Commissioner Planning Commission,

Dear County of San Bernardino County Planning Commission and Board of Supervisors,

I am strongly opposed to the proposed Bloomington Business Park Specific Plan Project.

If approved, this project will change the makeup of Bloomington and our lifestyle of raising livestock. The Bloomington Business Park's significant environmental impacts are detrimental to the health and well-being of our community's children, seniors, and families. Therefore, I urge you to represent the interests of the constituents you serve.

Bloomington is home to a diverse group of working-class families who have formed a vibrant community with strong ties to rural living and self-sufficient farming practices. However, once known for its quaint small-town lifestyle in harmony with the natural world, Bloomington has experienced a massive influx of warehouse development, and an ever-growing sea of concrete is consuming our green open spaces. This evident change to the fabric of our community has fueled strong public opposition to the Bloomington Business Park Project and the dangerous growth of warehouse developments next to homes, schools, and parks. If the fate of the Bloomington Business Park Project were at the hands of our community members, this project would not be an agenda item. The community would have promptly rejected the project with direction to the County Planning Division and prioritized developments focused on creating community and fostering a safe and healthy ecosystem where Bloomington residents can ride, work and play because warehouses are not what community members have requested, and certainly not what they deserve.

Therefore, I remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). Our pedestrian and equestrian public spaces will be negatively impacted by an estimated 9,000 vehicle and truck trips on roads in the heart of the community. Undoubtedly, the vibrant and colorful neighborhoods we value will be replaced by changing the character and values of our community. Families in our neighborhoods will experience displacement.

It is my unwavering position that the County of San Bernardino Planning Commissioners and

Board of Supervisors unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you consider alternatives to warehouse projects through outreach and a civic engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.

I acknowledge that by sending this letter, I am sharing my name, email, zip code, and any other contact information I want to share with the San Bernardino Planning Commissioners, Board of Supervisors, and my information will be part of the public record.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you can confirm the sender and know the content is safe.

Commissioner Planning Commission,

Me opongo firmemente al Bloomington Business Park Specific Plan propuesto.

Si se aprueba, este proyecto cambiará la composición de Bloomington y nuestro estilo de vida de crianza de ganado. Los impactos ambientales significativos de Bloomington Business Park son perjudiciales para la salud y el bienestar de los niños, las personas mayores y las familias de nuestra comunidad. Por lo tanto, le insisto que represente los intereses de los electores a los que sirve.

Bloomington es el hogar de un grupo diverso de familias de clase trabajadora que han formado una comunidad vibrante con fuertes lazos a la vida rural y prácticas agrícolas autosuficientes. Sin embargo, una vez conocida por su pintoresco estilo de vida de pueblo pequeño en armonía con el mundo natural, Bloomington ha experimentado una afluencia masiva de desarrollo de almacenes, y un mar de concreto en constante crecimiento está consumiendo nuestros espacios verdes abiertos. Este cambio evidente en la estructura de nuestra comunidad ha alimentado una fuerte oposición pública al Proyecto Bloomington Business Park y el peligroso crecimiento de desarrollos de almacenes junto a casas, escuelas y parques. Si el destino del Proyecto Bloomington Business Park estuviera en manos de los miembros de nuestra comunidad, este proyecto no sería un tema de agenda. La comunidad hubieran rechazado rápidamente el proyecto con la dirección de la División de Planificación del Condado y priorizado los desarrollos enfocados en crear comunidad y fomentar un ecosistema seguro y saludable donde los residentes de Bloomington pueden cabalgar, trabajar y jugar porque los almacenes no son lo que los miembros de la comunidad han solicitado, y ciertamente no es lo que se merecen.

Por lo tanto, les recuerdo lo que se perderá irreversiblemente si se acepta el Bloomington Business Park Specific Plan. Más de 213 acres de terrenos residenciales y agrícolas se perderán en espacios industriales a menos de 100 pies de tres escuelas públicas (Bloomington High School, Ruth O Harris Middle School y Walter Zimmerman Elementary School). Nuestros espacios públicos peatonales y ecuestres se verán afectados negativamente por aproximadamente 9,000 viajes de vehículos y camiones en las carreteras del corazón de la comunidad. Sin duda, los vecindarios vibrantes y coloridos que valoramos serán reemplazados al cambiar el carácter y los valores de nuestra comunidad. Las familias

en nuestros vecindarios experimentarán el desplazamiento.

