Appendix 4: Browser Requirements

Interact Intranet version 7 is a responsive web application that is accessed through a modern web browser. Interact has been designed to work across as many web browsers as possible and does not require the installation of any software on to the client device or browser.

Supported Browsers (Desktop)

At the date of this Agreement Interact Intranet version 7 supports the following browsers running in Windows with a minimum processor of 2Ghz and 2GB RAM:

- Microsoft Internet Explorer (should not be ran in compatibility mode): version 11 onwards
- Microsoft Edge.
- Google Chrome
- Safari (Max OS X)
- Firefox

Interact Intranet version 7 supports the following browsers running on Mac OS X with a minimum processor of 2Ghz and 2GB RAM:

- Safari (Max OS X)
- Google Chrome

A minimum screen resolution required all Interact features is 1024 x 768. Screens with a lower resolution will not always display correctly and inbuilt browser features such as 'zoom' that give the user to ability to increase/decrease the size of the content of the browser may also be adversely affected.

Supported Browsers (Mobile Device)

Interact Intranet version 7 is a fully responsive web application that adapts (resize, hide, shrink, enlarge and move content) the interface to work on any device. Supported browsers on a tablet and phone include:

Android (4+): Chrome, Firefox

iOS: Safari, Google Chrome.

Other

- Beta versions of web browsers are not supported
- Google Chrome and Firefox release automatic browser updates. Interact officially supports the latest version at the time of the Interact release, however, Interact makes every effort to support previous versions.
- When using Content Editor features such as cut and paste, script access to the Clipboard should not be disabled.
- JavaScript must be enabled to use Interact Intranet version 7.
- For resolutions below 1024x768 you may see the mobile or tablet versions of the site

Thin Client Technology

Interact Intranet version 7 has been widely deployed on thin client technologies such as Citrix XenApp. It is necessary to ensure that the required browser resources are provisioned and available to each thin client. Interact Intranet version 7 is dependent upon a significant amount of client side rendering through the use of JavaScript. It should be noted that some older generations of thin client infrastructure can result in significantly reduced performance. Offloading browser rendering to the thin-client (if available) will help to improve the general performance. In addition to this, updating to newer generation of thin client server can avoid poor compression (between the server and thin client) and vastly improve the end user experience.

A.1 Types and Limits

The Supplier agrees to provide insurance set forth in accordance with the requirements herein. If the Supplier uses existing coverage to comply with these requirements and that coverage does not meet the specified requirements, the Supplier agrees to amend, supplement or endorse the existing coverage to do so. Without in anyway affecting the indemnity herein provided and in addition thereto, the Supplier shall secure and maintain throughout the contract term the following types of insurance with limits as shown:

- A.1.2** Commercial/General Liability Insurance – The Supplier shall carry General Liability Insurance covering all operations performed by or on behalf of the Supplier providing coverage for bodily injury and property damage with a combined single limit of not less than one million dollars (\$1,000,000), per occurrence. The policy shall have a combined single limit of not less than one million dollars (\$1,000,000) for bodily injury and property damage, per occurrence. If the Supplier is transporting one or more non-employee passengers in performance of contract services, the automobile liability policy shall have a combined single limit of one million dollars (\$1,000,000) for bodily injury and property damage per occurrence. If the Supplier owns no autos, a non-owned auto endorsement to the General Liability policy described above is acceptable.
- A.1.4** Cyber Liability Insurance - Cyber Liability Insurance with limits of no less than \$1,000,000 for each occurrence or event with an annual aggregate of \$2,000,000 covering privacy violations, information theft, damage to or destruction of electronic information, intentional and/or unintentional release of private information, alteration of electronic information, extortion and network security. The policy shall protect the involved Customer entities and cover breach response cost as well as regulatory fines and penalties.

All policies, except for Worker’s Compensation, Errors and Omissions and Professional Liability policies shall contain additional endorsements naming the Customer and its officers, employees, agents and volunteers as additional named insured with respect to liabilities arising out of the performance of services hereunder. The additional insured endorsements shall not limit the scope of coverage for the Customer to vicarious liability but shall allow coverage for the Customer to the full extent provided by the policy. Such additional insured coverage shall be at least as broad as Additional Insured (Form B) endorsement form ISO, CG 2010.11 85.

A.3 Waiver of Subrogation Rights

The Supplier shall require the carriers of required coverages to waive all rights of subrogation against the Customer, its officers, employees, agents, volunteers, contractors and subcontractors. A.4 Policies Primary and Non-Contributory

All policies required herein are to be primary and non-contributory with any insurance or self-insurance programs carried or administered by the Customer.

