1. Cultural and Linguistic Competency

Cultural competence is defined as a set of congruent practice skills, knowledge, behaviors, attitudes, and policies that come together in a system, agency, or among consumer providers and professionals that enables that system, agency,

Providing mental health and substance use disorder treatment services in a culturally appropriate and responsive manner is fundamental in any effort to ensure success of high quality and cost-effective behavioral health services. Offering those services in a manner that fails to achieve its intended result due to cultural and linguistic barriers does not reflect high quality of care and is not cost-effective.
- g. To assist Contractor's efforts towards cultural and linguistic competency, DBH shall provide the following:

- i. Technical assistance to Contractor regarding cultural competency implementation.
 - a) Monitoring activities administered by DBH may require Contractor to demonstrate documented capacity to offer services in threshold languages or contracted interpretation and translation services.

**GENERAL MENTAL HEALTH SERVICES
SERVICE DESCRIPTION**

**Valley Star Behavioral Health, Inc.
1501 Hughes Way, Suite 150
Long Beach, CA 90810**

I. DEFINITION OF RECOVERY, WELLNESS, AND RESILIENCE AND REHABILITATIVE MENTAL HEALTH SERVICES

- A. Mental Health Recovery, Wellness, and Resilience (RWR) is an approach to helping the individual to live a healthy, satisfying, and hopeful life according to his or her own values and cultural framework despite limitations and/or continuing effects caused by his or her mental illness. RWR focuses on client strengths, skills and possibilities, rather than on illness, deficits, and limitations, in order to encourage hope (in staff and clients) and progress toward the life the client desires. RWR involves collaboration with clients and their families, support systems and involved others to help take control of major life decisions and client care. RWR encourages involvement or re-involvement of clients in family, social, and community roles that are consistent with their values, culture, and preferred language; it facilitates hope and empowerment with the goal of counteracting internal and external “stigma”; it improves self-esteem; it encourages client self-management of his/her life and the making of his/her own choices and decisions, it re-integrates the client back into his/her community as a contributing member; and it achieves a satisfying and fulfilling life for the individual. It is believed that all clients can recover, even if that recovery is not complete. This may at times involve risks as clients move to new levels of functioning. The individual is ultimately responsible for his or her own recovery choices.

For children, the goal of the RWR philosophy of care is to help children (hereinafter used to refer to both children and adolescents) to recover from mistreatment and trauma, to learn more adaptive methods of coping with environmental demands and with their own emotions, and to joyfully discover their potential and their place in the world. RWR focuses on a child’s strengths, skills, and possibilities rather than on illness, deficits and limitations. RWR encourages children to take increasing responsibility for their choices and their behavior, since these choices can lead either in the direction of recovery and growth or in the direction of stagnation and unhappiness. RWR encourages children to assume and to regain family, social, and community roles in which they can learn and grow toward maturity and that are consistent with their values and culture. RWR promotes acceptance by parents and other caregivers and by the community of all children, regardless of developmental level, illness, or disability, and it addresses issues of stigma and prejudice that are related to this. This may involve interacting with the community group’s or cultural group’s way of viewing mental and emotional problems and differences.

ADDENDUM II

“Rehabilitation” is a strength-based approach to skills development that focuses on maximizing an individual’s functioning. Services will support the individual in accomplishing his/her desired results. Families, caregivers, human service agency personnel and other significant support persons should be encouraged to participate in the planning and implementation process in responding to the individual’s needs and desires, and in facilitating the individual’s choices and responsibilities.

- B. Here, the Contractor will join the existing child and family mental health services continuum of care providing Children’s Intensive Rehabilitative Outpatient services to referred children, adolescents and Transitional-Age-Youth (TAY) who are seriously emotionally disturbed. Effective service implementation will involve collaboration with DBH liaisons, contract monitor, and child placing partners. Accordingly, program staffing should be multi-disciplinary and reflect the cultural, linguistic, ethnic, age, gender, sexual orientation and other social characteristics of the community in which the child resides. Families, caregivers, human service agency personnel and other significant support persons should be encouraged to participate in the planning and implementation process in responding to the individual’s needs and desires, and in facilitating the individual’s choices and responsibilities. Programs may be designed to use both licensed and non-licensed personnel who are experienced in providing mental health services.
- C. All outpatient contract agencies are required to provide services under Title 9, Chapter 11, Section 1810.249, which superseded the rehabilitation option and targeted case management guidelines of July 1, 1993, and more recent guidelines as may be incorporated or referenced herein by attachment. Minimum guidelines are detailed in Section III, “DESCRIPTION OF SPECIFIC SERVICES TO BE PROVIDED” of this Addendum.
- D. Definitions (Program Specific)
 - 1. Americans with Disabilities Act (ADA) - this Act applies to all private and state-run businesses, employment agencies and unions with more than fifteen employees, the goal of the ADA is to make sure that no qualified persons with any kind of disability is turned down for a job or promotion, or refused entry to a public-access area.
 - 2. Collaboration - to work jointly with others or together, especially with regard to intellectual endeavors.
 - 3. Community-Based - the concept of consumers and families receiving formal services, whenever possible, in the community where they live. This will enable them to live, learn, and grow safely, competently, and productively in their families, neighborhoods, and natural environment.
 - 4. Co-Occurring Disorder (COD) - the simultaneous existence of substance use and mental health disorders. Consumers with a diagnosis of COD have one or more disorders relating to the use of alcohol and/or other drugs as well as one or more mental health disorders. From a treatment perspective,

ADDENDUM II

both disorders are primary. Although the disorders may impact each other, neither is merely a symptom of the other.

