Commissioner Planning Commission,

Estimada Junta de Supervisores del Condado de San Bernardino:

Sigo oponiéndome firmemente en contra del Bloomington Business Park Specific Plan Project, y le insisto que vote en contra de este proyecto el 15 de noviembre.

Espero que pueda proteger a nuestra comunidad y nuestro estilo de vida de criar ganado. Los impactos ambientales significativos del Bloomington Business Park amenazan la salud y el bienestar de los niños, las personas mayores y las familias de nuestra comunidad. Por lo tanto, le insisto que nos mantenga a salvo y represente los intereses de los electores a los que sirve.

Bloomington es el hogar de un grupo diverso de familias trabajadoras que han formado una comunidad vibrante con fuertes lazos con la vida rural y prácticas agrícolas autosuficientes. Sin embargo, una vez conocida por su pintoresco estilo de vida de pueblo pequeño en armonía con el mundo natural, Bloomington ha sufrido de un influjo masivo de desarrollo de bodegas, y un mar de concreto en constante crecimiento que está consumiendo nuestros espacios verdes abiertos. Este cambio evidente en la estructura de nuestra comunidad ha alimentado una fuerte oposición pública al Bloomington Business Park Specific Plan Project y el peligroso crecimiento de desarrollos de bodegas junto a casas, escuelas y parques. Si el destino del Bloomington Business Park Specific Plan Project estuviera en manos de los miembros de nuestra comunidad, este proyecto no sería considerado como un tema de agenda. La comunidad habría rechazado rápidamente el proyecto y priorizado los desarrollos enfocados en proteger a nuestra comunidad y garantizar un ecosistema segura y saludable donde los residentes de Bloomington puedan montar, estudiar y trabajar. ¡Las bodegas NO es lo que la comunidad ha solicitado y ciertamente NO lo que merecemos!

Sigo recordándoles lo que se perderá irreversiblemente si se acepta el Bloomington Business Park Specific Plan Project. Más de 213 acres de terrenos residenciales y agrícolas se perderán en espacios industriales de menos de 100 pies para tres escuelas públicas (Bloomington High School, Ruth O Harris Middle School y Walter Zimmerman Elementary School). Nuestros espacios públicos peatonales y caballista se verán afectados negativamente por aproximadamente 9,000 viajes de vehículos y camiones en las carreteras del corazón de la comunidad. Sin duda, los vecindarios vibrantes y pintorescos que valoramos

serán reemplazados al cambiar el carácter y los valores de nuestra comunidad. Las familias en nuestros vecindarios sufriran el desplazamiento.

Mi posición inquebrantable es que la Junta de Supervisores del Condado de San Bernardino se oponga inequívocamente al Bloomington Business Park Specific Plan Project. Le pido que reconsideren las alternativas a los proyectos de bodegas a través del alcance y un proceso de participación cívica para colaborar con los miembros de la comunidad de Bloomington para crear e implementar una planificación que permita a sus residentes disfrutar de una mejor calidad de vida ahora y para las generaciones futuras.

Al enviar esta carta, reconozco que estoy compartiendo mi nombre, correo electrónico, código postal y cualquier otra información de contacto que desee compartir con los Comisionados de Planificación de San Bernardino, la Junta de Supervisores y mi información será parte del registro público.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you can confirm the sender and know the content is safe.

Commissioner Planning Commission,

Dear County of San Bernardino Board of Supervisors,

I remain strongly opposed to the proposed Bloomington Business Park Specific Plan Project, and I urge you to vote against this project on Nov. 15th.

I hope you can protect our community and our lifestyle of raising livestock. The Bloomington Business Park's significant environmental impacts threaten the health and well-being of our community's children, seniors, and families. Therefore, I urge you to keep us safe and represent the interests of the constituents you serve.

