Upon receipt of a corrected Deliverable from Baker & Taylor, County will have a reasonable period of time, not to exceed the originally specified acceptance period, to review the Deliverable. Subject to the provisions of Section I.3 below, the preceding process will be repeated until acceptance of the Deliverable is achieved.

- I.3** If, after two (2) repeated efforts, Baker & Taylor is unable to correct, in accordance with clause (b) above, any deficiencies preventing complete and final acceptance of a Deliverable, County either may (1) mutually agree with Baker & Taylor on a written amendment to the Project Specifications to reflect new criteria for acceptance of a Deliverable together with an equitable adjustment to Baker & Taylor's charges to reflect such changes, or (2) terminate this Agreement, pursuant to I.6 below.
- I.4** Any changes to the scope of the Services or to the tasks which comprise the Services may be made only by means of a writing signed by an authorized person of both Baker & Taylor and County as designated in writing by each party.
- I.5** Any changes must include with reasonable detail the change(s) in scope and/or task, and must specify any changes in the period(s) of time within which the services will be performed (including any changes to the final completion date of all services) and/or costs of materials/services resulting from such change.

1. COMPANY HISTORY

Baker & Taylor began in 1828 as a Hartford, Connecticut bindery and subscription book publisher. Founders, David Robinson and B. B. Barber, then opened a bookstore to distribute their own and other publisher's materials. Seven years later, Robinson and Barber moved their rapidly growing business to New York City. In 1885, James S. Baker and Nelson Taylor acquired the company, which was now focused on the distribution of other publisher's materials. In 1912, Baker & Taylor discontinued publishing altogether and devoted itself entirely to the wholesaling of all types of library materials. In 1970, W.R. Grace & Co. bought Baker & Taylor. During the '70's and '80's, Baker & Taylor experienced significant growth, increasing our market share and providing greater breadth of services to all consumers and markets.

Baker & Taylor senior management and the Carlyle Group, acquired Baker & Taylor in 1992. In July of 2003, Willis Stein & Partners acquired Baker & Taylor and in June of 2006, Castle Harlan, LLC. acquired Baker & Taylor. In April of 2016, Follett acquired Baker & Taylor. Baker & Taylor is headquartered in Charlotte, North Carolina, and operates distribution, technical support, and sales centers worldwide. Our Charlotte location maintains all sales administration, human resources, and finance operations. Book distributions centers are strategically located in New Jersey, Georgia, Nevada and Illinois.

Baker & Taylor has a long-standing tradition of being the "any book" wholesaler. We are a leading full-line distributor of books and audiovisual products to library facilities, with annual sales of more than 115 million books from over 75,000 publishers and imprints. 2. DESCRIPTION OF SERVICES

2.1. CUSTOMIZED LIBRARY SERVICES

Baker & Taylor has been leading the industry in providing libraries customized technical services for over forty (40) years. We have developed a multitude of innovative services in the area of collection management, cataloging services and technical processing. Due to technological advances and the increased complexity of library operations and projects, Baker & Taylor created Customized Library Services in 1996 to consolidate our valuable resources and experience in order to address the growing demand from libraries for more customized, specialized and unique services. CLS is a separate operating unit, whose sole focus is Opening Day Collections (ODC), Collection Expansions, On-line Cataloging Solutions, Outsourcing Projects and Project Management. Customized Library Services (CLS) has operations in four Baker & Taylor locations; Commerce, GA, Momence, IL, Bridgewater, NJ, and Reno, NV and leverages Baker & Taylor's extensive fulfillment and distribution network to provide total project services. CLS has its own staff of over 300 trained professionals to perform the unique services to provide complete library solutions. We currently serve over 400 libraries on an ongoing basis and complete over 75-100 ODC/Collection enhancement projects per year.

