Copies of Subscriber billings which demonstrate the above shall be made available to the Division on its request.

7. Section 13.2. Adjustments to Total Rate – Residential, Commercial and Roll-off Service is deleted in its entirety and replaced with the following:

Section 13.2 Adjustment to Total Rate - Residential, Commercial and Roll-off Service

The following annual and special rate adjustments shall be made to the appropriate cost components of the Total Rate as provided for in this Franchise Agreement. However, no rate adjustment shall be implemented for or during any period of time when Grantee is not in substantial compliance with all material provisions of this Agreement.

(a) Cost of Living Adjustment.

(1) General

Beginning July 1, 2020, Grantee may request an adjustment to all rate categories included in the approved rate schedule according to the method described below and the formulas shown in – “Exhibits G-1 through G-5 - Example Rate Adjustment Formula,” subject to review and approval of County. All future adjustments are to be effective July 1 of the same year.

(2) Cost Components for Rate Adjustment Indices

The approved rates consist of the following cost component categories: Landfill Disposal, Fuel, Service, and Other Operations. Initial component weightings to be used for the first rate adjustment are shown in the tables attached as “Exhibits H-1 and H-2- Rate Adjustment Indices and Initial Cost Component Weightings”. Each cost component may be adjusted by the change in the corresponding index shown in the exhibit. See subsection (3) through (5) below for detailed rate adjustment procedures.

(3) Residential and Commercial Rate Adjustment Steps

All residential and commercial rates, with the exception of commercial Food Waste rates, will be adjusted using the cost component weightings identified in the table attached as “Exhibit H-1 - Rate Adjustment Indices and Initial Cost Component Weightings” and as described below. See “Exhibits G-1, G-2 and G-3 - Example Rate Adjustment Formula” for an example of rate adjustment calculations. Using Exhibit G-1 as an example, the adjustment is calculated as follows:

Step One – Calculate the percentage increase or decrease in each index listed in the table attached as “Exhibit H-1 – Rate Adjustment Indices and Initial Cost Component Weightings.” The increase or decrease in the landfill disposal cost component will be the change in the Landfill Disposal Facility Fee between the July 1 effective date for the rate adjustment and the preceding July 1, except in those instances when the County does not fix a new Landfill Disposal Facility Fee as of July 1 of any year, the actual effective date of the Landfill Disposal Facility Fee change will control. The increase or decrease in the published indices for Fuel, Service and Other Operations will be the change in the average annual published index between the calendar year ended the December prior to the July 1 effective date for the rate adjustment and the prior calendar year. See “Exhibit G-5 – Example Rate Adjustment Formula” for an example calculation of the average annual change in an index.

Step Two – Multiply the percentage changes for each rate adjustment component by that component’s weighting and add these resulting percentages together to get the total weighted change to the rates.

The July 1, 2020 rate adjustment cost components as a percentage of total costs are provided in the table attached as “Exhibit H-1 Rate Adjustment Indices and Initial Cost Component Weightings”, with component weightings for use in subsequent years calculated in Step Four of the rate adjustment. For Step Two of each subsequent rate adjustment, use the “Cost Components Reweighted to Equal 100%” in Column “O” of “Exhibit G-1 – Example Rate Adjustment Formula” in Step Four during the previous rate adjustment.

Step Three – Multiply the total weighted percent change from Step Two by the existing customer rates to calculate the increase or decrease to the maximum rates. Add the rate increase or decrease to the existing rates to derive the newly adjusted rates.

Step Four – Recalculate weightings for the following year based upon these changes. The “Cost Components Reweighted to Equal 100%” in Column “O” of “Exhibit G-1– Example Rate Adjustment Formula” shall be used to calculate the franchise fees due for the upcoming year beginning the July 1 that rates become effective, as shown in “Exhibit I - Example Franchise Fee Calculation.”

(4) RESERVED

(5) Roll-Off Box Rate Adjustment Steps

All roll-off box rates will be adjusted using the cost component weightings identified above as described below. See “Exhibit G-4 Example Rate Adjustment Formula” for an example rate adjustment for roll-off box rates.

Step One – Calculate the percentage increase or decrease in the Fuel and Service indices listed in the table attached as “Exhibit H-2 - Rate Adjustment Indices and Initial Cost Component Weightings.” The increase or decrease in the indices for Fuel and Service will be the change in the average annual published index between the calendar year ended the December prior to the July 1 effective date for the rate adjustment and the prior calendar year.