Bloomington is home to a diverse group of hard-working families who have formed a vibrant community with strong ties to rural living and self-sufficient farming practices. However, once known for its quaint small-town lifestyle in harmony with the natural world, Bloomington has experienced a massive influx of warehouse development, and an ever-growing sea of concrete is consuming our green open spaces. This evident change to the fabric of our community has fueled strong public opposition to the Bloomington Business Park Project and the dangerous growth of warehouse developments next to homes, schools, and parks. If the Bloomington Business Park Project's fate were in our community members' hands, this project would not be an agenda item. The community would have promptly rejected the project, and prioritized developments focused on protecting our community and ensuring a safe and healthy ecosystem where Bloomington residents can ride, learn, and work. Warehouses are not what community members have requested and certainly not what they deserve.

I continue to remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). Our pedestrian and equestrian public spaces will be negatively impacted by an estimated 9,000 vehicle and truck trips on roads in the heart of the community. Undoubtedly, the vibrant and colorful neighborhoods we value will be replaced by changing the character and values of our community. Families in our neighborhoods will experience displacement.

My unwavering position is that the County of San Bernardino Board of Supervisors

unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you reconsider alternatives to warehouse projects through outreach and a civic engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.

By sending this letter, I acknowledge that I am sharing my name, email, zip code, and any other contact information I want to share with the San Bernardino Planning Commissioners, Board of Supervisors, and my information will be part of the public record.

I remain strongly opposed to the proposed Bloomington Business Park Specific Plan Project, and I urge you to vote against this project on Nov. 15th.

I hope you can protect our community and our lifestyle of raising livestock. The Bloomington Business Park's significant environmental impacts threaten the health and well-being of our community's children, seniors, and families. Therefore, I urge you to keep us safe and represent the interests of the constituents you serve.

Bloomington is home to a diverse group of hard-working families who have formed a vibrant community with strong ties to rural living and self-sufficient farming practices. However, once known for its quaint small-town lifestyle in harmony with the natural world, Bloomington has experienced a massive influx of warehouse development, and an ever-growing sea of concrete is consuming our green open spaces. This evident change to the fabric of our community has fueled strong public opposition to the Bloomington Business Park Project and the dangerous growth of warehouse developments next to homes, schools, and parks. If the Bloomington Business Park Project's fate were in our community members' hands, this project would not be an agenda item. The community would have promptly rejected the project, and prioritized developments focused on protecting our community and ensuring a safe and healthy ecosystem where Bloomington residents can ride, learn, and work. Warehouses are not what community members have requested and certainly not what they deserve.

I continue to remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). Our pedestrian and equestrian public spaces will be negatively impacted by an estimated 9,000 vehicle and truck trips on roads in the heart of the community. Undoubtedly, the vibrant and colorful neighborhoods we value will be replaced by changing the character and values of our community. Families in our neighborhoods will experience displacement.

My unwavering position is that the County of San Bernardino Board of Supervisors

unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you reconsider alternatives to warehouse projects through outreach and a civic engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.

By sending this letter, I acknowledge that I am sharing my name, email, zip code, and any other contact information I want to share with the San Bernardino Planning Commissioners, Board of Supervisors, and my information will be part of the public record.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you can confirm the sender and know the content is safe.

Commissioner Planning Commission,

Dear Board of Supervisors of San Bernardino County:

I continue to strongly oppose the Bloomington Business Park Specific Plan Project, and I urge you to vote against this project on November 15.

I hope you can protect our community and our lifestyle from breeding cattle. The significant environmental impacts of Bloomington Business Park threaten the health and well-being of children, the elderly and families in our community. Therefore, I urge you to keep us safe and represent the interests of the voters you serve.

Bloomington is home to a diverse group of working families that have formed a vibrant community with strong ties to rural life and self-sufficient agricultural practices. However, once known for its picturesque small town lifestyle in harmony with the natural world, Bloomington has suffered from a massive influx of winery development, and a sea of concrete in constant growth that is consuming our open green spaces. This obvious change in the structure of our community has fueled strong public opposition to the Bloomington Business Park Specific Plan Project and the dangerous growth of warehouse developments next to houses, schools and parks. If the fate of the Bloomington Business Park Specific Plan Project were in the hands of the members of our community, this project would not be considered an agenda item. The community would have quickly rejected the project and prioritized developments focused on protecting our community and ensuring a safe and healthy ecosystem where Bloomington residents can assemble, study and work. The wineries are NOT what the community has requested and certainly NOT what we deserve!