5. Cultural Competency - the acceptance and understanding of cultural mores and their possible influence on the participant's issues and/or behavior (i.e., using the understanding of the differences between the prevailing social culture and that of the participant's family to aid in developing individualized supports and services). This includes the ability to work competently and in an affirming manner with the LGBTQ population.
6. Department of Health Care Services (DHCS) - the California Department of Health Care Services provides oversight of statewide public mental health services through the Mental Health Services Division. Its responsibilities include: providing leadership for local county mental health departments; evaluation and monitoring of public mental health programs; administration of federal funds for mental health programs and services; care and treatment of people with mental illness; and oversight of Mental Health Services Act service implementation.
7. Early and Periodic Screening, Diagnosis, and Treatment Program (EPSDT Medi-Cal) - a federally-mandated Medicaid option that requires states to provide screening, diagnostic and treatment services to persons under age 21 who have unrestricted Medi-Cal and also meet necessary medical criteria by having a qualifying mental health diagnosis and functional impairment that is not responsive to treatment by a healthcare-based provider. In addition, services are generally acceptable for the purpose of correcting or ameliorating the mental disorder. For the purposes of this proposal, EPSDT Medi-Cal Rehabilitative Mental Health Services activities may include Assessment, Case Management/Targeted Case Management, Collateral, Crisis Intervention, Evaluation/Plan Development, Medication Support Services, Rehabilitation, and Therapy.
8. Health Insurance Portability and Accountability Act (HIPAA) - also known as the "Kennedy-Kassebaum Act", this U.S. law protects employees' health insurance coverage when they change or lose their jobs (Title I) and provides standards for patient health, administrative and financial data interchange (Title II), and governs the privacy and security of health information records and transactions.
9. Lesbian, Gay, Bisexual, Transgender and Questioning (LGBTQ) - U.S. Department of Health and Human Services and Substance Abuse and Mental Health Services Administration (SAMHSA) defines as an acronym referring collectively to lesbian, gay, bisexual, transgender and questioning people. For LGBTQ people, social stigma and systemic discrimination based on sexual orientation and gender identity have led to decades of lack of access to adequate, LGBTQ affirmative and culturally

competent support services. In order for the LGBTQ community to gain equitable access to the full continuum of health promotion, prevention and treatment services, DBH recognizes the necessity to be able to effectively address the needs of distinct populations within the population.

10. The encryption solution must be full disk unless approved in writing by DBH's Office of Information Technology.
2. Server Security. Servers containing unencrypted DBH PHI or PI must have sufficient administrative, physical, and technical controls in place to protect that data, based upon a risk assessment/system security review.
3. Minimum Necessary. Only the minimum necessary amount of DBH PHI or PI required to perform necessary business functions may be copied, downloaded, or exported.
4. Removable Media Devices. All electronic files that contain DBH PHI or PI data must be encrypted when stored on any removable media or portable device (i.e. USB thumb drives, floppies, CD/DVD, Blackberry, backup tapes, etc.). Encryption must be a FIPS 140-2 certified algorithm which is 128bit or higher, such as AES.
5. Antivirus / Malware Software. All workstations, laptops and other systems that process and/or store DBH PHI or PI must install and actively use comprehensive anti-virus software / Antimalware software solution with automatic updates scheduled at least daily.

