

### County Administrative Office

# **San Bernardino County Drone Program**

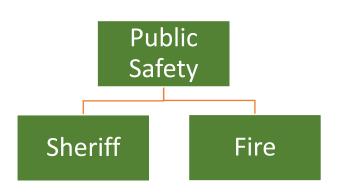

Leonard X. Hernandez Chief Executive Officer September 14, 2021

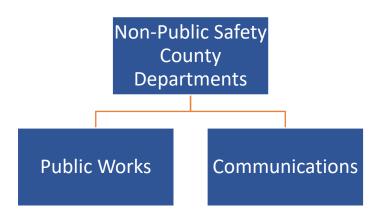

## **County Drone Program Overview**

- With the continued innovation and evolution of drone technology, there is a need to establish a countywide approach to department usage of drones
- In an effort to streamline drone usage to minimize risk and maximize benefits, a County Drone Operations Group will be established consisting of qualified pilots to operate drones
- Current usage of drones in the County include:
  - Mapping
  - Photo/video documentation
  - Search and rescue
  - Scouting/Ground Unit Coordination

The County has two different groups operating drones — public safety and non-public safety departments. The focus of the County Drone Operations Group will be on the non-public safety departments of Public Works and Communications to centralize drone operations and provide services to County departments.

## **County Drone Task Force**

The County Administrative Office has convened a drone task force that is comprised of the following departments:

- County Fire
- Sheriff
- Public Works
- Airports
- Communications
- Innovation and Technology

The objectives of the drone task force are to discuss current drone operations, develop, review, and implement policies/procedures for the use of drones in County operations and evaluate emerging drone technology and equipment

#### Current Drone Uses

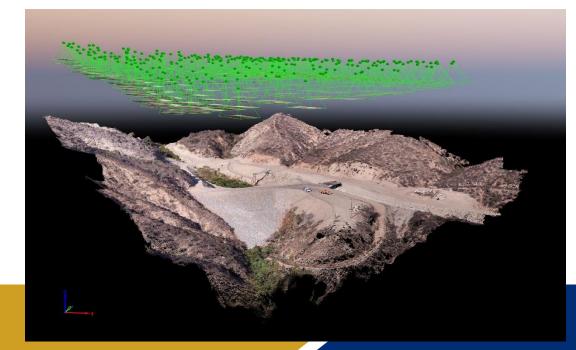

- Aerial mapping for Public Works projects for topographic mapping and volume calculations
- Aerial photos or videos for as-built documentation of Public Works projects
- Aerial photo or video documentation as needed for fire or flood incident management

### Future Drone Use

• Improve accuracy of our topographic mapping through improvements in equipment and processing

techniques

## **County Fire**

#### Current Drone Use

- After action review of structure fires and training
- Search and rescue to locate victims
- Hazardous materials identification and risk assessment

## Future Drone Use

- Firing operations during wildland incidents
- Automated launch from strategic locations throughout the county for rapid incident assessment
- Identification of hot spots on wildland incidents

#### Current Drone Use

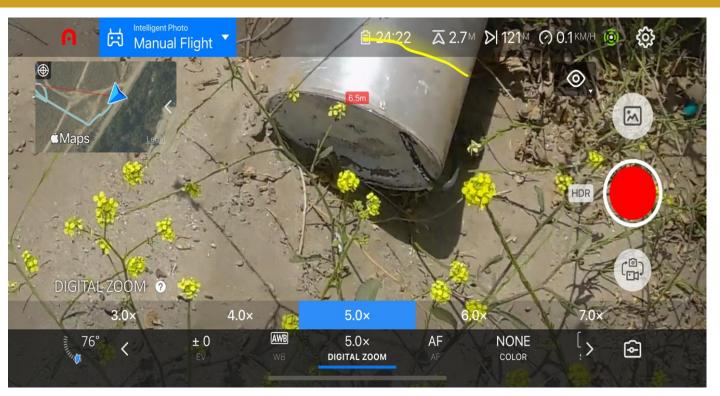

- Scouting/Ground Unit Coordination
- Building Clearance

## Future Drone Use

- Search and Rescue
- Crime Scene Mapping/Photography
- General Patrol Assistance

#### Future Drone Use

- Produce videos that are as dynamic and engaging as possible for our viewers
- Requests from Departments for drone services such as surveying construction projects, documenting rooftop repairs, and capturing live events

# Partnership With UAS Center – San Bernardino International Airport

The County will look to establish an agreement with the UAS Center at the San Bernardino International Airport to provide the following services:

- Analysis and development of Standard Operating Procedures and policies for the County
- Training for employees to become licensed as a FAA Part 107 drone pilot

# **Drone Technology - Next Steps**

- Provide guidance and feedback on the proposed County Drone program
- Establish a Countywide Drone Program
  - Develop an agreement with UAS Center for policy development and training services
  - Create a County Drone Operations Group program with participating departments and send out communication to all County staff about these available resources
  - Review current equipment owned by County Drone Operations Group departments and determine if upgrades would be beneficial to their operations
- Direct the Drone Task Force to research and evaluate how drone technology can provide efficiencies to County Departments

# Questions?