A.5 Severability of Interests

The Supplier agrees to ensure that coverage provided to meet these requirements is applicable separately to each insured and there will be no cross liability exclusions that preclude coverage for suits between the Supplier and the Customer or between the Customer and any other insured or additional insured under the policy.

A.6 Proof of Coverage

The Supplier shall furnish Certificates of Insurance to the Customer Department administering the Contract evidencing the insurance coverage at the time the Contract is executed, additional endorsements, as required shall be provided prior to the commencement of performance of services hereunder, which certificates shall provide that such insurance shall not be terminated or expire without thirty (30) days written notice to the Department, and Supplier shall maintain such insurance from the time Supplier commences performance of services hereunder until the completion of such services. Within fifteen (15) days of the commencement of this contract, the Supplier shall furnish a copy of the Declaration page for all applicable policies and will provide complete certified copies of the policies and endorsements immediately upon request.

Any and all deductibles or self-insured retentions in excess of \$10,000 shall be declared to and approved by Customer’s Risk Management Department.

**A.9 Failure to Procure Coverage**

In the event that any policy of insurance required under this contract does not comply with the requirements, is not procured, or is cancelled and not replaced, the Customer has the right but not the obligation or duty to cancel the contract or obtain insurance if it deems necessary and any reasonable premiums paid by the Customer will be promptly reimbursed by the Supplier or Customer payments to the Supplier will be reduced to pay for Customer purchased insurance.

A.10 Insurance Review

Insurance requirements are subject to periodic review by the Customer. Customer's Director of Risk Management or designee is authorized, but not required, to reduce, waive or suspend any insurance requirements whenever Risk Management determines that any of the required insurance is not available, is unreasonably priced, or is not needed to protect the interests of the Customer. In addition, if the Department of Risk Management determines that heretofore unreasonably priced or unavailable types of insurance coverage or coverage limits become reasonably priced or available, the Director of Risk Management or designee is authorized, but not required, to change the above insurance requirements to require additional types of insurance coverage or higher coverage limits, provided that any such change is reasonable in light of past claims against the Customer, inflation, or any other item reasonably related to the Customer's risk. Any change requiring additional types of insurance coverage or higher coverage limits must be made by amendment to this contract. Any failure, actual or alleged, on the part of the Customer to monitor or enforce compliance with any of the insurance and indemnification requirements will not be deemed as a waiver of any rights on the part of the Customer.

Supplier assumes responsibility for the security and confidentiality, integrity, and availability of Customer Data under its control. No Customer Data shall be copied, modified, destroyed or deleted by Service Provider other than for normal operation or maintenance of SaaS during the Contract period without prior written notice to and written approval by Customer. When data is destroyed or disposed, it shall be in accordance with the National Institute of Standards of Technology (NIST) Special Publication 800-88 published by the U.S. Department of Commerce. The incorporation of the Department of Defense (DoD) standard 5220.2-M wipe method shall be used when using data destruction programs, file shredders, etc. In either case, a written confirmation of this process is required to Customer within three (3) days of the

destroyed/disposed data. Remote access to Customer Data from outside the Continental United States, including remote access to County Data by authorized SaaS support staff in identified support centers, is prohibited unless approved in advance by Customer.

G. Encryption

In order to provide reasonable security to Customer Data, cloud service data centers should encrypt all Customer Data while in route to and from the Service Provider (in motion) using secure transfer methods (e.g., Secure Sockets Layer, Transport Layer Security), and while stored in the datacenter (at rest)

1. Data In Motion

All transmitted County Data require encryption in accordance with:

- a. NIST Special Publication 800-52 Guidelines for the Selection and Use of Transport Layer Security Implementations; and
- b. NIST Special Publication 800-57 Recommendation for Key Management - Part 3: Application-Specific
- c. Key Management Guidance; and
- d. Secure Sockets Layer (SSL) is minimally required with minimum cipher strength of 128-bit.

2. Data At Rest

All Customer Data at rest require encryption in accordance with:

- a. Federal Information Processing Standard Publication (FIPS) 140-2; and
- b. National Institute of Standards and Technology (NIST) Special Publication 800-57 Recommendation for Key Management - Part 1: General (Revision 3); and
- c. NIST Special Publication 800-57 Recommendation for Key Management - Part 2: Best Practices for Key Management Organization; and
- d. NIST Special Publication 800-111 Guide to Storage Encryption Technologies for End User Devices.
- e. Advanced Encryption Standard (AES) with cipher strength of 256-bit is minimally required.
