 1996 were obtained from EDR and reviewed for this assessment. A summary of EFI's observations is presented in the following table.

The topographic maps are provided in [Appendix F](#).

Year	Subject Property	Adjoining Property Observations & Notable Surrounding Area Observations
1896, 1898, and 1901	The Subject Property is depicted as vacant land.	All: Vacant land The surrounding area is depicted with sparse structural development.
1938	The Subject Property is depicted with a structure on the western portion	<b>North:</b> Structure depicted <b>East:</b> Vacant land <b>South:</b> Structures depicted <b>West:</b> Structure depicted The surrounding area is depicted with structural development.
1942, 1943, 1954, 1967, 1973, 1975, and 1980	The Subject Property is shaded indicating development, however, no specific structures are depicted	<b>All:</b> Shaded indicating development. The surrounding area is shaded indicating development.

The topographic maps in 1941, 1988, and 1996, do not depict the Subject Property.

Topographic Maps that were created in 2012 do not depict any structures and only indicate street development and street names. This does not indicate that structures were not present at that time.

### 4.4 AERIAL PHOTOGRAPHY REVIEW

Aerial Photography of many portions of the United States dates back to the 1920s. Items searched for in each photograph included, but were not limited to: evidence of tanks, gasoline stations, industrial site usage, water drainage pathways, areas which show evidence of drums or excessive debris, discolored or stained soils, areas of distressed vegetation, et cetera.

Available aerial photographs dated from 1938 to 2012 were obtained from EDR and reviewed for this assessment. A summary of EFI's observations is presented in the following table.

The aerial photographs are provided in [Appendix G](#).

Year	Subject Property	Adjoining Property Observations & Notable Surrounding Area Observations
1938	The Subject Property appears to be undeveloped land.	<b>North:</b> Residential <b>East:</b> Undeveloped <b>South:</b> Residential <b>West:</b> Residential The surrounding area appears to be developed with residential structures.
1949 and 1953	The Subject Property appears to be developed with a commercial structure on the southwestern portion.	<b>North:</b> Residential <b>East:</b> Residential and commercial structures <b>South:</b> Residential and commercial structures <b>West:</b> Residential The surrounding area appears to be developed with residential and commercial structures.
1959, 1966, 1968, 1975, and 1985	The Subject Property appears to be developed with two commercial structures on the western portion.	<b>North:</b> Commercial structure <b>East:</b> Vacant land and Residential structures <b>South:</b> Residential and commercial structures <b>West:</b> Residential structures The surrounding area appears to be developed with commercial and residential structures.
1989, 1994, 2005, 2006, 2009, 2010, and 2012	The Subject Property appears to be vacant land.	<b>North:</b> Commercial structure <b>East:</b> Vacant land and Residential structures <b>South:</b> Residential and commercial structures <b>West:</b> Residential structures The surrounding area appears to be developed with commercial and residential structures.

#### 4.5 SANBORN MAP REVIEW

Originally compiled by the Sanborn Map Company of Pelham, New York (Sanborn Map) for fire insurance companies to assess fire risks related to building materials and hazardous materials storage, today Sanborn maps are an invaluable tool for Environmental Professionals in determining historical site use and the potential for environmental conditions. Sanborn map coverage is available from as early as 1867 in some cities. Although Sanborn maps were created for approximately twelve thousand cities and towns in the United States, Canada, and Mexico, Sanborn map coverage is not available in newer and more rural communities.

Sanborn map coverage was obtained from EDR from 1906 to 1969 and reviewed for this assessment. A summary of EFI's observations is presented in the following table.

The Sanborn map search is provided in [Appendix H](#).

Year	Subject Property	Adjoining Property Observations & Notable Surrounding Area Observations
1950, 1951, 1953, 1954, 1956, 1957, 1958, 1959, 1961, 1963, and 1969	The Subject Property is developed with a two-tenant commercial structure (1351 and 1353 North E Street). The Subject Property is developed with two two-tenant commercial structures (1351, 1353, 1355, and 1357 North E Street) on the western portion of the Subject Property by 1956.	North: Residential (commercial by 1953) East: Undeveloped and residential South: Residential (commercial and residential by 1956) West: Commercial and residential The surrounding area developed with commercial and residential structures.

Sanborn maps indicated the following historical street addresses associated with the Subject Property: 1351, 1353, 1355, and 1357 North E Street. These addresses were researched during the completion of this report.

#### 4.6 CITY DIRECTORY REVIEW

City directories have been published since the 1800's and provide detailed occupant information for the Subject Property and its surrounding area at five-year intervals. The purpose of the City Directory research is to attempt to determine the businesses that historically occupied the Subject Property.

Historical city directories provided by EDR for the years 1922 to 2014 and reviewed by EFI are listed below.

The EDR City Directory Abstract Report is provided in [Appendix I](#).

#### Subject Property

1351 North E Street	
Date	Listing
1949 and 1955	Cooper Llyod and Son Insurance
1955	V Price and RA Buchoz Insurance

1353 North E Street	
Date	Listing
1949	Remington Rand Inc. Office Equipment
1955	The Magic Carpet Cocktails

#### Adjoining Properties

Adjoining Property	Years	Property Use	Listings of Concern
North	1955, 1965, 1975, and 1981	Commercial Office	None
	1991 and 1996	A& B Service Company	None

Adjoining Property	Years	Property Use	Listings of Concern
South	1945	Residential	None
East	1965	Residential	None
	1975 and 1981	Cobweb Antiques	None
West	1945	Residential	None

The addresses identified as adjoining and immediately surrounding properties in Section 3.2 were reviewed during the City Directory research and did not reveal any uses of concern.

#### 4.7 BUILDING DEPARTMENT RECORDS REVIEW

The current and historical addresses for the Subject Property were researched at the City of San Bernardino Building Department. Items considered in the course of the building permit review are previous Subject Property usage, previous ownership, and the construction or demolition of any structures that may have had a negative environmental impact on the Subject Property. The following table summarizes relevant building permits obtained and reviewed.

The building permit request and permits reviewed are provided in [Appendix J](#).

1351 North E Street		
Date	Owner/Occupant	Purpose
02/17/1956	Loyde Cooper	Permit for concrete block wall
04/27/1956	Cooper	Permit for office building
07/20/1956	Ken Barry	Remodel interior of commercial building

1351-1353 North E Street		
Date	Owner/Occupant	Purpose
02/29/1948	Lloyd Cooper	Neon sign for two store buildings

1351-1357 North E Street		
Date	Owner/Occupant	Purpose
12/31/1986	Floyd V. Peterson	Permit to demolish onsite buildings

1353 North E Street		
Date	Owner/Occupant	Purpose
06/16/1952	Remington Rand Co.	Permit for spray booth
11/05/1954	J.E. McMains	Add Restroom and Kitchen to store building
11/26/1954	Jack McMains	Install ventilation system in commercial building
12/03/1954	Ken Barry and Jack McMains	Awning for store building
08/13/1956	Ken Barry	Air conditioner for commercial building
12/20/1956	Ken Barry	Chain link fence
02/27/1958	Lloyd Cooper & Sons	Reroof commercial building
01/30/1967	Club Tyre	Certificate of occupancy
03/15/1967	Not listed	Remodel commercial building

1353 North E Street		
Date	Owner/Occupant	Purpose
03/15/1971	Lloyd Cooper	Repair fire damage to club. Fire contained to business offices.

1353-1355 North E Street		
Date	Owner/Occupant	Purpose
12/02/1964	Lloyd Cooper	Repair fire damage

1355 North E Street		
Date	Owner/Occupant	Purpose
08/25/1966	Mr. Peeters	Commercial air conditioner
12/07/1962	Lloyd Cooper	Demolish 5' masonry wall
12/03/1984	Mr. Peterson	Roofing permit

1357 North E Street		
Date	Owner/Occupant	Purpose
06/26/1978	Price Realty	Certificate of occupancy for offices
11/22/1983	Casa de San Bernardino Corporation	Permit for gas meter reset
12/14/1983	Casa de San Bernardino Corporation	Certificate of occupancy for drug abuse counseling

Based on a review of the building permits, Remington Rand Company installed a spray booth at the Subject Property (1353 North E Street) in 1952. By 1954, Remington Rand was no longer located at the Subject Property and the unit was converted into a club/bar. Based on the short period of operation of the spray booth equipment (approximately 1 to 2 years) and short-term tenancy of Remington Rand (1948-1953), this permit listing is not considered a REC for the Subject Property.

#### 4.8 OTHER HISTORICAL SOURCES

In order to further research data gaps, EFI consulted additional resources to further establish the history of the Subject Property. This research may include, but is not limited to: newspapers, miscellaneous maps, books about the history of the area, imagery, land title records, historical societies, interviews, internet searches, and other historical data.

No additional research was conducted during this assessment.

Documentation, if any, is included in [Appendix K](#).

## 5.0 RECORDS REVIEW AND VAPOR ENCROACHMENT SCREEN

A radial database search was conducted in accordance with the specifications defined in ASTM E1527-21 which sets the radial search distances for each regulatory database. A copy of the database report is presented in [Appendix L](#) of this report.

Following are summaries of the information found for the Subject Property and adjoining and immediately surrounding properties within the relevant database listings and EFI's opinion regarding the potential for the Subject Property to be impacted. Furthermore, EFI considered database listings for surrounding area properties with reported releases.

In addition, EFI herein performed a vapor encroachment screening pursuant to ASTM E2600-22 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (Vapor Encroachment Screening or VES). The results of this VES are incorporated throughout this section.

EFI's opinion is based on the information found in the database listings, through other historical and regulatory resources, the ASTM E2600-15 standard, and assumed groundwater flow direction discussed in Section 2.3.

### 5.1 SUBJECT PROPERTY

The Subject Property is not listed on any of the regulatory databases researched.

### 5.2 ADJOINING AND IMMEDIATELY SURROUNDING PROPERTIES

No adjoining/immediately surrounding properties (within 100 feet) were listed on any of the regulatory databases researched.

Agency records reviewed, if any, related to the above listings/summaries are included in [Appendix M](#).

### 5.3 SURROUNDING AREA

**Newmark Ground Water Contamination (Bunker Hill Ground Water Basin)** - The Subject Property is listed as located within the Newmark Ground Water Contamination National Priorities Listing (NPL) boundaries. The Newmark NPL is associated with a regional plume of chlorinated solvents in groundwater within the Bunker Hill Groundwater Basin. Based upon a review of the *Final Technical Memorandum, Source Identification, Plume Delineation, Restoration Timeframe Estimation, and Transition from Interim to Final Remedy* report, dated May 19, 2014 and prepared by the US EPA, the contamination plume does not underlie the Subject Property, even though the Subject Property is located within the general NPL boundaries. Additionally, according to the report, the plume has been delineated from the property, stabilized, and is undergoing remediation under regulatory oversight. Based on these factors and the fact that the Subject Property addresses and previous tenants do not appear on the Responsible Parties list associated with the NPL, the Newmark Ground Water Contamination NPL site does not represent a REC for the Subject Property.

None of the other sites listed on the regulatory database report are considered to pose a significant threat or potential vapor encroachment condition (pVEC) to the Subject Property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross- or down-gradient of the Subject Property and in excess of 1/10 mile from the Subject Property or the critical distance per the VES standard.

Agency records reviewed, if any, related to the above listings/summaries are included in [Appendix M](#).

## 5.4 ORPHAN SITES

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. Eleven (11) orphan sites were identified in the Radius Map Report prepared for this Subject Property. The sites were manually mapped to determine the location of the site relative to the Subject Property and groundwater gradient.

A cursory review of these listings indicated that none of these sites are associated with the Subject Property or adjoining properties or are otherwise considered to represent a REC to the Subject Property.

## 6.0 AGENCY RECORDS AND FILE REVIEWS

This section summarizes the federal, state, and local agency research conducted for the Subject Property.