2.2. CUSTOMER RESPONSE

Project Scope

Customized Library Services is fully capable of providing customized cataloging and processing services required by the San Bernardino County Library. In accordance with the library's completed requirements, the following services will be provided:

- CLS will provide customized adaptive and copy cataloging with CIP upgrades where needed utilizing Z39.50 protocol
- CLS will provide Project Management Support
- CLS will provide custom cataloging and processing of Ongoing Material

The basis of Customized Library Services' business relationship with San Bernardino County Library will be a partnership, based on mutually agreed upon roles, responsibilities, and obligations. Flexibility and responsiveness to changing needs are fundamental requirements for ensuring a successful and mutually satisfying partnership between the Library and CLS.

2.3. PROJECT MANAGEMENT APPROACH

The formation of Baker & Taylor's Customized Library Services brought with it the development of a project-oriented approach to Ongoing Collection Development, Opening Day Collections, and Ongoing Online Cataloging and Processing. This approach allows CLS management to schedule all facets of a project or ongoing service, including resources, and provides the foundation and framework for the entire project while creating a mutual understanding of the requirements of both the Library and CLS.

The first step in the implementation of the CLS project management process is the establishment of a project team. All CLS project teams consist of a minimum of a project manager, collection development manager, an automation specialist/cataloging/processing manager, and an account coordinator. Team members are responsible for managing their assigned resources to complete the project. In turn, each team member works closely with the project manager to ensure compliance to all requirements.

The development of the project team begins upon receipt of a completed Customer Needs Assessment or formal/informal proposal request. The project team immediately becomes part of the CLS response team and helps develop an approach that will successfully complete the project and meet the library's requirements. This process ensures that all management resources are in place prior to the submission of our response. Our experience has shown that when the library sets up a project team with similar project responsibilities and scope in advance of the project or ongoing service startup, the documentation and implementation of services is more efficient, accurate, and thorough. Additionally, the library's internal project team, supported by a designated library project manager, can provide a central point of contact for all issues and information. This will help foster communication and insure that all internal library timelines and schedules are met.

Upon successful award to CLS, the project manager immediately contacts the library's project coordinator to begin developing the partnership that will carry throughout CLS service to the library or the projects' completion. At this time, the project manager contacts the library to review the next steps in the process and possible site visit dates and also requests samples of barcodes, genre labels, ownerships labels or other labels as applicable. The project manager will work with the library to schedule a series of conference calls, including the appropriate CLS and library project team members. The goals of these calls will be to establish connectivity to the library's catalog, review the cataloging and processing specifications supplied in the proposal process and further define them if needed, profile any collection development needs, and assist in the coordination of any electronic ordering/account set up. At the end of these conference calls, all CLS project team members will review their notes and provide a comprehensive requirements documentation package to the library. Upon receipt of the library's approval of the requirements package, CLS will create cataloged and processed samples.

Your project manager will deliver these samples to the library, giving the library another opportunity to confirm that CLS understands their requirements. At this time the project manager can walk the library through placing their first orders and discuss a fulfillment schedule with the library.

Ultimately, the key to successful project management is communication. Internally, CLS emphasizes and focuses on team communication for facilitation and completion of all processes and tasks. Externally, this communication is no less important. Team to team communication between the library and CLS builds a confidence and the environment that is needed for the successful completion of any project. In support of this "communications environment", the project manager is responsible for establishing regular conference calls with the library and all the CLS team members. These meetings can serve a number of purposes, such as the regular review of profiles, requirements, and project status updates. Our experience has also proven that these meetings and calls aid in the development of the relationship between CLS and the library by promoting open lines of communication at all times and by helping to resolve any issues or questions to the mutual satisfaction of the library and CLS.

A final component of project management is consulting support. All CLS project managers have significant project and delivery experience that can provide ongoing support and aide to the library. This additional knowledge base is free of charge and comes from working with seasoned project professionals. This support can be an invaluable and timely tool from collection development strategy all the way to the delivery implementation.

2.5. CATALOGING

Customized Library Services' custom cataloging is BAKER & TAYLOR's premier service. CLS has performed on-line cataloging, editing and maintenance for Libraries since 1989. Our preferred method is to access the Library's ILS using the Z39.50 protocol. Customized Library Services has partnered with The Library Corporation (TLC) to create a state of the art cataloging methodology that leverages Z39.50 protocol for accessing the library's database and a resource pool of records from the Library of Congress and any Baker & Taylor created records. This technology allows our CLS catalogers to have access to the most current version of the library's cataloging records without the overhead of being directly online. Records obtained from the Library's database are saved to a library specific work file located in our secure cataloging utility. The records in the work file are used in the creation of spine labels and as a vehicle for providing item-linking information.