The Landfill Disposal Facility Fee component is based on a per ton rate. That rate shall remain equal to the San Bernardino County Solid Waste System per ton rate for roll-off loads as of the effective date of the new rate schedule.

Step Two – Multiply the percentage changes for each rate adjustment component by that component’s weighting and add these resulting percentages together to get the total weighted change to the rates.

Cost components as a percentage of total costs are provided in “Exhibit H-2 Rate Adjustment Indices and Initial Cost Component Weightings” for the rate adjustment effective July 1, 2020, with subsequent components calculated in Step Four of the rate adjustment. For Step Two of each subsequent rate adjustment, use the “Cost Components Reweighted to Equal 100%” in Column “O” of “Exhibit G-4 – Example Rate Adjustment Formula” in Step Four during the previous rate adjustment.

Step Three – Multiply the total weighted percent change from Step Two by the existing customer rates to calculate the increase or decrease to the maximum rates. Add the rate increase or decrease to the existing rates to derive the newly adjusted rates.

Step Four – Recalculate weightings for the following year based upon these changes. The “Cost Components Reweighted to Equal 100%” in Column “O” of “Exhibit G-4 – Example Rate Adjustment Formula” shall be used to calculate the franchise fees due for the upcoming year beginning the July 1 that rates become effective, as shown in “Exhibit I - Example Franchise Fee Calculation.”

(6) Changes in Rate Adjustment Indices

If the same rate adjustment index is used from year to year, the “Old Index Value” (Column A in each example in “Exhibits G-1 through G-4- Example Rate Adjustment Formula”) shall be the “New Index Value” (Column B in “Exhibits G-1 through G-4– Example Rate Adjustment Formula”) used in the prior rate adjustment. If the rate adjustment index changes, due to a change in type of fuel, a discontinued index or otherwise, the change will be measured as the average annual change year over year for the new index, and data for the old/discontinued index will not be used. If a rate adjustment index is discontinued, an alternative index must be approved by the Deputy Director of Solid Waste Management or designee.

(7) Revision of Cost of Living Adjustment Methodology

The Parties acknowledge that external factors that are used in the Cost Components Reweighted analysis, such as fuels, costs of equipment, etc., may change over time and the factors may need adjustment. Either Party may initiate discussions to review these factors and whether an adjustment to the rate component weightings is necessary in order to provide economic service to County ratepayers.

(b) Reserved. [Former subsection 13.2(b) deleted as of the effective date of Amendment No. 3.]

(c) Extraordinary Adjustment

The parties acknowledge that there may be infrequent extraordinary events which, although they do not prevent either party from performing, and thus do not implicate the Force Majeure provisions hereof, nevertheless increase the cost of providing service such that Grantee's compensation and the rate adjustment mechanism provided in this Agreement result in Grantee's suffering losses which are substantially outside the commercially reasonable expectations of the parties. The obligation of the parties in such event is to act reasonably toward each other in arriving at an appropriate adjustment in rates. Accordingly, at its option, Grantee may apply to the County at any time, but not more frequently than once annually, for an extraordinary rate adjustment should an event or circumstance arise that is not the result of a Change in Law or Change in Service Level which negatively impacts the economic operation of Grantee and which is in excess of the rate adjustment resulting from the application of the annual adjustment formula set for in subparagraph (a) above. An interim adjustment in rates will be deemed justified if it is necessary for the Grantee to make a substantial change in its operations, or substantial capital expenditure or investment in order to perform its obligations under this Agreement due to the occurrence of an event or circumstance other than a Change in Law or Change in Service Level which is beyond the reasonable control of Grantee. In the event of such an application for an extraordinary rate increase, it is understood that the Grantee shall have the burden of demonstrating to the reasonable satisfaction of County the basis for the extraordinary increased cost. In no event shall any Extraordinary Adjustment be effective prior to the Board's approval of an amendment to the Franchise Agreement.

(d) Landfill Disposal Facility Fee Adjustment

The Landfill Disposal Facility Fee and Organics Processing Facility Fee Adjustments shall be the pass-through of one hundred percent (100%) of any increase or decrease in the fee charged to the Grantee for the use of a Landfill Disposal Facility or an Organics Processing Facility Fee approved for use by the Division, using the rate adjustment formula described in "(a)" above, and shall be effective as of the date of the change of such fee.