### 6.1 FEDERAL AND STATE AGENCIES

The Santa Ana Regional Water Resources Control Board (SARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding air emission permits and site investigation files for the Subject Property. Additionally, the State Water Resources Control Board's (SWRCB) GeoTracker, SCAQMD's online Facility Information Detail (FINDS), and DTSC's EnviroStor and Hazardous Waste Tracking System (HWTS) online databases were searched for information on the Subject Property to identify any evidence of previous or current hazardous material usage.

- According to responses to EFI's requests and review of the aforementioned agencies, there are no files for the Subject Property.

Note that the above agency requests were made and the online database searches were conducted on February 14, 2025, with responses received through February 24, 2025.

Requests, responses and records from the above-referenced agencies are included in [Appendices N and O](#).

US EPA has designated two widely used per- and polyfluoroalkyl substances (PFAS) chemicals, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), as hazardous substances under CERCLA. The US EPA is working on various regulatory initiatives to address PFAS in drinking water and under cleanup programs. Additionally, the screening levels and analytical methods for detecting PFAS are evolving.

The US EPA established health advisories in November 2016 for PFAS at 70 parts per trillion (ppt). Updated drinking water health advisories were issued by the US EPA in June 2022 of 0.004 ppt for perfluorooctanoic acid (PFOA) and 0.02 ppt for perfluorooctane sulfonic acid (PFOS), and on April 10, 2024 US EPA finalized a National Primary Drinking Water Regulation and health-based Maximum Contaminant Levels (MCLs) for the six substances: 4.0 ppt for PFAS, 4.0 ppt for PFHxS, 10 ppt for HFPO-DA (GenX), 10 ppt for PFNA, 10 ppt for PFOA, and 10 ppt for PFOS. At this time the SWRCB is following health advisories established by the EPA for PFAS.

PFAS are commonly used as surface protection products for products such as carpet, clothing and cookware treatments; coating for paper, furniture and some food packaging materials and personal products. These chemicals are additionally used for industrial purposes in photo imaging, metal plating, semiconductor coatings, aviation hydraulic fluids, medical devices, insect baits, printer and copy machine parts, chemically driven oil production, rubber and plastic industries. Additionally PFAS are known to have been present in some foam firefighting materials.

According to EFI's historical research, current and historical uses at the Subject Property do not have the potential to have used and stored PFAS. Therefore, the potential for PFAS risk at the Subject Property is considered low. No sampling was conducted as part of this assessment.

A review of the *GeoTracker PFAS Map* and Environmental Working Group's (EWG) *PFAS Contamination in the U.S. Map*, dated August 9, 2024, did not identify PFAS at or within 500 feet of the Subject Property.

Records of the above can be referenced in [Appendix O](#).

The California Department of Conservation, Geologic Energy Management Division (CalGEM) online mapping application Well Finder was reviewed for information pertaining to oil and gas exploration on or nearby the Subject Property. In addition, the Pipeline and Hazardous Materials Safety Administration (PHMSA) National Pipeline Mapping System Public Map Viewer was reviewed for information on natural gas and hazardous material pipelines on or near the Subject Property.

- No oil wells or pipelines were identified within 500 feet of the Subject Property.

Records of the above can be referenced in [Appendix P](#).

## 6.2 LOCAL AGENCIES

The San Bernardino County Department of Public Health (SBCFPD), the San Bernardino City Clerk (SBCC), and the San Bernardino County Fire Protection District (SBCFPD) were contacted regarding hazardous materials, underground storage tanks, and industrial waste discharge records for the Subject Property. Additionally, the City of San Bernardino (CSB) was contacted regarding permits and site investigation files for the Subject Property.

- According to responses to EFI's requests, there are no files for the Subject Property.

Note that the above agency requests were made and the online database searches were conducted on February 14, 2025, with responses received through February 28, 2025.

Requests, responses and records from the above-referenced agencies are included in [Appendix Q](#).

## 6.3 AGENCY RECORDS RESEARCH LIMITATIONS

No limitations were encountered during EFI's agency record research.

## 7.0 CONSIDERATIONS BEYOND SCOPE

ASTM International E1527-21 identifies additional conditions which, should they exist at the Subject Property, may create a human health risk to the occupants of the site. These risks may also create additional costs to the property owner in the form of identification, operations & maintenance, and cleanup or remediation.

This section summarizes the considerations beyond scope evaluated in this assessment.

### 7.1 ASBESTOS CONTAINING BUILDING MATERIALS

Asbestos is a group of naturally occurring minerals used in many products, including building materials vehicle brakes, insulation and other products that require resistance to heat and corrosion. Asbestos includes: chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite asbestos, actinolite asbestos, and any of these materials that have been chemically treated and/or altered.

The inhalation of asbestos fibers by workers can cause cancer and other serious diseases of the lungs and other organs that may not appear until years after the exposure has occurred. For instance, asbestosis can cause a buildup of scar-like tissue in the lungs and result in loss of lung function. Asbestos fibers associated with these health risks are too small to be seen with the naked eye, and smokers are at higher risk of developing some asbestos-related diseases.

Asbestos-containing materials (ACMs) do not always pose a hazard to occupants and workers in buildings that contain these materials. Intact, undisturbed ACMs generally do not pose a health risk. ACMs may become hazardous and pose an inhalation risk when they are damaged, disturbed in some manner, or deteriorate over time and asbestos fibers are released into building air.

ACMs can be found in a multitude of building products which include decorative and acoustical plaster texture, fire-proofing (Monokote), joint compound, attic and wall insulation, resilient floor covering, mastic, recessed lighting fixtures, wiring, elevator brakes, fire doors, pipe insulation, pipe gaskets, duct insulation, duct tape, siding and roofing materials (tar/shingles), textured paint, stucco, concrete, asphalt underlayment (Petromat) and plaster.

Local jurisdictions have specific laws and regulations regarding asbestos and actions including building renovations and building demolition.

- Based on the lack of permanent structures currently on the Subject Property, the potential for ACMs is considered to be low.

Documentation regarding the above, if any, is included in [Appendix R](#).

### 7.2 LEAD-BASED PAINT

Although the use of lead-based paint (LBP) in residential structures has been prohibited since 1978, it may still be used in commercial and industrial buildings. It is approximated that 80 percent of buildings built prior to 1978 contain LBP. Even at low levels, lead poisoning can cause intelligence quotient (IQ) deficiencies, reading and learning disabilities, impaired hearing, reduced attention spans, hyperactivity, and other behavioral problems with children under 6 years old being most at risk.

Lead is a highly toxic metal that was used for many years in products found in and around homes and commercial buildings. Lead can be found in dust from friction surfaces of windows and doors that are painted with lead-based paint and from building components coated with LBP that has begun peeling, flaking, and chalking. There is also the potential for soil to have elevated lead levels due to leaching from LBP on nearby structures and deposition of airborne lead when leaded fuel was in use prior to the 1976 ban and phase out.

Since the 1980's, lead has been phased out in gasoline, reduced in drinking water, reduced in industrial air pollution, and banned or has been limited in use in consumer products.

Local, State, and Federal agencies, including the US EPA, Department of Housing and Urban Development (HUD), and Occupational Safety & Health Administration (OSHA), have set various action limits that have been enacted with the intent to prevent human exposure and contamination of the surrounding environment.

- Based on no permanent structures currently on the Subject Property, the potential for LBP is considered to be low.

Documentation regarding the above, if any, is included in [Appendix R](#).

### 7.3 RADON

Radon is a radioactive gas that has been found in structures all over the United States. Radon is produced from the natural breakdown of uranium in soil, rock, and water. Radon typically moves up through the ground and into structures through cracks and other holes in the foundation. Movement of radon through the earth is strongly influenced by moisture content and permeability of soil, porosity, and degree of fracturing in rocks, as well as surface meteorological conditions. High levels of radon have been discovered in every state.

Radon cannot be seen, smelled, or tasted. Breathing air-containing radon may increase the risk of getting lung cancer. The Surgeon General of the United States has warned that radon is the second leading cause of lung cancer in the United States today after smoking.

The US EPA has designated three zones depending on radon potential. Zone 1 is an area with the average predicted indoor radon concentration in residential dwellings exceeding the US EPA action limit of 4.0 picoCuries per Liter (pCi/L). Zone 2 are areas with average predicted indoor radon concentration of 2.0 - 4.0 pCi/L and Zone 3 are those areas with an average predicted indoor radon concentration in residential dwellings below 2.0 pCi/L.

- A review of the US EPA Map of Radon Zones places the Subject Property in Zone 2. Site specific radon levels vary greatly within the US EPA radon zones and on-site radon measurements would need to be collected in order to determine the radon levels at the Subject Property. Radon sampling was not conducted during the completion of this assessment.

Documentation regarding the above, if any, is included in [Appendix R](#).

### 7.4 MICROBIAL GROWTH AND MOISTURE INTRUSION

Mold and mildew are simple, microscopic organisms in the Fungi kingdom that can grow virtually anywhere if they have adequate moisture, nutrients, air and appropriate temperatures. Depending on the particular mold or fungus, growing colonies can be almost any color. Most household molds and fungi (mildews) are white, black, grey, or brown colored. Spores of dozens of kinds of mold and fungus (mildew) are present at all times in indoor and outdoor air. These spores can settle, germinate and grow wherever good growth conditions are found. They can grow on soil, plants, dead plant materials, foods, fabrics, paper, wood and

many other materials found within structures. Many molds are not harmful and actually have a beneficial role in the environment and in living systems. In soil, molds play a crucial part in decomposition of organic matter and in making nutrients available to plants.

When mold and fungi (mildews) growth occurs in structures, it can be very destructive to the materials on which they grow and cause high levels of airborne mold spores and volatile organic compounds associated with the characteristic musty / moldy odor. They cause staining, decomposition (rotting of materials) and objectionable, musty odors. Where colonies are extensive they can also produce enough spores, and by-products to be harmful to health. Many of the by-products of mold and fungus (mildew) are irritating to skin, eyes and respiratory tracts. Some molds produce true allergic sensitization and allergic reactions in susceptible people. Some molds produce toxic by-products that could be harmful to skin, and poisonous if ingested or inhaled in quantity. Persons with compromised immune systems may even experience systemic fungal infections of the respiratory tract.

Based on the lack of permanent structures currently on the Subject Property, no mold observations were made during this assessment.

Documentation regarding the above, if any, is included in [Appendix R](#).

## 7.5 METHANE GAS

In response to growing concern regarding methane intrusion into structures and to the potential for methane build-up underneath structures, certain municipalities have established methane requirements for structures based on the proximity to oil wells and landfills. If a Subject Property is located in the proximity of active or abandoned oil wells or landfills, methane mitigation devices installed prior to construction activities at a Subject Property may be necessary.

- Based on EFI's research, the Subject Property is not known to be located in proximity (within 1,000 feet) to any active or abandoned oil wells or landfills. Therefore, the potential for methane risk at the Subject Property is considered low.

Documentation regarding the above, if any, is included in [Appendix R](#).

## 7.6 WETLANDS

According to the Clean Water Act, a wetland is "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Wetland areas have been identified as ecologically diverse and sensitive areas and are generally subject to more stringent development, re-development, and building regulations.

- According to the United States Fish and Wildlife Service (USFWS) Geospatial Wetlands Information online map, there are no mapped wetlands on the Subject Property. Additionally, no evidence of wetlands, settling ponds, lagoons, surface impoundments, natural catch-basins, or potential wetland features (water marks on tree trunks, drift lines, buttressed roots, etc.) were observed at the Subject Property during this investigation and no evidence of potential water features were noted on the reviewed historical source documents.

Documentation regarding the above, if any, is included in [Appendix R](#).

## **8.0 FINDINGS AND CONCLUSIONS**

EFI has performed a Phase I ESA in conformance with the scope and limitations of ASTM International E1527-21, at 1351 North E Street, San Bernardino, California, the Subject Property. It is EFI's opinion that no exceptions to or deletions from this practice that would alter the findings of this assessment were identified.

This assessment has revealed no evidence of significant data gaps, RECs, CRECs, or HRECs in connection with the Subject Property.

