This plan view illustrates the sanitary sewer system layout. Key features include:

- Proposed Infrastructure:** A green line represents the proposed 12" VCP SS line, which includes a proposed 6" SS lateral and a proposed 12" VCP SS line. A proposed 6" SS lateral is shown connecting to the existing main at a proposed public manhole.
- Existing Infrastructure:** Existing 12" VCP SS lines and public sewer mains are shown in black. A 12" VCP SS line is noted as being per a separate plan.
- Manholes and Connections:** A proposed public manhole (MH) is shown at station 25+62.89, with a rim elevation of 12.8 and an invert elevation of 05.66. A connection is made to the existing main at this proposed manhole.
- Labels and Annotations:** Red boxes with arrows point to specific features: "ARCHIBALD R/W", "EXISTING PUBLIC SEWER MAIN", "PROPOSED TOPGOLF SERVICE CONNECTION", "CONNECT TO EXISTING MAIN AT PROPOSED PUBLIC MANHOLE", and "EXISTING PUBLIC SEWER MAIN".
- Technical Data:** Stationing (e.g., 1+00.00, 1+20.00, 1+22.00, 2+14.0, 2+79.0), elevations (e.g., 10.12 BOT 12", 07.42 TOP 6", 13.3 RIM, 06.02 INV), and slopes (e.g., S=0.0200) are provided for various segments.
- Other Features:** A 16" DW (Ditch Width) is indicated on the left. A 16" DW is also noted near the proposed manhole. A 16" DW is also noted near the proposed manhole.