6. Patch Management. All workstations, laptops and other systems that process and/or store DBH PHI or PI must have all critical security patches applied with system reboot if necessary. There must be a documented patch management process which determines installation timeframe based on risk assessment and vendor recommendations. At a maximum, all applicable patches must be installed within thirty (30) days of vendor release. Applications and systems that cannot be patched within this time frame due to significant operational reasons must have compensatory controls implemented to minimize risk until the patches can be installed. Application and systems that cannot be patched must have compensatory controls implemented to minimize risk, where possible.
7. User IDs and Password Controls. All users must be issued a unique user name for accessing DBH PHI or PI. Username must be promptly disabled, deleted, or the password changed upon the transfer or termination of an employee with knowledge of the password. Passwords are not to be shared. Passwords must be at least eight characters and must be a non-dictionary word. Passwords must not be stored in readable format on the computer. Passwords must be changed at least every ninety (90) days, preferably every sixty (60) days. Passwords must be changed if revealed or compromised. Passwords must be composed of characters from at least three of the following four groups from the standard keyboard:
 - a. Upper case letters (A-Z)
 - b. Lower case letters (a-z)
 - c. Arabic numerals (0-9)
 - d. Non-alphanumeric characters (special characters)
8. Data Destruction. When no longer needed, all DBH PHI or PI must be wiped using the Gutmann or U.S. Department of Defense (DoD) 5220.22-M (7 Pass) standard, or by degaussing. Media may also be physically destroyed in accordance with NIST Special Publication 800-88. Other methods require prior written permission of DBH's Office of Information Technology.
9. System Timeout. The system providing access to DBH PHI or PI must provide an automatic timeout, requiring re-authentication of the user session after no more than twenty (20) minutes of inactivity.
10. Warning Banners. All systems providing access to DBH PHI or PI must display a warning banner stating that data is confidential, systems are logged, and system use is for business purposes only by authorized users. User must be directed to log off the system if they do not agree with these requirements.
11. System Logging. The system must maintain an automated audit trail which can identify the user or system process which initiates a request for DBH PHI or PI, or which alters DBH PHI or PI. The audit trail must be date and time stamped, must log both successful and failed accesses, must be read only, and must be restricted to authorized users. If DBH PHI or PI is stored in a database, database logging functionality must be enabled. Audit trail data must be archived for at least ten (10) years from the final date of the contract period or from the date of completion of any audit, whichever is later.
12. Access Controls. The system providing access to DBH PHI or PI must use role based access controls for all user authentications, enforcing the principle of least privilege.
13. Transmission Encryption. All data transmissions of DBH PHI or PI outside the secure internal network must be encrypted using a FIPS 140-2 certified algorithm which is 128bit or higher, such as AES. Encryption can be end to end at the network level, or the data files containing DBH PHI can be encrypted. This requirement pertains to any type of DBH PHI or PI in motion such as website access, file transfer, and E-Mail.
14. Intrusion Detection. All systems involved in accessing, holding, transporting, and protecting DBH PHI or PI that are accessible via the Internet must be protected by a comprehensive intrusion detection and prevention solution.

C. Audit Controls

1. System Security Review. Contractor must ensure audit control mechanisms that record and examine system activity are in place. All systems processing and/or storing DBH PHI or PI must have at least an annual system risk assessment/security review which provides assurance that administrative, physical, and technical controls are functioning effectively and providing adequate levels of protection. Reviews should include vulnerability scanning tools.
2. Log Review. All systems processing and/or storing DBH PHI or PI must have a routine procedure in place to review system logs for unauthorized access.
3. Change Control. All systems processing and/or storing DBH PHI or PI must have a documented change control procedure that ensures separation of duties and protects the confidentiality, integrity and availability of data.

D. Business Continuity/Disaster Recovery Controls

1. Emergency Mode Operation Plan. Contractor must establish a documented plan to enable continuation of critical business processes and protection of the security of DBH PHI or PI held in an electronic format in the event of an emergency. Emergency means any circumstance or situation that causes normal computer operations to become unavailable for use in performing the work required under this Agreement for more than 24 hours.
2. Data Backup Plan. Contractor must have established documented procedures to backup DBH PHI to maintain retrievable exact copies of DBH PHI or PI. The plan must include a regular schedule for making backups, storing backups offsite, an inventory of backup media, and an estimate of the amount of time needed to restore DBH PHI or PI should it be lost. At a minimum, the schedule must be a weekly full backup and monthly offsite storage of DBH data.

E. Paper Document Controls

1. Supervision of Data. DBH PHI or PI in paper form shall not be left unattended at any time, unless it is locked in a file cabinet, file room, desk or office. Unattended means that information is not being observed by an employee authorized to access the information. DBH PHI or PI in paper form shall not be left unattended at any time in vehicles or planes and shall not be checked in baggage on commercial airplanes.
2. Escorting Visitors. Visitors to areas where DBH PHI or PI is contained shall be escorted and DBH PHI or PI shall be kept out of sight while visitors are in the area.
3. Confidential Destruction. DBH PHI or PI must be disposed of through confidential means, such as cross cut shredding and pulverizing.
4. Removal of Data. Only the minimum necessary DBH PHI or PI may be removed from the premises of Contractor except with express written permission of DBH. DBH PHI or PI shall not be considered "removed from the premises" if it is only being transported from one of Contractor's locations to another of Contractor's locations.
5. Faxing. Faxes containing DBH PHI or PI shall not be left unattended and fax machines shall be in secure areas. Faxes shall contain a confidentiality statement notifying persons receiving faxes in error to destroy them. Fax numbers shall be verified with the intended recipient before sending the fax.
6. Mailing. Mailings containing DBH PHI or PI shall be sealed and secured from damage or inappropriate viewing of such PHI or PI to the extent possible.

Mailings which include 500 or more individually identifiable records of DBH PHI or PI in a single package shall be sent using a tracked mailing method which includes verification of delivery and receipt, unless the prior written permission of DBH to use another method is obtained.