### **8.1 SIGNIFICANT DATA GAPS**

No significant data gaps were identified during the course of this assessment.

### **8.2 RECOGNIZED ENVIRONMENTAL CONDITION (REC)**

No RECs were identified during the course of this assessment.

### **8.3 CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITION (CREC)**

No CRECs were identified during the course of this assessment.

### **8.4 HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITION (HREC)**

No HRECs were identified during the course of this assessment.

## 9.0 RECOMMENDATIONS

Based on the foregoing, no additional investigation is recommended at this time.

## 10.0 SIGNATURES

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## **INTERVIEW DOCUMENTATION**

## USER QUESTIONNAIRE

As part of the All Appropriate Inquiry (AAI) standard for conducting Phase I Environmental Site Assessments set by the Environmental Protection Agency (EPA), the following questions are to be asked of the User.

Please return by e-mail to your project manager or fax listed below.

Please also provide a **Title Report, previous environmental reports including Phase I and Phase II, Site Characterization, Removal or Remediation, Geotechnical Reports, Lead Based Paint or Asbestos Survey or Removal**, or other relevant material, as available.

### A. GENERAL

1. Subject Property Address \_\_\_\_\_
2. Person completing this questionnaire:  
  
Name \_\_\_\_\_ Telephone Number \_\_\_\_\_  
  
Relationship to Property \_\_\_\_\_ Date \_\_\_\_\_
3. What is your intended use of the property?  
 No Change                       Residential Development                       Commercial/Industrial Development
4. What is the purpose of ordering a Phase I ESA?  
 Purchase                       Refinance                       Other (please specify) \_\_\_\_\_

### B. AAI STANDARD QUESTIONS

1. Did a search of land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Subject Property under federal, tribal, state, or local law?  
Yes  No  If Yes, please explain: \_\_\_\_\_  
  
\*NOTE 1—In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records shall be searched for environmental liens and AULs.
2. Did a search of land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Subject Property and/or have been filed or recorded against the Subject Property under federal, tribal, state or local law?  
Yes  No  If Yes, please explain: \_\_\_\_\_
3. Do you have any specialized knowledge or experience related to the Subject Property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Subject Property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?  
Yes  No  If Yes, please explain: \_\_\_\_\_
4. Does the purchase price being paid for this Subject Property reasonably reflect the fair market value of the Subject Property? Yes  No  If No, please explain: \_\_\_\_\_  
If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Subject Property? Yes  No

5. Are you aware of commonly known or reasonably ascertainable information about the Subject Property that would help the environmental professional to identify conditions indicative of releases or threatened releases? Yes  No
- a. Do you know the past uses of the Subject Property? Yes  No
  - b. Do you know of specific chemicals that are present or once were present at the Subject Property? Yes  No
  - c. Do you know of spills or other chemical releases that have taken place at the Subject Property? Yes  No
  - d. Do you know of any environmental cleanups that have taken place at the Subject Property? Yes  No

If Yes to any of the above, please explain: \_\_\_\_\_

6. Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of releases at the Subject Property?  
Yes  No  If Yes, please explain: \_\_\_\_\_

APPENDIX II: RADIUS MAP REPORT

APPENDIX III: SUPPORTING DOCUMENTATION

## EXECUTIVE SUMMARY

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for U.S. Vets (Client) for a vacant property located at 1351 North E Street, in San Bernardino County and the City of San Bernardino, California, Assessor's Parcel Number: 0145-211-55-0000. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

### Site Description

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 1351, 1353, 1355, and 1357 North E Street, San Bernardino, California. The subject property is located on the east side of North E Street, approximately 400 feet north of West 13th Street, in the City of San Bernardino. The subject property is approximately 0.80 acre in size and is comprised of a vacant, unpaved lot with broken aged asphalt on the east portion surrounded by a chain link fence. The surrounding area is used for a mix of commercial and residential purposes. Groundwater is estimated to be in excess of 200 feet below ground surface in the area of the site and is assumed to flow towards the south.

- No significant hazardous material storage or recognized environmental conditions were observed at the site. Those interviewed, as persons familiar with the site were not aware of any negative environmental conditions associated with the property.

### Historical Land Use

According to EFI Global, Inc.'s interpretation of the historical research data, the subject property was undeveloped land from at least 1938 through 1948 when a two-unit commercial building was constructed in the southwest corner of the property at 1351-1353 North E Street. In 1955, a second two-unit commercial structure was constructed in the northwest portion of the property at 1355-1357 North E Street. Prior to construction of the second building, the address "1357 North E Street" was associated with the present-day north adjacent property. In approximately 1965, an addition was made to the east side of the northern building (1355-1357 North E Street). In 1986, both buildings were demolished. The property has been a vacant lot since that time.

Previous tenants for 1351 North E Street included: Lloyd & Sons Insurance (1951 through at least 1977) and other insurance companies intermittently during that time. Identified previous tenants for 1353 North E Street included: Remington Rand (1948-1953), Magic Carpet (1955-1967), Club Tyre (1967). Based on a review of other historical records, including historical newspapers, this unit operated as a club/bar through at least 1983. According to a review of other historical records, including historical newspapers, 1355 North E Street was historically occupied by Lloyd Cooper Insurance from at least 1959 through 1977 and by 1980, the address was an office for The March of Dimes, which operated at the site until approximately 1983. Previous tenants identified for 1357 North E Street included: California Department of Mental Hygiene Bureau of Social Work (1963), Price Realty (1978-1982) and Casa De San Bernardino (1983 to 1986).

- According to historical research, Remington Rand Company installed a spray booth in the portion of the property located at 1353 North E Street in 1952. By 1954, Remington Rand was no longer located at the property and the unit was converted into a club/bar. Based on the short period of operation of the spray booth equipment (approximately 1 to 2 years) and short-term tenancy of Remington Rand (1948-1953), this permit listing is not considered a significant environmental concern for the subject property.
- None of the historical resources utilized as part of this assessment covered the period from 1955 through 1962 or 1964 through 1977 for the portion of the property located at 1357 North E Street, constituting a data gap. However, based on the nature of the site in 1963 (offices), and 1979 (offices) and a lack of an indication of any manufacturing or industrial work at the property, this limitation is not expected to significantly alter the findings of this report.

## **Environmental Data Search**

- The subject property is not listed on any of the regulatory databases researched.
- There are no properties within 100-feet of the subject property where a release is considered likely or a known release has occurred.
- In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.
- The San Bernardino County Department of Environmental Health (SBCDEH), San Bernardino County Fire Department (SBCFD), Santa Ana Regional Water Quality Control Board (SARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding permits and site investigation files for the subject property. Additionally, the State Water Resources Control Board (SWRCB) GeoTracker, DTSC Hazardous Waste Tracking System (HWTS) and EnviroStor, and SCAQMD Facility Information Detail (FIND) databases were researched for information pertaining to the subject property.
  - According to responses to our requests, there are no files for the subject property for the address listed at 1351 North E Street.
  - EFI Global, Inc. has contacted the RWQCB, DTSC, SBCDEH, and SBCFD for information on the historical addresses for the subject property (1353, 1355, and 1357 North E Street) addresses; however, EFI Global, Inc. has not received a response as of this report date. Based on the quality of information obtained from other sources and the general office/restaurant nature of occupancy of the subject property, this limitation is not expected to alter the overall findings of this investigation. However, should information of an environmental concern be identified upon receipt of regulatory agency records, an addendum to this report will be issued.
- The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property. No oil wells were identified within 500 feet of the subject property.

- The User did not provide EFI Global any information either verbally or in writing (i.e. Title Report) regarding environmental cleanup liens or activity and use limitations encumbering the subject property. An environmental lien search was not requested by the User; however, based on our review of the Department of Toxic Substances Control (DTSC) EnviroStor Database, no environmental liens enforced by the DTSC were identified.

### **Additional Issues**

- Based on lack of onsite building structures, the potential for asbestos containing building materials and lead based paint is considered to be low.
- According to our research, radon risk at the subject property is considered to be low.
- Based on the lack of onsite building structures, no observations regarding mold were made.
- According to our research, methane risk at the subject property is considered to be low.

### **CONCLUSIONS**

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 1351 North E Street, San Bernardino, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property.

#### **Recognized Environmental Conditions (REC)**

In our opinion, no RECs were identified during the course of this assessment.

#### **Historical Recognized Environmental Conditions (HREC)**

In our opinion, no HRECs were identified during the course of this assessment.

#### **Controlled Recognized Environmental Conditions (CREC)**

In our opinion, no CRECs were identified during the course of this assessment.

#### **De Minimis Conditions**

In our opinion, no *de minimis* conditions were identified during the course of this assessment.

### **RECOMMENDATIONS**

Based on the foregoing, no additional investigation is recommended at this time.

## 1.0 INTRODUCTION

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for the property located at 1351 North E Street, in San Bernardino County and the City of San Bernardino, California (Subject Property). This report has been prepared for the sole use of U.S. Vets (Client).

The research conducted for this study and the report prepared are in general conformance with the EPA "All Appropriate Inquiries" standard and the ASTM 1527-13 "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The primary purpose for performing a Phase I ESA is to "...permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations (commonly known as landowner liability protections) on Comprehensive Emergency Response Compensation and Liability Act (CERCLA) liability." (ASTM, 2013) An environmental site assessment meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition is presumed to be valid under this standard. In order to maintain landowner liability protections, the user also has a "continuing obligation to not interfere with activity and use limitations associated with the property," must take "reasonable steps to prevent releases" and must "comply with legal release reporting obligations." (ASTM, 2013) Further, it is the goal of this study to identify business risks related to the property associated with environmental conditions. This investigation is not an environmental compliance audit and is not designed to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations.

The goal of this process is to identify any (1) recognized environmental conditions (RECs), (2) historic recognized environmental conditions (HRECs), (3) controlled recognized environmental conditions (CRECs), and/or (4) *de minimis* conditions associated with the subject property.

- A **recognized environmental condition** is defined as "...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." This definition does not include *de minimis* conditions defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies" (ASTM, 2013).
- A **historical recognized environmental condition** is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." (ASTM, 2013). The HREC designation requires the comparison of residual contamination concentrations, if any, to current regulatory standards.
- A **controlled recognized environmental condition** is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)" (ASTM, 2013).

- A ***de minimis condition*** is defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not recognized environmental conditions nor controlled recognized environmental conditions" (ASTM, 2013).

In order to identify environmental conditions at the site, the Phase I ESA includes a site inspection, interviews with parties familiar with the property, historical research into the past uses of the property, and an environmental records search with regard to the subject property, adjoining and immediately surrounding properties, and the surrounding area. In addition, EFI Global, Inc. provides an opinion regarding the potential for asbestos containing materials, lead-based paints, mold, radon, oil and gas exploration, and methane as they relate to the subject property. Reviewing those documents that are publicly available, reasonably ascertainable, and practically reviewable controls the completeness of this assessment. The inability to review documents which do not exist or are not publicly available, reasonably ascertainable, or practically reviewable may result in a data gap.

## **1.1 Significant Assumptions**

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the property may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

## **1.2 Limitations and Exceptions**

This report has been prepared in accordance with generally accepted environmental methodologies referred to in ASTM 1527-2013, and contains all of the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report. The conclusions of this report are based in part, on the information provided by others. The possibility remains that unexpected environmental conditions may be encountered at the site in locations not specifically investigated. The services performed and outlined in this report were based, in part, upon visual observations of the site and attendant structures. Our opinion cannot be extended to portions of the site that were unavailable for direct observation, reasonably beyond the control of EFI Global, Inc. The objective of this report was to assess environmental conditions at the site, within the context of our contract and existing environmental regulations within the applicable jurisdiction. Evaluating compliance of past or future owners with applicable local, provincial, and federal government laws and regulations was not included in our contract for services. Our observations relating to the condition of environmental media at the site are described in this report. It should be noted that compounds or materials other than those described could be present in the site environment.