Mi posición inquebrantable es que los Comisionados de Planificación y la Junta de Supervisores del Condado de San Bernardino se oponen inequívocamente al Bloomington Business Park Specific Plan. Les pido que consideren alternativas a los proyectos de almacenes a través de la divulgación y un proceso de participación cívica para colaborar con los miembros de la comunidad de Bloomington para crear e implementar una planificación que permita a sus residentes disfrutar de una mejor calidad de vida ahora y para las generaciones futuras.

Reconozco que al enviar esta carta, estoy compartiendo mi nombre, correo electrónico, código postal y cualquier otra información de contacto que desee compartir con los Comisionados de Planificación de San Bernardino, la Junta de Supervisores, y mi información será parte del registro público.

Commissioner Planning Commission,

Dear County of San Bernardino County Planning Commission and Board of Supervisors,

I am strongly opposed to the proposed Bloomington Business Park Specific Plan Project.

If approved, this project will change the makeup of Bloomington and our lifestyle of raising livestock. The Bloomington Business Park's significant environmental impacts are detrimental to the health and well-being of our community's children, seniors, and families. Therefore, I urge you to represent the interests of the constituents you serve.

Bloomington is home to a diverse group of working-class families who have formed a vibrant community with strong ties to rural living and self-sufficient farming practices. However, once known for its quaint small-town lifestyle in harmony with the natural world, Bloomington has experienced a massive influx of warehouse development, and an ever-growing sea of concrete is consuming our green open spaces. This evident change to the fabric of our community has fueled strong public opposition to the Bloomington Business Park Project and the dangerous growth of warehouse developments next to homes, schools, and parks. If the fate of the Bloomington Business Park Project were at the hands of our community members, this project would not be an agenda item. The community would have promptly rejected the project with direction to the County Planning Division and prioritized developments focused on creating community and fostering a safe and healthy ecosystem where Bloomington residents can ride, work and play because warehouses are not what community members have requested, and certainly not what they deserve.

Therefore, I remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). Our pedestrian and equestrian public spaces will be negatively impacted by an estimated 9,000 vehicle and truck trips on roads in the heart of the community. Undoubtedly, the vibrant and colorful neighborhoods we value will be replaced by changing the character and values of our community. Families in our neighborhoods will experience displacement.

It is my unwavering position that the County of San Bernardino Planning Commissioners and

Board of Supervisors unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you consider alternatives to warehouse projects through outreach and a civic engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.

I acknowledge that by sending this letter, I am sharing my name, email, zip code, and any other contact information I want to share with the San Bernardino Planning Commissioners, Board of Supervisors, and my information will be part of the public record.

Therefore, I remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). Our pedestrian and equestrian public spaces will be negatively impacted by an estimated 9,000 vehicle and truck trips on roads in the heart of the community. Undoubtedly, the vibrant and colorful neighborhoods we value will be replaced by changing the character and values of our community. Families in our neighborhoods will experience displacement.

It is my unwavering position that the County of San Bernardino Planning Commissioners and

Board of Supervisors unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you consider alternatives to warehouse projects through outreach and a civic engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.

I acknowledge that by sending this letter, I am sharing my name, email, zip code, and any other contact information I want to share with the San Bernardino Planning Commissioners, Board of Supervisors, and my information will be part of the public record.

Commissioner Planning Commission,

Me opongo firmemente al Bloomington Business Park Specific Plan propuesto.

Si se aprueba, este proyecto cambiará la composición de Bloomington y nuestro estilo de vida de crianza de ganado. Los impactos ambientales significativos de Bloomington Business Park son perjudiciales para la salud y el bienestar de los niños, las personas mayores y las familias de nuestra comunidad. Por lo tanto, le insisto que represente los intereses de los electores a los que sirve.

Bloomington es el hogar de un grupo diverso de familias de clase trabajadora que han formado una comunidad vibrante con fuertes lazos a la vida rural y prácticas agrícolas autosuficientes. Sin embargo, una vez conocida por su pintoresco estilo de vida de pueblo pequeño en armonía con el mundo natural, Bloomington ha experimentado una afluencia masiva de desarrollo de almacenes, y un mar de concreto en constante crecimiento está consumiendo nuestros espacios verdes abiertos. Este cambio evidente en la estructura de nuestra comunidad ha alimentado una fuerte oposición pública al Proyecto Bloomington Business Park y el peligroso crecimiento de desarrollos de almacenes junto a casas, escuelas y parques. Si el destino del Proyecto Bloomington Business Park estuviera en manos de los miembros de nuestra comunidad, este proyecto no sería un tema de agenda. La comunidad hubieran rechazado rápidamente el proyecto con la dirección de la División de Planificación del Condado y priorizado los desarrollos enfocados en crear comunidad y fomentar un ecosistema seguro y saludable donde los residentes de Bloomington pueden cabalgar, trabajar y jugar porque los almacenes no son lo que los miembros de la comunidad han solicitado, y ciertamente no es lo que se merecen.