Major Features of the CLS Preferred Cataloging Methodology (Z39.50):

Only authorized CLS catalogers have access to the library's database and work file. The cataloger will process material first by searching for a matching record in the library's database and work file simultaneously.

A successful search occurs when our cataloger matches the data elements found in the appropriate record tags. CLS considers the title, author, imprint/publisher, edition and date of publication when matching a record. During the CLS profiling, the project team will document the appropriate attributes for matching records. When a matching record is found, the appropriate item level information (examples: barcode number, list price, collection code, etc.) is keyed and the record is saved to the library's work file.

If a record is not found in the library's database or work file, the CLS Bibliographic Database is searched, followed by LC MARC and the resource databases of TLC. The CLS Bibliographic Database contains all CIP records upgraded to full MARC standards by CLS catalogers, as well as new records created by CLS original catalogers.

If the record is not found in the above resources, the Library may also choose to have CLS search OCLC on their behalf for records not found in the library's catalog. Once a record is located in OCLC it is saved to the Library's work file and the record is updated to the Library's specifications. The option of utilizing OCLC will also help to minimize the Library's need for original cataloging. Please note that the process of using OCLC is available upon CLS' receipt of a signed third party agreement which grants permission to our catalogers to access OCLC on the library's behalf. There are no additional charges from CLS for this service. However, it should be noted that all corresponding OCLC charges will be the responsibility of the Library. On a weekly basis, an electronic file is sent to OCLC to update the library's holdings for all contributed records.

When a full matching record is found in one of the resource databases, it is upgraded to meet the library's specifications and the appropriate item tag is keyed. The record is then saved to the library's work file.

If the matching record found is not a full level record, the record is upgraded to meet LC standards and is saved to the CLS Bibliographic Database. The record is then further edited to meet the

library's specifications and the appropriate item record is keyed. The record is then saved to the library's work file. The exception to a full level record would be that some AV pre-pub records are not upgraded to full MARC standards. However, these records are upgradeable to the Library's local standards. If a matching record cannot be found in the multi-database search string, a request is forwarded to an original cataloger in the CLS department. Our original catalogers will create a record according to RDA rules. LC authority files are used to validate author and subject headings. Once the record is created, it is saved into the CLS Bibliographic Review File. Once the record has been reviewed and approved, it is saved in the CLS Bibliographic Database. The library's assigned cataloger is notified and the record will be edited to meet the library's specification and appropriate item tag is keyed. The sample MARC records are enclosed in Appendix 1. The sample records enclosed (Appendix A) represent the minimum level of cataloging for AV materials. (Use only if pricing for A/V is included in response).

Every title sent to the library will have a full MARC record with the appropriate item tags. The records will either be new additions to the library's catalog, edited and modified to the library's standards, or existing records from the library's catalog.

When the cataloger has completed the order, laser printed label sets consisting of spine, barcode, bibliographic, and other labels as required by the library are printed. We have enclosed a sample label set in Appendix 2. The barcode is provided in a standard format, with an eye readable number strip available. All other labels are customizable for font, pitch, boldness and italics. Options for label font include Courier, Times New Roman and Arial and pitches 12, 14, 16 and text can be left justified or centered. For thin books, we can provide one line spine labels and for Picture Books we can provide a larger font author letter spine label. The library will supply a unique barcode range, barcode prefix, and symbology information.

Call number and bibliographic information is extracted directly from the MARC record to ensure accuracy. After the labels are printed, a file of MARC records corresponding to the titles in the order is created. Released records are flagged so they cannot be selected again.

The file of records will be put on the B&T FTP server for the library to retrieve and load. The records are maintained on the Library's work file for historical reference.