## **1.3 Reliance**

This report has been prepared for the sole use of U.S. Vets. The contents should not be relied upon by any other parties without the express written consent of U.S. Vets and EFI Global, Inc.

## 1.4 User Responsibilities

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM E 1527-13 Phase I Standards require that the user conduct independent research and consider certain information before purchasing a property:

- Obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations (AULs) with regard to the subject property. If environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property are identified, the user should provide that information to the Environmental Professional (EFI Global, Inc.). If the user has actual knowledge of environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property, the user should provide that information to the Environmental Professional (EFI Global, Inc.).
- The user should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the user has with regard to recognized environmental conditions in connection with the property.
- If the user is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the user should provide the information to the Environmental Professional (EFI Global, Inc.).
- If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the user to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the user should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

## **2.0 SITE DESCRIPTION**

EFI Global, Inc. has performed a Phase I for a vacant property located at 1351 North E Street, in San Bernardino County and the City of San Bernardino, California. The subject property is located on the east side of North E Street, approximately 400 feet north of West 13th Street, in the City of San Bernardino. The subject property is approximately 0.80 acre in size and is comprised of a vacant, unpaved lot with broken aged asphalt on the east portion surrounded by a chain link fence. The surrounding area is used for a mix of commercial and residential purposes.

As the property is a vacant lot, there are no active utility connections. However, were the property to be developed, natural gas and electrical services would be provided to the subject property by Southern California Gas and Southern California Edison, respectively. Potable water and sewer services are provided by the City of San Bernardino.

### **2.1 Current and Historical Addresses**

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 1351, 1353, 1355, and 1357 North E Street, San Bernardino, California.

### **2.2 Legal Description**

According to the San Bernardino County Assessor's Office, the subject property is located in the City of San Bernardino, and is described by the Assessor's Parcel Number: 0145-211-55-0000.

### **2.3 Physical Setting**

The elevation of the subject property is approximately 1,120 feet above sea level (United States Geological Survey San Bernardino South, California 7.5-minute topographic quadrangle). Based on our review of the GeoCheck Section of the EDR Radius report, the subject property is not situated within a 100-year Federal Environmental Management Agency (FEMA) Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties. Based on our review of groundwater data presented in the State Water Resources Control Board (SWRCB) GeoTracker website, groundwater was detected at a nearby well (Well ID 341260N1172890W002) approximately 0.25 mile northeast of the subject property at approximately 240 feet below ground surface. However, perched and semi-perched aquifers may be present beneath the site. Based on topographic map interpretation, regional groundwater flow direction is estimated to be towards the south; however local groundwater flow direction may vary.

### 3.0 SITE RECONNAISSANCE/INTERVIEWS

#### 3.1 Site Reconnaissance

On June 23, 2017, Devina Horvath conducted a site reconnaissance of the subject property. The site inspection was conducted to attempt to identify current site use(s), current hazardous materials storage, and evidence of past site uses and hazardous material storage and to identify evidence of other recognized environmental conditions. The following table summarizes our Site Reconnaissance observations:

Yes	No	Observed Feature(s)
	✓	Hazardous Substances and Petroleum Products Containers
	✓	Underground and/or Aboveground Storage Tanks
	✓	Drains/Sumps/Clarifiers/Sewer Interceptors/Septic Systems
	✓	Stained or Corroded Surfaces/Stained Soil or Stressed Vegetation
	✓	Pits/Ponds/Lagoons/Wetlands
	✓	Electrical Equipment with the Potential to contain Fluids
	✓	Production or Monitoring Wells
	✓	Evidence of Solid Waste Disposal/Dumping/Fill Areas

#### 3.1.1 Exterior Observations

The exterior portions of the site consist of an unpaved lot enclosed by a chain link fence. The eastern portion of the lot contains broken-up asphalt that is indicative of a past parking lot area. However, the asphalt is severely degraded and overgrown. No evidence of illegal dumping or hazardous materials were observed onsite. No evidence of on-site burial of previous building materials was noted during the visit.

No recognized environmental conditions were observed in this portion of the site.

#### 3.1.2 Interior Observations

As the subject property is a vacant lot, there were no building interior areas for inspection at the time of this assessment.

#### 3.1.3 Reconnaissance Limitations

No significant limitations were encountered during our reconnaissance of the subject property.

#### 3.2 Adjoining and Immediately Surrounding Properties

The adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) were visually and physically observed from public right-of ways and the subject property in an attempt to identify recognized environmental conditions. Our observations are summarized in the following table:

Location	Address(es)	Uses/Observations
North	1361 North E Street	Commercial building / store front (Summit Payee Services)
East	1351 North Stoddard Avenue	Residence
	1349 North Stoddard Avenue	Vacant land
	1339 North Stoddard Avenue	Residence

Location	Address(es)	Uses/Observations
South	1347-1349 North E Street 1342 North Stoddard Avenue	Vacant land Residence
West	1340-1370 North E Street 1334 North E Street	Vacant land Multi-tenant residences

No recognized environmental conditions were readily observable at the adjoining/immediately surrounding properties.

### 3.3 Surrounding Area Observations

#### 3.3.1 Surrounding Property Uses

The surrounding area is mostly developed with commercial and residential structures. There are no gas stations, dry cleaning facilities, or evidence of ongoing environmental investigation or remediation within the immediate surrounding area of the subject property.

#### 3.3.2 Surrounding Geography

The surrounding area is mostly flat with a slight topographic slope to the south. No nearby hills or bedrock outcroppings were observed in the area of the site. No lakes, ponds, rivers or streams were observed in the surrounding area.

### 3.4 Interviews

#### 3.4.1 Property Owner

EFI Global, Inc. requested an interview with the subject property owner; however, the subject property owner has not responded as of this report date. Based on the quality of information obtained from other sources, this limitation is not expected to alter the overall findings of this investigation.

#### 3.4.2 Key Site Manager

A key site manager was not available for interview during the completion of this report.

#### 3.4.3 Property Occupants

No occupants were available for interview during the completion of this report.

#### 3.4.4 Past Owners, Operators and Occupants

Past owners, operators and occupants were not able to be identified for an interview for this report.

#### 3.4.5 Prospective Purchaser

U.S. Vets, the organization receiving the subject property as a gift, was interviewed by telephone during the course of the assessment. Mr. Darwin Thomas of U.S. Vets was unaware of any recognized environmental conditions such as underground storage tanks or any generated hazardous materials associated with the property.

#### 3.4.6 Neighboring Property Owners/Tenants

Per ASTM, an attempt to interview neighboring property owners/tenants should be conducted when the subject property is vacant and unsecured land.

No owners/tenants of adjoining properties were available for interview during the site reconnaissance as no one was available at the time of the site reconnaissance.

### **3.5 User Provided Information**

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM 1527-13 Phase I Standards require that the Report User conduct independent research and consider certain information before purchasing a property. EFI Global, Inc. recommends that the User documents completion of the following items:

#### **3.5.1 Lien Search**

The User is required to obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations with regard to the subject property. If environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (EFI Global, Inc.). If the User has actual knowledge of environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (EFI Global, Inc.).

- The User did not provide EFI Global any information either verbally or in writing (i.e. Title Report) regarding environmental cleanup liens or activity and use limitations encumbering the subject property. An environmental lien search was not requested by the User; however, based on our review of the Department of Toxic Substances Control (DTSC) EnviroStor Database, no environmental liens enforced by the DTSC were identified.

#### **3.5.2 Specialized Knowledge**

The User should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.

- The User has no specialized knowledge with respect to recognized environmental conditions in connection with the property.

#### **3.5.3 Commonly Known or Reasonably Ascertainable Information**

If the User is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the User should provide the information to the Environmental Professional (EFI Global, Inc.).

- The User is not aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions.

#### **3.5.4 Property Valuation**

If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

- According to the User, the property is being gifted to their organization as part of a veterans housing initiative.

### **3.5.5 Purpose of Performing Phase I ESA**

- According to the User, the User is being gifted the subject property for a veterans housing initiative and the Phase I is being performed to qualify for landowner liability protections under CERCLA as well as identify business risks related to the property associated with environmental conditions.

### **3.6 User Provided Documents**

- No documents were provided to EFI Global, Inc. by the Report User.

## 4.0 HISTORICAL LAND USE

A review of historical data derived from standard historical resources is provided in this section. The objective of consulting historical sources is to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property. During our historical review, acute attention is paid to the subject property. Data relating to the adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) and the surrounding area is reviewed to the extent that it is revealed in the course of researching the property itself.

### 4.1 Aerial Photography Review

Aerial Photography of many portions of the United States dates back to the 1920's. Items searched for in each photograph included, but were not limited to: evidence of tanks, gas stations, industrial site usage, water drainage pathways, areas which show evidence of drums or excessive debris, discolored or stained soils, areas of distressed vegetation, et cetera.

Aerial Photograph Coverage was available from Environmental Data Resources (EDR) for the years: 1938, 1949, 1953, 1959, 1966, 1968, 1975, 1985, 1989, 1994, 2005, 2006, 2009, 2010, and 2012. A summary of our observations is presented in the following table.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1938	Vacant, undeveloped land	The properties to the north, south, and west are developed with residential dwellings. The property to the east is vacant.	Densely developed with residential properties.
1949	Developed with one commercial building in the southwest corner of the property.	The properties to the north, south, and west are developed with residential dwellings. The property to the east is vacant.	Densely developed with residential properties.
1953	Developed with one commercial building in the southwest corner of the property.	The property to the north has been redeveloped with a commercial building in the present-day configuration. The properties to the south and west remain developed with residential buildings. The property to the east remains vacant.	Densely developed with residential and commercial properties.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1959	Developed with two commercial buildings along the west side of the property and a parking lot in the east side.	No significant changes from the 1953 photograph.	Densely developed with residential and commercial properties.
1966, 1968, 1975, and 1985	The northernmost commercial building has been extended to the west with an addition.	The dwellings to the west have been demolished and the west adjacent properties, aside from one multi-tenant residential building, are vacant. No other significant changes from the 1959 photograph.	Densely developed with residential and commercial properties.
1989 and 1994	The subject property buildings have been demolished and the property is a vacant lot.	No significant changes from the 1985 photograph	Densely developed with residential and commercial properties.
2005, 2006, 2009, 2010, and 2012	No significant changes from the 1994 photograph.	The dwelling to the south has been demolished. No other significant changes from the 1994 photograph.	Densely developed with residential and commercial properties.

## 4.2 Building Department Records Review

The addresses identified as current and historical addresses for the subject property were researched at the City of San Bernardino Building Department. Items considered in the course of the building permit review are previous site usage, previous ownership, and the construction or demolition of any structures that may have had a negative environmental impact on the property. The following table summarizes relevant building permits obtained and reviewed:

1351 North E Street		
Date	Owner/Occupant	Purpose
02/17/1956	Loyde Cooper	Permit for concrete block wall
04/27/1956	Cooper	Permit for office building
07/20/1956	Ken Barry	Remodel interior of commercial building

1351-1353 E Street		
Date	Owner/Occupant	Purpose
02/29/1948	Lloyd Cooper	Neon sign for two store buildings

<b>1351-1357 North E Street</b>		
<b>Date</b>	<b>Owner/Occupant</b>	<b>Purpose</b>
12/31/1986	Floyd V. Peterson	Permit to demolish onsite buildings

<b>1353 North E Street</b>		
<b>Date</b>	<b>Owner/Occupant</b>	<b>Purpose</b>
06/16/1952	Remington Rand Co.	Permit for spray booth
11/05/1954	J.E. McMains	Add Restroom and Kitchen to store building
11/26/1954	Jack McMains	Install ventilation system in commercial building
12/03/1954	Ken Barry and Jack McMains	Awning for store building
08/13/1956	Ken Barry	Air conditioner for commercial building
12/20/1956	Ken Barry	Chain link fence
02/27/1958	Lloyd Cooper & Sons	Reroof commercial building
01/30/1967	Club Tyre	Certificate of occupancy
03/15/1967	Not listed	Remodel commercial building
03/15/1971	Lloyd Cooper	Repair fire damage to club. Fire contained to business offices.