(e) Franchise Fee Adjustment

The Franchise Fee adjustment shall be the pass through of one hundred percent (100%) of any increase or decrease in the Franchise Fee percentage, and shall be effective as of the date the Franchise Fee increase or decrease is payable by the Grantee.

(f) Change in Service Level Adjustments

(1) The Total Rate shall be increased (or decreased) by one hundred percent (100%) of the increase (or decrease) or incremental increase (or incremental decrease), as the case may be, in the demonstrable costs (i.e., on any direct or indirect cost, whether fixed or variable) associated with the change in the level of the Solid Waste Handling services which may be required of, or agreed to by, Grantee. A Change in Service Level Adjustment shall be effective on and after the actual date of the requirement to or agreement to change operations which results from the change in service, but, absent the consent of the Director, or designee, not sooner than the effective date of the change in service. In no event shall any Change in Service Level Adjustment be effective prior to the Board's approval of an amendment to the Franchise Agreement.

(2) In the event that the Director, or designee, and the Grantee claiming to be affected by the change in service level cannot agree on either the existence, or the effect on demonstrable costs, of a change in service level, the dispute resolution provisions of Section 13.3(a) shall apply.

(g) Change in Law Adjustments

(1) The Total Rate shall be increased (or decreased) by one hundred percent (100%) of the increase (or decrease) or incremental increase (or incremental decrease), as the case may be, in the demonstrable costs (i.e., on any direct or indirect cost, whether fixed or variable) associated with the change in the manner or nature of conducting Solid Waste Handling services necessitated by a Change in Law. A Change in Law Adjustment shall be effective on and after the actual date of the change in operations which resulted from the Change in Law, but, absent the consent of the Director, or designee,

not sooner than the effective date of the Change in Law. In no event shall any Change in Law Adjustment be effective prior to the Board's approval of an amendment to the Franchise Agreement.

- (2) In the event that the Director, or designee, and the Grantee claiming to be affected by the Change in Law cannot agree on either the existence, or the effect on demonstrable costs, of a Change in Law, the dispute resolution provisions of Section 13.3(a) shall apply.

(h) Calculation Errors

If at any time during the term of this Agreement, the Grantor or the Grantee realize that an adjustment made in accordance with this Section 13.2 has been calculated in error, then the appropriate correction will be calculated by the County and an applicable corrective change, either positive or negative, will be made to the Total Rate on the next ensuing July 1st.

8. Exhibit A, Section F (1) and (2) are deleted in their entirety and replaced with the following:

Exhibit A, Section F. "Emergency Disaster Debris Removal Services"

- (1) In the event of a declared emergency disaster such as a fire, flood, earthquake, or other such occurrence as deemed meeting the criteria of a disaster in which debris is created, the County reserves the right to seek bids and/or services from Grantee or any other service provider for emergency removal of debris in compliance with Federal and State emergency management procurement requirements.
- (2) During any period of time that Grantee is unable to service its franchise area during such declared emergency, either for loss of transportation, lack of assistance or an overabundance of debris material or other similar circumstances the County reserves the right to contract with any other County franchise haulers for temporary bin/roll-off services using rates reflected in such other franchise hauler's contract with the County or to contract with any third party for required services. Grantee shall notify County when it regains its ability to recommence service in its franchise area and County will, within a reasonable time period, terminate any contract with other haulers for the same services.

2020 EXHIBIT G-5 - EXAMPLE RATE ADJUSTMENT FORMULA

CALCULATION FOR AVERAGE ANNUAL CHANGE IN PUBLISHED PRICE INDICES

Rate adjustment indices for fuel, service and other operations are calculated using the “average annual change” as demonstrated in the example below, measured for the twelve months ended the December before each rate adjustment, as compared to the twelve months ended the prior December.

The following example is for the Consumer Price Index for All Urban Consumers, Los Angeles-Long Beach-Anaheim, all items less energy index average that is used to adjust the service and/or other operations cost components. If a rate adjustment based on this CPI index were to be implemented as of July 1, 2020, the twelve-month average annual index for the 12 months ended December 2019 of 275.384 would have been the “New Index Value” to be used in Column B of the example rate adjustment formulas in Exhibits G-1 through G-4, and the twelve-month average annual index for the 12 months ended December 2018 of 267.261 would have been the “Old Index Value” in Column A. This would have resulted in a 3.0% increase to the service and/or other operations cost components in Column C.