I keep reminding you of what will be irreversibly lost if the Bloomington Business Park Specific Plan Project is accepted. More than 213 acres of residential and agricultural land will be lost in industrial spaces of less than 100 feet for three public schools (Bloomington High School, Ruth O Harris Middle School and Walter Zimmerman Elementary School). Our pedestrian and horseback public spaces will be negatively affected by approximately 9,000 vehicle and truck trips on the roads in the heart of the community. Undoubtedly, the vibrant and picturesque neighborhoods that we value will be replaced by changing the character and values of our community. Families in our neighborhoods will suffer the displacement.

My unwavering position is that the Board of Supervisors of San Bernardino County unequivocally opposes the Bloomington Business Park Specific Plan Project. I ask you to reconsider the alternatives to winery projects through the reach and a process of civic participation to collaborate with the members of the Bloomington community to create and implement a planning that allows its residents to enjoy a better quality of life now and for future generations.

By sending this letter, I acknowledge that I am sharing my name, email, zip code and any other contact information that I wish to share with the Planning Commissioners of San Bernardino, the Board of Supervisors and my information will be part of the public registry.

Warehouses are not what community members have requested and certainly not what they deserve.

I continue to remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School). Our pedestrian and equestrian public spaces will be negatively impacted by an estimated 9,000 vehicle and truck trips on roads in the heart of the community. Undoubtedly, the vibrant and colorful neighborhoods we value will be replaced by changing the character and values of our community. Families in our neighborhoods will experience displacement.

My unwavering position is that the County of San Bernardino Board of Supervisors

unequivocally oppose the Bloomington Business Park Specific Plan. I ask that you reconsider alternatives to warehouse projects through outreach and a civic engagement process to collaborate with Bloomington community members to create and implement planning that will allow its residents to enjoy a better quality of life now and for generations to come.

By sending this letter, I acknowledge that I am sharing my name, email, zip code, and any other contact information I want to share with the San Bernardino Planning Commissioners, Board of Supervisors, and my information will be part of the public record.

Commissioner Planning Commission,

Dear County of San Bernardino Board of Supervisors,

I remain strongly opposed to the proposed Bloomington Business Park Specific Plan Project, and I urge you to vote against this project on Nov. 15th.

I hope you can protect our community and our lifestyle of raising livestock. The Bloomington Business Park's significant environmental impacts threaten the health and well-being of our community's children, seniors, and families. Therefore, I urge you to keep us safe and represent the interests of the constituents you serve.

Bloomington is home to a diverse group of hard-working families who have formed a vibrant community with strong ties to rural living and self-sufficient farming practices. However, once known for its quaint small-town lifestyle in harmony with the natural world, Bloomington has experienced a massive influx of warehouse development, and an ever-growing sea of concrete is consuming our green open spaces. This evident change to the fabric of our community has fueled strong public opposition to the Bloomington Business Park Project and the dangerous growth of warehouse developments next to homes, schools, and parks. If the Bloomington Business Park Project's fate were in our community members' hands, this project would not be an agenda item. The community would have promptly rejected the project, and prioritized developments focused on protecting our community and ensuring a safe and healthy ecosystem where Bloomington residents can ride, learn, and work. Warehouses are not what community members have requested and certainly not what they deserve.

I continue to remind you of what will be irreversibly lost if the Bloomington Business Park Project is accepted. Over 213 acres of residential and agricultural land will be lost to industrial space less than 100 ft. to three public schools (Bloomington High School, Ruth O Harris Middle School, and Walter Zimmerman Elementary School).