<b>1353-1355 North E Street</b>		
<b>Date</b>	<b>Owner/Occupant</b>	<b>Purpose</b>
12/02/1964	Lloyd Cooper	Repair fire damage

<b>1355 North E Street</b>		
<b>Date</b>	<b>Owner/Occupant</b>	<b>Purpose</b>
08/25/1966	Mr. Peeters	Commercial air conditioner
12/07/1962	Lloyd Cooper	Demolish 5' masonry wall
12/03/1984	Mr. Peterson	Roofing permit

<b>1357 North E Street</b>		
<b>Date</b>	<b>Owner/Occupant</b>	<b>Purpose</b>
06/26/1978	Price Realty	Certificate of occupancy for offices
11/22/1983	Casa de San Bernardino Corporation	Permit for gas meter reset
12/14/1983	Casa de San Bernardino Corporation	Certificate of occupancy for drug abuse counseling

Based on a review of the building permits, Remington Rand Company installed a spray booth in the portion of the property located at 1353 North E Street in 1952. By 1954, Remington Rand was no longer located at the property and the unit was converted into a club/bar. Based on the short period of operation of the spray booth equipment (approximately 1 to 2 years) and short-term tenancy of Remington Rand (1948-1953), this permit listing is not considered a significant environmental concern for the subject property.

### 4.3 City Directory Review

City directories have been published since the 1800s and provide detailed occupant information for the property and its surrounding area at five-year intervals. The purpose of the City Directory research is to attempt to determine the businesses that historically occupied the subject property. Historical City Directories provided by EDR and reviewed by EFI Global, Inc. are listed below.

1351 North E Street	
Date	Listing
1949	Lloyd Cooper and Son Insurance
1955	V B Price Insurance R A Buchoz Insurance Lloyd Cooper & Son Insurance

1353 North E Street	
Date	Listing
1949	Remington Rand Inc Office Equipment
1955	The Magic Carpet cocktails

Listings for adjoining and immediately surrounding properties reviewed during the course of researching the subject property did not reveal any uses of concern.

### 4.4 Sanborn Map Review

Originally compiled by the Sanborn Map Company of Pelham, New York for fire insurance companies to assess fire risks related to building materials and hazardous materials storage, today Sanborn Maps are an invaluable tool for Environmental Professionals in determining historical site use and the potential for environmental conditions. Sanborn Map Coverage is available from as early as 1867 in some cities. Although Sanborn maps were created for approximately twelve thousand cities and towns in the United States, Canada, and Mexico, Sanborn Map Coverage is not available in newer and more rural communities. Sanborn Map Coverage was available from EDR for the years: 1906, 1950, 1951, 1953, 1954, 1956, 1957, 1958, 1959, 1961, 1963, and 1969. A summary of our observations is presented in the following table.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1906	Not mapped	Not mapped	Not mapped

<b>Year</b>	<b>Subject Property</b>	<b>Notable Adjoining Property Observations</b>	<b>Notable Observations of the Surrounding Area</b>
1950 and 1951	One commercial building with an office at 1351 and a store at 1353 is located in the southwest corner of the subject property.	E Street is located adjacent to the west. The north, south, and west adjacent properties are developed with single- and multi-family dwellings. The property to the east is vacant with one outbuilding. In 1951, the north adjacent dwelling is no longer depicted.	Densely developed with commercial and residential buildings.
1953 and 1954	One commercial building with an office at 1351 and a store at 1353 is located in the southwest corner of the subject property.	A commercial building is located adjacent to the north with the address 1357 North E Street. No other significant changes from the 1951 map.	Densely developed with commercial and residential buildings.
1956, 1957, 1958, 1959, and 1961	A second commercial building with addresses 1355-1357 North E Street is located adjacent to the north of the pre-existing building on the west portion of the subject property. No other significant changes.	The building to the north has been re-addressed as 1359 North E Street. The property to the south is now depicted as two stores. No other significant changes.	Densely developed with commercial and residential buildings.
1963	The building located at 1355-1357 North E Street has been extended to the east with an addition.	No significant changes from the 1961 map.	Densely developed with commercial and residential buildings.
1969	No significant changes from the 1963 map.	The single-family residences across E Street to the west are no longer depicted and the land is vacant.	Densely developed with commercial and residential buildings.

Sanborn maps indicated the following historical street addresses associated with the subject property: 1351, 1353, 1355, and 1357 North E Street. These addresses were researched during the completion of this report; however, records responses for several of the addresses were not received in time for issuance of the report.

## **4.5 Historical Summary**

### **4.5.1 Subject Property**

According to EFI Global, Inc.'s interpretation of the historical research data, the subject property was undeveloped land from at least 1938 through 1948 when a two-unit commercial building was constructed in the southwest corner of the property at 1351-1353 North E Street. In 1955, a second two-unit commercial structure was constructed in the northwest portion of the property at 1355-1357 North E Street. Prior to construction of the second building, the address "1357 North E Street" was associated with the present-day north adjacent property. In approximately 1965, an addition was made to the east side of the northern building (1355-1357 North E Street). In 1986, both buildings were demolished. The property has been a vacant lot since that time.

Previous tenants for 1351 North E Street included: Lloyd & Sons Insurance (1951 through at least 1977) and other insurance companies intermittently during that time. Identified previous tenants for 1353 North E Street included: Remington Rand (1948-1953), Magic Carpet (1955-1967), Club Tyre (1967). Based on a review of other historical records, including historical newspapers, this unit operated as a club/bar through at least 1983. According to a review of other historical records, including historical newspapers, 1355 North E Street was historically occupied by Lloyd Cooper Insurance from at least 1959 through 1977 and by 1980, the address was an office for The March of Dimes, which operated at the site until approximately 1983. Previous tenants identified for 1357 North E Street included: California Department of Mental Hygiene Bureau of Social Work (1963), Price Realty (1978-1982) and Casa De San Bernardino (1983 to 1986).

- According to historical research, Remington Rand Company installed a spray booth in the portion of the property located at 1353 North E Street in 1952. By 1954, Remington Rand was no longer located at the property and the unit was converted into a club/bar. Based on the short period of operation of the spray booth equipment (approximately 1 to 2 years) and short-term tenancy of Remington Rand (1948-1953), this permit listing is not considered a significant environmental concern for the subject property.

### **4.5.2 Adjoining and Immediately Surrounding Properties**

According to EFI Global, Inc.'s interpretation of the historical research data, the adjoining and immediately surrounding properties were developed as residential buildings as early as 1938. Surrounding property development has remained generally residential, with the north and south adjacent properties being converted into commercial buildings in the 1960s. The properties to the west were demolished and became vacant in the mid 1960s and the property to the south was demolished in the late 1990s. The adjoining properties have been in the same general configuration since at least 2002.

### **4.5.3 Surrounding Area**

According to EFI Global, Inc.'s interpretation of the historical research data, the surrounding area was developed for residential use as early as 1938. Beginning in the mid 1960s, commercial redevelopment began in the vicinity and replaced residences along E Street through the 1980s. The surrounding area has been in the same general configuration since the mid-1980s.

### **4.6 Historical Data Gaps**

None of the historical resources utilized as part of this assessment covered the period from 1955 through 1962 or 1964 through 1977 for the portion of the property located at 1357 North E Street, constituting a data gap. However, based on the nature of the site in 1963 (offices), and 1979 (offices) and a lack of an indication of any manufacturing or industrial work at the property, this limitation is not expected to significantly alter the findings of this report.

## 5.0 REGULATORY DATABASE REPORT

A radial database search was conducted in accordance with the specifications defined in ASTM E 1527-13 which sets the radial search distances for each regulatory database. The radial database search was conducted by EDR on June 14, 2017. A copy of the database report is presented in Appendix II of this report. The following table summarizes required databases reviewed, the approximate search distances, and indicates if the subject site, adjoining/immediately surrounding properties or surrounding sites are listed on the respective database.

Following the table are summaries of the information found in the relevant database listings and our opinion regarding the potential for the subject property to be impacted. Our opinion is based on the information found in the database listings, through other historical and regulatory resources, “Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions” (ASTM E2600-15), and assumed groundwater flow direction. As discussed in Section 2.3, groundwater is estimated to be approximately 240 feet below ground surface in the area of the site and is assumed to flow towards the south.

DATABASE	Search Distance (Miles)	Subject Site (Yes/No)	Adjacent Site (Yes/No)	Total Listings (#)
Federal National Priorities List (NPL)	1.0	No	No	1
Federal De-listed NPL	1.0	No	No	0
Federal CERCLIS	0.5	No	No	1
Federal CERCLIS NFRAP	0.5	No	No	0
Federal RCRA CORRACTS	1.0	No	No	0
Federal RCRA non-CORRACTS TSD	0.5	No	No	0
Federal RCRA Generators	0.25	No	No	2
Federal Institutional/Engineering Controls	0.5	No	No	2
Federal ERNS	Property	No	No	0
State/Tribal Equivalent NPL	1.0	No	No	2
State/Tribal Equivalent CERCLIS	1.0	No	No	0
State/Tribal Landfill	0.5	No	No	0
State/Tribal Underground Storage Tank (UST)	0.25	No	No	6
State/Tribal Leaking Underground Storage Tank (LUST/SLIC)	0.5	No	No	6
State/Tribal Institutional/Engineering Controls	0.5	No	No	0
State/Tribal Voluntary Clean-up Sites	0.5	No	No	0
State/Tribal Brownfield Sites	0.5	No	No	0

### 5.1 Subject Property

The subject property is not listed on any of the regulatory databases researched.

### 5.2 Adjoining and Immediately Surrounding Properties

No adjoining/immediately surrounding properties (within 100-feet) were listed on any of the regulatory databases researched.

### 5.3 Surrounding Area

**Newmark Ground Water Contamination (Bunker Hill Ground Water Basin)** - The subject property is listed as located within the Newmark Ground Water Contamination National Priorities Listing (NPL) boundaries. The Newmark NPL is associated with a regional plume of chlorinated solvents in groundwater within the Bunker Hill Groundwater Basin. Based upon a review of the *Final Technical Memorandum, Source Identification, Plume Delineation, Restoration Timeframe Estimation, and Transition from Interim to Final Remedy* report, dated May 19, 2014 and prepared by the US EPA, the contamination plume does not underlie the subject property, even though the site is located within the general NPL boundaries. Additionally, according to the report, the plume has been delineated from the property, stabilized, and is undergoing remediation under regulatory oversight. Based on these factors and the fact that the subject property addresses and previous tenants do not appear on the Responsible Parties list associated with the NPL, the Newmark Ground Water Contamination NPL site does not represent a recognized environmental concern for the subject property.

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

### 5.4 Orphan Sites

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. Thirteen (13) orphan sites were identified in the Radius Map Report prepared for this site. The sites were manually mapped to determine the location of the site relative to the subject property and groundwater gradient. The following conclusions were made:

In our opinion, none of the orphan sites listed pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

## 6.0 AGENCY FILE REVIEWS

### 6.1 State Agencies

The regional offices of the Santa Ana Regional Water Quality Control Board (SARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding permits and site investigation files for the subject property. Additionally, the State Water Resources Control Board (SWRCB) GeoTracker, DTSC Hazardous Waste Tracking System (HWTS) and EnviroStor, and SCAQMD Facility Information Detail (FIND) databases were researched for information pertaining to the subject property.

- According to responses to our requests, there are no files for the subject property for the address listed at 1351 North E Street.

The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property.

- No oil wells were identified within 500 feet of the subject property.

### 6.2 City/County Agencies

The San Bernardino County Department of Environmental Health (SBCDEH) and San Bernardino County Fire Department (SBCFD) were contacted regarding hazardous materials, underground storage tank, and industrial waste discharge records for the subject property.

- According to responses to our requests, there are no files for the subject property for the address listed at 1351 North E Street with the SBCDEH.
- As of the date of this report, a response has not been received from the SBCFD.