2.6. PROCESSING

The CLS department has over 300 trained professionals staffed to handle the library's customized requirements. These staff members are dedicated to meeting the library's requirements and exceeding your expectations. Our commitment to excellence and doing the job right the first time is unmatched in our industry. After cataloging is complete, the processing department completes the physical processing of each item. The processors review the processing instructions gathered at the site visit. Following these instructions, the processor attaches the spine label, barcode, and any special labels required by the library. After the application of all physical components, the library's materials move to the jacket selection area. Experienced technicians size the books so the appropriate Mylar jacket can be applied to the dust cover of the book. After the material is fully processed, it is ready for the final and most important stage in our CLS process, back audit.

2.6.1. RFID

CLS Shelf Ready Processing can also include the application and linking of RFID tags. Baker & Taylor's Customized Library Services has been providing RFID services for print and audiovisual material since 2001. To date, we have linked, printed and/or applied tags for over 1 million items. As the number of vendors and product offerings has grown with regard to RFID technologies, CLS too has grown in our vendor relationships and linking and application capabilities. We currently work with 3M, Checkpoint, Tech-Logic, ITG, Biblio-theca, and VTLS and we own equipment from each vendor.

As this is a developing technology with unlimited potential for library use, Baker & Taylor's Customized Library Services will continue to support the needs and requirements of our customers.

2.6.2. Back Audit

The back audit team is the final step in ensuring the material we ship to the library is of the highest quality and is in compliance with the library's profiled specifications. The CLS back auditors inspect each order by cross referencing the completed processing and the processing instructions gathered at the site visit. Once the library's material passes this stage, the order is ready to be staged for delivery to the library.

2.7. INVOICES

Book and SWA

Baker & Taylor's book and spoken word invoices include the bill to address, ship to address, unit price, unit discount, quantity, total discount price, ISBN and purchase order number. The library may choose the order in which books appear on the invoice; in the same order as the original purchase order, alphabetically by title, author, or publisher. Cataloging and processing charges can be included in each line's extended price, summarized at the bottom of each invoice, or shown on a separate invoice. In addition, Baker & Taylor's ATS number (authorization to ship) is included on each invoice and packing slip and will allow the library to match the packing slips to invoices.

DVD and Music CD:

Audio Visual invoices will list the account number, purchase order number, quantity, title, producer's list price, discount, extended price, and total price. Processing and cataloging charges will also be listed. Titles can be listed by purchase order, artist, and title or item number. The invoice number is listed on both the invoice and the packing list. In addition, Baker & Taylor's ATS number (authorization to ship) is included on each invoice and packing slip and will allow the library to match the packing slips to invoices.

Electronic Invoicing:

Electronic Invoicing is available for orders placed with Baker & Taylor. The invoice files are available for the library to pickup from our FTP site, <ftp.bakertaylor.com> using the library login with its username and password. The library can retrieve confirmations in the .out directory of our FTP site. After the file is retrieved from the FTP site, the file will receive lines of the PO ordered and close order records for materials invoiced in the library's acquisition system.

Consolidated Invoicing:

Consolidated invoicing will be available from Baker & Taylor in June 2018. Baker & Taylor will work with the library to define options to meet the library's needs

2.8. ONLINE CUSTOMER SUPPORT

Online Customer Support (OCS) is Baker & Taylor's web-based account management system. Access to the OCS system via your web browser is available 24 hours a day, 7 days a week to search and view account information, orders, and invoices with Baker & Taylor.

OCS' sophisticated search options include the ability to query orders by Purchase Order, B&T Order Number, Order Date Range, and more. The OCS data is updated to reflect the latest order and invoice status, as well as up to six months of history.

The library can obtain updated status information at any time by accessing OCS. A backorder summary report including information on all backordered and cancelled titles is available. The library can go to the reports/downloads tab to request this report, setting date parameters and selecting all accounts or specific ones. The report is emailed to the library within 24 hours.

The Library can also view detailed information on order and account status, warehouse location, quantities and prices, and shipping details. If a shipping carrier, such as UPS, has external tracking capabilities, a link in the OCS system will take the Library directly to the carrier's website where additional information on your shipment's status is available. There is even an option that helps the Library to print invoices and order details for record keeping.

2.9. PAYMENT TERMS