Por lo tanto, les recuerdo lo que se perderá irreversiblemente si se acepta el Bloomington Business Park Specific Plan. Más de 213 acres de terrenos residenciales y agrícolas se perderán en espacios industriales a menos de 100 pies de tres escuelas públicas (Bloomington High School, Ruth O Harris Middle School y Walter Zimmerman Elementary School). Nuestros espacios públicos peatonales y ecuestres se verán afectados negativamente por aproximadamente 9,000 viajes de vehículos y camiones en las carreteras del corazón de la comunidad. Sin duda, los vecindarios vibrantes y coloridos que valoramos serán reemplazados al cambiar el carácter y los valores de nuestra comunidad. Las familias

en nuestros vecindarios experimentarán el desplazamiento.

Mi posición inquebrantable es que los Comisionados de Planificación y la Junta de Supervisores del Condado de San Bernardino se oponen inequívocamente al Bloomington Business Park Specific Plan. Les pido que consideren alternativas a los proyectos de almacenes a través de la divulgación y un proceso de participación cívica para colaborar con los miembros de la comunidad de Bloomington para crear e implementar una planificación que permita a sus residentes disfrutar de una mejor calidad de vida ahora y para las generaciones futuras.

Reconozco que al enviar esta carta, estoy compartiendo mi nombre, correo electrónico, código postal y cualquier otra información de contacto que desee compartir con los Comisionados de Planificación de San Bernardino, la Junta de Supervisores, y mi información será parte del registro público.

Commissioner Planning Commission,

Dear County of San Bernardino County Planning Commission and Board of Supervisors,

I am strongly opposed to the proposed Bloomington Business Park Specific Plan Project.

If approved, this project will change the makeup of Bloomington and our lifestyle of raising livestock. The Bloomington Business Park's significant environmental impacts are detrimental to the health and well-being of our community's children, seniors, and families. Therefore, I urge you to represent the interests of the constituents you serve.

Bloomington is home to a diverse group of working-class families who have formed a vibrant community with strong ties to rural living and self-sufficient farming practices. However, once known for its quaint small-town lifestyle in harmony with the natural world, Bloomington has experienced a massive influx of warehouse development, and an ever-growing sea of concrete is consuming our green open spaces. This evident change to the fabric of our community has fueled strong public opposition to the Bloomington Business Park Project and the dangerous growth of warehouse developments next to homes, schools, and parks. If the fate of the Bloomington Business Park Project were at the hands of our community members, this project would not be an agenda item. The community would have promptly rejected the project with direction to the County Planning Division and prioritized developments focused on creating community and fostering a safe and healthy ecosystem where Bloomington residents can ride, work and play because warehouses are not what community members have requested, and certainly not what they deserve.

Therefore, I remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). I am strongly opposed to the proposed Bloomington Business Park Specific Plan Project.

If approved, this project will change the makeup of Bloomington and our lifestyle of raising livestock. The Bloomington Business Park's significant environmental impacts are detrimental to the health and well-being of our community's children, seniors, and families. Therefore, I urge you to represent the interests of the constituents you serve.

Bloomington is home to a diverse group of working-class families who have formed a vibrant community with strong ties to rural living and self-sufficient farming practices. However, once known for its quaint small-town lifestyle in harmony with the natural world, Bloomington has experienced a massive influx of warehouse development, and an ever-growing sea of concrete is consuming our green open spaces. This evident change to the fabric of our community has fueled strong public opposition to the Bloomington Business Park Project and the dangerous growth of warehouse developments next to homes, schools, and parks. If the fate of the Bloomington Business Park Project were at the hands of our community members, this project would not be an agenda item. The community would have promptly rejected the project with direction to the County Planning Division and prioritized developments focused on creating community and fostering a safe and healthy ecosystem where Bloomington residents can ride, work and play because warehouses are not what community members have requested, and certainly not what they deserve.

Therefore, I remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). Our pedestrian and equestrian public spaces will be negatively impacted by an estimated 9,000 vehicle and truck trips on roads in the heart of the community. Undoubtedly, the vibrant and colorful neighborhoods we value will be replaced by changing the character and values of our community. Families in our neighborhoods will experience displacement.

It is my unwavering position that the County of San Bernardino Planning Commissioners and

Board of Supervisors unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you consider alternatives to warehouse projects through outreach and a civic engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.