### 6.3 Agency File Review Limitations

- EFI Global, Inc. has contacted the RWQCB, DTSC, SBCDEH, and SBCFD for information on the historical addresses for the subject property (1353, 1355, and 1357 North E Street) addresses; however, EFI Global, Inc. has not received a response as of this report date. Based on the quality of information obtained from other sources and the general office/restaurant nature of occupancy of the subject property, this limitation is not expected to alter the overall findings of this investigation. However, should information of an environmental concern be identified upon receipt of regulatory agency records, an addendum to this report will be issued.

## **7.0 NON-SCOPE ENVIRONMENTAL RISKS**

ASTM Standard E1527-13 identifies additional conditions which, should they exist at the subject property, may create a human health risk to the occupants of the site. These risks may also create additional costs to the property owner in the form of identification, operations & maintenance, and cleanup or remediation.

### **7.1 Asbestos Containing Building Materials**

Asbestos is a group of naturally occurring minerals used in many products, including building materials vehicle brakes, insulation and other products that require resistance to heat and corrosion. Asbestos includes: chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite asbestos, actinolite asbestos, and any of these materials that have been chemically treated and/or altered.

The inhalation of asbestos fibers by workers can cause cancer and other serious diseases of the lungs and other organs that may not appear until years after the exposure has occurred. For instance, asbestosis can cause a buildup of scar-like tissue in the lungs and result in loss of lung function. Asbestos fibers associated with these health risks are too small to be seen with the naked eye, and smokers are at higher risk of developing some asbestos-related diseases.

Asbestos-containing materials (ACM) do not always pose a hazard to occupants and workers in buildings that contain these materials. Intact, undisturbed ACMs generally do not pose a health risk. ACMs may become hazardous and pose an inhalation risk when they are damaged, disturbed in some manner, or deteriorate over time and asbestos fibers are released into building air.

ACM can be found in a multitude of building products which include decorative and acoustical plaster texture, fire-proofing (Monokote), joint compound, attic and wall insulation, resilient floor covering, mastic, recessed lighting fixtures, wiring, elevator brakes, fire doors, pipe insulation, pipe gaskets, duct insulation, duct tape, siding and roofing materials (tar/shingles), textured paint, stucco, concrete, asphalt underlayment (Petromat) and plaster.

Local jurisdictions have specific laws and regulations regarding asbestos and actions including building renovations and building demolition.

- Based on lack of onsite building structures, the potential for asbestos containing building materials is considered to be low.

### **7.2 Lead-Based Paint**

Although the use of lead-based paint in residential structures has been prohibited since 1978, it may still be used in commercial and industrial buildings. It is approximated that 80 percent of buildings built prior to 1978 contain lead paint. Even at low levels, lead poisoning can cause IQ deficiencies, reading and learning disabilities, impaired hearing, reduced attention spans, hyperactivity and other behavior problems with children under 6 years old being most at risk.

Lead is a highly toxic metal that was used for many years in products found in and around our homes and commercial buildings. Lead can be found in dust from friction surfaces of windows and doors that are painted with lead-based paint and from building components coated with lead-based paint that has begun peeling, flaking and chalking. There is also the potential for soil to have elevated lead levels due to leaching from lead based paint on nearby structures and deposition of airborne lead when leaded fuel was in use prior to the 1976 ban and phase out.

Since the 1980s, lead has been phased out in gasoline, reduced in drinking water, reduced in industrial air pollution, and banned or has been limited in use in consumer products.

Between the local, State and Federal agencies, including the Environmental Protection Agency (EPA), Department of Housing and Urban Development (HUD), Occupational Safety & Health Administration (OSHA) and the California Department of Public Health (CDPH), each state has various action limits that have been enacted with the intent to prevent human exposure and contamination of the surrounding environment.

- Based on lack of onsite building structures, the potential for lead based paint is considered to be low.

### **7.3 Radon**

Radon is a radioactive gas that has been found in structures all over the United States. Radon is produced from the natural breakdown of uranium in soil, rock, and water. Radon typically moves up through the ground and into structures through cracks and other holes in the foundation. Movement of radon through the earth is strongly influenced by moisture content and permeability of soil, porosity, and degree of fracturing in rocks, as well as surface meteorological conditions. High levels of radon have been discovered in every state.

Radon cannot be seen, smelled, or tasted. Breathing air-containing radon may increase the risk of getting lung cancer. The Surgeon General of the United States has warned that radon is the second leading cause of lung cancer in the United States today after smoking.

Testing for the presence of radon is fairly inexpensive, simple and is the only way to be certain of the on-site concentrations. Various types of sampling methods exist to determine the concentration. On-site radon sampling was not performed during the completion of this assessment.

- Based on research by the United States Environmental Protection Agency (USEPA), the average radon concentrations for San Bernardino County are between 2.0 picoCuries per Liter (pCi/L) and 4.0 pCi/L, below the 4.0 pCi/L action level set by the USEPA; however, site specific radon levels vary greatly within the EPA radon zones and on-site radon measurements would need to be collected in order to determine the radon levels at the subject property.

### **7.4 Wetlands**

According to the Clean Water Act, a wetland is “those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions.” Wetland areas have been identified as ecologically diverse and sensitive areas and are generally subject to more stringent development, re-development, and building regulations.

- The U.S. Fish and Wildlife Service National Wetlands Inventory was reviewed to determine if the subject property is situated within an identified wetland. According to the USFWS, the subject property is not located within a wetland area.

### **7.5 Mold**

Mold and mildew are simple, microscopic organisms in the Fungi kingdom that can grow virtually anywhere if they have adequate moisture, nutrients, air and appropriate temperatures. Depending on the particular mold or fungus, growing colonies can be almost any color. Most household molds and fungi (mildews) are white, black, grey, or brown colored. Spores of dozens of kinds of mold and fungus (mildew) are present

at all times in indoor and outdoor air. These spores can settle, germinate and grow wherever good growth conditions are found. They can grow on soil, plants, dead plant materials, foods, fabrics, paper, wood and many other materials found within buildings. Many molds are not harmful and actually have a beneficial role in the environment and in living systems. In soil, molds play a crucial part in decomposition of organic matter and in making nutrients available to plants.

When mold and fungi (mildews) growth occurs in buildings, it can be very destructive to the materials on which they grow and cause high levels of airborne mold spores and volatile organic compounds associated with the characteristic musty / moldy odor. They cause staining, decomposition (rotting of materials) and objectionable, musty odors. Where colonies are extensive they can also produce enough spores, and by-products to be harmful to health. Many of the by-products of mold and fungus (mildew) are irritating to skin, eyes and respiratory tracts. Some molds produce true allergic sensitization and allergic reactions in susceptible people. Some molds produce toxic by-products that could be harmful to skin, and poisonous if ingested or inhaled in quantity. Persons with compromised immune systems may even experience systemic fungal infections of the respiratory tract.

- Based on the lack of onsite building structures, no observations regarding mold were made.

## **7.6 Methane Gas**

In response to growing concern regarding methane intrusion into buildings and to the potential for methane build-up underneath buildings, certain municipalities have established methane requirements for structures based on the proximity to oil wells and landfills. If a subject property is located in the proximity of active or abandoned oil wells or landfills, methane mitigation devices installed prior to construction activities at a subject property may be necessary.

- Based on our research, the property is not known to be located in proximity (within 1,000 feet) to any active or abandoned oil wells or landfills. Therefore, the potential for methane risk at the subject property is considered low.

## 8.0 FINDINGS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for U.S. Vets (Client) for a vacant property located at 1351 North E Street, in San Bernardino County and the City of San Bernardino, California, Assessor's Parcel Number: 0145-211-55-0000. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

### 8.1 CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 1351 North E Street, San Bernardino, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property.

#### **Recognized Environmental Condition (REC)**

In our opinion, no RECs were identified during the course of this assessment.

#### **Historical Recognized Environmental Condition (HREC)**

In our opinion, no HRECs were identified during the course of this assessment.

#### **Controlled Recognized Environmental Condition (CREC)**

In our opinion, no CRECs were identified during the course of this assessment.

#### **De Minimis Condition**

In our opinion, no *de minimis* conditions were identified during the course of this assessment.

### 8.2 RECOMMENDATIONS

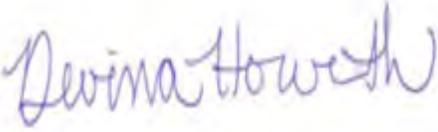

Based on the foregoing, no additional investigation is recommended at this time.

## 9.0 SIGNATURES

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

## EXECUTIVE SUMMARY

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/05/2017 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>NEWMARK GROUND WATER</b>	<b>BUNKER HILL GROUND W</b>	<b>0 - 1/8 (0.000 mi.)</b>	<b>0</b>	<b>8</b>

### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 02/07/2017 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>NEWMARK GROUND WATER</b>	<b>BUNKER HILL GROUND W</b>	<b>0 - 1/8 (0.000 mi.)</b>	<b>0</b>	<b>8</b>

### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>LOTZ QUALITY DRAPERY</b>	<b>1269 N D ST</b>	<b>SE 1/8 - 1/4 (0.135 mi.)</b>	<b>13</b>	<b>29</b>
ONE HOUR FABRICARE	382 BASELINE ST	SSE 1/8 - 1/4 (0.220 mi.)	F21	34

### ***Federal institutional controls / engineering controls registries***

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 02/13/2017 has revealed that

## EXECUTIVE SUMMARY

there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>NEWMARK GROUND WATER</b>	<b>BUNKER HILL GROUND W</b>	<b>0 - 1/8 (0.000 mi.)</b>	<b>0</b>	<b>8</b>

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 02/13/2017 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>NEWMARK GROUND WATER</b>	<b>BUNKER HILL GROUND W</b>	<b>0 - 1/8 (0.000 mi.)</b>	<b>0</b>	<b>8</b>

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2017 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 2 SWEEPS UST sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 7 EDR Hist Auto sites within approximately 0.125 miles of the target property.

## EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal June 24, 1988): The four municipal supply wells of Newmark Well Field are in an area of approximately 700 square feet bounded by 48th Street, Magnolia Drive, Reservoir Drive, and the San Bernardino County Flood Control Channel in the Muscoy area north of San Bernardino, San Bernardino County, California. The San Bernardino Municipal Water Department was forced to close the four wells in the early 1980s when they were found to be contaminated with high levels of halogenated organic chemicals, including tetrachloroethylene, also known as perchloroethylene (PCE), and trichloroethylene (TCE). An August 1986 report by a consultant to the California Regional Water Quality Control Board identified possible contaminant sources. A midnight dumping operation from the late 1950s to early 1960s appears to be the most likely source of contamination. It is approximately 300 feet upgradient of the Newmark wells. The California Department of Health Services is installing air stripping towers to remove contaminants from ground water. The towers are scheduled to be in operation in mid-1988. An additional 10 municipal wells in San Bernardino have also been retired from service due to PCE/TCE contamination. An apparent hydrogeologic barrier, the Pelona Schist outcrop of the Shandin Hills, suggests that contamination of these 10 wells is originating from different sources. The 14 municipal wells that have already been retired from service served 25 percent of the city's total population, and additional wells are also threatened. The San Bernardino wells supply 80,000 people in the cities of San Bernardino and Loma Linda, and the loss of any additional wells could leave some areas without water. The municipal supply wells for Riverside also lie directly downgradient. No alternative water sources are

Site Description: In 1980, the California Department of Health Services (DHS) initiated a monitoring program in San Bernardino to test for the presence of industrial chemicals in the water from public supply wells. The results of the tests revealed the presence of perchloroethylene (PCE) and trichloroethylene (TCE) contamination in large portions of the ground water of the Bunker Hill Basin.

MAP FINDINGS

**NEWMARK GROUND WATER CONTAMINATION (Continued)**

**1000296132**

Fourteen wells operated by the city of San Bernardino Water Department in the North San Bernardino/Muscoy area were found to contain concentrations of PCE and TCE above the state and federal Maximum Contaminant Levels (MCLs) of 5 parts per billion for both TCE and PCE. The affected wells had supplied nearly 25 percent of the water for the city of San Bernardino. Following investigations by The Santa Ana Regional Water Quality Control Board and California Department of Health Services (now the California EPA Department of Toxic Substances Control), the state provided over \$6 million to construct four water treatment systems to protect the public water supply. After years of testing these agencies determined that the solvents in the ground water were continuing to flow south and threatening many more wells operated by San Bernardino, Riverside and other communities. The state requested federal involvement to address this regional problem. The EPA placed the Newmark site on the National Priorities List (NPL) in March, 1989. The EPA Remedial Investigation (RI) began in late 1990, focusing entirely on the Newmark Plume. Based upon the findings of the RI, the Muscoy plume on the western side of the valley was included as part of the Newmark Superfund Site. Additional RI well sampling in the vicinity of the Muscoy plume was conducted in September 1992. The RI/FS Report for the Muscoy Plume Operable Unit (OU) was finalized in December, 1994. As a result of the RI investigation, the San Bernardino Airport was no longer suspected to be the source of the Newmark plume as originally identified in the aerial photographic analysis conducted by EPA's Environmental Monitoring Systems Laboratory in September, 1990. Ongoing investigations are attempting to definitively identify the source. The Newmark Groundwater Contamination Superfund Site includes three Operable Units (OUs): the Newmark and Muscoy OUs are located within the San Bernardino portion of the Bunker Hill Basin, near the Shandin Hills, and the Source OU is generally located in the area northwest of the Shandin Hills. The Newmark Groundwater contamination Superfund Site covers approximately eight square miles of groundwater contaminated with volatile organic compounds (VOCs), including tetrachloroethene (PCE), trichloroethene (TCE). These chemicals are industrial solvents that have been commonly used for a variety of including dry cleaning, metal plating and machinery degreasing. The pattern of contamination indicates that a release or releases occurred in northwest San Bernardino and that contaminants have migrated more than five miles toward the Santa Ana River to the southeast. The plume is split by a major outcrop of relatively impermeable bedrock and divides the contaminated ground water into an eastern branch (the Newmark plume) and a western branch (the Muscoy plume). EPA is addressing the leading edges of the plume as two separate OUs. The identification, characterization and remediation of the source of contamination will constitute a third OU. The ground water contamination at the Newmark Superfund Site affects a large portion of a 110 square mile aquifer in the San Bernardino Valley of southern California. The aquifer, known as the Bunker Hill Basin, is bounded by the San Bernardino and San Gabriel Mountains to the north, the Crafton Hills and badlands on the southeast, and by a hydrogeologic barrier formed by the San Jacinto fault along the southwest. Waters flowing from all parts of the aquifer join in a confined artesian zone before leaving the basin where the Santa Ana River crosses the San Jacinto fault line. The ground water currently serves approximately a half-million residents of San Bernardino, Riverside and surrounding communities. The San Bernardino Valley Municipal Water District has indicated that the Bunker Hill Basin Aquifer is capable of storing approximately 1.6 trillion gallons and producing 81 billion gallons each year. The aquifer receives rainfall and natural runoff from the surrounding mountains, collected floodwater from rivers, creeks and washes, and water imported from outside the region that is spread over percolation basins. Residential and commercial use predominates throughout the Newmark Superfund Site. On October 30, 1986, the California Department of Toxic Substances

**NEWMARK GROUND WATER CONTAMINATION (Continued)**

**1000296132**

Control (DTSC) contracted with the City to construct, operate and maintain four treatment systems consisting of air stripping and liquid granular activated carbon units located at the Newmark wellfield and elsewhere, and DTSC and its assigned remedial project manager directed and oversaw the City's work on the design, construction, operation and maintenance of those treatment systems. DTSC paid for the design and construction of these four treatment systems and appurtenant facilities at the Newmark wellfield. The City has paid for, and continues to pay for, the operation and maintenance of these treatment systems, and the City paid for and constructed appurtenant storage and distribution facilities needed to accommodate these treatment systems. EPA placed the Newmark Groundwater contamination Superfund Site on the National Priorities List (NPL) in March 1989. In 1990, EPA began the Remedial Investigation (RI) and the Feasibility Study (FS) of the Newmark OU. For the Newmark RI, monitoring wells were drilled and sampled in the Newmark OU, and nearby City and State wells were also sampled by EPA. PCE and TCE were found in all of the affected wells. The FS evaluated a range of cleanup alternatives for addressing the five-mile long groundwater contamination plume. The report for the Newmark OU was finalized in March 1993. On August 4, 1993, EPA issued a Record of Decision (ROD) that identified the methods that EPA would use to contain and clean up the Newmark OU groundwater contamination. The remedy for the Newmark plume is an interim remedial action which addresses the public health threats from the groundwater contamination. It consists of the following features: (1) groundwater extraction (pumping) and treatment facilities at two locations in the aquifer (the North and south Areas); (2) removal of contaminants from groundwater using liquid phase granular activated carbon filtration; and (3) the final use of treated water. Construction of the Newmark OU extraction and treatment system was completed in October, 1998, and was determined to be operational and functional in October 2000. Additional investigation in the summer of 1992 traced the direction of the groundwater contamination flow into the western side of the Shandin Hills. Based on this information, the Newmark Groundwater contamination Superfund Site was officially expanded in September 1992 to include the Muscoy groundwater plume, located west of the Shandin Hills, as the Muscoy OU. EPA completed the RI/FS of possible treatment alternatives for the Muscoy groundwater contamination, and the RI/FS report for the Muscoy OU was issued in December 1994. The Muscoy OU ROD was signed on March 24, 1995. The ROD for the Muscoy groundwater contamination selects an interim remedial action focusing on preventing contamination from spreading to clean parts of the aquifer south and west of the Shandin Hills. Much of the analysis for selecting a cleanup plan for the Newmark groundwater contamination was directly applicable to the Muscoy plume: Construction of the Muscoy OU extraction and treatment system is anticipated to be completed in 2004, and the performance evaluation of the system is anticipated to be completed in 2005. The U.S. EPA's primary objective for the 1993 and 1995 Interim RODs for the Newmark and Muscoy OUs is to withdraw, treat and dispose of contaminated groundwater, and inhibit any further spread of contamination to clean areas of the aquifer. This is being accomplished for the Newmark and Muscoy OUs by the completion of the construction and operation of the water treatment plants and the barrier wells located along 11th and 14th Streets in San Bernardino, which are expected to remove 21,000 pounds of contaminants over the next 50 years. An Explanation of Significant Differences (ESD) addressing the Newmark OU (OU 1) and the Muscoy OU (OU2) was completed on August 9, 2004. The Source OU RI/FS is still being conducted with the participation of the United States Army Corps of Engineers. A ROD for the Source OU will be issued after completion of the RI/FS.

**FINDS:**

Registry ID: 110002735229

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 06/08/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

EPA Region 10  
Telephone 206-553-8665

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 06/09/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

### Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017	Source: EPA
Date Data Arrived at EDR: 04/21/2017	Telephone: N/A
Date Made Active in Reports: 05/12/2017	Last EDR Contact: 06/09/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 04/07/2017
Number of Days to Update: 92	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Varies

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346
Date Made Active in Reports: 05/05/2017	Last EDR Contact: 06/08/2017
Number of Days to Update: 16	Next Scheduled EDR Contact: 07/31/2017
	Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

### SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346
Date Made Active in Reports: 05/05/2017	Last EDR Contact: 06/08/2017
Number of Days to Update: 16	Next Scheduled EDR Contact: 07/31/2017
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/12/2016	Source: EPA
Date Data Arrived at EDR: 12/28/2016	Telephone: 800-424-9346
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 05/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 05/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 05/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 05/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

## RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 05/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Varies

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/28/2016	Source: Department of the Navy
Date Data Arrived at EDR: 01/04/2017	Telephone: 843-820-7326
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 05/15/2017
Number of Days to Update: 93	Next Scheduled EDR Contact: 08/28/2017
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695
Date Made Active in Reports: 06/09/2017	Last EDR Contact: 05/31/2017
Number of Days to Update: 101	Next Scheduled EDR Contact: 09/11/2017
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/28/2017	Telephone: 703-603-0695
Date Made Active in Reports: 06/09/2017	Last EDR Contact: 05/31/2017
Number of Days to Update: 101	Next Scheduled EDR Contact: 09/11/2017
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Federal ERNS list**

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/26/2016

Date Data Arrived at EDR: 09/29/2016

Date Made Active in Reports: 11/11/2016

Number of Days to Update: 43

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 03/29/2017

Next Scheduled EDR Contact: 07/10/2017

Data Release Frequency: Annually

## **State- and tribal - equivalent NPL**

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 01/30/2017

Date Data Arrived at EDR: 01/31/2017

Date Made Active in Reports: 05/23/2017

Number of Days to Update: 112

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 05/02/2017

Next Scheduled EDR Contact: 08/14/2017

Data Release Frequency: Quarterly

## **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/30/2017

Date Data Arrived at EDR: 01/31/2017

Date Made Active in Reports: 05/23/2017

Number of Days to Update: 112

Telephone: 916-323-3400

Last EDR Contact: 05/02/2017

Next Scheduled EDR Contact: 08/14/2017

Data Release Frequency: Quarterly

## **State and tribal landfill and/or solid waste disposal site lists**

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 02/13/2017

Date Data Arrived at EDR: 02/15/2017

Date Made Active in Reports: 05/02/2017

Number of Days to Update: 76

Source: Department of Resources Recycling and Recovery

Telephone: 916-341-6320

Last EDR Contact: 05/17/2017

Next Scheduled EDR Contact: 08/28/2017

Data Release Frequency: Quarterly

## **State and tribal leaking storage tank lists**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LUST: Leaking Underground Fuel Tank Report (GEOTRACKER)

Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 03/13/2017	Source: State Water Resources Control Board
Date Data Arrived at EDR: 03/14/2017	Telephone: see region list
Date Made Active in Reports: 05/02/2017	Last EDR Contact: 03/14/2017
Number of Days to Update: 49	Next Scheduled EDR Contact: 06/26/2017
	Data Release Frequency: Quarterly

## LUST REG 6V: Leaking Underground Storage Tank Case Listing

Leaking Underground Storage Tank locations. Inyo, Kern, Los Angeles, Mono, San Bernardino counties.

Date of Government Version: 06/07/2005	Source: California Regional Water Quality Control Board Victorville Branch Office (6)
Date Data Arrived at EDR: 06/07/2005	Telephone: 760-241-7365
Date Made Active in Reports: 06/29/2005	Last EDR Contact: 09/12/2011
Number of Days to Update: 22	Next Scheduled EDR Contact: 12/26/2011
	Data Release Frequency: No Update Planned

## LUST REG 4: Underground Storage Tank Leak List

Los Angeles, Ventura counties. For more current information, please refer to the State Water Resources Control Board's LUST database.

Date of Government Version: 09/07/2004	Source: California Regional Water Quality Control Board Los Angeles Region (4)
Date Data Arrived at EDR: 09/07/2004	Telephone: 213-576-6710
Date Made Active in Reports: 10/12/2004	Last EDR Contact: 09/06/2011
Number of Days to Update: 35	Next Scheduled EDR Contact: 12/19/2011
	Data Release Frequency: No Update Planned

## LUST REG 3: Leaking Underground Storage Tank Database

Leaking Underground Storage Tank locations. Monterey, San Benito, San Luis Obispo, Santa Barbara, Santa Cruz counties.