I acknowledge that by sending this letter, I am sharing my name, email, zip code, and any other contact information I want to share with the San Bernardino Planning Commissioners, Board of Supervisors, and my information will be part of the public record.

Commissioner Planning Commission,

Dear County of San Bernardino County Planning Commission and Board of Supervisors,

I am VERY strongly opposed to the proposed Bloomington Business Park Specific Plan Project.

If approved, this project will change the makeup of Bloomington and our lifestyle of raising livestock. There would be terrible health consequences, and impact on the environment that you have the chance to stop.

Bloomington is home to a great and amazing group of working-class families. I have grown up here, and over the years Bloomington has grown in size of warehouses being developed. It is heartbreaking to see your community suffer and be kicked out for factories and warehouses that do more harm than good.

As someone who has had family have to leave their homes in order to make way for the factories, and someone whose church has had to sell land to these factories, nothing hurts more than your community being torn apart.

If the fate of the Bloomington Business Park Project were at the hands of our community members, this project would not be an agenda item.

The community would have promptly rejected the project with direction to the County Planning Division and prioritized creating community and fostering a safe and healthy environment.

Therefore, I urge you to think of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 (!!!!!) acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools. (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School).

My own family and friends have gone to Bloomington high school. I have gone to Ruth O Harris Middle School. Endangering us young adults is not the way to go..

It is my unwavering position that the County of San Bernardino Planning Commissioners and Board of Supervisors unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you consider alternatives to warehouse projects through outreach and a civic

engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.

I acknowledge that by sending this letter, I am sharing my name, email, zip code, and any other contact information I want to share with the San Bernardino Planning Commissioners, Board of Supervisors, and my information will be part of the public record.

BLOOMINGTON IS NOT FOR SALE.

It is astonishing that I, a 16 year old who lives in the neighboring city is here writing a message to our representatives. I should be outside, walking around my town, enjoying the Southern California weather, and going to parks. Instead I am fighting against people who want to use whatever land possible to gain money and power. Instead I am struggling to write a message that contains all I want to say. Instead I am pleading with you to use your voice and stop the madness that is happening in Bloomington and nearby cities.

Sincerely,
Alexa Franco.

Therefore, I remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). Our pedestrian and equestrian public spaces will be negatively impacted by an estimated 9,000 vehicle and truck trips on roads in the heart of the community. Undoubtedly, the vibrant and colorful neighborhoods we value will be replaced by changing the character and values of our community. Families in our neighborhoods will experience displacement.

It is my unwavering position that the County of San Bernardino Planning Commissioners and

Board of Supervisors unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you consider alternatives to warehouse projects through outreach and a civic engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.

I acknowledge that by sending this letter, I am sharing my name, email, zip code, and any other contact information I want to share with the San Bernardino Planning Commissioners, Board of Supervisors, and my information will be part of the public record.

Commissioner Planning Commission,

Dear County of San Bernardino County Planning Commission and Board of Supervisors,

I am strongly opposed to the proposed Bloomington Business Park Specific Plan Project.

If approved, this project will change the makeup of Bloomington and our lifestyle of raising livestock. The Bloomington Business Park's significant environmental impacts are detrimental to the health and well-being of our community's children, seniors, and families. Therefore, I urge you to represent the interests of the constituents you serve.

Bloomington is home to a diverse group of working-class families who have formed a vibrant community with strong ties to rural living and self-sufficient farming practices. However, once known for its quaint small-town lifestyle in harmony with the natural world, Bloomington has experienced a massive influx of warehouse development, and an ever-growing sea of concrete is consuming our green open spaces. This evident change to the fabric of our community has fueled strong public opposition to the Bloomington Business Park Project and the dangerous growth of warehouse developments next to homes, schools, and parks. If the fate of the Bloomington Business Park Project were at the hands of our community members, this project would not be an agenda item. The community would have promptly rejected the project with direction to the County Planning Division and prioritized developments focused on creating community and fostering a safe and healthy ecosystem where Bloomington residents can ride, work and play because warehouses are not what community members have requested, and certainly not what they deserve.

Therefore, I remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). Our pedestrian and equestrian public spaces will be negatively impacted by an estimated 9,000 vehicle and truck trips on roads in the heart of the community. Undoubtedly, the vibrant and colorful neighborhoods we value will be replaced by changing the character and values of our community. Families in our neighborhoods will experience displacement.

It is my unwavering position that the County of San Bernardino Planning Commissioners and

Board of Supervisors unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you consider alternatives to warehouse projects through outreach and a civic engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.