Date of Government Version: 05/19/2003	Source: California Regional Water Quality Control Board Central Coast Region (3)

### ***Local Brownfield lists***

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/09/2017  
Date Data Arrived at EDR: 03/08/2017

Data Release Frequency: Varies

### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 02/14/2017	Source: California Integrated Waste Management Board
Date Data Arrived at EDR: 02/17/2017	Telephone: 916-341-6066
Date Made Active in Reports: 05/25/2017	Last EDR Contact: 05/15/2017
Number of Days to Update: 97	Next Scheduled EDR Contact: 08/28/2017
	Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2015	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 10/12/2016	Telephone: 916-255-1136
Date Made Active in Reports: 12/15/2016	Last EDR Contact: 04/14/2017
Number of Days to Update: 64	Next Scheduled EDR Contact: 07/24/2017
	Data Release Frequency: Annually

## ICE: ICE

Contains data pertaining to the Permitted Facilities with Inspections / Enforcements sites tracked in Envirositor.

Date of Government Version: 11/21/2016	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/22/2016	Telephone: 877-786-9427
Date Made Active in Reports: 01/23/2017	Last EDR Contact: 05/24/2017
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/04/2017
	Data Release Frequency: Quarterly

## HIST CORTESE: Hazardous Waste & Substance Site List

The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

Date of Government Version: 04/01/2001	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/22/2009	Telephone: 916-323-3400
Date Made Active in Reports: 04/08/2009	Last EDR Contact: 01/22/2009
Number of Days to Update: 76	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HWP: EnviroStor Permitted Facilities Listing

Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

Date of Government Version: 11/21/2016	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 11/22/2016	Telephone: 916-323-3400

Data Release Frequency: Varies

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/19/2013	Telephone: 860-424-3375

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

Version Date:	2012
North Map:	5630643 SAN BERNARDINO NORTH, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

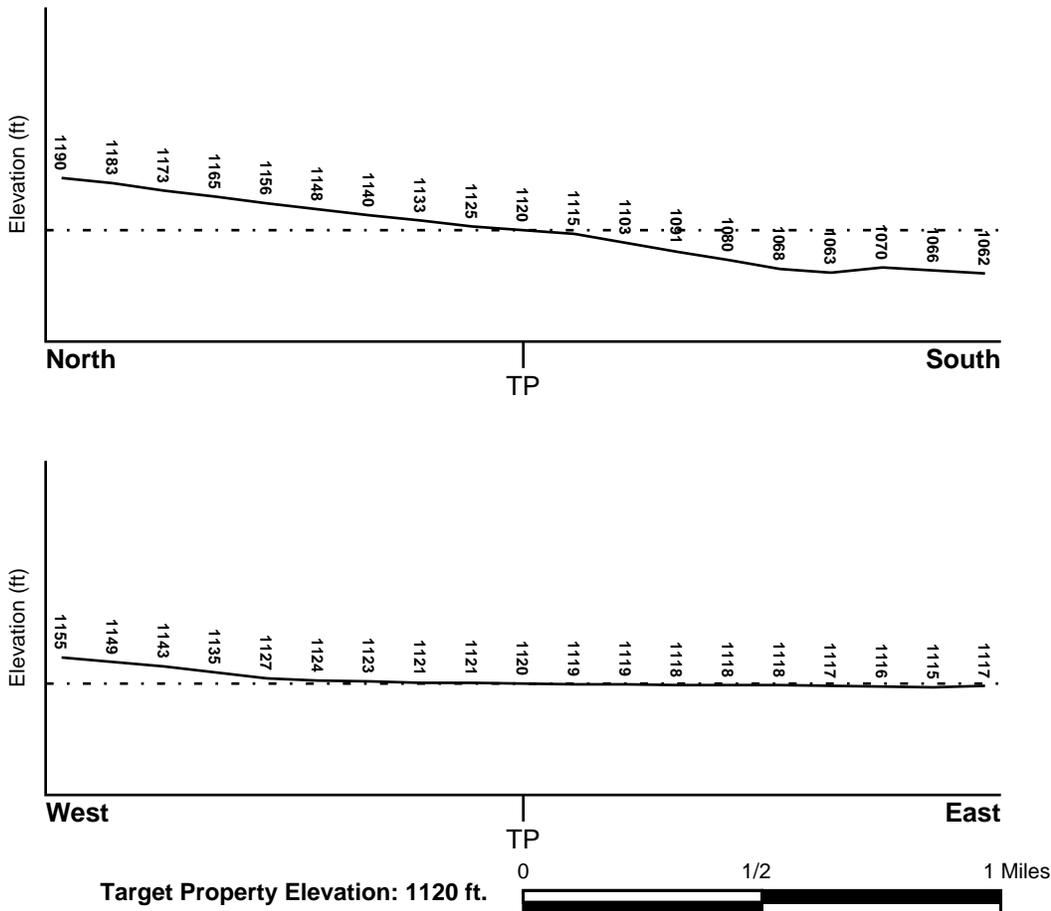

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06071C8681H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06071C7945H	FEMA FIRM Flood data
06071C7944H	FEMA FIRM Flood data
06071C8682H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
9	1/4 - 1/2 Mile West	Not Reported
19	1/2 - 1 Mile ESE	Not Reported
35	1/2 - 1 Mile NNW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

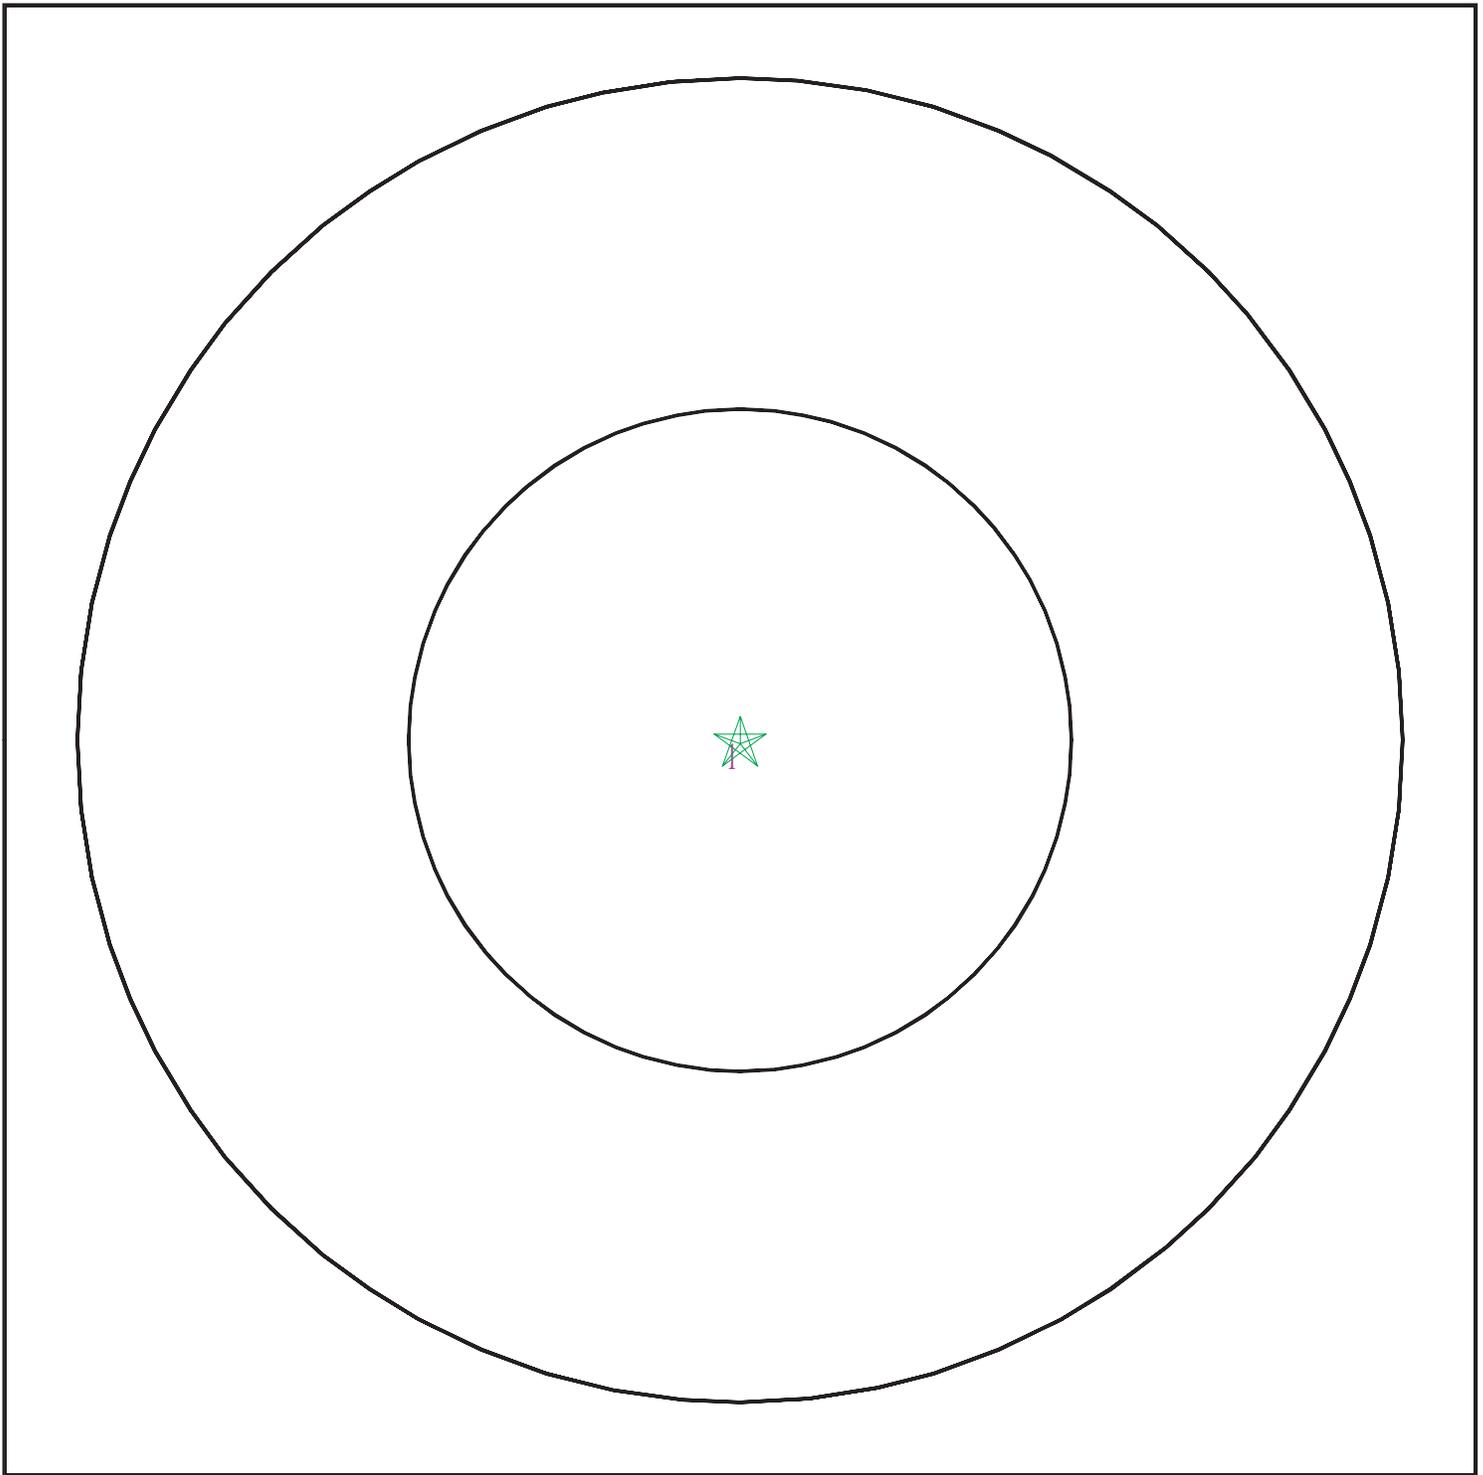

Era: Cenozoic  
System: Quaternary  
Series: Quaternary  
Code: Q (*decoded above as Era, System & Series*)

#### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Hanford

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 6.1
2	11 inches	59 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.8 Min: 5.6

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### RADON

#### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
